American Railroad Journal.

Saturday, April 25, 1863.

Stock Exchange and Money Market.

The news of the last few days has given an entirely different complexion to our public affairs. At no time during the war, has the prospect of an early conclusion of our difficulties been so bright as it is to-day. The news from all quarters of the Country is favorable, and the money market and stock exchange cannot but respond. Rushkin, a celebrated English critic made a remark on the conduct of his countrymen during the Crimean war, which is quite applicable to ourselves. Whenever a barrel of gunpowder accidentally blew up in the British Camp, the opposition would rail against the Government, and pronounce the war hopeless and unjustifiable. Whenever another barrel exploded in the Russian lines, the tone of public feeling changed, the war became popular, and loyalty was rampant. It has been very much so in this country, for we, too, have a large class who are swayed by the feelings of the moment, and allow their judgment to be influenced by them. It is to be hoped these may gather courage from the returning tide of success, and will henceforth stick to one determination, "the Union must and shall be preserved."

Generals Grant, Banks and Rosecrans are doing finely in their Departments, Admirals Farragut and Porter are again successful in their operations, the enemy has been defeated on the Nansemond, Washington is relieved of its besiegers, and private intelligence assures us that Fort Sumter was badly damaged in the late fight with the Monitor, and

it had been assailed a few hours longer, would have been destroyed!

The news from Mexico announces the defeat of the French Army at Puebla, which is a guarantee that France will seek no further to meddle with our affairs. This Mexican Expedition resembles very much that of the English against Buenos Ayres in 1807, where their Commander Gen. Whitelocke was but too happy to get out the Plate river with a whole skin.

Above all, the British Ministry have at last, in good faith we hope, interfered to prevent any further attempts at fitting out Confederate privateers in their ports to prey upon our commerce, and have actually seized one of this kind of craft in the chrysalis state.

It is impossible but that all these cheering facts must bear favorably on our financial condition and prospects. If coming events cast their shadows before, we may safely anticipate a good time coming.

The Treasury department is receiving in one shape or other, three millons of dollars per day. The taxes are paid cheerfully everywhere, and in he face of an increasing paper currency, gold has fallen and exchange declined. Everywhere, too, the Government currency is received with favor and preferred to all other kinds. In the South West, local bank notes are taken with much less satisfaction, and the whole monetary wheel revolves with ease and regularity. Government stocks are recovering their tone abroad, and large orders are now in this country to meet the demand from thence, where the rates are advancing, and where with the news carried out by the steamer of Wednesday, they are sure to advance still higher. Agents from the United States Navy and Treasury Department are abroad to watch the markets and the ship yards, and in their hands our interests will receive due care and protection. Further offers of loans from Europe are announced in the street, and it is evident there will be no lack of means to carry on the operations of the Government. The sale of the 5 20's would be still more largely increased, if the bonds were ready for delivery, the takers being compelled to wait for them ten and fifteen days.

The condition of the public debt of the United States on the 30th of March, is much more favorable than some persons would like to believe. It has been all along most grossly exaggerated.

In another column, we give the amount and character of the public debt to the 1st inst. This amount is but little more than the footing of the Confederate Government will be on the 1st of July, and tells well after all for the financial management of the Treasury. For about the same expenditures, we have received more than double in armaments and war materials, than has been obtained by the Confederates, or if the respective values of their currency and ours be any rule to determine the question, we have received six times as much for our money, as they have for theirs.

The Money Market is actually plethoric. Occasional transactions are heard of at 3 per cent, and 4 is the usual rate, with leading borrowers. The deposits in the Sub-Treasury last week were nine millions at 5 per cent, and the limit of one hundred millions is nearly reached. The prices of railway and bank shares appear to be entirely unaffected by that of gold, as well as those of most other staples, and manufactured goods. Gold appears to be completely demonetized, and is obliged to stand on its own merits. The rod of the Enchanter is for the present powerless. Our weekly tables will give our readers correct reports of the rates ruling in the markets.

The people of this City were utterly astounded on learning on Wednesday morning, that the Common Council of this city the preceding evening, had on the request of the Harlem Railroad Company, given it permission to extend its rails down Broadway to the Battery. This movement skillfully managed, has been effected in a legal manner, and defeats beyond all question the parties at Albany, who were about to obtain a grant of a most valuable franchise without paying anything to the public for it. Com. Vanderbilt has again been more than a match for Commodore Law. The Harlem Co. is to pay 10 per cent of the gross receipts of the extension below Union square into the City Treasury, for the relief of the citizens from taxation. On Thursday, after due consultation with eminent counsel, the Mayor signed the resolutions in favor of the grant.

We have on several occasions placed before our readers encouraging views of the future of this Company, and they might have done well if they had taken the hint. We can assure the public that the line thus to be extended through Broadway will be well managed, the well known character of the President being a guarantee that everything will be placed on the most complete and satisfactory footing. If we must have a railway in Broadway, let honest and upright men have the management of it.

Large movements are on foot to extend the connections of the Erie; arrangements have been made to construct broad gauge lines between the Atlantic and Great Western, and Cleveland and Chicago. It is impossible to calculate the business these will divert from the upper or Lake shore lines, to the Erie. The Central must look to its laurels, as it has now a competition of no ordinary power.

We are happy to announce that there is every prospect of a speedy organization of the Union Pacific. We learn by a late Telegraphic despatch from San Francisco that bills have finally passed the Legislature, submitting it to a vote of the people of the counties along the route of the Pacific Railroad to decide whether the country shall subscribe toward building the road proportionated to the taxable property, namely :

San Francisco County, $1,000,000; Santa Clara, $100,000; San Joaquin, $250,000; Sacramento, $300,000; Placer, $250,000; Nevada County, $150,000. The people of all the counties will probably vote Yea.

On this side of the continent there is equal alacrity in preparing for the work. An arrangement is on foot which will beyond all question terminate very soon in the organization of a company, under the act of Congress, with means, talent and influence, which will construct the track from the 100th meridian to the Colorado Country within a very brief period, securing for even this distance business of a very remunerative character.

By the Persia, Messrs. Baring Brothers & Co. quote bar silver at 5s. 1½.; dollars, 5s. 2¼d.; eagles, 76s. 2 ¾d. They say of American stocks. "Very little doing, and quotations generally are unaltered." In relation to American stocks, E. F. Satterthwaite remarks:

The dealings on the London market in American securities have been of a restricted character since our last. The further decline in exchange, reported from New York, caused quotations to advance, but there being a disposition to press sales, the market became weaker, and closes not strong, at a slight reduction from top rates. The advance established during the week has been $3 per share on Erie and $2 on Illinois. Consols close at 92⅝@92¾ for money, and 92¾@92⅞ account 7th May.

We give elsewhere the regulations for the assessment of the Income tax as established by the Commissioner of Internal Revenue. This tax is one of the most unpopular of any in the whole list. Every other is paid with cheerfulness, but this; and from the large returns of revenue from other sources, it is quite likely this will be abolished at an early day.

The New York and New Haven Railroad Company have declared a semi-annual dividend of three dollars per share, free from government tax, payable on the 1st of May.

The Pennsylvania Railroad Company have declared a semi-annual dividend of 4 per cent. on the capital stock, clear of State and national taxes, payable on and after May 15th.

A sale of $48,000 Poughkeepsie City six per cent bonds was made at auction in that city on the 15th. The bonds were issued for bounty purposes and are payable, $2,000 each year up to 1887. The price obtained was ⅜ per cent prem. for the shortest up to 10⅜ prem. for the longest.

We understand that arrangements have been made to lay a third rail upon the track of the Pittsburgh, Fort Wayne and Chicaga Railway, from the Junction of the Atlantic and Great Western Railway to Chicago, to make the gauge correspond with that of the Atlantic and Great Western and Erie roads—thus forming an unbroken line of the six-foot gauge from New York to Chicago. This will give the Fort Wayne road a through route from Chicago to New York by the Erie, as well as by the Pennsylvania road, and add largely to its already heavy business.

The bill amending the Banking law of New York, so as not to conflict with the National Bank act has been signed by the Governor.

The City of Saginaw has voted, by 115 yeas to 1 nay, to issue her bonds to the Amboy, Lansing and Traverse Bay Railroad.

The Atlantic and Great Western Railway Co., advertise (but not in the Journal) for 400,000 ties to be delivered on the line between Akron and Dayton. The offices of the company are at Meadville, Pa., and Jamestown N. Y.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns :—

New York.—Illinois coupon bonds, 1879, 108½ @109½; Illinois Canal bonds, 1862, 101½; Ohio 6s, 1875, 108; Illinois Central canceled bonds scrip, 70; do., full stock, 89; N. Y. City 6s, ex. int., 118½; Citizens Gas Co., Brooklyn, 130; Brooklyn City Water Loan, 116½; Canton Co., 24½; Minnesota Mining Co., 107¼; Cumberland Coal pref., 20; Quicksilver, 41; Central American Transit Co., 32.

The Atlantic Telegraph.

This great project has again received a warm support and large pecuniary assistance from our countrymen. The exertions of Mr. Cooper and Mr. Field, the great friends of the enterprise, have been crowned with success. Their appeals in person to the Chamber of Commerce and the Produce Exchange of this city were timely and promptly responded to. It is said subscriptions to the amount of $250,000 have been obtained by their personal exertions. In order that our readers may understand the present condition and prospects of the Atlantic Telegraph, it may be well to state the results of the sixth and last meeting of the British stockholders of the Company. It appears, after five years experience and examination of the subject, they retain their confidence in the final success of the project. They have also advanced out of their own pockets such sums as were necessary to keep intact, their valuable concessions and privileges. The capital required for laying the new cable is of the maximum nominal amount of three millions of dollars, divided into shares of twenty-five dollars each. On this the British Government has guaranteed 8 per cent. interest upon the completion and working of the line, and the stock therefor was ordered to be issued at an extraordinary general meeting on the 12th of December last. It is believed this sum of three millions will be in excess of the amount actually required. A Board of Directors has been elected, comprising several American subscribers whose energy and talent will again be as useful as they were before.

Some doubt has been expressed in quarters usually enterprising enough, that the scheme will give the British Government very great advantages over our own. The termini are both on British territory, and in case of war, which within a few years past, has several times been imminent, the control of these would be used effectively against the United States. Many persons of capital but for this reason, would have subscribed liberally. Yet on the whole, it is believed that such a connection as this will effect between the two countries, will go far to prevent any rupture. Without the American business the enterprise will not pay, and the British Government will have to advance the guaranteed interest. Besides, the facilities the Telegraph will give to commerce, must increase that commerce. This has been the effect of all the telegraph lines established in this country. In the instance of the California line, it is conceded it has not only paid for its construction in a single year, and realized a handsome profit besides, but it has had a direct effect on the trade between New York and San Francisco, largely and beneficially affecting it. Its influence has also been felt on the China trade. We know that similar consequences have flowed from the various submarine lines which are now at work in the Mediterranean, and the various channels between England and the neighboring countries. We may therefore, safely conclude that the Atlantic Telegraph will bind more closely together both British and American interests, increase their activity, and stimulate their intercourse. These will then be strong links in the chain of National amity, heavy bonds to keep the two nations at peace.

It is certainly the true interest of England to remain on friendly terms with the United States. No petty jealousy should be allowed to rise in her breast against the country which speaks her language, quotes her authors, and re-enacts her laws. The child has given back to the parent full returns for the gift of life. Even in the case of the Telegraph, it should not be forgotten by her, that the successful application of electricity originated here, and the thoughts of the world are interchanged through the genius of an American discoverer. It is to Morse that England is indebted for her advantages in telegraphic communication, and it would be still better for her if she abandoned the confused system of her own electricians for the simpler and more elegant processes of the Americans. Let the cable therefore be laid as speedily as possible. Let *us* do right and fear nothing. We have no doubt the attempt this time will be a successful one. Experience has taught us what mistakes may be avoided, and what improvements may be made. Lines of more than half its proposed length are now in successful operation in the East, and appear to be permanent. The length of lines over land is no objection to them, though they are subject to storms and many much worse dangers. We can not see why the sea may not be found even a safer repository, if the cable be well prepared, has the proper strength of material, scientific arrangement and careful protection. The progress of science has been so rapid and astonishing, that nothing of which man can control the material, may not be shaped finally to his purposes and wants. The Telegraph is one of the most wondrous of human agents, one of the most beneficial in his service, one of the most conducive to his security and happiness. Let it then be at work over land or across the ocean, wherever and when ever it is possible. Over its narrow bridge pass as lightning, thoughts in crowds which cannot be numbered, messengers of industry, business, peace and good will.

Stanstead, Shefford and Chambly Railway.

We find in the Waterloo *Gazette* an account of an entertainment recently given at that place by the employees of this company, to the Hon. A. B. Foster. At a public dinner, where two hundred of his friends assembled to do him honor, he was presented with his own portrait, and complimented by a speech from Col. Knowlton, who reviewed the eminent services of their guest in procuring railway facilities for the Eastern townships. Mr. Foster in a neat, compact and modest address, spoke of his connection with the railway alluded to, the advantages it had already conferred on those townships, and stated a fact particularly interesting to Americans, that there will be on the 4th of July next only 18 miles of cartage between Waterloo and Boston. This gap will undoubtedly be filled up, as the speaker observed it was more important for the township to have communication with Boston than Montreal.

Notice to Contractors.

The Hudson River Bridge Co., at Albany, N. Y., will receive proposals for constructing the Railroad Bridge across the Hudson River at that point. The time for receiving bids is limited to the ninth of May. Plans, specifications, etc. will be ready for inspection on the 1st.

To Contractors.

Proposals will be received at the office of the Montreal and Vermont Junction Railway Co., Phillipsburg, C. E., until the 16th of May next, for the construction of about 24 miles of railroad, commencing at a point near St. Johns, and extending to a point in the Province Line, in the township of St. Armand, Canada East, including all the clearing and grubbing, grading, masonry, bridging, superstructure, (including iron rails, chairs, spikes, ties, frogs, switches, and turnouts,) fencing, farm and road crossings, cattle guards, station and woodhouses, water stations, &c., including all the labor and materials required to finish the road in complete order for operation. Plans, specifications, etc., will be ready for inspection on the 4th.

Columbus and Piqua Railroad.

The Urbana *Citizen* states that the railroad now in course of construction from Covington on the Columbus and Piqua Road, to the State line near Richmond, Indiana, will be completed by the first of May next. The rails are now nearly all laid as far as Greenville. As soon as the spring opens a telegraph line will be constructed along this road between Columbus and Indianapolis.

National Banking Associations.

It will be seen by the annexed letter that Secretary Chase has decided that 7.30 Treasury Notes are not receivable as security for circulating notes under the National Bank Bill:

TREASURY DEPARTMENT,
WASHINGTON, April 8, 1863.

Sir: Your letter of the 1st inst. is received. The 3-year 7.30 bonds I do not consider as securities contemplated by the act to authorize a national currency to be deposited for circulation, until they are converted into bonds of 1881, which may be done at any time. Inclosed are blanks for the guidance of parties in preparing preliminary certificates for National Banking Associations.

Very respectfully yours,
S. P. CHASE, Secretary of the Treasury.
To J. THOMPSON, Esq. New York.

The following list, then, embraces the stocks that are receivable as security for National Currency:

$9,415,250 6s of 1867,	interest	payable	Jan. & July.	
8,098,341 6s of 1868,	"	"	"	"
7,022,000 5s of 1881,	"	"	"	"
20,000,000 5s of 1874,	"	"	"	"
68,417,000 6s of 1881,	"	"	"	"
Any amount of 5-20 6s,	"	"	May & Nov.	

Regulations for the Assessment of the Income Tax, May 1, 1863.

The following regulations for the assessment of the Income Tax, have just been issued by the commissioner of Internal Revenue:

The Assessor and Assistant Assessors of each collection district will assess the income tax, as on the first day of May next, upon every person residing within the district liable thereto.

Each person will be required to return his total income, so far specifying the sources from which it is derived as to enable the assistant assessor to decide what deductions shall be made therefrom.

Persons whose income does not exceed the sum of ten thousand dollars, and who reside in the United States, will be subject to a duty of three per cent. on such portion thereof as is liable to taxation: *Provided, however*, That upon income derived from interest upon notes, bonds, or other securities of the United States, a duty of one and a half per cent. will be levied.

Persons whose income exceeds ten thousand dollars will be subject to a duty of five per cent. on the portion thereof subject to taxation: *Provided, however*, That upon income derived from interest upon notes, bonds, or other securities of the United States, a duty of one and a half per cent. will be levied.

Citizens of the United States residing abroad, and not in the employment of the Government of the United States, will be subject to a duty of five per cent. on the income of any property, securities, or stock owned in the United States, and not exempted from the income tax: *Provided, however*, That upon income derived from interest upon notes, bonds, or other securities of the United States, a duty of one and a half per cent, will be levied.

Every farmer or planter will be required to make returns of the value of the produce of his farm or plantation, without deduction for the labor or services of himself and his family, or for any portion of such produce consumed by himself and family.

The following deductions will be made from the aggregate income of each person, and the tax assessed upon the remainder, viz;

State and local taxes assessed in the calendar year preceding the assessment, to wit, from January 1, 1862, to December, 31, 1862, inclusive.

Salaries, of officers, or payments to persons in the service or employment of the United States, from which a deduction of three per cent has been made by the disbursing officers of the Government.

Interest or dividends on stock, capital, or deposits in any bank, trust company, or savings' institution, insurance, bridge, express, steamboat, ferry-boat, railroad company or corporation, from which interest or dividends a duty of three per cent. shall have been deducted by the officers of said companies, corporations, or associations: interest from any bonds, or other evidences of indebtedness, of any railroad company, or other corporation, from which a duty of three per cent. shall have been deducted by the officers of such company or corporation; and receipts derived from advertisements on which a duty shall have been assessed and paid.

Also, the sum of six hundred dollars, except in those cases where the whole or any part of said six hundred dollars shall have been deducted from the salaries or pay of officers or persons in the service or employment of the United States.

The amount actually paid for rent of any dwelling house or estate, which is the residence of the persons assessed.

The amount paid by any farmer or planter for hired labor and necessary repairs upon his farm or plantation, including the subsistence of the laborers.

Whenever the total income of any person exceeds ten thousand dollars, and deductions are made therefrom, upon the ground that a portion of such income has been subject to a three per cent. duty upon dividends or interest paid by companies, corporations or associations, as before enumerated, such person will be subject to a tax of two per cent. additional upon so much of his income as may have been previously subjected to a duty of three per cent. by the officers of the companies, corporations, or associations before named.

Guardians and trustees, whether such trustees are so by virtue of their office, as executors, administrators, or other fiduciary capacity, are required to make return of the income belonging to minors or other persons which may be held in trust, as aforesaid; and the income tax will be assessed upon the amount returned, after deducting such sums as are exempted from the income tax, as aforesaid: *Provided*, That the exemption of six hundred dollars, under section 90 of the excise law, shall not be allowed on account of any minor or other beneficiary of a trust, except upon the statement of the guardian or trustee, made under oath, that the minor, or beneficiary has no other income from which the said amount of six hundred dollars may be exempted and deducted.

Whatever persons liable to assessment of income tax shall neglect or refuse to make the lists required by law, or when the lists made and tendered by such persons shall not be accepted by the Assessor or Assistant Assessor as just and proper, it shall be the duty of such Assessor or Assistant Assessor to make lists for such persons according to the best information he can obtain. Persons so assessed may make oath or affirmation as to the amount of income and deductions therefrom agreeably to section 93.

Persons receiving rent may deduct therefrom the amount paid for necessary repairs, insurance, and interest on incumbrances upon such rented property. The cost of new structures, or improvements to buildings, shall not be deducted from income.

The tax must be levied upon all dividends declared prior to September 1, 1862, and upon six hundred dollars of all salaries of officers, or payments to persons of the civil, military, naval, or other service of the Untied States, for services rendered prior to said date, as such dividends and proportion of salaries were not subject to deduction or assessment.

Interest received from or due by trust companies, savings institutions, insurance, bridge, express, steamboat, ferry-boat, and railroad companies, corporations, or associations, prior to the same date, must also be taxed.

Interest paid by him on incumbrances upon the dwelling-house or estate on which the assessed person resides may be deducted from income; also his payments for necessary repairs.

Farm produce which the producer has on hand on the 31st day of December, 1862, must be appraised at its market value on that day.

The income tax shall be included in the annual list, and appeals and other proceedings held as provided by law.

Form of Affidavit to be taken and subscribed before the Assessor or Assistant Assessor.

State of ——, *County of* ——, *ss:* ————, being sworn (or affirmed) according to law, says that he (or she) (as guardian or trustee of ——) was not possessed of, or entitled in any way to, an income to the amount of six hundred dollars in value, from any or all sources, whatever, during the year 1862, liable to be assessed according to the provisions of the laws of the United States, as he (or she) solemnly and verily believes.

Sworn (or affirmed) and subscribed this —— day of —— A. D., 1863. before me, the subscriber, Assistant Assessor for —— division of said county.

State of ——, *County of* ——, *ss:* ————, being sworn or affirmed according to law, says that he (or she) has been assessed for the year A. D. 1862, for an income duty in the —— county (or city, or town, as the case may be) of ——, in the State of ——, and for the full amount of his (or her) income under authority of the United States, and by reason thereof is entitled to be exempt from any further income duty for said year, as he (or she) verily believes.

Sworn (or affirmed) and subscribed this —— day ——, A. D. 1863, before me, the subscriber, Assistant Assessor for —— division of said county.

State of ——, *County of* ——, *ss:* ————, being sworn (or affimed) according to law, says that the annexed statement contains a full and correct account of his (or her) annual income for the year A. D. 1862, which he (or she) has received, or to which he (or she) is in any manner entitled, (as trustee or guardian, as the case may be, of ————,) and that he (or she) (as trustee or guardian as aforesaid), has not received and is not entitled to receive, from any or all sources of income together, any other for the said year besides what is set forth in said statement.

Sworn (or affirmed) and subscribes this —— day of ——, A. D. 1863, before the Assistant Assessor of —— division of said county.

Middlesex Horse Railroad.

This company, which has been running the Chelsea Branch since its completion, have disposed of its lease in the same to the Lynn and Boston Horse Railroad Company, who will in future run their cars over the road in connection with the route over the Chelsea Ferry. The Middlesex Company retain all the appurtenances of the road such as cars, horses, and the like. By this arrangement some sixty horses and twenty cars will be made available for the other branches of the road, the accomodations of which will no doubt be greatly increased thereby.

Prevention of Accidents on Passenger Railroads.

Messrs. Gilan, Coleman & Wilson, of Philadelphia, have obtained letters patent for an invention to prevent accidents on city passenger railroads, and in a few days will be subject to a practical test. The invention is cheap, simple, and to appearance will accomplish all that is claimed for it by the inventors. During 1862 over thirty persons were killed and maimed by city passenger railroads, and any invention which will prevent such accidents in the future should be immediately adopted. The deaths caused by accidents on these roads since the 1st January, 1863, average about two per month. The apparatus to prevent this loss of life is placed in front of the wheels, and runs so near the track, that if the hand or arm of a passenger should be upon it, there could be no danger of injury; and if a man was upon the track, he would stop the car before the wheels could touch him. It will also be useful in removing snow without salt, or any other obstructions.

The Belvidere Gap in the Route to the Water Gap to be Closed.

In November, 1855, the Belvidere Railroad was opened to Belvidere, and in 1856 the line was opened from Scranton through the Delaware Water Gap to Elizabethport, passing Belvidere three miles distant. For six years this gap of three miles has remained open, subjecting travelers to inconvenience and discomfor, from dust, delay and other annoyances, to great injury to the route, especially in its summer travel; for, hundreds of summer tourists have each season avoided the Delaware Water Gap, because of the ominibus infliction at Belvidere.

The objectionable nature of this gap was foreseen, and an act was obtained from the Legislature of New Jersey to supply the needed link, to connect the Belvidere with the Warren road; but, as we were at the time informed, parties in Belvidere put the charter in their pockets, and held it for sale at a price about equal to the cost of the three miles of road required!

At the last session of the New Jersey Legislature, however, the Belvidere Delaware Railroad Company obtained authority to extend their road from Belvidere to connect with the Warren road; and we learn that they are arranging for an early commencement and active prosecution of the work of construction, though we are not advised whether the Belvidere road will be extended up the Delaware river bank, or up the Pequest Valley; so that this current year will terminate a formidable nuisance long endured on an important route. Then and thereafter there will be open from Trenton and from Philadelphia a continuous line of rail to the Delaware Water Gap and Scranton.—*U. S. Railroad and Mining Register, April* 18.

The Public Debt.

The following statement of the amount and character of the public debt up to April 1, 1863, is authentic:

Three years 7.30 bonds convertible into 6s due in 1881	$139,996,950 00
6 per cent. debt	92,625,905 91
5 " "	30,483,000 00
1 year certificates	273,880,176 20
U. S. Notes	345,553,500 00
Q. M. and other requisitions	46,646,615 61
Aggregate debt	$929,186,147 72

Average interest per annum on whole amount about 3⅓ per cent.

But little more than a year ago, the country was startled by the announcement that the public debt had already amounted to a thousand millions, and that it was increasing at a rate that would in another year render us completely bankrupt. Now just two years since the breaking out of the rebellion we find that our debt is only $929,186,147. It is less than one-half the debt of France, less than one-fourth the debt of England, less by nearly five hundred millions than the debt of Russia, and less by a quarter of a million than the debt of Austria. This does not look very much like bankruptcy. Facts all go to prove that we are the richest and most powerful people on the face of the globe.

Opening of the Hudson--Reduction in Freights.

The opening of the Hudson River gives a new impetus to trade, and those having property to go forward or come up are pleased to hear the announcement. Despatches received here from Albany, state that the river business will commence at once, and property may be sent right along.

We understand that the Central Railroad Company have reduced the rates on freight, as follows:—Flour to New York, 75 cents per bbl; to Albany, 60 cents, per bbl. Fourth class freight to New York, 37 cents.

The rates have lately been 90 cents on flour to New York, 75 cents to Albany, and 45 cents on fourth class freight.—*Rochester Union.*

Transportation for the Northwest.

A memorial has been addressed to the Governor-General of Canada by the Commissioners recently appointed by the Governor of Illinois, in relation to the necessity of enlarged and cheaper tide-water outlets to the ocean for the products of the Northwest. Arguments are presented in favor of so opening and perfecting the navigation of the St. Lawrence, as to afford to the commerce of both countries a cheap communication between the shipping ports on the Northwestern lakes and Great Britain. The memorial says the Northwest has arrived at a point of production beyond any possible capacity for transportation which can be provided, except by the great natural outlets. The railways and canals are over-crowded by the immense shipments of produce. It is urged that by improving the navigation of the St. Lawrence freights may be reduced thirty cents per bushel, which would have the effect of greatly stimulating the production of grain, and cheapen its cost to English consumers.

Cotton Culture in Illinois.

The Chicago *Journal* says that the farmers of Southern and Central Illinois are going into the cotton raising business in earnest. Six car loads of seed were sent from Cairo last week, to different points on the Illinois Central.

Dighton and Somerset Railroad.

We learn from the Taunton *Gazette* that proposals for the grading and masonry of the proposed line of railroad from Taunton and Somerset have been accepted, from parties who will at once enter upon the execution of the contract. The work is to be pushed with vigor, and from the well known energy of the projectors of the enterprise no doubt can be entertained of its early completion.

Chesapeake and Ohio Canal.

The Directors of this work have increased their tolls on coal one-sixteenth cent. per ton per mile, making the tolls five-sixteenths cent instead of one-fourth cent. per ton per mile, or 57½ cents instead of 46 cents per ton for the whole distance. It is thought this increase will give the canal company at least $25,000 additional toll annually.

NOTICE to CONTRACTORS.

ENGINEER'S OFFICE OF THE HUDSON RIVER BRIDGE COMPANY AT ALBANY, April 13, 1863.

Sealed Proposals will be received by the undersigned, at the Engineer's Office, in the Exchange Building, in the City of Albany, until the 9th day of May next, for constructing the substructure, consisting of Abutments, Piers, Embankments, etc., for THE HUDSON RIVER BRIDGE AT ALBANY.

The Company reserve the right to accept or reject any proposal, without regard to the terms. Satisfactory references must accompany the bids. Competent security for the fulfillment of the contract and payment of laborers' wages, will be required on entering into contract.

The work is of sufficient importance to deserve the attention of responsible contractors, and proposals from no others will be entertained.

Plans and specifications of the work will be ready for inspection on and after the 1st day of May next, at this office, where full information will be given.

By order of the Board.
GEO. E. GRAY, Chief Engineer.

AMES IRON WORKS,
OSWEGO, N. Y.,
SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.

An imperfect sketch of our smallest size Machine.

PAYE'S PATENT FORGE HAMMER. A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York, or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Crampton, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Kaigh's Point, Phila.; Mallory & Cottrell, Mystic, Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Guinness, Albany; Sweet Brothers, Syracuse.

FOX LATHES.
F. W. BACON & CO.,
No. 23 PLATT, corner of GOLD ST.,
NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. GEO. H. FOX & CO., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT REOILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downwards beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Picket's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years with uniform success, they confidently offer their services to those requiring such aid.

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS**, etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.
Address **HENRY RUTTAN,**
Coburg, Canada.

Semi-Steel Locomotive Tires, Fire-box & Tube Sheets,
AND BOILER PLATES.

TIRES—ROLLED, BLOCKED AND WELDED TO FIT ANY GIVEN DIAMETER OF CENTRE
PLATES—ROLLED AND CUT TO ANY PATTERN AND SIZE ORDERED.
ROLLED AND HAMMERED BARS, AXLES AND FORGINGS OF SAME METAL.

MANUFACTURED BY
CORNING, WINSLOW & CO.,
ALBANY IRON WORKS, TROY, N. Y.

SOLE AGENT,
GEORGE T. M. DAVIS,
47 EXCHANGE PLACE, N. Y.

CAST STEEL WORKS
OF
FRIED. KRUPP,
At ESSEN, in RHENISH PRUSSIA.

Patent Railway Tires, without a weld. **Axles, Cannon, Anchor-Flukes, Propeller Blades and Shafts. Cranked Axles and Shafts up to Twenty Tons weight.**

CAST STEEL IN BARS, BEST QUALITY,
Suitable for Axles, Shafts, Rolls, Tools, Dies, Needle and Music Wire, Fine Cutlery, etc.

KRUPP'S TIRES

ARE CHEAPER AT THEIR COST THAN IRON ONES GRATIS.
THEY WILL, WITHOUT TURNING, ENTIRELY OUTWEAR THE BEST IRON ONES.
WEAR UNIFORMLY, WITHOUT FLAT PLACES, OR LAMINATION.
ARE NOT AFFECTED BY EXTREME COLD.
MORE THAN SIXTY THOUSAND OF THESE TIRES HAVE BEEN SUPPLIED.

KRUPP'S AXLES
Possess similar advantages over Iron ones that the Tires do.

THOMAS PROSSER & SON, 28 Platt St., N. Y.
SOLE REPRESENTATIVES IN AMERICA.

DELAFIELD & BAXTER'S,
Late OGDEN & DELAFIELD,
ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well paperred, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

BOARDMAN'S
Patent Steam-Boilers

SAVE over 20 per cent. of the fuel required for fine or plain cylinder boilers, while they have all the advantages of strength, cheapness and simplicity of construction, convenience and safety in use, claimed for either. Send for a circular.

Broadway Railroad.

To the Editor of the RAILROAD JOURNAL:

SIR—I do not propose to enter into any discussion *pro* or *con.* as to the propriety of constructing a Railroad in Broadway. I suppose that to be a matter beyond discussion, or rather that it is one of those sort of questions which depends not at all upon propriety or necessity, or the demands of the public, but simply upon the point of power to construct it. I start therefore here—*i. e.*, if the Road is to be built—and simply beg to submit a few suggestions as to the mode of construction. I take it for granted that, as it has been commenced, so it is designed to continue. We have a specimen on Broadway near Union Square, where mostly or quite a block of the Russ pavement has been torn up, the cross sleepers and Longitudinal sills laid, and a few rails spiked down, while a pile of Rails is deposited near Union Park which we have reason to assume are to be laid.

I suppose no one will dispute the proposition that if we are to have a Railroad in Broadway, it should be of the best possible plan of construction. Every detail should be such as has been suggested and approved by experience in the use of these Roads. The substructure should be of so durable a character that there will not be constant necessity for tearing up the pavement for repairs and renewals. The Rails should be of the most approved form, so as to offer the least obstruction to ordinary vehicles; and the general plan of construction should be that which should least disturb the Russ pavement and least interrupt the travel of the street while the work is being done. I believe the conditions of the grant to be that the Railway shall be of the most approved construction. But what do we see in Broadway?

First, the entire pavement is torn up, obstructing and inconveniencing the business of the street; next the concrete foundation of the pavement is broken up and destroyed for the reception of the cross sleepers and sills, rendering it impossible to restore the pavement to its original condition. Every one knows perfectly, that the principal merit, and in fact the only merit the Russ pavement has, is its solid concrete foundation, and that once disturbed, the pavement is ruined. There are innumerable places in Broadway where the foundation has been broken in laying down drains and pipes, and in no case has the pavement ever afterwards retained its surface, but it inevitably becomes uneven, each individual block in time wearing away on its corners so as to become an immense boulder. Let the street be torn up and relaid in this way, and I venture to say that in one year there would not be so rough and destructive a pavement in any street in this city as this would become. Nor is this proved by the experience in Broadway only. In other cities, Boston for instance, pavements of stone Blocks similar to that used for the Russ pavement have been laid down upon an ordinary foundation of gravel. In every case it has resulted as I have stated.

Next, after tearing up the concrete foundations the wooden sills of the most inferior quality are laid down so that in about three years we should have gangs of men constantly tearing them up for repairs and renewals; and then, to cap the climax, we have a rail spiked down on these sills which would almost serve as a gutter for the eaves of a House.

This is supposed to be the Rail of most "approved form." I have had some familiarity with street Railways for the past 10 years, and I do not hesitate to say that I never saw a worse pattern, unless it be that most absurd structure in Greenwich street. The form was condemned years ago; and no modern Railway, upon which the slightest regard is paid to the passage of any other vehicle than the cars in the street, is laid with anything approaching this pattern. Every experience here and elsewhere has condemned it; and yet we are threatened with having four such lines laid down through the greatest thoroughfare for all sorts of travel on this continent. Not a single condition necessary in building the Broadway Railroad is fulfilled in the outrageous and antiquated structure which has been commenced at Union Square—a structure, which, I venture to say, if permitted, will not only in itself be a most dangerous and vexatious obstacle to all other travel, but which will utterly and irretrievably ruin the entire pavement of Broadway.

Now, I suppose the Harlem Railroad company have men of experience in the construction and use of Horse Railways; and I can hardly make up my mind that they seriously intend to put down such a Track as this they have given us a sample of. I trust not. If this Road is to be built, I hope it may be built by this company; but I also hope that they will spare no pains or expense, and neglect no expedients which will make this Road what it ought to be—superior to any street Railway yet constructed. A Railroad can be put down in this pavement without obstructing the ordinary travel for a moment. It can be constructed without disturbing the pavement at all, except for a width of perhaps a foot where each Rail is to lie; and it can be made without a particle of perishable material. It can be made a monolith with the pavement on each side, the whole forming a surface retaining its level and not obstructing the ordinary travel. All this can be done too, at absolutely less first cost than the track which is now being laid.

Let us take a cast iron Rail of an I Section, the top being cast in the most approved form for the wheels of the cars. Let the Rail be, say, 6 inches in height, and the base or bottom flange be, say 6 or 8 inches wide—the shank or vertical web of the Rail being of the required thickness to connect the top and bottom; and in order to support the top thoroughly, let this shank, instead of running straight the entire length of the rail, be in short corrugations or zig-zags. Such a Rail may be, and has been used, of a weight of 60 lbs per lineal yard; but for such a Road as is required in

Broadway let it weigh say one hundred pounds, making the top very heavy, and chilling the tread in the same manner as the tread of our cast-iron car wheels is chilled. Let the pavement be taken up for a width of say two rows of Blocks, making a track of sufficient width to receive such a Rail. Let the bottom of this track be levelled off with a concrete of cement and clean gravel, so that when the Rail is laid upon it the tread is even with the surface of the street. Then, finally, let the spaces on each side of this Rail, and under its edges, be carefully filled with blocks of the removed stone, hammered or split to such a shape as will fit the space they are to occupy, and let these also be carefully laid in cement.

All this process is perfectly simple. There is no necessity for breaking up the pavement or disturbing its foundation. The Rail becomes as stable as the pavement itself—in fact is a part of the pavement. There is no perishable material used, and the chilled surface of the rails will wear for years. And, finally, one Rail may be laid at a time, thus occupying no room in the street, and not blocking it up with piles of timber and stone. Everything could go forward as usual, quietly and without interruption; and when done, the Road would be one of such a character as Broadway requires.

Will the Harlem Company look into these suggestions, and give us the best possible track in Broadway, thus in some measure compensating the public for taking possession of our greatest business thoroughfare.

PRO BONO PUBLICO.

Pittsburgh, Ft. Wayne & Chicago Railway.

The gross earnings of this road during the years ending December 31, 1861 and 1862, have been as follows:

	1861.	1862.
Freight	$1,905,707 35	$2,401,630 13
Passenger	902,706 46	1,116,740 62

Passengers carried	541,252	656,885
Mileage of do	36,216,079	45,811,455

The following explanation is given by the Comptroller of the apparent excess of expenditure by the Company over and above its revenue, from May 1st to December 31st ult., as shown in General Account:

At the time of the purchase of the Railway, &c., from the Trustees, there were outstanding $198,000 of the Bridge bonds of the Ohio and Pennsylvania Railroad Company, secured by a mortgage on the extension of the Railway from Federal street in Allegheny City, and across the Allegheny river, to Penn street in Pittsburgh, and $337,133, of the Chicago Depot bonds of the Pittsburgh, Fort Wayne and Chicago Railroad Company, secured by a mortgage on the real estate in Chicago, purchased by that Company in 1860 for the erection of a Union Passenger Depot, both of which mortgages were held by the U. S. Circuit Court to be liens prior to the general mortgages of the Companies consolidated into the Pittsburgh, Fort Wayne and Chicago Railroad Company, and to the general mortgage of the latter Company. This Company, therefore, had, of necessity, to assume the payment of the bonds secured by these prior liens, amounting in the aggregate to $535,133, which amount is embraced in the expenditures for account of "Construction and Equipment." All expenditures on the above account being chargeable against "Income" (the Company having no further capital than its stock and bonds, which have all been appropriated), the net revenue for the past year has been, apparently, more than exhausted by the assumption of the bonds in question. In any calculation, however, of the net working of the Railway since the assumption of its management by the Board of Directors, over and above the legitimate charges for expenses of management and operation, absolute expenditures for account of perfecting and extending the Railway and appurtenances, and increasing its equipment, interest on the coupon bonds and other incidental charges, the amount of the two classes of bonds before referred to should be deducted, together with the interest due November 1st, 1862, on the Bridge bonds of Ohio and Pennsylvania Railroad Company, and in their stead added, eight months installments of $2,000 each, for the payment of the interest on these bonds and their liquidation at maturity, and eight months installments of $9,364 81 each, as a sinking fund for the liquidation of the Chicago Depot bonds at maturity. This latter amount is given, assuming that the sinking fund will be unproductive. If it is made productive, say at four per cent. interest, it will be somewhat lessened. The following will then show the result:

Earnings for eight months		$2,599,159 24
Discount on Bridge bonds, redeemed		600 00
Total		$2,599,759 24
Deduct expenses of operation, &c	$1,342,919 64	
Construct'n expendit'rs	435,014 56	
Interest on bonds	420,535 38	
Other incid'tal charges.	43,247 87	
Eight months interest and Sinking Fund for Bridge bonds	16,000 00	
Eight months Sinking Fund for Chicago Depot bonds	74,918 48	
		2,332,635 93
Surplus		$267,123 31

Cumberland Valley Railroad.

The receipts from operations of this road for the fiscal years ending September 30, 1861 and 1862, have been as follows:

	1861.	1862.
From passengers	$115,433 21	$90,314 80
" freight	129,145 28	144,252 64
" mails	5,200 00	5,200 00
	$249,778 49	$239,767 44
Operating expenses	90,247 05	90,132 65
Net earnings	$159,531 44	$149,634 79
Share of receipts on Franklin R. R.		15,082 57
Rents and Interest		760 02
		$165,427 38
Dividends on stock	$70,552	
Interest on bonds	21,640	
		92,192 00
Balance		$73,235 38

The gross receipts of the Franklin railroad were $34,209 83, of which that company received $19,177 26. The report says:

Immediately upon the close of the present fiscal year, the Rebel Raid into Chambersburg resulted in the destruction of our Depot Buildings there, involving all the books, accounts, vouchers, and papers of the auditing department, and depriving us, consequently, of all means of making a detailed report of the operations of the last year. The first act of the Rebels, in their sudden descent upon the town, was to take possession of our Depot buildings; hence nothing escaped the torch of the incendiaries, which was applied the next morning after their arrival and immediately before they left the town. The Wood-shop, Machine-shop, Blacksmith-shop, Engine-house, Wood-sheds, and Passenger Depot were totally consumed, and with the Engine-house three second-class Engines were much injured by the fire, but not so destroyed but that they may be restored to usefulness. All the machinery in the Wood-shop was totally destroyed, and most of that in the Machine-shop so injured as to render it useless. Our entire loss has been estimated at about fifty thousand dollars. The destruction of our property, however, did not at all stop, or even impede the operations of the road, whose business for the past has greatly exceeded that of any former year, in consequence of the great amount of transportation of troops and stores for the Government; the vouchers for all which were destroyed in the office of the auditor of accounts: in consequence of which, these accounts remain unsettled, and are, therefore, not included in the Treasurer's accounts herewith submitted. These vouchers are yet in the process of being duplicated, and when settled will be included in the accounts of next year; so also will the expenditures incurred in rebuilding the Depot and Shops.

Fortunately the office of the Treasurer was located at another point of the road. The safety of his books and papers enables us to submit the amount of receipts and expenditures.

During the past year seventeen hundred feet of Siding have been constructed at Chambersburg, one thousand feet at Carlisle, and about four hundred feet at Bridgeport; a new Depot House has been erected at Carlisle, and the whole road is now in excellent order. One new Engine and thirteen eight wheeled Freight cars have been added to the rolling stock.

The experience of the past two years has demonstrated that our contract with the Franklin Railroad Company for the transaction of the business of the road, has not been such as will fairly compensate us for the work done. For although the great amount done for the Government was such as to prevent any loss, yet is very manifest that the terms of the contract will not compensate us for the ordinary and natural business to be done upon it. In pursuance of its terms, therefore, notice has been given by our Company that the contract shall terminate, and it will be necessary to enter into a new one, by the terms of which we

will require a greater share of the gross earnings. This subject is now in the process of negotiation, and will doubtless result in an arrangement which will be more satisfactory to both parties.

It is only necessary to add that such is the present financial condition of the Company that the destruction of our property at Chambersburg and the necessity for its restoration, will not at all interfere with the regular payment of the interest upon our bonds and dividends to our stockholders.

GENERAL STATEMENT.

Cost of road and appurtenances	$1,128,687 05

Superintendent.—O. N. LULL.

Louisville and Frankfort, and Lexington and Frankfort Railroads.

The receipts from the joint operations of these roads during the fiscal years ending June 30, 1861 and 1862, have been as follows:

	1861.	1862.
Passengers	$181,303 74	$141,439 01
Freight	153,897 11	97,776 61
Express	7,363 04	6,627 79
Mail	8,960 00	8,998 30
Miscellaneous	3,331 38	3,395 54
	$354,855 27	$258,237 25

The expenditures during the past year were:

Repairs of road	$41,830 53	
" locomotives	11,256 90	
" cars	16,339 49	
" bridges	981 78	
" rails	3,328 72	
" buildings, etc.	4,650 55	
Fuel	16,314 67	
Wages	55,195 04	
Chairs and spikes	5,441 29	
Cross-ties	19,001 24	
Ballast	3,617 05	
All other expenses	11,061 94	
	169,022 20	
Balance net profit		$89,215 05
The decrease in gross earnings was		$96,618 02
With a decrease in expenses of		43,885 50
Making the decrease in net earnings		$52,732 52

LEXINGTON AND FRANKFORT RAILROAD.

The proportion of gross and net earnings and expenses applicable to this road is as follows:

	1861.	1862.
Gross earnings	$108,944 41	$78,985 37
Operating expenses	65,676 72	52,191 09
	$43,267 69	$26,794 28
The decrease in gross earnings was		$30,959 04
With a decrease in expenses of		13,485 63
Making the decrease in net earnings		$17,473 41

The receipts from all sources during the year were $81,826 90; and the expenditures were:

Transportation expenses, as above	$52,191 09
Taxes, interest and insurance	3,491 98
Sinking fund	7,500 00
Dividend	10,291 46
Balance to credit profit and loss	8,352 37
	$81,826 90

Notwithstanding the reduced earnings, the company were enabled to pay a dividend of two per cent in November, carry $7,500 to the Sinking Fund, and still have a surplus of $8,352 37.

The following statement will show the cost, earnings, expenses and net earnings of this road from its opening, in May, 1857:

	Cost.	Receipts.	Expenses.	Net.
1858	$637,072	$128,471	$68 061	$60,410
1859	642,702	120,187	56,045	54,142
1860	642.702	120,324	66,051	54 373
1861	648.421	108,944	65.677	43,267
1862	649,089	78,985	52,191	26,794

BALANCE SHEET, July 1, 1862.

Capital stock	$514,573 07
Bonds	130,000 00
Dividends unpaid	6,519 36
Sinking Fund	27,000 00
Renewal and contingent fund	37,337 26
Stock profits	22,276 02
Profit and loss	8,362 37
	$746,068 08
Construction	$596,788 20
Proportion of rolling stock	52,300 00
" materials	25,440 16
Bonds redeemable	51,000 00
Real estate	1,025 12
Bills receivable	6,930 09
F. R. Hunt, treasurer	343 11
Cash	12,241 40
	$746,068 08

President—EDWARD D. HOBBS.
Superintendent—SAMUEL GILL.
Secretary—E. S. DUNCANSON.

LOUISVILLE AND FRANKFORT RAILROAD.

The proportion of gross and net earnings and expenses applicable to this road is as follows:

	1861.	1862.
Gross earnings	$245,910 86	$179,251 88
Operating expenses	147,230 98	116,831 11
Net earnings	$98,679 88	$62,420 77

The receipts from all sources, including cash, etc., on hand July 1, 1861, were $233,517 40; and the disbursements were:

Transportation expenses, as above	$116,831 11
Construction account	12,702 66
Taxes, interest, discount, etc.	27,469 15
Redemption of railroad bonds	6,000 00
" Louisville city bonds	24,000 00
Dividends paid	16,644 50
Cash	29,869 98
	$233,517 40

Two dividends of one per cent each were declared in 1861-'62, and the balance disposed of as per above statement. The bonded indebtedness of the company (exclusive of $100,000 City of Louisville bonds, maturing in 1881) is $228,000, of which $34,000, all that remains of the old issue, will become due July 1, 1863—the balance at intervals between July 1, 1864, and January 1, 1878. It will be seen that bonds to the amount of $30,000 ($24,000 of which were City of Louisville bonds) were retired in January and July 1862, for which purpose $18,000 new bonds were disposed of. The total debt of the company has thus been reduced $12,000. It is believed that the future earnings of the road will enable the company to meet its indebtedness as it matures without resort to an additional use of its credit.

The following statement will show the cost, earnings, expenses and net earnings of this road since its opening in July, 1851:

	Cost.	Receipts.	Expenses.	Net.
1852	$1,358,764	$165,920	$82,543	$85,387
1853	1,455,080	187,229	106,382	80.847
1854	1.225.217	267,070	153,919	113,151
1855	1.535.928	244,015	147.112	99,903
1856	1.543,651	237,048	145,090	91,958
1857	1,545,791	243,035	132.595	110.440
1858	1,502.095	245,750	136,691	109.059
1859	1.502.095	268.046	154.997	113.049
1860	1.502.095	270.053	145.183	124,870
1861	1.510.261	245.911	147.231	98.680
1862	1,522,964	179,252	116,831	62,421

BALANCE SHEET, JULY. 1, 1862.

Capital stock	$1,104,875 00
Stock to be issued for interest and dividends	4,719 40
City of Louisville bonds	100.000 00
Railroad bonds, old and new	228.000 00
State of Kentucky	74,519 50
Cash dividends unclaimed	4,668 26
Profit and loss	139.076 63
	$1,655,858 79
Construction	$1,396,229 09
Proportion of rolling stock	126.735 00
" materials	45.288 89
Stock in other companies	6.540 00
Real estate	38.170 36
Bills receivable	13,025 47
Cash in New York to pay interest	3,392 40
Cash on hand	26,477 58
	$1,655,858 79

President—EDWARD H. HOBBS.
Superintendent—SAMUEL GILL.
Secretary and Treasurer—W. H. BEYNROTH.

The equipment of the entire line consists of 18 locomotives; 10 passenger, 5 baggage, 160 freight, stock and platform, and 65 construction ballast and hand cars. Total mileage of cars, 1,156,734. Miles run by locomotives with passenger trains, 126,790; with freight trains, 58,379; with other trains, 29,862—total miles run, 215,031. The whole number of passengers carried was 133,799. The total mileage of passengers, 4,581,939. Tons of freight carried, 42,525; do carried one mile, 2,376,996.

Pennsylvania Railroads.

The following is a condensed statistical table of all the railroads in the State which have reported to the Auditor General:

Cost of Pennsylvania railroads	$145,797,651
Length of main track r'ds in Pa., miles	3,271
Length of double track and sidings	1,183
Number of branch roads	28
Number of engine houses	192
Number of engines	953
Number of first-class passenger cars	476
Baggage, mail and express cars	212
Freight cars	8,832
Coal cars	20,804
Number passengers carried in 1862	7,057,805
Gross tonnage for year, tons	15,035,533
Aggregate receipts of roads	$31,028,232 31
Aggregate expenses of roads	12,106,758 30
Number of persons killed in 1862	175
Number of persons injured in 1862	226
Capital stock authorized by law	$99,307,504
Capital stock actually paid in	$99,483,909
Funded and floating debt	$78,573,872

The following companies have failed to make report to the Legislature, as required by law: Allegheny Valley Railroad, Bradford Railroad, Buffalo, Bradford and Pittsburg Railroad, Chester and Darby Railroad, Ebensburg and Cresson Rail-

road, Franklin Railroad, Gettysburg Railroad, Greenwich Improvement Railroad, Littletown Railroad, New York and Erie Railroad, Pittsburg, Columbus and Cincinnati Railroad, Pittsburg and Steubenville Railroad, Strawsburg Railroad, Schuylkill and Dauphin Railroad, Treverton Railroad, Hestonville, Mantua and Fairmount Railroad, Lombard and South Street Railroad, North Philadelphia Railroad, Richmond and Schuylkill Railroad.

Pennsylvania Manufacturing Corporations.--Liability of Stockholders.

THE ACTS OF APRIL 20TH 1853 AND APRIL 7TH 1849. STOCKHOLDERS, IN COMPANIES ORGANIZED IN PURSUANCE OF THEIR PROVISIONS, LIABLE FOR DEBTS, CONTRACTED WHILE STOCKHOLDERS, ALTHOUGH THEY HAVE PAID UP THE WHOLE OF THEIR STOCK.

This action was brought against the Wyomissing Manufacturing Company, and certain of its individual stockholders, joined as defendants, to enforce a liability incurred under the General Manufacturing Law of April 9th 1849, and its supplements. The company was organized in 1854 in the city of Reading, Berks county, and duly incorporated under the act of assembly and supplements mentioned; its object being to manufacture goods composed of wool and cotton. While engaged in this business, and while the individual defendants joined in the action were stockholders therein, the company purchased four several lots of cotton, in bales, from the plaintiffs, amounting to $4,878 28. Shortly after this purchase the company became embarrassed, and their real estate was sold by the sheriff for payment of liens, the corporation being insolvent to a large amount. This action was then commenced to recover the price for which the cotton was sold, and was brought against the stockholders on the ground that the act of assembly and supplements made each of them, as well as the company, liable to the plaintiffs for the amount of their claim.

The defendants pleaded, first, "*Nil debet.*" Afterwards they filed three special pleas, the first averring an award against the company for part of the plaintiff's claim, which award had not been appealed from; the second averring that the company was required by law to pay a certain bonus to the Commonwealth; that they did not pay the bonus, and therefore the defendants were not liable; and the third alleging that the defendants gave certain drafts and notes in payment, which were in full satisfaction of the claim. To the first and second special pleas the plaintiffs demurred, and to the last plea they filed a general replication, denying the facts. The demurrers were argued, and the Court decided that the pleas of "former recovery" and "bonus unpaid" would not avail the defendants.

The following is a portion of the opinion rendered upon the decision of the demurrers, which we quote only for the purpose of having the point at issue fully understood, the view of the court not being sustained by the appellate tribunal.

"The act of 1849, to which the others named are supplementary, provides that all the stockholders of companies incorporated under it, shall be jointly and severally liable, in their individual capacities, for all the debts and contracts made by such company, to the amount remaining unpaid on the shares of stock by them respectively held. If all the shares were paid up, there would, under this provision, be no further liability. The legislature obviously designed to encourage manufacturing enterprise, and at the same time to prevent organizations proceeding upon a large nominal, but small real capital. The capitalist and the person of small but surplus means were equally invited to take part in these enterprises, by the assurance that there was no risk incurred beyond the extent of the subscription for stock. Any indefinite universal liability it was felt would repel capital, for it would be an act of folly or madness for any man of means to go into a concern not managed by himself, not controlled by himself, if by so doing he staked his whole fortune on a subscription, it might be, to a half dozen shares of its stock. The liability of the stockholder in the act of 1849, was upon the stock unpaid for by him. The *time when* the liability attached to the holder was not fixed with any precision, nor was the person of the particular holder, which is but to state the fact in other words. We suppose that this was soon found to be an invitation to fraud, and that when the evil day was seen by the more sagacious members of the corporation to be at hand, or had already come, the holder of stock transferred it to irresponsible persons, or sold it to ignorant and innocent ones. By these shifts the individual liability was evaded and the bread asked for by the people was given to them in the shape of a stone.

"In view of this the act of 1853 was passed, supplementary to the act of 1849, which declares that stockholders shall be justly or severally liable in their individual capacities, for all debts contracts and other liabilities of the company, *contracted or incurred during the time such stockholders respectively held their stock, or are beneficially interested therein.*"

"The words are very large and would seem to include a universal responsibility—indeed are large enough for that. But when we remember what the policy of the state is, that such a construction would at once defeat the wise purpose of the acts—to encourage the adventure of combined capital in manufactures; that this act is expressly supplemental to that of 1849; that the large words after all, precisely remedy the defect of the act of 1849 as to individual liability—we may as well suppose that they were intended to be in harmony with that policy, were not introduced to make the legislature defeat itself, and are to be subordinated to the 9th sec. of the act of 1849, as amending that wherein that section was deficient. The reading of the statute taken together then is, that the holders of stock at the time of any liability are individually liable therefor to the extent of their unpaid stock. But as in this case the whole stock was paid in, there is no liability whatever incurred by the stockholders to the creditors of the corporation."

Judgment was rendered for the defendant and the plaintiffs appealed. The following opinion was rendered by the Supreme Court of the State, reversing the judgment and ordering a new trial, on the ground that the individual defendants were liable for the company's debts notwithstanding their stock was all paid up, if such debts were contracted while they owned the stock.

LOWRIE C. J.—The act of 20th April 1853, sec. 3, is very positive in declaring that the stockholders in these corporations shall be liable for all debts contracted while they are stockholders; and we are unable, with the court below, to discover any public policy that requires or allows us to limit this liability according to the extent of unpaid stock. Public policy, as applied to any particular subject, is the very spirit of a people's settled customs, laws, and institutions relative to that subject. What it requires can be ascertained only by a careful process of observation, investigation, and induction of and from the actual public practice in such matters. On this subject our practice is very limited, beginning with the act of 7th April 1849, at least as a general practice. That act was of course experimental, and therefore not sufficient to prove a public policy. Alterations were to be expected under the dictations of experience, and the thought of the first act must not be considered as controlling the second, when a change is manifestly intended. Even settled policy and institutions change naturally, as the aims and purposes of society change, and of course the experimental institutions of one legislature cannot be used to control the interpretation of the amendments of a subsequent one. We think the stockholders are liable though they have paid up all their stock.

What is the character of their liability? We think it is secondary, not primary; collateral, not principal; analogous to a case of guarantee, to be enforced if the regular process in the principal contract proves fruitless, or if the corporation becomes insolvent. The nature of the case shows this; for the true contract is with the corporation, and therefore it has the principal duty and liability, and the individual liability of the stockholders is a supplementary one added on to secure the other. And this thought is expressed in the act of 1849, when it requires that execution shall go first against the corporation, even when the stockholders should be joined in the same action.

Here then is the right; how shall it be administered? If the mechanic has not blocks or lasts on hand suitable for the hats or shoes that are required, he must provide others that are suitable. Courts and lawyers are the mechanics in the administration of justice, and, when defined rights are to be enforced, they ought to know how to do their work, and to find new methods for it if the old will not answer. We do not excuse a builder because his chest does not furnish him tools of the proper shape for the required work. Even for this new form of right, analogy directs us to an ordinary remedy, which with very little modification, is exactly suited; the forms of proceedings against guarantors. And looking at this we find that the form of the remedy, as well as the character of the right, allows the use of separate actions against the primary and secondary debtors. The declaration in the secondary action alone needs any special departure from the form used in the case of guarantee. It is by going into the equity practice that we find example for suing them together, and getting different judgments against each, to be enforced by separate writs of execution, and this analogy is adopted in the act of 1849, saying that the stockholders "may" be included, that is in the ordinary action against their corporation, and allowing several verdicts, judgments and executions. Proceeding by separate actions, a judgment against the corporation does not bar a suit against the stockholders. And a judgment against the corporation for one of the divided portions of the claims does not bar a suit

against the corporation and the stockholders together for the rest of the claim.

* * * * *

The claim is for goods sold; the paper that was given for them and dishonered being treated as a fruitless provision for payment. The plaintiffs had obtained judgment against the corporation on one of the notes; but the corporation became insolvent, and the judgment proved fruitless. There was no use going further against the corporation alone; it would have result in more expense and delay. A suit against the stockholders is therefore their only hope; and they may join the corporation, at least, so far as the debt due by it is not yet in judgment; and the nature of the case, and the act of Assembly, allow that the judgment may be as different as the facts of the case require. This action is, therefore, in the right form. * * *

One plea in bar is, that the stockholders are not liable because the corporation did not pay the bonus to the Commonwealth; and this is well demurred to. We must not interpret the act of Assembly so as to make it absurd or ridiculous. It was not intended that a neglect of the corporation's duty to the state should free the stockholders from their duty to their creditors—that they might rid themselves of the law itself by disobeying a part of it. The *proviso* that imposes the bonus is not properly a *proviso* or condition, but an additional law. In our hurried legislation, independent enactments are often stuck on in the form of a *proviso*, and so it is here.

Judgment reversed and a new trial awarded.

Trade and Commerce of Montreal.

We are indebted to the Montreal *Gazette* for another annual statement of the trade and commerce of that city for 1862. That journal felicitates its readers on the prosperity of the city during the past year, and the interesting tables it furnishes are conclusive as to the fact. We regret that in the expression of its satisfaction at this state of things, it is not more magnanimous in its expressions with regard to the condition of the United States, which it represents as on the "brink of a fearful catastrophe," with "inflated prices," a "frightful extension of the national debt," and "with rapidly decreasing means of meeting accumulating liabilities." When we consider how much Montreal owes of prosperity to its railway and water communications with the country of which it speaks so disparagingly, and the trade which it desires from the American West, we think the tone of its remarks to say the least of them, is very unkind. We shall, however, notwithstanding, do full justice to Montreal and publish with much pleasure the following synopsis of the valuable report of the *Gazette*.

The imports into Montreal for the last ten years amount in the aggregate to about $165,065,373, those of 1862 being $20,529,893, in excess of those of 1861 by $3,715,732.

The amount of duties collected during the same period of ten years was about $20,653,624, o which was received during the past year $2,490,-025, in excess of that of the previous year but $98,206.

The increase of tonnage has been large.

		Tonnage.
In 1852 the number of ships was	185	45,145
In 1862 " " "	506	254,842

Both the tonnage and number of vessels would have been greater, but for the failure of the Gulf and Labrador fisheries, which cut off the lower port trade the last fall, by which the export of flour, pork and butter was greatly diminished.

It appears that the arrivals and destinations of the foreign vessels in port were as follows:

From—					
Liverpool	100	with cargoes	and	5	in ballast.
Glasgow	77	"	"	10	"
London	19	"	"	26	"

Various other ports in the West Indies, S. America, Ireland and Scotland	9	"	"	17	"

Total vessels, 566. Tonnage, 254,842.

We observe that a considerable number of vessels arrived in 1861 from ports unrepresented in 1862, such as Portsmouth, Grimsby, Dublin, Galway, Wexford, Rotterdam, Christiensend, St. Helena, &c.

The number of vessels which cleared for foreign ports in 1861 was 494, tonnage 250,281, 1862 523, tonnage 266,761.

The largest proportion cleared for Liverpool 135, to Glasgow 95, London 57, Cork (orders) 75, Lower ports 81, New York 3, Boston 2, all with full cargoes.

The Montreal Ocean Steamship Company consisting of six fine vessels, making their average outward passages in 13 days 14 hours, the inward 12 days and 8½ hours, made 30 trips each way, carried 4,748 passengers outward, and 8,133 inward, and a total of freight from Quebec of 3,392 tons, and from Montreal of 19,635.

Freights.—The want of proper harbor accommodation, the insufficient lights in the gulf, and the short days and the long nights of October, November and December, impair the navigating interests of Montreal, and the number of vessels arriving in ballast affect the rates of freight disadvantageously. They fluctuated considerably during the season. In May the engagements per steamer were 4sh. sterling for flour, and 3sh. 3d. for sailing vessels. Grain 10sh. per steamer, and 8sh. per sailing vessels. In November 4sh. 6d. for flour in the former, and 11sh. for grain to London, and 4sh. 6d. flour, and 10sh. 6d. to 11sh. for grain to Liverpool.

The season has been satisfactory to shipowners.

Inland Commerce.—The season opened with a larger accumulation of produce than any previously known, and full employment was given the regular craft, at rates however, not so high as the previous year, viz:

Average from Lake Ontario, 11 to 10c. per bushel, 40c. per bbl.

Average from Lake Erie, 14@15c., and 60c. to 55c.

Up freights steady from $1.40 heavy, and $3.50 light freight.

The capacity for carrying inland freight is thus given.

Steamers.—Total carrying freight per trip, 71,-000 bbls.

Barges and schooners	980,401 bush.
34 barges	312,000 "
Total of schooners &c., per trip	1,292.401 bush.

Exports down the river by Quebec, Three Rivers, Chambly, &c., by steamers and schooners.

	1861.	1862.
Flour, bbls	273,526	226,177
Do. bags	36,070	32,371
Wheat, bush	176.281	199,482
Barley, "	22,587	6,060

The amount of wheat received from the Western States was 1,662,310 bush.

Canadian	230,651	"
Rejected wheat of all kinds	205,655	"
Mixed Western Corn	252,437	"
Rejected "	264,827	"
	2,455,880	bush.

The total amount of imported grain, bringing flour and oatmeal into grain, including the river trade amounted to 24,380,028 bushels. Taking all things into consideration, and the amount sold over the market, the imports exceeded those of 1861 by 2,000,000 bushels. The shipments by the river and Lachine Canal for 1862, were as follows:

		Increase from 1861.	Decrease.
Flour, bbls	626,070	9,787	.....
Wheat, bush	6,538,053	936,282	.....
Peas, "	712,818	.....	318,847
Barley, "	459	.....	2,120
Oats, "	24,788	.....	254,387
Oatmeal, bbls	5,003	.....	20,155
Corn, bush	1,774,546	296,114	.....
Ashes, bbls	23,835	1,444	.....
Butter, kegs	59,804	10,082	.....
Pork, bbls	7,806	4,503	.....
Lard, bbls	472	294	.....
Beef, tcs. & bbls.	222	.....	1,396
Tallow	189	49	.....

The shipments by the way of Portland and Boston were as follows:

	Portland.	Boston.
Flour, bbls	50,662	15,461
Grain, bush	350,854	127,741
Ashes, bbls	7,046	64
Butter, kegs	9,555	100
Pork, bbls	1,273	.....
Lard, "	3,633	.....
Beef, tierces	1,154	.....

Adding in the river trade the total export of breadstuffs, including that *via* St. John, was about 15,000,000 bushels.

The quantity of grain and flour in store, Dec. 31, 1862, is estimated at

Flour, bbls.	70,718
Wheat, bush.	170,839
Peas, "	12,759
Corn. "	88,246

The whole imports of flour are stated as follows:

By Grand Trunk Railroad	405,553	bbls.
" Montreal and Champlain	196	"
" Lachine Canal	735,529	"
	1,141,278	"
Milled in the city	220,981	"
Total receipts for the year	1,362,259	bbls.

Shipments—

Direct for Montreal	626,070	bbls.
" via Portland and Boston	66,123	"
" down the river	226,177	"
Total exports	918,370	bbls.

Prices of extra have ranged from $5.50.60 in May, to $4.80.90 in December.

The imports of wheat show a considerable increase from the year 1861.

Receipts per Lachine Canal	7,952,782	bush.
" " Grand Trunk	673,779	"
Total	8,626,561	bush.

Exports—

Via St. Lawrence	6,538,053	bush.
" Portland and Boston	478,595	"
" River Ports	199,482	"
Total	7,216,030	bush.

The tendency of prices has been downwards, yet though the crop will run ⅓ short of that of 1861, the stocks held over will prevent any great rise.

Prices have ranged for Milwaukee No. 1, per bushel of 60 lbs., between May and December from to $1.02 to $1.00, the highest price being in June, $1.08. For Chicago No. 1, 98 to 97½, the highest price being in July, $1.07.

Indian Corn has been received in large quantities, the receipts being for 1862, 2,466,890 bushels, against 1,510,767 in 1861. Prices have ruled at from 50c. in May to 49c. in December, the former being the highest rate obtained.

Barley turned out short. The American demand fell off towards the fall. The bulk of the crop raised south of the St. Lawrence goes to the United States by the Chambly Canal. No estimate of the quantity is attainable or given in the report.

Oats have been scarce owing to the long Spring drought, and prices have ruled high. The stock is light and the market closed stiff. Prices ruled in May at 35 to 37 per cents, rose to 50 in August and September, and left off in December at 40 to 41.

Peas. This is the staple crop of Lower Canada, but owing to the weather the receipts were not more than ⅓ of the previous year. Prices ruled in May at 70 to 75c. per bushel of 66 lbs., and left off in December at 70c.

The Pork trade began for the season with heavy stocks in all hands, the chief outlets Ottawa and Quebec being fully supplied. Yet as the price for mess in the West was only $9 and $10, it afforded opportunities for speculation which were largely embraced. This, however, led to a decline in the price in Montreal, though a slight rally took place at the close owing to a scarcity in the outlets mentioned.

	1859.	1860.	1861.	1862.
Imports of pork in barrels	17,688	9,014	14,223	42,490

The stock at present on hand is estimated at 20,000 bbls., including 3,000 held by the Commissariat.

Prime Mess and Prime have ruled very dull, the demand at the lower ports having fallen off. Prices have ranged as follows:

	Mess.	Prime Mess.	Prime.
May	$12.50 to 12...	$10.25 to 9.50	$9.75 to 8.50
Dec..	9.75 to 10.25	7.50 to 8...	None.

Transactions in beef have been limited, and prices have not varied much. The shipments to England were light, as the prices there ruled low. The quality of the cattle has not been equal to that of the previous year.

The imports were only 845 tierces and barrels, against 1,115 the previous year. The amount packed and inspected is given, viz:

Beef, bbls. (packed in full)	2,726
" tierces " "	1,437

Prices ruled as follows:

	Tierces.	Prime Mess.	Prime.
May	$20@..	$11...@11.50	$7.50
Aug	21@22	12.50@13...	.....
Dec.	17@18	8...@ 8.50	7.50

The receipts of butter were heavy, viz: 86,217 packages against 71,875 in 1861. The bulk was of an inferior quality and a drug in the market. Owing to the high prices ruling in England, the shipments were heavy. The quantity weighed and inspected was:

Kegs weighed	4,500
" inspected	500

The price has been for poor qualities 9 to 12 cents. Choice dairy 19 cents, good 15 to 17 cents.

Ashes have been in good demand, and the supply in excess of that in 1861, by 7,848 bbls., and the shipments show an increase of 8,983 bbls. both qualities. The amount received and delivered at inspection stores for 1862, was:

	Pots.	Pearls.
Received	28,325	10,408
Delivered	28,337	10,415
In store	384	259

The prices rule a shade lower than during the previous year.

	Pots.		Pearls.	
In May last stood at..	$6.70	$6.75	$6.65	$6.70
" Dec. " "	6.75	6.80	5.30	6.35

Fish have not figured much in the Montreal trade the last year, though a staple product of the colonies. It is entirely an import in that city, and the value in 1862 was but $74,577 against $132,715 in 1861.

Coal oil is becoming a valuable branch of commerce. 20,000 bbls. petroleum reached Montreal from Sarnia direct.

The home consumption is increasing, but figures cannot be given. The duty of 10 per cent. per gallon, has checked the importations from the United States, which commenced in 1861 in consequence of low prices there. Early in the season, refined brought 45 to 50 cents, but the market yielded to the pressure of producers and stood at 25. In November the rise in the United States took up the price in Montreal to 60 cents, when a reaction took place, and it closed at 30 cents for low grades, and 45 for the best samples.

Canada whiskey though exposed to sharp competition from the Upper province is bringing 65 to 70 cents per gallon, (high wines). No tables of production are given, but the exports down the river from Montreal are as follows:

Whiskey and high wines	1,207	puncheons.
" " "	800	barrels,

The quantity imported appears from the Custom House returns to have been 8,988 gallons, of the value of $6,175.

DRY GOODS TRADE.

The sales of dry goods have been satisfactory, and the trade is in a healthy state.

Cottons.—These have advanced in price which put a stop to consumption. Under this head the Custom House shows the value of the imports for 1862 of the value of $2,262,349, showing a decrease from 1861 of $789,211.

Woollens.—This branch of trade has been good. Some of the Canadian cotton mills have been converted to woollens, and the demand is increasing for the fabric. The following is a statement of the value of the dry goods entered at Montreal for the years 1861, 1862:

	1861.	1862.
Cotton goods	$3,051,560	$2,262,349
Linen, do.	192,856	195,324
Silk, do.	494,233	371,573
Wool, do.	90,875	133,823
Cotton yarn and warp	49,850	36,756
Carpets	77,586	81,952
Clothes ready made	37,635	34,623
Hosiery	88,422	69,601
Lace goods	.....	12,704
Thread	.....	.....
Woolen goods	2,452,776	2,048,668
Cotton and flax waste	15,394	15,818
Cotton wool	7,908	145,109

IRON AND HARDWARE.

This branch of trade has not been marked with fluctuation. There has been a fair average demand and at good prices. Stocks on hand not heavy. The quantity of hardware goods being manufactured around Montreal is increasing.

Pig iron ruled low in the Spring and Summer, and barely paid cost and charges of importation.

Prices rose with a Western demand in October and November from $18, for G. M. B. No. 1 Brands to $24@25 per ton. Stocks in hand light.

The following is a statement of the iron and metal imports for 1861 and 1862:

	1861.	1862.
Iron and hardware	$686,361	$612,637
Machinery	32,955	50,841
Chain cable	3,406	3,921
Bar rod and sheet iron	488,825	401,344
Railroad bars	24,644	14,676
Boiler plate	6,701	11,425
Pig	165,053	168,847
Round and square	.....	.....
Hoop	26,637	17,709
Wrought iron cranks	7,307	1,168
Lead	8,509	15,652
Steel	67,939	63,791
Tin and zinc	4,473	18,780
Telegraph wire	.....	.....
Anchors	940	589
Copper	3,834	8,199
Chains otherwise than cables	.....	.....
Railroad wheels and axles	.....	.....

GROCERIES.

The year past has been the most prosperous in this branch of trade ever known in Montreal, owing to light stocks at the commencement of the season, increased consumption. The tea market of Montreal is said to be the cheapest on the continent, and the bulk of the Western trade has gone there. This advantage has, however, been modified by the overtrading among the Western Canadians where has been a pressure for money, owing to short crops, low prices and bad roads. The *Gazette* believes that Montreal will become at no distant period, the emporium for the great Western States.

The quantity of tea entered at Montreal is large. Four vessels arrived direct from China with full cargoes. The assortment on hand being larger, the terms of sale being more liberal and the prices lower than in New York, buyers flocked to the market in the hope of carrying on an illicit trade with the United States. The Canadian duty is 4c. per lb. and 15c. *ad valorem*.

The quantity and value of teas imported for the last ten years at Montreal are as follows:

	Pounds.	Value.
1853	2,240,299	$553,764
1854	2,018,169	474,140
1855	1,937,519	442,788
1856	1,919,386	461,592
1857	1,717,373	503,680
1858	2,096,229	513,640
1859	2,041,750	603,460
1860	1,577,179	471,381
1861	2,585,641	967,281
1862	4,879,212	1,858,193

Remaining in bond 1862, Dec. 31, 799,280 lbs. $299,257.

Prices ruled as follows:

	April.	Dec.
Young Hyson	73@98	65@90
Souchong	40 to 63	40 to 65

Sugars.—Prices varied, with a disposition to rise, chiefly on account of the Canadian tariff of July 1, 2 cents per lb. specific duty, and 10 per cent. *ad valorem*.

The imports of raw sugar in 1862 were	25,811,507 lbs.	$1,029,193
Do. repaid	6,992 cwts.	57,067
Remaining in bond raw, 2,933,619	"	166,276
Do. refined	555 "	5,024

Coffee, owing to its scarcity in New York and the English markets, ruled higher at the opening of the season than at the close of 1861. The market closed dull with light stocks.

	Pounds.	Value.
The quantity of green imported in 1861 was	794,935	$92,678
in 1862 was	1,468,258	196,677

	Per lb.
Prices of La Guayra April 1862, were	22@23c.
" Java no quotation.	
" La Guayra Dec. 1862	23@33c.
" Java " "	28@28c.

In tobacco, owing to the war a considerable rise obtained. The imports of manufactured were light, and prices at the close of the season advanced from 20 to 50 per cent., though with a downward tendency. A market for Montreal manufactured has sprung up in England for Australia.

Imports of manufactured tobacco.

	Value.
1861	$79,694
1862	60,290
Unmanufactured—	
1861	$84,125
1862	592,445

Sugars at the commencement of the year showed a tendency to rise, and advanced under the influence of a large Western demand, adverse advices from Havana and the new tariff which came into effect the 1st of July.

The imports of raw sugar were in 1861, 222,242 lbs. of the value of $910,810; 1862, 25,811,507 lbs., value $1,029,193.

	Pounds.	Value.
The imports of refined sugar, 1861	192	$1,747
1862	6,992	57,067

Remaining in bond 1862, 2,933,619 lbs., value $166,276.

	April.	Dec.
Port Rico, per 100 lbs.	$6.25@7.00	$7.10@8.75
Cuba " "	6.15@6.75	7.25@8.60
Canada loaf	11c. per lb.	12½

Molasses has two regular periods of trade from January to March, and October and November. The year opened with a good demand, at fair prices, and rose under the tariff of July, 5 cents per gallon specific, and 10 cents *ad valorem*. At the end of the year the market was dull.

The imports were:

	Gallons.	Value.
1861	790,298	$128,937
1862	790,447	147,009

Remaining in warehouse, 174,806 gallons.

	Per gal.
Prices in April for Muscovado	24@26 cts.
" Dec. " "	30@34 "
" April for sugar house syrup	32@36 "
" Dec. " "	36@37 "

Pepper.—An active demand set in, and the market was relieved by orders from New York to intercept the American tariff. Market closed at 11¾ cents, and 12 for black.

Paints.—The season has been dull, price of white lead No. 1, in December was $2.30@2.50. Putty $4 to 4.60.

Glass ware.—Window and plate glass.—In window, the business was under average, and stocks light. In plate, Belgian increased.

Bottles, the supply was ample and trade quiet. The imports in 1861 were of the value of $60,289
" 1862 " " 95,360

Soap.—Prices have ruled steady, with no advance on last years rates. Prices of Liverpool, 5@5½.

Imports for 1861	$34,696
" 1862	18,470
Inland	1,194

Mustard.—In the first of the year prices ruled high. A decline took place on the arrival of the usual supply. Coleman's closed Dec., 20@21cts.

Rice has been continuously dull. Prices opened fair, but the market closed heavy at $3.50 to $3.60 for Arracan, no Patna offering.

Imports in 1861	$76,944
" 1862	89,543

Saltpetre, was eagerly picked up. Prices in December 11½@12½ per lb.

Seeds.—Timothy opened at $1.80@1.90, and the supply equal to the demand.

Clover.—Closing price 8 cents.

Flax.—Demand good, and prices stiff. $2 paid for finest samples.

Candles.—Imports show a considerable decrease, and the market has been stiff.

Imports, 1861	$20,002
" 1862	9,662

Tobacco, pipes.—Little fluctuation. Prices closed at $1.40@1.50, for Henderson's T. D.

Starch.—Canadian is pressing out British manufactured. Prices closed, Glenfield 9c. to 14c. per lb. Canada 6 to 8c.

Imports, 1861	$7,780
" 1862	5,457

Tallow.—Trade dull. Prices closed heavily in December at 9½.

Varnishes.—Advanced. Turpentine No 1. Varnish quoted at $3@4.50.

Vinegar.—Imports of English not so heavy. French full supply. Prices have closed higher, viz:

English	40@45 cts. per gal.
French	45@50 " "
Imports, 1861	11,634 gallons.
" 1862	12,826 "

Salt.—Had many fluctuations. The season opened for Liverpool, bag at 72c., in June saw it at 47½c., when an American demand caused a rally, and a constant rise continued throughout the season. Closing for Liverpool, bag $1.35@1.40, (coarse.)

Oils, vegetable and fish.—Linseed rose from deficiency of crop, from 85c. in January, to $1.25 in October. A fall then took place, and prices closed at $1.10 to 1.15 for boiled, and $1.05@1.10 for raw. Fish oils were scarce. Cod closed at 71 to 74c. Whale at 60 to 65c. Olive fluctuated closing firm at $1.30.

Indigo.—With light stocks, prices declined and the market closed heavy at 80@95 cents per lb. for Madras.

Imports in 1861	$11,590
" 1862	41,680

Naval stores.—Turpentine has ruled high, and stock light. Rosin has advanced, and the market is bare. Price of the former closed at $2.75@3.00 per gallon. Of the latter there was none.

Coal.—Of American the stock is smaller than usual. Of English, an increased quantity has been imported.

Prices of—

Steam closed at	$5.50@ 6.00 per chaldron.
Lehigh " "	9.00@10.50 per ton 2,000 lbs.

Raisins, currants, figs, prunes, nuts and almonds.—Of the former the prices have been low, and demand small, the Western houses getting their supplies at New York. Currants not in demand, and prices closing at 4 cents below those of last year. Figs and prunes sold satisfactorily all the year. Nuts and almonds scarce, and bringing full prices.

The imports of dry fruit were:

1861	$77,431
1862	161,595
Green—	
1861	$79,083
1862	151,031

Wines and spirits.—Brandies have been reduced in consumption. First class brands ranged at 13sh. 6d. to 14sh., duty paid. Stock light and holders firm.

Gin.—Prices have gone up 5 cents per gallon. Old stocks were forced off at 80@95c. Case gin in demand at 12sh. 6d. at 15sh. green case, red, 21sh.@28sh. 9d. Stocks light.

Rum.—Prices rule too low to favor importations from Jamaica.

Scotch Whiskey.—Limited, and scarcely quotable.

Wines.—A good demand existed, but not equal to that of former years.

Canada Whiskey.—The trade is prosperous, with a sharp competition, lowest price 65 cents, highest 70 cents, (high wines.)

Ale and porter.—The import of this article has almost ceased, the home supply, a superior quality taking the place of the foreign. Prices advanced 2 cents per gallon.

The imports of—

Wines were in 1862 in wood		$189,226
" " " bottles		35,829
Whiskey, " " "		6,175
Gin, " " "		22,973
Rum, " " "		15,920
Brandy, " " "		104,184
Ale, " "	in wood	2,884
" " "	in bottles	17,024

The Money Market has been well supplied. Exchange plentiful, and of a first class character, and American silver become a drug. Rate of interest 6 to 8 per cent.

New York and Harlem Railroad.

(*Abstract of Annual Reports; years ending 30th September.*)

LENGTH OF RAILROAD.

Main Line—New York City to Dover Plains	80.17 miles.
Albany Extension—Dover Plains to Chatham	50.58 "
Branch—Melrose to Port Morris	2.12 "
Total length of main line and branches	132.87 "
Length of second track and sidings	29.06 "
Equivalent in single track	161.93 "

ROLLING STOCK.

Locomotive engines		32
Cars: 1st class passenger (8-wheel)	35	
" city passenger (4-wheel)	42—	77
" baggage, mail and express (8-wheel)		13
" freight (8-wheel)		428

STATEMENT OF SHARE CAPITAL.

Common, 42,171 shares	$4,217,100	
Preferred 7 per cent., 15,000 shares	1,500,000	$5,717,100

STATEMENT OF MORTGAGE DEBT.

1*st mortgage 7 per cent. coupon bonds* $3,000,000

—dated 1st May, 1853, and payable, coupons semi-annually, 1st May and 1st November, and principal, 1st May, 1873. Secured on the whole road and sundry lots of ground in the city of New York and along the line.

2*nd mortgage 7 per cent. coupon bonds* $1,000,000

—dated 1st August, 1854, and payable, coupons semi-annually, 1st Feb'y and 1st August, and principal 1st August, 1864. Secured on the same property as the 1st mortgage and additionally on the rolling stock. The company intend to redeem these bonds at maturity from the proceeds of sales of real estate not used for railroad purposes.

3*rd mortgage 7 per cent. coupon bonds* $1,000,000

—dated 15th January, 1858, and payable, coupons semi-annually 1st Jan'y and 1st July, and principal, 1st January, 1868. Secured on the same property as the 2nd mortgage bonds and further by a lien upon the Albany Extension Certificates to the amount of $1,500,000.

The remainder of the bonded debt of the Company amounting to $565,487 are plain bonds, and excepting $80,000 due in 1867, and $106,000 due in 1872, have already matured.

Albany Extension 7 per cent. Certificates	$2,000,000	
Less amount converted into stock and bonds	1,779,000	
Amount outstanding 30th September, 1862		$221,000

These certificates, which were issued for the construction ofthe road north of Dover Plains, are now being exchanged for the sinking fund bonds of the company.

COST OF ROAD AND ROLLING STOCK.

Construction (including land and land-damages) of the road from New York to Dover Plains	$7,385,739
Construction etc. of Albany Extension (represented by Albany Extension Certificates of which the company hold $1,779,000)	2,000,000
Locomotives and fixtures and snow-plows	306,411
Horses and stable equipage	52,507
Passenger and freight cars	291,886
Total	$10,036,544

Besides the road and equipment as above represented the Company own—

Real estate in the city of New York and elsewhere	$1,137,014
Less amount of mortgage thereon	218,573
Net value of real estate	$918,441

GENERAL STATEMENT (approximate).

Share capital common	$4,217,100	Cost of road and equipment (as per statement above)	$10,036,544
" " preferred	1,500,000	Real estate in New York and elsewhere not used for railroad purposes	1,137,014
Bonded debt	5,565,487	Balance (not accounted for)	633,311
Floating debt, being bills payable less cash on hand	84,709		
Albany Extension Certificates outstanding	221,000		
Real estate mortgages	218,573		
Total	$11,806,869	Total	$11,806,869

Statement of capital account yearly since the completion of the road to Dover Plains in 1848:

Year.	Share Capital.	Bonded Debt.	Floating Debt.	Total.
1848	$3,026,680	$350,000	$200,887	$3,579,567
1849	3,388,750	350,000	142,693	3,881,443

American Railroad Journal.

Saturday, May 2, 1863.

Stock Exchange and Money Market.

One of the most remarkable circumstances attending the present struggle for the maintenance of the Union, is the ease of the Money Market, and the facility with which the National Government obtains all the money it needs for its vast expenditures. In the closing period of Mr. Buchanan's weak and faltering administration, the Treasury found considerable difficulty in raising a small amount of money at 12 per cent. interest; and as the war broke out, the leading British journals took care by every means in their power to prevent any successful efforts on our part to obtain any money abroad. Their readers were admonished to beware of federal loans, and taught to expect bankruptcy and a collapse on this side the Atlantic. In order to secure the accomplishment of these predictions, every aid and facility were extended to the South, and even now the delusion of our failure is attempted to be kept up with a persistent injustice, which is as undeserved as it is harmless. While our system of finance has been assailed with extreme bitterness, that of the South, which is without any basis whatever, is sustained and commended. But never did any nation in any struggle for its life loom up more grandly than our own. We never knew till now our great strength and resources. So far from seeking aid from abroad, as the Confederates have been obliged to do, we have all the means at hand of our own to sustain ourselves, and the Treasury has actually rejected several important offers from

foreign continental capitalists. There is no truth in the rumors that we have any agents abroad to consider or accept them. Mr. Aspinwall, now in England, has authority to expend and not to borrow money, and Mr. Walker who has followed him may be commissioned to make certain investigations, but his mission is esteemed in certain intelligent quarters, rather the result of political strategy than a trust of a National character.

Side by side with this advance of the public credit, is that of our armies. That of the Potomac is at length on the move, with a very different inspiration from what it has hitherto enjoyed, and from the west and southwest comes the news of important and extensive successes.

The ease of the Money Market so advantageous to the Government, is equally so to the people who sustain it. An immense number of buildings is being erected all over the country, and numerous manufactories constructed to supply the demand for fabrics occasioned by the war. Money was never cheaper than at this moment, and if we have inflation, industry, production and distribution are running such a race with it, that they preserve their equality and prevent any ill consequences. This is the solution of the problem, which troubles so many theorists at home and abroad. As long as our currency is absorbed and used in productions and exchanges, it will never be in excess. And this too is the difference in our favor which foreign economists do not understand. If there is an excess of currency, it is immediately solidified and made permanent, by investments which fasten themselves to the soil and rise in form of towns, villages and cities, spread over it as canals and railways, fructify it in "fresh fields and pastures new," and everwhere enrich individuals and States. Even the money paid to our gallant soldiers is gathered up in large quantities, and sent back to their families with a thrift and forecast, unknown in foreign armies. In short, the invincible enterprise, industry and persistence of the American character, rise superior to all ordinary obstacles, and bear the nation on its way in war as in peace to the sure goal of a great superiority. No one who has looked at the history of the past two years can fail to see, that in spite of the politicians who seek to turn alike success or disaster to their own personal advantage, in spite of the miserable mismanagement which has been shown in the general conduct of our military and naval affairs, in spite of the intrigues of ambitious men to make the future as the past conducive to their own ends, seeking to turn the leagued loyalty of the country into machinery for their own advancement, in short, with all the disadvantages which war gives to certain classes to advance themselves at the expense of others, there is a solid, true, brave, hopeful and honest population at the base of our country and institutions which cannot be moved, and which, whenever it crops out, shows its granitic and ever-enduring character. We repeat, therefore, that our financial policy has been a complete success. The people find they are equal to any demand of money that may be made to uphold the system under which they have prospered. Small difficulties are cheerfully met or postponed. When the war is over we shall see how to provide against them hereafter. We must expect abuses in times like these.

Government stocks and Treasury paper continue to be in great favor, the new 5-20's being the favorite investment, and likely to be entirely absorbed. It is a curious fact that our soldiers are largely investing their earnings in this security, and orders are coming in from all quarters. The next coupon will begin to run from the 1st of May, and this will probably lead to immediate and heavy conversions for obvious reasons.

The deposits with Mr. Cisco continue to be large, of which heavy sums are placed for conversion. In Philadelphia, the amounts received for this purpose are beyond all expectation, and the limit is nearly reached. Money is very easy and the rise or fall of gold does not affect any substantial transactions in anything. With the exception of a few articles affected by the war and the tariff, prices are not much enhanced, and all the comforts of life are plentiful and cheap.

Railway shares are firm, and holders confident. Among those which have attracted speculation is the Harlem, which after a long obscurity, seems coming into greater sunshine than ever. This road has always been a favorite for many reasons, its pleasant and beautiful route, its clean and comfortable cars, its respectable and well-behaved conductors, and from its being managed with such scientific skill and knowledge of what railways may do when properly handled. It has been long staggering under its former load, for which the present direction is no way responsible, but it has been working along with an honest courage which is about to be rewarded. The Madison avenue and Broadway grants, the connection with the Housatonic, and the Northern and Canadian lines, the Hudson river bridge grant, the construction of an independent line from Chatham to Albany, and finally the successful funding of its debt in long bonds, and the settlement and liquidation of its various indebtedness, are likely to place its affairs in such a position that it may take rank with the longest and best lines in the country. We have not the slightest interest in the road, but it gives us pleasure to do justice to good railway management like this. In the years 1833 and 1834, this JOURNAL entertained similar views as to its franchises that it does now. Mr. Chase has gone to Boston. While here he has been surrounded with bankers and politicians all proffering advice and support.

It is stated that quite a number of produce bills had been returned by the last steamers. We have not heard the particulars.

In another column will be found S. Hallett & Co.'s *Circular*, which presents the Harlem Company in a favorable light, independent of its relations with the Broadway franchise.

We publish a full statement of the commercial condition of Montreal for the year 1862, made up from the columns of the *Gazette*. This thriving city presents a most favorable aspect from the reports of its Board of Trade, and we rejoice to hear of its prosperity.

The Chicago and Alton Railroad Company will pay the coupons due May 1, on the Preferred First Mortgage Sinking Fund Bonds at their new office, corner of William and Pine streets.

The coupons due May 1, 1863, from the funded coupon bonds of the Chicago and Northwestern Railroad Company will be paid on presentation at the office of the company. The coupons from registered bonds will be paid only to the parties in whose name the bonds are registered, or upon their written order.

The second mortgage coupons of the preferred and income bonds of the St. Louis, Alton and Terre Haute Railroad Company, due 1st May, will be paid at the Bank of North America.

The coupons for interest, due May 1st, on the second mortgage bonds, and on the sinking fund or interest bonds of the Toledo and Wabash Railroad Company, will be paid at the Bank of the Republic.

Coupons of the first mortgage bonds of the N. Y. and Harlem Railroad Company, due May 1, will be paid at the office of that Company on and after that date.

The coupons due May 1, on the mortgage bonds of the Indianapolis and Madison Railroad, will be paid at the office of J. & S. Ferguson, No. 35 Pine street.

The coupons of the Evansville and Crawfordsville Railroad Company, due May 1, will be paid at No. 56 Wall street.

The Buffalo, New York and Erie Railroad Company will pay the interest due May 1, 1863, on their second mortgage bonds, at the Bank of Commerce.

The coupons due May 1, on the mortgage bonds of the Cleveland and Pittsburgh Railroad Co., will be paid at the office of Wm. C. Gilman & Son, No. 46 Pine street.

Coupons on the bonds of the Long Island Railroad, due May 1, will be paid at the Bank of the State of New York.

The Manchester and Lawrence Railroad has declared a dividend of $4 per share, payable May 1.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns :—

Railroad Earnings—Weekly.

The traffic of the Great Western Railroad for the week ending April 17, 1863, was as follows:

Passengers	$21,450 72
Freight and live stock	31,284 02
Mails and sundries	1,260 80
Total	$53,945 54
Corresponding week of 1862	49,564 29
Increase	$4,381 25

The earnings of the Grand Trunk Railway for the weeks ending April 11 and April 18, 1863, were:

	April 11.	April 18.
Passengers	$25,062 53	$25,992 29
Mails and sundries	4,200 00	3,500 00
Freight and live stock	43,192 06	41,628 71
Total	$72,454 59	$71,121 00
Same weeks, 1862	86,520 41	66,835 69
Decrease	$14,065 82	Inc. $4,285 31

The earnings of the Chicago and Alton Railroad for the 3d week of April, 1863, were:

Passengers	$12,107 37
Freight	24,029 37
Sundries	1,035 83
Total	$37,172 57
Same week last year	17,571 95
Increase	$19,600 62

The earnings of the Galena and Chicago Union Railroad for the 3d week of April, 1863, are:

Freight	$22,487 43
Passengers	8,379 17
Mails, etc.	1,250 00
Total	$32,116 60
Same week, 1862	19,501 11
Increase	$12,615 49

The earnings of the Michigan Central Railroad for the 3d week of April, 1863, were $57,011 30
Same week, 1862 40,351 45

Increase $16,351 85

The earnings of the La Crosse and Milwaukee Railroad for the 2d week in April, 1863, were $23,239 24
Same week, 1862 11,140 92

Increase $12,098 32

The earnings of the Toledo and Wabash Railroad Company for the 3d week of April, 1863, were $31,339 36
Same week, 1862 18,993 14

Increase $12,346 22

The earnings of the Chicago and Rock Island Railroad for the 3d week of April, 1863, were $34,496 00
Same week, 1862 19,480 00

Increase $15,016 00

The earnings of the St. Louis, Alton and Terre Haute Railroad for the 2d week in April, 1863, were $28,511 40
Same week, 1862 15,915 83

Increase $12,595 57

The earnings of the Cleveland and Toledo Railroad for the 3d week of April, 1863, were $25,148 00
Same week, 1862 19,149 00

Increase $5,999 00

Notice to Contractors.

The Albany and Susquehannah Railroad Company will receive proposals, until the 2d of June, for the Grading, Masonry, Bridging and Fencing, of 31 miles of their road, extending from Richmonville, in Schoharie Co., to Oneonta, in Otsego Co. Plans, profiles, etc., will be ready on the 25th of May. See advertisement.

New York and Harlem Railroad.

The immediate interest which centres in this road grows out of the authority recently conferred upon the company by the City Council to lay down a city passenger track in Broadway, the great thoroughfare of the city, in obedience to their legislative privileges granted to the company in 1832, and subsequently confirmed, to construct, with the consent of the City Council, railroads through *any* street in the city of New York. The value of such a privilege, or franchise is so enormous, that its existence, when discovered upon the statute book, was enough to cause an excessive rise in the securities of the company. Hence the rapid appreciation in the value of the stock several weeks ago. It subsequently declined under the apprehension that the City Council might not carry out the legislative provisions in favor of the company. There was almost instantly a strong rally in the stock, when it became apparent that the proposed action of the legislature in granting, without compensation to the city, the right to construct a railroad in Broadway would raise an issue between that body and the City Council, by which the latter would seek to make available to the city Treasury, what by legislative action at Albany, was to be secured to members of the legislature and a crowd of followers. The value of the franchises of the four street railroads already constructed in the city, cannot be estimated at less than $8,000,000, all of which vast sum has been the profits of their lucky recipients. Never before was such a rich placer opened to rapacity, consequently the legislature for years past, has been the theatre of the most vigorous and desperate contests for similar grants. Some have been successful, but the great prize of all had still remained untaken. The opposition to a road in this imperial highway had been as formidable as the efforts in its favor till the present year, when a master spirit in such enterprizes, who had already monopolized two similar grants and grown confident by success, appeared in the field. It was very soon seen that he had the legislature, and that the grant would be made, worth millions to its promoters as an indirect and more efficient means of taxing our citizens. Remonstrances from them went for nothing, when our City Fathers cast about for some means of self-defence and protection. It was found but with their consent, the legislative right to construct a city passenger road in Broadway was perfect. All that was wanting was the sanction of the city Government. The only question remaining to be settled was the terms upon which the grant to the Harlem Company should be confirmed. The compensation for the franchise was fixed at 10 per cent. of its gross, which will probably equal fully 25 per cent. of its net earnings. This rate exclusive of the tax on the cars will yield to the city Treasury $200,000, a capital sum of about $3,000,000, the compensation which the city will realize for granting the privilege of constructing some three miles of the road. This was the prize struggled for, and the prompt and decisive action of the city council in view of the impending danger was most creditable to good sense, and entitles it to the heartfelt thanks of every tax payer. It was a masterly stroke of policy, and it excites unusual applause even from the opponents of the road. All see that the construction of such a work is only a question of time, and all rejoice in the defeat of a corrupt lobby, and that the franchise is now in the hands of a company standing deservedly high in popular estimation, whose road is a model of its kind and from whom the public will receive every accommodation and the city every security that could be asked.

Such is the present position of this struggle that has so excited our people, rendering Harlem the all engrossing subject in the financial circles. The Broadway bill that passed the egislature is in the hands of the Governor, where it is likely to remain, *unsigned*. If so, this vexed subject is forever removed from the legislative halls. But it is not at all likely that the city council will stop with granting to the Harlem Company the Broadway franchise. By conferring it upon this company, it has realized to the city some $3,000,000. It should at once extend in its favor grants for roads in *all* other streets needing them, upon proper terms, the city receiving a proper compensation, and guarding its own rights, as well as the interests of the public. This is the only mode in which any compensation can be had for the use of our streets for city Railroads. In the Harlem Company the city has a reputable and responsible party with which it can deal—and there never was a more propitious moment in which to secure to the city beyond repeal its proper rights. All these rights should be granted before another legislature meets. The city may in this way add an enormous sum to its annual revenues, diminishing to an equal degree the burdens of taxation, which all are now feeling to be oppressive.

While the city has been more fortunate in the contract closed with the Harlem Company, the value of the recent grant to the latter can

be hardly over estimated. This company has already the right to extend its line through Madison Avenue, the construction of which is commenced, so as to bring it in direct connection with the Central Park. Such a line united to the Broadway Railroad, would be equivalent to a monopoly of the city travel to this great pleasure ground, the two would pass directly in front of nearly all our great public houses. The prolongation of the main line of the Harlem through the whole extent of the city, would give that road a decided advantage over any other line for travel going North as well as East. It would in fact give advantages which hardly any railroad in the world, which certainly none in the United States, possesses. It cannot fail to double its traffic during the first year after the completion of its Broadway line.

The Harlem is a most valuable property even without the Broadway grant. Forty second street, to which the trains can run at full speed, will soon be the centre of our metropolis, the route of this road is the great northern gate into it. The road is not only thoroughly constructed and equipped, but it possesses a real estate not wanted for its business, the value of the whole of which cannot be less than $1,500,000. The following is a schedule of a portion of the property of the company, exclusive of the track and equipment:

Block of lots and depot between Fourth avenue and Madison, and 26 and 27th streets, full block.

Block between Fourth and Madison, between 32d and 33d streets, full block.

Block beyond, between Fourth avenue and Madison, ½ block in depth.

Block opposite, between Fourth avenue and Lexington, full block.

Block between 33d and 34th street, east side of Fourth avenue, full block.

Block between 42d and 43d to Madison avenue, half block, with freight and engine houses thereon.

Block opposite, between the same streets, block 110 feet deep.

Block between 43d and 44th, same side, 110 feet deep.

Block between 125th and 126th streets in Harlem 100 feet in depth.

Water front on the Harlem river, both sides 200 feet, connected with the proposed ship canal across the island.

The property and station buildings at Tryon Row.

Sixty acres of land, eight hundred feet of wharfage in deep water at Port Morris, connected by a track with the main line.

Here is the ship terminus of the route, having facilities for transhipment of freight to ocean vessels not enjoyed by any other company in this State. Here is to be the berth of the Great Eastern, and in case of any foreign difficulties, will be the point from which vessels destined for the sea, must take their departure to avoid a blockading fleet off Sandy Hook.

The company are now taking measures to sell its surplus property, preparatory to the removal of its station and offices to 42d street. The proceeds will be applied to the payment of its funded debt, reducing the present amount to something like $4,000,000. When this is accomplished, and the proposed additions and improvements are completed, the Harlem Railroad cannot fail to stand first among our great lines, both in the extent of its income, and in the value of its securities.

While we have given full importance to the possession of the Broadway franchise, and can well see the enormous in come to be derived by the Harlem Company from that branch of its business, for in that street every corner will be a station and every house a depot yet, it is proper to consider one contingency affecting it. There is no doubt a serious litigation yet to be encountered. While lawyers seek briefs, and judges can grant injunctions, it may be expected that the disappointed parties in this case will contest the right of the Harlem Company under the grant of the Common Council, step by step.

But this will not in the least impair the great value of the road arising from other and undisputed causes.

A short connection between the Harlem and Housatonic from Dover to Kent, authorized by the Legislatures of New York and Connecticut, will enable the former to add a hundred miles of road to its present line, traversing the beautiful and fertile valleys of Berkshire, and diverting its traffic from its present circuitous route *via* Bridgeport.

A further connection from the Northern Terminus at North Adams, of but a few miles, will add to this line that of the Western Vermont road, and open up the shortest route between New York and Montreal.

The Harlem Company has never abandoned the idea of having an independent line of its own between Chatham Four Corners and Albany, and it has the right by law to cross the new bridge the same as the other companies. Should an amalgamation of the Central and Harlem become a necessity, for reasons obvious enough in the judgment of many, this continuation of the line from Chatham Four Corners will be of immense advantage and great economy.

The receipts of the last seven months, are so much in advance of those for the same period the last year, that for the fiscal year ending the 30th of September they will be fully equal to $1,400,000.

A plan of funding the debt shortly coming due, as well as the various classes of the other indebtedness, which circumstances now favor, which is eminently practicable, and is being actually carried out, is all that is now wanting to place the financial operations of the company in the most perfect order, and on an equality with the reputation the road deserves for its scientific and economic management, its increas ing business, and its connection with the Western and Northern routes which will place it in the front rank with our great lines.—*Samuel Hallett & Co.'s American Circular.*

LEAVES FROM THE DIARY OF AN ARMY SURGEON, or Incidents of Field, Camp and Hospital Life.—By Thomas T. Ellis, M. D., Late Post Surgeon at New York, and Acting Medical Director at Whitehouse, Va., Duodecimo, 312 pp. JOHN BRADBURN, Publisher, N. Y.

This is a new work by a medical gentleman, who had been a staff surgeon in the British Army, and seen active service at the Cape, before he entered ours. It is full of interest, both to professional and unprofessional readers, and gives some curious details which have never been made public, though they throw much light on events already generalised into history. This volume settles the question as to the personal bravery of GEN. MCCLELLAN, as it describes him on several occasions being in the hottest of the enemy's fire.

Atlantic and Great Western Railroad.

The Jamestown *Journal* says: Trains on the Atlantic and Great Western Railroad now run daily through from Salamanca to Ravenna, Ohio. Much of the western travel and freight are beginning to centre on this route. The earnings of this road for the week ending April 3d, were $69,010.

NOTICE to CONTRACTORS.

ALBANY AND SUSQUEHANNA RAILROAD. —Sealed Proposals will be received by the undersigned, at the Office of the Albany and Susquehanna Railroad Company, No. 73 State street, Albany, until Tuesday, the 2d day of June next, at 10 o'clock A. M. of that day, for the Grading, Masonry, Bridging and Fencing of 31 miles of the line of said railroad, extending from Richmondville in Schoharie County, to Oneonta, in the County of Otsego.

The line will be divided into sections of convenient length, and proposals will be received for single sections or for the whole line.

The line will be ready for examination by contractors on and after Monday, the 25th day of May next, and Maps, Profiles and Plans, with Specifications, may be examined at the Engineer's Office, in Albany, on and after that date. Blank proposals with all necessary information will also be furnished to those wishing to propose for work.

Proposals should be enclosed in an envelope and endorsed "Proposals" and directed to the undersigned.

The proposals which may be received in pursuance of this notice will be opened by the undersigned and canvassed, and the results reported to the Directors to aid them in making a proper award of the work.

Parties proposing, who are unknown to the undersigned, will be required to give satisfactory references.

The right is reserved to reject any or all proposals, as may be deemed for the interests of the Company. Albany, April 24th, 1863.

5t18 C. W. WENTZ, Chief Engineer.

AN INVALUABLE POCKET GUIDE

FOR THE ENGINEER AND MECHANIC!

THE

Mechanic's & Machinist's

PRACTICAL

BOOK OF REFERENCE

Containing Tables and Formulæ for use in Superficial and Solid Mensuration; Strength and Weight of Materials, Mechanics, Machinery, Hydraulics, Hydrodynamics, Marine Engines, Chemistry, and Miscellaneous Recipes. Adapted to, and for the use of all classes of Practical Mechanics. Together with the

Engineer's Field Book

Containing formulæ for the various methods of Running and Changing Lines, Locating Side Tracks and Switches, etc. Table of Radii and their Logarithms. Natural and Logarithmic Versed Sines and External Secants. Natural Sines and Tangents to every Degree and Minute of the Quadrant, and Logarithms of Natural Numbers, from 1 to 1,000.

BY CHARLES HASLETT,
Civil Engineer.

EDITED BY CHARLES W. HACKLEY,
Professor of Mathematics in Columbia College, in New York.

Issued in a compact pocket volume of 520 pages, containing 176 diagrams, bound in morocco, pocket-book form, PRICE TWO DOLLARS. *Copies mailed free of postage on receipt of price.*

The work is eminently a PRACTICAL **POCKET GUIDE** to ALL CLASSES OF **Mechanics** and **Engineers.** As a book for practical use in field work, it is confidently believed that this is more direct in the application of rules and facility of calculation than any work now in use. The original portion of this part of the work is submitted to the profession, fully confident that its use will be practical proof of its superior merits.

The tables and examples have been prepared with great care, and their accuracy may be relied upon. Further information can be derived from the circular containing the contents in full, which will be sent on application to the publisher. Inducements are offered to clubs of six or twelve, for particulars of which also apply to publisher,

JAMES G. GREGORY,
No. 46 Walker St., New York.

Burden, Hubbard & Co.,

MACHINISTS,

MANUFACTURERS of Horizontal, Portable and Hoisting Steam Engines, Sugar Mills, Saw and Grist Mills, Boilers, Hydraulic Presses, Pumps and Gearing for working mines, etc., etc. No. 102 Front st., BROOKLYN, N. Y.

NEW YORK, HARLEM & ALBANY R. R.

For ALBANY, TROY, NORTH and WEST.

ON and after Monday, November 17th, trains will leave as follows:

For White Plains—8.15 A. M., from Twenty-sixth street depot, stopping at all stations.

For Albany—10.30 A. M., Mail Train, from Twenty-sixth street depot, stopping at Williamsbridge, White Plains, and all stations north to Chatham, and at Kinderhook, Chatham Centre and Schodack.

For Williamsbridge—11.15 A. M. and 8.30 P. M., from Twenty-sixth street depot, stopping at all stations.

For White Plains—2.30 and 5.00 P. M., from Twenty-sixth street depot, stopping at all stations.

For Pawlings—4.00 P. M., from Twenty-sixth street depot, stopping at all stations except Yorkville.

For White Plains, 6.15 P. M., from White Street depot, stopping at all stations.

RETURNING WILL LEAVE

Williamsbridge—5.30 A. M., 1 P. M. stopping at all stations.

White Plains—6.10, 7.15, 10.00 A. M. and 4.45 P. M., stopping at all stations.

Pawlings—6.20 A. M. stopping at all stations north of and at Fordham.

Albany—10.30 A. M. Mail Train, stopping at all stations north of and at White Plains, Williamsbridge, Kinderhook, Schodack and Chatham Centre on signal, for New York passengers only.

JOHN BURCHILL, Superintendent.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of **SMITH'S AIR LIGHT FOR RAILROADS**, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, **91 Nassau st.**, or by addressing

CHAS. W. WELSH,
Secretary.

NOTICE to CONTRACTORS.

ENGINEER'S OFFICE OF THE HUDSON RIVER BRIDGE COMPANY AT ALBANY, April 13, 1863.

Sealed Proposals will be received by the undersigned, at the Engineer's Office, in the Exchange Building, in the City of Albany, until the 9th day of May next, for constructing the substructure, consisting of Abutments, Piers, Embankments, etc., for THE HUDSON RIVER BRIDGE AT ALBANY.

The Company reserve the right to accept or reject any proposal, without regard to the terms. Satisfactory references must accompany the bids. Competent security for the fulfillment of the contract and payment of laborers' wages, will be required on entering into contract.

The work is of sufficient importance to deserve the attention of responsible contractors, and proposals from no others will be entertained.

Plans and specifications of the work will be ready for inspection on and after the 1st day of May next, at this office, where full information will be given.

By order of the Board.
GEO. E. GRAY, Chief Engineer.

10 NEW BOX CARS,

4 ft. 8½ in. gauge, 28 ft. long, First Class Cars, Iron Trucks, 3x1 Iron, Wrought Iron Buffers, Rubber Springs, Hammered Axles 280 lbs. each.

DIRECTLY OPPOSITE THE CITY HALL.

FOX LATHES.

F. W. BACON & CO.,

No. 23 PLATT, corner of GOLD ST.,
NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. GEO. H. FOX & Co., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT REOILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downwards beyond the prescribed speed.

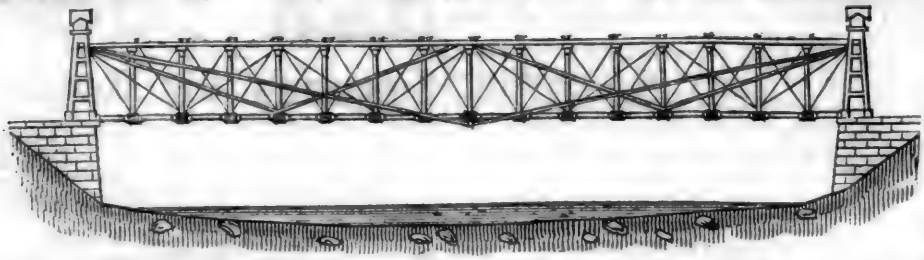
They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Pickett's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packing, Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.



Having made this branch of Engineering a SPECIALITY the past ten years with uniform success, they confidently offer their services to those requiring such aid.

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS**, etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.

Address **HENRY RUTTAN,**
Coburg, Canada.

FINK'S PATENT IRON RAILROAD BRIDGE.

THE undersigned is prepared to manufacture and build in any part of the United States and Canada, at reasonable terms, **FINK'S PATENT IRON BRIDGE** in spans from 20 to 300 feet. The same is favorably known, well tested and already extensively introduced, is stronger and more economical than any other Bridge now in use, requires no repairs, and no adjustment, but is perfectly adjustable. For plans and particulars apply to

AMES IRON WORKS,
OSWEGO, N. Y.,
SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.

An imperfect sketch of our smallest size Machine.

PAYE'S PATENT FORGE HAMMER, A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Crampton, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Kaigh's Point, Phila.; Mallory & Cottrell, Mystic, Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; N. Guinness, Albany; Sweet Brothers, Syracuse.

An Invention of Rare Merit.

LONG WANTED, AND FOUND AT LAST!

A Kerosene Lamp Chimney, Easily Cleaned

AND WHICH

WILL NOT CRACK OR BREAK

FROM SUDDEN CHANGES OF

TEMPERATURE.

THE CHIMNEY in common use breaks from unequal expansion and contraction, caused by the upper portion becoming much more highly heated than the lower portion. This constant liability of the Chimney to be broken by being suddenly cooled or "over-heated," is entirely removed by a unique and beautiful invention, BROWN'S METAL TOP LAMP CHIMNEY, which, being made in accordance with the simple law of expansion and contraction, is found to be almost "fire-proof," as far as heating by the flame of the lamp is concerned.

The clear, positive superiorities of the NEW LAMP CHIMNEY over the old style, are—

1. It will not crack or break from sudden changes of temperature, or "over-heating."

2. The top can be instantly removed, and the glass wiped perfectly clean in a moment WITHOUT WETTING.

3. It is shorter than the common chimney, therefore less liable to accidents and more convenient for carrying about the house, it is of elegant proportions and a decided ornament to the lamp, which will be found to burn with a clear, steady and beautiful light.

It is really the ideal of perfection in a lamp chimney, and after using one for an evening you will wonder that you could tolerate the old expensive style.

A "BROWN'S METAL TOP LAMP CHIMNEY," **IS WARRANTED, with ordinary care, to last just as long as the lamp on which it is used.**

Price (with a small SHADE for common size,) Zinc-top, 25 cents, Brass, 31 cents, Silver-Plated, 50 cents.

Dealers will be furnished, per Express, with a SAMPLE BOX containing one-half dozen Chimneys, assorted styles and sizes, with circulars, colored show cards, Price list, etc., on receipt of $1.25.

BROWN'S

Metal Top Lamp Chimneys

ARE MANUFACTURED ONLY BY THE

NEW LAMP CHIMNEY MANUFACTURING COMPANY.

The Gold Mines.--Their Guarantee for the National Future.

It has been thought until very recently, that California was the Dorado of this continent, and we could expect no further supplies from that quarter, when the nuggets were exhausted and the placers ceased to yield. Attention was therefore turned to the most economical method of converting what remained of the precious metals, and quartz mining, and the machinery for crushing it were regarded with a new interest. So that the extraction of gold was beginning to be considered like any other regular business, with a certain moderate profit, rather than a lottery where there were nothing but prizes.

The late report however of the Secretary of the Interior has determined the fact, that Fairy land is not yet extinct. Of Colorado he states the fact, that gold is now "found on the loose soil of the surface, in pieces from a grain to several ounces." "Idaho and Washington Territories are exhibiting still greater richness, while Arizona, New Mexico, Nevada, Oregon, Utah and even Nebraska are all rich in the precious minerals. Thus the United States possesses a gold region of at least 17° of latitude, from the 31° 30′ to the 49th°, and as many of longitude, embracing one million of square miles. This vast region says the Commissioner of the General Land Office is traversed from North to South on the Pacific side, by the Sierra Nevada and Cascade mountains, then by the Blue and Humboldt; on the east by the double ranges of the Rocky mountains, embracing the Wasatch, the Wind river chain, and the Sierra Madre, stretching longitudinally and in lateral spurs; crossed and linked together by intervening ridges, connecting the whole system by five principal ranges, dividing the country into an equal number of basins, each being nearly surrounded by mountains and watered by mountain streams and snows, thereby interspersing this immense territory with bodies of agricultural lands adequate to the support of miners not only, but a dense population. These mountains are literally stocked with minerals, gold and silver are found in the greatest profusion over this immense surface, and daily brought to light by new discoveries. The precious metals are found imbedded in whole mountains of quartz, rich washings marking the pathway of rivers and floods."

Such astounding statements as these almost take away one's breath. Yet they are literally true. To what reflections do they not naturally lead us, and especially us of the North who are to profit almost exclusively by the possession of this territory and these treasures. Of these vast advantages, the Southern States now in rebellion against the government will be deprived, unless they return to their allegiance, and the old flag under which these territories were obtained.

The first method of their complete development is that of transit. California has the sea and the Isthmus railway at her command. Her population is 365,439. The territories have advanced in numbers without any advantages of transit whatever.

Colorado	had in	1860	34,277
Dakotah	"	"	4,839
Nevada	"	"	6,857
Nebraska	"	"	28,841
New Mexico	"	"	87,033
Utah	"	"	40,273
Washington	"	"	11,594
Idaho	"	"	20,000
Arizona	"	"	6,483

Some idea of the vastness of these territories may be obtained by a comparison of their area with the old and well known States.

Utah has 61,000 square miles, and is as large as Virginia and of the size of the six New England states. Idaho formed in the present year, has 326,373 square miles, and is equal to six such states as New York. Dakotah with 148,982 miles is three times as large as New York, Arizona has 126,141 square miles, New Mexico 121,201, these three being equal to eight of the seceding states West of the Mississippi. Colorado has 104,500, Nevada 81,539, Utah 106,382, Washington 69,994, Nebraska 75,995—a total of 1,414,992 square miles, or 905,694,880 acres of which 54,199,676 have been actually disposed.

One remarkable feature of the new territories lying between 40° and 49° North is the mildness and uniformity of their climate. It is the opinion of the appropriate departments at Washington city that the yield from the gold region we have thus described, will not fall short the present year of one hundred millions of dollars. If California with a population of 361,000 produces 70 millions, a year, then the nine territories named, would with an equal population each, produce SIX HUNDRED AND THIRTY MILLIONS of dollars per annum. And who and where is the person who will deny the possibility of this result. It is far more likely that with the Pacific Railroad in operation, the population would increase more rapidly than that of California, which is accessible to emigrants and travellers only by a month's voyage or overland journey, while these territories could be reached with far less danger and expense in five or six days.

It needs no argument then to show the propriety and necessity of the immediate construction of the Pacific Railroad, and we are happy to assure our readers from our personal knowledge, that the project is very near its realization, by far seeing capitalists and patriotic and enterprising American citizens.

We see two other results of immediate importance.

One is the flow to this country of a vast emigration from Europe. Beyond the natural tie of birth there is no reason whatever that the industrious and tax ridden people trans-Atlantic should remain there to uphold a caste of titled rulers who live in luxury at their expense, and shed their blood and take their earnings to sustain their

personal superiority. Here down trod man may lift his head without fear of losing it, and the weary may refresh himself with rest.

The other result is that our own Government by a wise system of leases or licenses, may receive out of this golden domain, a large sum annually into the public coffers. This war over, the public debt and our present taxes may be easily diminished by a few years' rental from these mines.

And the religious mind, and the philosophic mind in view of the whole subject, cannot but be struck with the wonderful interference of the Ruler of events, in giving to this country, at such a critical moment, such lasting and inexhaustible stores of wealth, from which not only to recuperate from the losses occasioned by the rebellion, but to perpetuate on this continent the wonderous experiment of free Government, with means equal to its power, scope, and blessings.

A New Ship Canal Proposed by a New Route.

To the Editor of the RAILROAD JOURNAL:

SIR—As you profess to keep your readers advised on all matters connected with Railways and Canals, I thought I would present to them a project for ship canals on new routes which, if made, would greatly facilitate commercial intercourse between this city and the great west. It is admitted by those conversant with the Erie Canal, that it has not capacity enough for the business that is now being forced upon it, and that to enlarge it again to the dimensions required, would be attended by an enormous expense, not only for the work proper, but for damages for land taken through cities on its line, for Warehouses, Mills, Foundries, Factories and dwelling houses destroyed to give room for the canal. This item alone would almost pay for the construction of a new canal on another route, where the land would be mostly given by the inhabitants on the line of it.

To make the chain of inland water communication complete there should be constructed a ship canal across the state of Michigan connecting the head waters of Lake Michigan at St. Joseph with those of Lake Erie at Toledo. Such a canal should be built at once, and the grade should be made to descend all the way to Lake Erie. Its advantages cannot be overestimated. It would save a tedious Lake navigation of 700 miles, besides rendering us perfectly independent of British cannon, on the St. Clair river in the event of hostilities between this country and Great Britain. The distance across the state between those points is about 150 miles, although the route selected might be 175 miles. Such a canal should have a surface width of 150 feet, a depth of 10 feet, with locks having an available length of chamber of 225 feet and a width of 30 feet. And the lifts should not be less than 20 feet. The greater the lifts the less number of locks and gates to open and close.

A ship canal in this state should be made from the Erie canal at Macedon in Wayne county to Seneca Lake at Geneva, which Lake could be used to its head, a distance of 36 miles, thence by canal to the Susquehanna river at Owego or Binghamton in Broome county, which river could be used by means of dams and locks to a point a short distance above Great Bend. The Susquehanna at Owego is 382 feet above Seneca Lake, the waters of which river could be used to supply the canal to the lake. From the Susquehanna a few miles above "Great Bend" a canal could be made to the Delaware river at Stockport which is lower than the Susquehanna at the point named, or it might be connected with the Delaware at a point higher up, as might be deemed best by the Engineers. The Susquehanna might be made to feed the canal to the Delaware, or the reverse might be the case.

The Delaware could be made navigable by means of dams and locks, and from Port Jervis a canal could be cut to the Hudson at Haverstraw, with a descending grade all the way to the Hudson.

These connecting links of canal should be of the same dimensions as that described for the canal across the state of Michigan. The Erie would have to be enlarged for part of the distance from Lockport to Macedon. At Macedon it is 21 feet higher than Seneca Lake. Such a line of water communication would bring Chicago within 900 miles of New York or 6 days if steam should be used in the propulsion of boats, as they unquestionably would be. The Susquehanna has a descent from Great Bend to Owego of 88 feet in a distance of 47 miles. The Delaware has a descent of 400 feet from Stockport to Port Jervis a distance of 72 miles. Port Jervis is 441 feet above tide water, from which it is distant about 50 miles. The Susquehanna at Owego is 382 feet above the level of Seneca Lake from which it is distant about forty miles, requiring about 19 locks. From Port Jervis to the Hudson about the same number of locks would be required—possibly more. From the Erie Canal to Seneca Lake two locks would undoubtedly be required. While the Susquehanna can easily be made navigable by means of dams and locks, the Delaware will be found more difficult to manage, a canal could be made on its banks and be supplied with water from the river. The importance of the subject entitles it to the most earnest consideration of the people. That something should be done immediately to increase the facilities for cheap water transportation between the Lakes and tide water is absolutely necessary. To enlarge the Erie to the required dimensions would be so enormously expensive as to forbid entertaining the idea, to say nothing of the possible interruption it might occasion to navigation.

This route would be considerable shorter than by way of Albany, besides overcoming the overslaugh, which up to this time, it has been impossible to remedy.

By such a canal the lakes can easily be reached by Gunboats and Iron clads, through the Cayuga outlet, which should be enlarged to Oswego as well the Clyde Canal to Big Sodus Bay. The Erie canal, as I previously observed, is already nearly large enough from Buffalo to Rochester. Of course the locks from Buffalo to Macedon would require to be enlarged to the dimensions indicated, and so would those of the Cayuga and Seneca canals.

In view of the possibility of war with England it would be well that this route should be surveyed immediately with a view to its availability for a ship canal. There is not a doubt of its practicability. Of course the means for making such a canal should be furnished by the General Government but the control of them should be under the government of the states of Michigan and New York, and the General Government should be reimbursed out of the earnings of the canals. In this manner the government would secure a passage for its Gunboats and Iron clads to the Lakes, and the country would secure an additional avenue through which its products could be cheaply and expeditiously transported. The importance of such an avenue cannot be overestimated, military or commercially. Only let such a water communication be made and the country would never hear of another rebellion. We should also render ourselves perfectly secure from attack by England on the Lakes. I have not alluded to the Illinois canal enlargement for the reason that it is so obviously necessary that any opposition to its consumation would entitle the opponent to the imputation of being a Copperhead. †

Railroad Convention.

The representatives of nineteen railways met at Buffalo on the 28th and 29th ult.

The following Delegates were present.

New York Central.—Erastus Corning, President; Dean Richmond, Vice President; C. Vibbard, Gen. Sup't; E. F. Folger, Chief Clerk.

Erie Railway.—N. Marsh, President; Charles Minot, Gen. Sup't; W. R. Barr, Pass'r Agent.

Pennsylvania Railroad.—Thos. A. Scott, Vice President; Lewis A. Houpt, Gen. Ticket Agent.

Michigan Southern.—E. M. Gilbert, President; M. L. Sykes, Vice President; C. P. Leland, Gen. Ticket Agent.

Cleveland and Toledo.—L. D. Rucker, Sup't.

Boston and Albany.—Henry Gray, Sup't.

Buffalo and Erie.—Geo. Palmer, President; Dean Richmond, Vice President; R. N. Brown, Sup't.

Pittsb'g, Ft. Wayne and Chicago.—W. P. Shinn, Gen. Pass'r Agent.

Toledo and Wabash.—Warren Colburn, Vice President.

Atlantic and Gt. Western.—Wm. Reynolds, President.

Ohio and Mississippi.—Edward Larned, President, E. D; Mendes Cohen, President, W. D; E. F. Fuller, Gen. Ticket Agent.

Troy and Rutland.—Jay Gould, President.

St. Louis, Alton and Terre Haute.—H. Z. Sanderson, Gen. Agent.

Shore Line.—John E. Foster, Gen. Agent.

Lake Shore and Mich. Southern.—F. G. Faxon, Gen. Agent.

Mich. Central.—R. N. Rice, Gen. Sup't.

Great Western.—Julius Movius, Gen. Agent; Thomas Roynolds, Fin'l Director.

A committee was appointed to consider and report on the subject matter of the call for the meeting, which duty was performed and the result was received at the meeting the following day. The recommendations of the committee were adopted. They are substantially as follows:

That the New York Central, Erie, Pennsylvania and Baltimore and Ohio Railroad Companies, or a majority of them, shall establish in New York and Boston a Union office, to be under the exclusive control of the lines establishing it, so far as relates to the employment of agents.

Also, that Union offices be established at Buffalo, Cleveland, Cincinnati, Indianapolis, St. Louis, Chicago and Milwaukee, at the discretion of the lines competing for business.

The expenses of the Union offices to be borne ratably in proportion to the amounts received by the several companies.

After the 1st of June, no ticket not sold in the

Union offices, or regularly on the lines of the road, to be received or accredited upon any of the lines, and all outstanding tickets in the hands of outside agents to be withdrawn by that day.

Tickets to be sold at the full published rate, without drawback or inducement in the shape of gift, pass or gratuity.

No compensation to be paid ticket agents except in the shape of salary; second and third class tickets to have no privileges above those they actually entitle the holders to.

Companies not to furnish tickets to any other agents than their own and the Union office agents.

The minimum price of emigrants or third class passengers to be 1 cent per mile free of all commissions after the 1st of July.

Tickets issued by connecting steamboat and railway lines forming parts of through connections, not parties to the present agreement, will be received if sold at their offices at the regular rates.

Half fare tickets over connecting lines not to be sold for conventions and assemblages in 1863, except as the several lines have already agreed to carry at half rates.

Half fare tickets to Clergymen may be issued, and the local arrangements of any one road not to be interferred with.

Excavations of Lands Adjoining Railroad Beds.

A general term of the Superior Court of Cincinnati, in the Little Miami Railroad *vs.* Kemper, have just held that where a grant of part of a grantor's land is made to a railway company, for the purpose of the road itself, and upon which it is to be constructed and worked, there is a right to all reasonable adjacent support from the other land of the grantor; and if the grantor, or those claiming under him, are excavating and removing the soil from the land of the grantor adjoining the land granted, and the effect of such excavation and removal will be to endanger the railway of the grantee, by reason of the withdrawal of the lateral support given to the land upon which the railway is constructed, such excavation and removal may be restrained by injunction.

The case arose upon a petition filed by the plaintiffs, stating that they obtained, by grant, from the ancestors of the defendant, two strips of ground, upon which to construct and use their railway; that these purposes are expressed in the deeds; that they had constructed their road upon said ground, and had been in the enjoyment of the premises for such purposes for many years; that the defendant owns land adjoining these two strips of ground, which, at the time of the grants to the plaintiffs, belonged to their grantors, and the defendants claims title from their grantors; that the defendant is excavating and removing the soil of this adjoining land, adjacent to the land granted to them and to their railway, by reason of which there is imminent danger of their railway being destroyed, and they suffering irreparable injury.

On the case coming on to be heard upon the petition, answer and proofs at special term, the plaintiffs gave in evidence two deeds, properly executed. By one, the grantors, for the consideration of $1,200, convey to the plaintiffs and assigns forever two lots of ground, particularly described, and the right of way for the railroad located on Lot No. 6, in the Fourth Division of Nassau continued; that is to say, the perpetual use of 25 feet on each side of the centre of said railroad, as now located, running through said lot. By the other, it is recited that it has become necessary that the plaintiffs should hold the following described real estate for the purposes prescribed in their charter, viz.: a certain strip of land, 20 feet wide and about 109 feet long, through Lot No. 5, in Fourth Division of Nassau continued; and, after describing the same by metes and bounds, conveys the premises, for the consideration of $105, to the plaintiffs in fee, reserving free egress and ingress along said railroad ground to their property on said railroad, which property is not herein conveyed.

The Judge, deeming it advisable, before the case was fully heard, to submit to all the judges at general term a question in the case, postponed the further hearing; but, under the statute, reserved and adjourned, for the decision of the Court, the following question: Whether the plaintiffs, by the execution and delivery of the conveyances in question to them, and the construction and use of their railway upon the premises thereby granted acquired such a right to the support of the soil adjacent, of the remaining premises of said grantors, as to be entitled to enjoin the grantors, their heirs or assigns, against excavations likely to endanger the railway aforesaid?

The opinion of the Court was now delivered by:

COFFIN, Judge.—The law, while it gives to an individual entire dominion over his own soil, will, in many instances, restrain him in the mode of using or enjoying his property, if such mode of enjoyment infringes upon the rights of others.

A man may dig upon his own land and remove the earth for any lawful purpose; but if thereby he removes the natural support of his neighbors land, so that it cannot stand by its own coherence, and it falls, and his neighbor is thus disturbed in the enjoyment of his property, the law will hold the man answerable for the consequences, provided his neighbor has done nothing with his own land contributing to produce the injury. This right to natural support is an incident to the land; it is a right of property necessarily attached to the soil. 19 Barb. 380; 21 Barb. 409; 2 Allen, 131.

The fact that the plaintiffs have constructed, and are daily using, a railway over the land granted to them, takes the case out of the general rule above stated.

The support which the plaintiffs claim is not merely the natural support, which they would have been entitled to if they had not built their railway, or otherwise increased the lateral pressure n the adjoining soil, but a great deal more.

They have increased, and are daily producing, by the running of their machinery over their railway, a lateral pressure upon the adjoining soil, and they claim a right to lateral adjacent support from that soil. This right, if any exists, is not an incident to the land. It is not a right attached to the soil to which the plaintiffs are entitled because of their mere ownership of the soil, but, if maintained at all, must arise out of the grants to the plaintiffs.

When a grantor conveys a part of his land to a grantee for a specified purpose, has he thereby diminished his right of dominion over the residue of his land? May not the mode of enjoyment, on his part, of the residue of his land, be restrained because of his grant?

Upon granting the land for a specified purpose, has he a right thereafter to use his adjoining land in a manner inconsistent with the enjoyment expressly granted by him by his deed?

By granting the land for a designated purpose, does he not impliedly warrant that, as to him and those claiming under him, the property granted shall be fully and beneficially enjoyed by the grantee for the purpose designated?

Looking to these deeds, it was clearly the intention and meaning of these grantors that the property conveyed should be fully and beneficially held and enjoyed by the Little Miami Railroad Company, for the purposes of their road, and upon which they might construct and work it, and that was the sole object of the grantees in obtaining the grant; and it seems to me, therefore, that, by reasonable intendment, these grantors, and those claiming under them, have no right to use the adjoining land in a manner inconsistent with the enjoyment thus expressly granted by these deeds. Of that right they have, for a valuable consideration, voluntarily deprived themselves.

The grantors, by their deeds, impliedly bound themselves, and all claiming under them, to do no act which would disturb the necessary lateral adjacent support to the contemplated works of the grantee; they incurred that obligation by the terms of the conveyances. The purposes to which the land was to be appropriated, and the mode of enjoyment by the grantees, form a part of the grant. This, I think, is the true construction to be given to these deeds. It could never have been in the contemplation of the parties, after the grantees had expended large sums of money in the construction of their road upon this strip of land, merely 50 feet wide, to be operated upon by heavy machinery in the transportation of persons and property over such a great public highway, that the grantors, or those claiming under them, should be entitled to take away from the adjacent land the lateral support necessary to enable the grantees to enjoy the grant for the purpose and in the mode expressly provided for in the grant.

It was supposed by one of the counsel, during the argument, that the opinion of the Court, in the case of Hieatt *vs.* Morris, 10 Ohio State Rep. 523, was, in some respects, adverse to the claims here asserted by the present plaintiffs; but, upon an examintion of that opinion, we are not able to see that it has any material bearing upon the question. All the Court held in that case was, that the facts stated in the declaration did not constitute a cause of action. It would seem, from the opinion of the learned judge who pronounced the judgment of the Court, that the Court thought that the parties, when they contracted for the wall then in question, had only in view the then present state of affairs, and did not anticipate the changes of circumstances which the material prosperity of the city had brought about; and could not be held to have agreed to the continuance of the wall beyond the period when, from rising fortunes of the city, a change should be desirable. The case was distinguished from that of an owner of two adjoining lots, who, having built a house upon each, with a common partition on the line of the two lots, conveyed each lot to different purchasers. In such a case said the learned judge, the right to the use of the entire partition wall would pass by the deed to each grantee.

Upon a careful examination of the question submitted, the principles involved, and the authorities cited, we are of opinion that when a grant of a part of a grantor's land is made to a railroad company, for the purposes of the road itself, and upon which it is to be constructed and worked, there is a right to all reasonable adjacent support from the other land of the grantor. If the line which divides the land granted from the land retained traverses a quarry of solid rock, it may be that no adjacent support is necessary, and the grantor may dig and remove the whole contiguous soil. But if the dividing line traverses a soil of less tenacity—say, for illustration, a bed of sand, or gravel, or loam—it will be incumbent on the grantor to leave untouched such an intervening measure of lateral support as will prevent any part of the land granted from retreating.

This opinion is fully sustained by the deliberate judgment of Lord Chancellor Cranworth and Lord Brougham, in the case of the Caledonian Railway Company *vs.* Sprot, 2 Macqueen's Rep. 449 and 462; and is in accordance with the views and principles held by Lord Campbell, in Humphries *vs.* Brogden, 12 Adolph. & Ellis, 739, S. C.; 1 Eng. Law and Equity Rep. 241; and of the Court, in Harris *vs.* Ryding, 5 M. & W. 60; and Harris *vs.* Roberts, 6 El. & B. 643, and 7 El. & B. 625.

Where the grantors, or those claiming under them, in such a grant, are excavating and removing the soil from the land granted, and the effect of such excavation and removal will be to endanger the railway of the grantee, by reason of the withdrawal of the lateral support given to the land upon which the railway is constructed, such excavation and removal may be restrained by injunction. Farrand *vs.* Marshall, 19 Barb. 380; 21 Barb. 410; Putnam *vs.* Valentine, 5 Ohio, 188.

The right of lateral adjacent support arising upon the implied warranty in the conveyance, is not affected by the "act to regulate the making of cellars, excavations, and foundations," passed April 28, 1854.

We, therefore, answer the question reserved and adjourned for the decision of this Court, in the affirmative.

Cienfugos and Villa Clara Railroad in Cuba.

We notice that the Brig Titania which sailed from Philadelphia on the 1st inst., carried as a part of her cargo, two passenger cars for the Cienfugos and Villa Clara Railroad, which crosses the Island of Cuba, connecting its Northern and Southern shores at those points. Two locomotives and four passenger cars had previously been shipped for the use of the same road. A first class passenger car has also been shipped for the railroad running from Sagua.

The Mechanic's, Machinist's and Engineer's Practical BOOK OF REFERENCE containing tables and formulæ for use in superficial and solid mensuration, strength and weight of materials, mechanics, machinery, hydraulics, hydrodynamics, marine engines, chemistry and miscellaneous recipes, adapted to and for the use of all classes of practical mechanics, together with the Engineer's Field Book, etc.—By Charles Haslett, C. E., edited by Professor Charles W. Hackley, of Columbia College. Published by J. G. Gregory, N. Y.

This is the best work of its kind, on all accounts, we have in print. It contains everything a mechanic, engineer, chemist, or artizan wishes to know at a glance, without loss of time in elaborate calculation, and in working out of principles to their results. The contents embrace practical directions in geometry, of which we quote a single example to show its value to the designer of a steam engine. "The throw of an eccentric, and the travel of a valve in a steam engine, also the length of one lever for communicating motion to the valve being given, to determine the proper length for the other."

Mensuration and instrumental arithmetic are fully explained. To the uninitiated it would be surprising to know, how many things may be cyphered out by the sliding scale. So the laws of motion, the unit of work necessary to consider when we estimate the working force of men, animals and machines, the doctrines of equilibrium and pressure of beams indispensable to builders, steam power and the steam engine, strength and weight of materials, mechanical laws of elastic fluids, necessary to be understood in gas factories, effects of heat, fuel, ductility and malleability of metals, masonry, bricklaying, plastering, woodwork and carpentry, and various other arts, such as bronzing, enamelling, dyeing, bookbinding, etc. are practically explained. The Engineer's Field Book is equally valuable. We have on a former occasion, in an article on the Management of Railways, shown what profound scientific knowledge is required for the successful designing and constructing of these works. Here may be found all the rules by which engineers arrive at their conclusions. The most intricate problems are solved in a simple way. The construction and location of curves are fully treated, and the tables of logarithms for radii, secants, tangents and of numbers, are large and complete. We recommend the work as one that should be in the pocket of every engineer and intelligent mechanic and artizan.

Toledo and Wabash Railway.

We have received a copy of the Fourth Annual Report of this company. The time of closing the fiscal year has been changed from the 31st of August to the 31st of December. The statement is therefore made to cover a period of sixteen months. A proper division has, however, been preserved in its preparation, so that the transactions of the last four months of 1861, are given separately from those of the full year 1862. For convenience of reference we have arranged the figures in the following order:

Receipts from—	Four months, 1861.	Full year, 1862.
Passengers	$74,299 22	$248,642 15
Freight	445,523 52	1,090,949 42
Mails	8,100 00	24,416 67
Express	6,396 45	16,432 43
Other sources	736 50	22,706 06
Total	$535,055 69	$1,403,146 73
Expenses viz:		
Repairs of road-bed	$47,476 36	$176,895 86
" bridges	450 61	2,058 69
" buildings	3,937 84	11,802 92
" engines	13,288 71	62,451 41
" cars	22,874 21	84,680 99
" tools, etc	3,291 48	11,049 85
Fuel	32,378 83	82,842 80
Oil and waste	4,044 07	19,469 94
Loss and damage	3,949 53	10,176 49
Agents and clerks	8,779 00	28,913 61
Conductors, etc	34,846 47	105,955 26
Handling freight	6,588 82	18,694 43
Rent of depots	2,468 32	6,880 48
Other transp. exp.	10,717 77	37,673 46
Taxes, rents, insurance, etc., as below	21,502 15	111,605 45
Total	$216,589 17	$771,151 64
Net income	318,466 52	631,995 09

The gross revenue for the entire period covered by the report was as follows:

From passengers	$322,941 37
" freight	1,536,472 94
" mail	32,516 67
" express	22,828 88
" other sources	23,442 56
Total earnings, as above	$1,938,202 42
Expenditures, viz:	
Passenger expenses	$67,289 62
Freight "	387,728 41
General "	399,615 18
Overcharges on freight	13,934 91
Rent of cars and engines	42,594 81
Salaries of officers	19,957 47
Taxes and insurance	15,265 53
U. S. Tax	3,151 64
Discount and exchange	13,724 07
Advertising and agencies	6,275 22
Commissions	5,327 38
Legal expenses	6,315 21
Miscellaneous	6,561 37
	987,740 81
Net income, as above	$950,461 61

To the net revenue should be added the following amounts, received from sources exclusive of earnings, viz: From T., W. & W. R. R. Co., $357 62; from fractional lots sold, $263 75—making the actual net surplus of revenue, $951,082 98.

Thus accounted for—		
Renewals of bridges, iron, chairs, spike and ties		$221,101 17
Construction and equipment		212,813 48
First mortgage coupons	$237,685 00	
Second " "	186,751 50	
Sinking fund "	30,348 66	
Interest on funded notes	10,761 63	
Instalment of principal on same	54,022 17	
		519,568 98
Old contract assumed		2,000 00
		$955,483 61
Loss carried to income balance		4,400 63
Total, as above		$951,082 98

The capital of the company, and which substantially represents the cost of its roadway, equipment and other property, amounts, as shown in the annexed Balance Sheet, to $8,547,168 19.

Since the publication of the last annual report, the general stock of the company has been increased 714 shares, and the preferred stock 1350 shares, the former by issues made to holders of stock in the late Toledo, Wabash and Western Railroad Company, and the latter by issues made to holders of evidences of indebtedness against that company, as they have from time to time been presented for redemption. Both of these issues of stock have invariably been made with discriminating care, and in strict conformity with the various stipulations of the agreement which in fact constituted the basis of the organization of this company. The stock and claims of the former company are now almost entirely absorbed.

The first mortgage bonds comprise two issues made by the following organizations, viz: Lake Erie, Wabash and St. Louis Railroad Company, $2,500,000; and Toledo and Illinois Railroad Co., $900,000.

These issues of bonds bear date August 1st, 1853, and the principal thereof will mature August 1st, 1865. In anticipation of this event, the holders of these securities have already signified their wish to arrange for an extension of the principal for a period of twenty-five years, which the company have acquiesced in, and the necessary coupons are now being issued in consummation of the same. The final attainment of this arrangement cannot prove otherwise than highly advantageous to all parties in interest.

The second mortgage bonds embrace two issues made by the following organizations, viz: Toledo and Wabash Railroad Company, $1,000,000; and Wabash and Western Railway Co., $1,500,000.

These bonds were issued in the year 1858, and the principal thereof matures November 1st, 1878.

The sinking fund bonds were created by this company for the purpose of retiring coupons numbers two, three and four of the second mortgage bonds, maturing on the 1st day of November, 1859, and the 1st days of May and November 1860. The authorized amount of this bonded obligation was $249,112 50, and of this sum $245,700 has been issued, leaving a further liability to issue $3,412 50 for the coupons still outstanding.

The funded coupons, forming an element of the capital, are now represented by certain promissory notes of the company, executed for the purpose of retiring coupons numbers eight and nine of the first mortgage bonds, maturing August 1st, 1857, and February 1st, 1858. The original amount of

notes required for the redemption of these coupons was $147,689 37, and of this amount $144,512 42 have already been executed and delivered, showing a further liability to issue $3,176 95 for the unredeemed coupons. The notes executed for these coupons were made payable in five equal annual instalments, commencing with November 1st, 1860, and three of said instalments having been paid, a net principal remains of $62,741 24.

Of coupons numbers eight and nine of the first mortgage bonds, and maturing August 1st, 1857, and February 1st, 1858, there remains still outstanding and subject to redemption, by the substitution of the promissory notes of the company, the sum of $3,176 95.

There remains unredeemed of coupon numbers two, three and four of the second mortgage bonds, maturing the 1st day of November, 1859, and the 1st days of May and November, 1860, and which are fundable into the sinking fund bonds of the company, the sum of $3,412 50.

At the close of the year 1861, the company having on hand and unappropriated a considerable sum of its second mortgage bonds, an amicable arrangement was then made with the holders of that class of securities, for the payment of their coupons, maturing on the 1st days of May and November of that year, in such unappropriated bonds at par. The original amount of these coupons was $156,075, and there remains outstanding and subject to redemption $11,375.

The liability of the company for matured coupons, and which are payable in cash on presentation, amounts to $2,278 23.

During the period now under review, the company have promptly paid the interest upon each and every class of its funded obligations, as the several instalments thereof have matured. The payment of the accrued interest on the preferred stock, which has been provided for, completes the adjustment of all interest indebtedness of every character, thus placing the company in a financial position not hitherto occupied since its organization, a position which it is to be hoped it may in future successfully and permanently maintain. The report says:

Although the increase in the revenues of the road for the past sixteen months has been large and flattering, it is still considerably below the amount that might have been realized if the equipment and storage facilities had been sufficient to take care of the business offered. The heavy and abundant crops of the last two years in the region immediately penetrated by the road, would alone have taxed its full capacity, but in addition to this, new sources of supply have been opened and connections formed, until such an extent of country has now become tributary to the line, that even an ordinary crop would furnish a heavy business.

The operating expenses proper have been $987,740 81, or fifty-one per cent. of the gross earnings. From various causes these expenses have been larger in proportion than in preceding years, but a large per centage of the excess is of course attributable to the greatly increased cost of labor and of all the material, oil, wood, iron, etc., used in the operation of the road. In addition to this, a very large amount of work has been performed, at the shops at Fort Wayne, in repairing and renewing the equipment of the road, taxed to its utmost by the heavy business done.

The average mileage of each locomotive for all services has been 40,928 miles for the sixteen months, which is sufficient to indicate how much has been required and how thoroughly they have been kept at work.

During the twelve months of 1862, 15,481 rails have been thoroughly repaired at the shops of the company, equal to 30 7-10 miles of track. The entire expense of repairing and changing this iron in the track, as well as that of putting in over 200,000 new ties, and laying of the new iron purchased, is all included in the operating account.

Otherwise the account of renewals has been separated from the operating account, in order to show more clearly what are the expenses of putting the road into first class condition, as well as because these renewals, which result from the extraordinary wear of seven or eight years, cannot be justly chargeable to the current operating expenses.

During the period under investigation, 1,967 lineal feet of truss bridges, 2,750 lineal feet of pile bridges, and 1,600 lineal feet of stringer or trestle bridges have been thoroughly rebuilt, at a cost of $22,979 06. There have also been procured 213,195 superior oak ties at a cost of $48,677 65, which have been mostly placed in the track.

Thirty-five hundred tons of the best American iron rails, from Danville, Penn., have been purchased and laid, and one thousand tons of iron have been re-rolled at Indianapolis, and also laid, making an aggregate of 4,500 tons of new rails, equal to 51½ miles of new track. Twenty-seven thousand seven hundred and fifty-one wrought iron chairs have been used in laying this new iron and in replacing broken chairs.

In addition to these permanent improvements to the track, the large sum of $28,742 29 has been expended in ballasting the road bed. A portion of the road, particularly that portion between Defiance and Fort Wayne, laid on a treacherous soil, had lapsed into a condition unfit for the heavy trade of a trunk line. At some expense and difficulty a superior gravel pit has been obtained in the vicinity of the track near New Haven, and during the past season a coating of a foot in average depth has been distributed over the road bed, for a distance of 29 miles, and the track put into fair condition. Inasmuch as this gravel pit affords ample material of superior quality, it is proposed to continue the ballasting through the approaching season, and until the track east of Fort Wayne shall be put into thorough order.

Four new passenger engines, weighing about twenty tons each, were purchased of the Rogers Locomotive and Machine Works, and six locomotive engines hitherto used exclusively in the passenger service, have been converted into freight engines, by substituting five feet for six feet driving wheels. This change has proved highly successful, and contributed very materially to the power of the road.

Two pony engines, for switching purposes, have been procured, to one of which is attached a powerful fire engine, for the protection of the valuable buildings and property at Toledo.

One hundred first class box freight cars have been purchased, of superior manufacture and with all modern improvements.

The most important expenditure on account of buildings has been for shops at Fort Wayne. The principal machine shop at that point was completed for use in February, 1862, and during the following summer a large blacksmith shop, with boiler and coppersmith shops attached, was constructed. These are extensive and constructed in the most convenient and thorough manner, perfectly ventilated and lighted, and completely furnished with power, tools and machinery.

A commodious blacksmith and machine shop has also been erected at Lafayette, principally for the repairs of rails and for ordinary repairs of freight cars. Shops for the repairs of rails have also been erected at Toledo, Defiance, Antwerp, Huntington and Peru.

At Attica and Antwerp, buildings have been built for passenger and freight accommodations.

The foundation for the extension of the freight house at Toledo has been put in, and the flooring and platforms completed, thus affording large additional storage room for the past autumn; however, the necessities for further storage room are such as to render it indispensable that this building should be completed during the coming season. The whole amount expended in the erection of these buildings is $39,294 01.

The great importance of providing ample elevator and storage facilities at Toledo, for the accommodation of the large and growing grain business of the road, has been fully considered, and the results of the past year in this behalf have been highly satisfactory. At the close of our last fiscal year, the total storage capacity was 375,000 bushels. The building then in process of construction has since been completed, giving additional storage room for 175,000 bushels. A division of another and still larger elevator is now about completed and ready for occupation, which affords storage equal to 350,000 bushels, and when completed 550,000 bushels. This will give an aggregate storage capacity of 1,200,000 bushels, sufficient no doubt for the present requirements of the road.

Throughout the year our trains have been operated with remarkable exemption from accidents and casualties, and our business relations with connecting roads continued harmonious and satisfactory.

The entire length of the road is 242.4 miles, of which 166.9 miles are in Indiana, and 75.5 miles in Ohio. The gauge of track is 4 feet 8½ inches.

The equipment consists of 42 locomotives; 18 passenger, 10 mail and baggage, 509 box freight, 150 stock and 80 platform cars. Miles run by engines, 1,614,932. Passengers carried, 174,742. Among the articles of freight carried east were: 8,091,929 bushels of grain; 8,082 car loads of live stock; 2,975,655 feet lumber; and 142,505,366 lbs. sundries. Among the articles carried west were: 5,224,291 feet lumber; 93 car-loads live stock; and 110,476,602 lbs. sundries.

GENERAL BALANCE.

General stock	$1,409,350 00

Dighton and Somerset Railroad.

John B. Jones & Co. of Lewiston, Me., have contracted for the grading and masonry on this road, to be completed by the 1st day of November next. Ten thousand sleepers are to be furnished by the West Greenwich Lumber Company; and the locomotives are to be built at the Taunton Locomotive Works. William Cobb of Dighton has taken the contract to build the wharves at Somerset, opposite Fall River, and the terminus of the road. H. N. Gunn of Fall River, Guilford White of Easton, and Daniel Brown of Fall River, have been appointed Commissioners, required by the act of incorporation, to designate the number and extent of the wharves. The first assessment

of $20 on a share has been paid in, amounting to $60,000.

The Bay State line of steamers will run in connection with the new road, and it is also intended to put on a line of propellers for freight.—*Taunton Republican.*

New Railroad Enterprises.--Conditional Subscriptions.

PERSONS SUBSCRIBING TO STOCK UPON CONDITION THAT THE ROAD WILL BE CONSTRUCTED ALONG A DEFINED ROUTE, ARE LIABLE TO THE AMOUNT OF THEIR SUBSCRIPTION, NOTWITHSTANDING THE ENTERPRISE IS AFTERWARDS ABANDONED.

In 1853 one Miller subscribed for twenty shares of the stock of the Pittsburgh and Connellsville Railroad Company, on the express condition that the company "should *locate* and *construct* their railroad along the route contemplated by the Meyer's Mill Plank-road Company for their road." He paid one instalment and a part of the second, but delayed the payment of the balance as the calls were made, until the company, before the road was *constructed* along the route mentioned, suspended operations, after which payment was refused on the ground that though the road had been *located* by the company they had not *constructed* it according to the condition in the subscription.

The company suspended operations in 1857, the calls upon the stock were all made previous to January 1855. The road had been located along the route desired by Miller, but owing to the suspension of the company it was not constructed. This action was brought by the company in April, 1859, against Miller, to recover the unpaid instalments upon the twenty shares mentioned. The trial was had in the Court of Common Pleas Somerset County, Penn., and resulted in a verdict in favor of the plaintiffs for $1,210.50. The defendant then carried the case to the Supreme Court of Pennsylvania, which Court now affirmed the judgment of the Court below; and *held*—

1. That the promise of subscription being precedent to that of construction upon the part of the company, the defendant could not insist upon performance by the railroad company while he refused performance on his part; and that the road being located as stipulated, and completed so far as the means of the company would allow, it was a compliance with the condition, and the plaintiffs were entitled to recover.

2. That the condition in the contract of subscription was not a condition precedent, and did not require the completion of the road before payment could be required, but only that when located and constructed it should occupy the route designated, the undertaking being on the part of the subscriber, to pay as calls should be made by the directors, and on the part of the company to locate as stipulated and construct as fast as their means would allow.

3. That the suspension of operations made by the directors, long after the payments upon the defendant's stock had been due, was not a defence in an action brought against him for the unpaid balance thereon.

4. That although the company had received subscriptions on a guarantee that they would pay interest on stock "as soon as paid," until the road was finished, interest would not accrue until the stock was fully paid; and where but a small part of the stock had been paid for by the defendant, he could not in a suit against him for the balance, set up the non-payment of interest on his stock by the company as a breach of condition.

The following is the opinion, in full, rendered by the Court upon the decision of the case:

WOODWARD, J.—The plaintiff in error, defendant below subscribed for twenty shares of the capital stock of the above named railroad company, on the express condition that the company "should locate and construct their railroad along the route contemplated by the Meyer's Mill Plank-road Company for their road." It was proved that the railroad had been located along that route—that it was completed from Connellsville to Turtle Creek, and advancing from there to Pittsburgh—that $218,000 had been expended at Sand Patch Tunnel in Somerset County, east of Meyer's Mill, and that the whole work had progressed so far as to reduce the completion of the road to nine months' more work, when, in October 1857, the company suspended operations.

The defendant paid the first instalment of his stock and part of his second, but neglected to respond to the calls for the residue of his subscription, all of which were duly made before January 1855. This action was brought to enforce payment of these calls. The defence is, that though the company have *located* their road agreeably to the above condition they have not *constructed* it, and therefore subscribers are not bound to pay.

It is a most extraordinary defence, for it presupposes that the company were to build their road without money, and to deliver it a finished work to the stock subscribers, who were then to pay their subscriptions. Such was not the contract. By his subscription the defendant made himself, voluntarily, a member of a company incorporated and authorized to build a railroad from Pittsburgh to the Maryland line, east of the mountains—a company to be governed by directors, who should dictate when and where to begin the work, and how its means should be applied—a company with authority to enact by-laws, and make calls for payment of stock—a company to whose vigorous prosecution of their work prompt payments on the part of stockholders in obedience to calls, were indispensable.

Of such a company Miller made himself a member, and now sets up the partial failure of the company to complete their work as the justification for his almost total failure to supply the means he agreed to supply. His promise was precedent to theirs. He has no right to insist on performance by them, whilst he refuses performance on his part. Had he and the other subscribers paid promptly in obedience to calls, as they promised, possibly the panic of 1857 would not have suspended the work. The stock payments were indispensable not only as furnishing funds which the company had a right to rely on, but as constituting also a solid basis of credit on which to negotiate the bonds of the company. The modern expedient chiefly relied on for building railroads is mortgage bonds, but to give these credit in the markets of the country, the payment in of a cash capital is indispensable.

All these things Miller knew, or ought to have known when he subscribed, and therefore the defence now attempted is simply absurd. The condition in his contract did not mean that the road should be constructed and finished before he paid, but only meant that when it was located and constructed it should occupy the route designated. On his part the undertaking was to pay as calls should be made. On the company's part the undertaking was to locate as stipulated, and to construct *bona fide* as fast as the means at their command would allow. This was the whole scope and effect of the condition. A suspension of the work two years and a half after the time when every dollar of the defendant's subscription ought to have been in the treasury of the company, is no defence for him. The necessity for that suspension was no doubt aggravated, perhaps induced, by the failure of himself and others to pay up their stock, but whether it was or was not, the suspension was the exercise of a discretion which every subscriber had committed to the directors. Let them not complain, therefore, that their constituted agents have under the pressure of the times and the default of subscribers, exercised the discretion that was voluntarily committed to them for the benefit of the common enterprise. Until it can be shown how railroads can be built without money, no such defence as is here set up can prevail.

But there is a breach of another condition alleged. This company conformed to the foolish practice of receiving subscriptions on a guarantee that they would pay interest on stock "as soon as paid," until the road is finished. When it is considered that railway companies are joint stock associations, and depend on borrowing most of the money they expect to expend, the absurdity of borrowing money to pay interest to themselves is self-evident. They never borrow it at less than from 7 to 10 per cent., and in so far as the money is used to pay themselves 6 per cent. on their stock, it is manifestly a ruinous as well as absurd operation. No intelligent stockholder who has the interest of the enterprise at heart, ought to accept or insist on such a condition. Still where it is inserted in the contract, it must be judicially administered, and for the present case we may dispose of it as follows: In this contract the interest is not payable until the stock be fully paid. "As soon as paid," interest was to accrue; and such was the effect of the resolution of February 22d, 1854. But the defendant has not paid. He then has no breach to complain of. He points to the resolution of the board of 15th October, 1857, suspending the payment of interest, as ground for not paying moneys due in January, 1855. This is, if possible, a more curious defence than the former. Had he paid his stock he would have been entitled to receive interest. But because the company could not pay other stockholders interest in 1857, he justifies himself for withholding moneys due in 1855. This action is to enforce the calls that were not responded to. If such a defence is worth anything now, it ought to have been good when the calls were made. But it would not have been easy to state it then, for it was wrapped up in the womb of the future, and possibly could never have been born, if the defendant had performed according to his undertaking, for in that event the company might have been able to pay interest.

It is scarcely possible to conceive of a defence more destitute of merit, and accordingly the judgment is affirmed.

Galena and Chicago Union Railroad.

(16*th Annual Report for the year ending December* 31, 1862.)

LENGTH OF ROAD AND BRANCHES.

American Railroad Journal.

Saturday, May 9, 1863.

Stock Exchange and Money Market.

The severe contest on the Rappahannock not being finally determined up to Wednesday last, gave room for the usual agitation in the Money Market and Stock Exchange. The spirit which actuates the dealers has little connection with any exalted estimation of political necessities. A defeat is as welcome to a certain class of operators, as a victory is to others. When hundreds of our brave soldiers are killed in battle, gold goes up, and there are too many who are indifferent to the loss of life, if they but fill their pockets.

All over the world, however, the Bourse is an unpopular institution, however useful and necessary it may be in a great commercial capital. The historians of France and England have not failed to notice its conduct in those countries on similar occasions, and there is no severer critic of its tendencies than Napier, who relates the manner in which the English operators defrauded whenever they could, both the Government and the army. The following extract from a late foreign journal thus characterizes the present Stock Exchange in Paris:

"There are two sorts of gamblers at the Bourse, the big ones and the little ones. The big ones, the gamblers certain of winning, occupy high positions. They are versed in the mysteries of the game. They haul millions by shovelfuls, and spend them as quickly, in order to have the pleasure of getting them back again. Those gentlemen mostly buy what they call 'an affair'—a mine, a factory, a contract. They pay a certain

sum for it on Saturday, and on Sunday they sell it for four times its cost, to a good-natured company, of which they naturally take the direction. They then issue half the shares, keeping the other half in their pocket-book. Thanks to their credit as thorough-grained rogues, the shares issued sell for a premium, which increases and rises like the flowing tide. Then, when it seems to have reached the maximum, they throw upon the market, at one single cast, the other half of the shares which they held in reserve. They flood the market; the tumble begins. The fall, driven on by panic, descends below all reasonable limits. When it has reached its lowest point, the founders of the company, little by little, buy up the panic-stricken shares, which soon rise again to par, and the see-saw of the market recommences. By this very simple game, millions of francs are realized. We may, therefore, consider every financial company which gambles at the Bourse as a machine organized by clever rogues for turning simpletons to profit."

The uncertainty of the result on the Rappahannock, as we have already hinted, had its effect. Gold rebounded from 146 to 150½ on Wednesday, and sellers of exchange waited to see if they could not put up their rates. Even the banks attempted by calling in their loans, to raise the rates of interest, but without success. Money was too plentiful to be coerced to a higher price. Railway shares continued firm in spite of the pressure; Harlem jumped forward another step, and the more established lines stood up to nearly their best quotations with a prospect of improvement. It is understood that the stock of the Harlem is, a majority of it in new hands, and that some of the heaviest of the old stockholders have taken advantages of the rise to realize and enjoy their immense profits while they could. It is quite possible there may be some changes in the Board of Directors, and if so it is to be hoped the company will not become a Wall street bubble as it was in the days of Robert Schuyler. Under the scientific and practical management of Allan Campbell who has a world-wide reputation, the Harlem has risen to respectability, solvency and importance. It has the best immediate future of any railway of its class in the United States. But it requires skill in handling, sagacity in its combinations, and economy in expenditure. To depart from its present line of conduct is to invoke its ruin. The stock of the Mississippi and Missouri has been placed on the list of the public board, and will be introduced at the regular Stock Exchange. It represents the extension of the Rock Island road through Iowa, and gives promise of success in all particulars. The line is being rapidly pushed through to the Missouri.

The Treasury is getting plethoric. There is no want of money to any extent required. There was in the Sub-Treasury in this city on Tuesday a clear balance of $22,449,310. With the ability shown by Mr. Chase on the one hand, and the generous confidence of the people on the other, there has been no lack of means to carry on the war, without the aid of any foreign capital whatever. There is no such other instance to be found in history, of such a successful system of finance. The people of this country, however, are not less shrewd than patriotic. The conversion of their profits and the currency afloat, into the 5-20's, is the very best method they could take to secure these profits, and save their earnings from any further depreciation in the currency at a future day. A Treasury note to-day for all practical purposes at home, is as good as an equal amount in gold; it will buy as much, in fact the prices of most articles of necessity as well as ornamental, are not higher than they were before the war. Now is the time for prudent people to guard against the consequences of a future excess of currency, by judicious investments in Government stocks, by which act also, the redundancy of the currency will be checked. It is quite possible to get on without further issue of paper money, if the present holders of it fund it in the public securities. If there is any thing in that shape which is permanent, it is these national obligations founded on resources of the mightiest extent, increasing every hour, and not exceeding even if they were double what they are, but a small part of the annual earnings of the nation's industry.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Long Dock Company, 125; Stonington, 119; Ohio 6s, 1870, 106; Illinois coupon bonds, 1879, 110; Canton Co., 30¼; Buffalo, New York and Erie, 90; Rome and Watertown, 88; Miss. and Mo., 23; do., Land Grant bonds, 62@63; N. Baltimore.—Western Maryland bonds, 85; do., guar., 104; N. W. Va., 3d mort., 18. The quotations are: Balt. and Ohio, 83@85; do., 1867, 101; do., 1875, 104; do., 1880, 103; do., 1885, 101; Northern Central, 38@40; do., bonds, 1885, 102; N. Western Va., 5@7; 1st mort., 103; 2d mort., 100½; do., 3d mort., 15@19; Central Ohio 2d 101@105; do., 3d mort., 64; do., 4th mort., 34; do., income 1857-'60, 22@30; Maryland 6s, Ins., 114@116; Baltimore 6s, 1870, 106; do., 1873, 106@107; do., 1875, 108@108¼; do., 1890, new, 108¾@109; do., 1890, coupon, 110; do., 5s, 1338-'70, 95.

Pacific Railroad.

We understand a meeting was held a few evenings since at Delmonico's, at the call of the Secretary, to take into consideration the subject of the Pacific Railroad. We suppose this was a private meeting, as some of the corporators who have been most active from first to last in support of the project, were not invited to attend. A committee was appointed to take action on the subject, and speeches were made, one of them by a clergyman not much known hitherto in this line of business.

We look however to another quarter then the one indicated, for a real and substantial prosecution of the great work.

New Ship Canal.--New Route.

We publish in another part of the JOURNAL an original proposition to connect Lake Michigan with the Hudson by a Ship Canal. The scheme is brought forward evidently in good faith. It is one of an extraordinary character, since it proposes to bring ships through Seneca Lake down the Delaware and Susquehanna rivers which began their voyages in Michigan, and are to conclude them by a short cut from Port Jervis to the Hudson River.

The route proposed is from St. Joseph's in Michigan to Toledo at Lake Erie, but why not to a nearer point on this lake is not explained. The Erie canal is to be widened and deepened down to Macedon in Wayne Co. The same process is to be repeated between that point and Geneva. Seneca Lake thus becomes a part of the canal, and would certainly make a most splendid section of any canal in the world.

Thence it is to be extended to Owego or Binghamton on the Susquehanna, the point apparently being of little consequence. The river is then to be dammed and slack-watered so as to make it navigable to some place on the Great Bend. Thence the canal is to cross the mountains to Stockport on the Delaware, which is then to be made navigable by dams to Port Jervis, and from thence to the Hudson river. We confess we cannot even imagine such a route as this, nor in our judgment could any civil Engineer in existence, either calculate the cost or prepare plans by which contracts could be safely made. We do not believe it practicable to make the Delaware and Susquehanna rivers navigable for vessels of ten feet draft by any slack water contrivances. The experience obtained in Pennsylvania is conclusive against these kind of works, even for canal boats, and they invariably give way at the first good chance to the system of railways. On the banks of these streams there is barely room enough for a railway track, and to get a continuous depth of water of ten feet, would compel in all probability a change of the present grade and the destruction of the line. The mountain cuts between these rivers would be like tunnelling Mount Cenis.

Independent of these considerations there are others to which we attach even more weight. One argument in favor of the canal is that it will enable the Government to send ships of war through it to the Lakes. We thought this specious imitation of a reason had been exploded during the recent debates in Congress on a similar proposition.

We are surprised that men of reputation, known as the friends of internal improvements should ever

have put it forth. Was it intended to cover private views by a show of patriotism, and cheat congress into incurring a large national debt? Whether so or not, all the vessels of war we want for the Lakes are there already, convertible into Iron clads in a few weeks time, more than a match for any of the small craft that could be squeezed through the St. Lawrence canals. If we wish to build Monitors, there are plenty of points on our canals within a few miles of the Treaty of Ghent limit, where they can be built and prepared without the least difficulty.

But we are totally opposed to the idea now too prevalent that long lines of canals may be used for ships. The worst place a ship or steamer can be in is a canal or narrow river. This has been fully demonstrated by the losses we have sustained in attempting to navigate the bayous and narrow streams which are connected with the Mississippi and its confluents. Our vessels come out of these streams almost torn in pieces by the ordinary casualties of such narrow channels, without ever being seen by an enemy. Besides, the available capacity of a steamer is diminished by the space occupied by its machinery. It is demonstrable that horse power on a canal where the speed is limited and not essential, is far more economical than steam. All long ship canals like the Caledonian for example, have proved failures and always will be.

The real place of a ship canal in the United States, will be found in that around the Falls of Niagara on the American side. We see a large advantage to this country in having its lake navigation and commerce with the Canadas, extended and advanced in that direction. Here in New York, we think highly of our trade with foreign countries. Why should not our North Western ports regard with equal favor those which nature offers them also. Why should they not as well as we, have the choice of foreign and domestic markets, so advantageous always to the producer and the factor. These views will largely enter into the consideration of the convention to be held at Chicago in June, and have their influence in that body. And though for a time the good people of that city may have been disappointed in enlarging their present inland communications, they will lose nothing in the end for themselves or their country, if they seek to improve the great natural outlets, which have been the cause of their prosperity, and which must ever secure them in the advantages of their position.

Redemption of Pennsylvania State Loans.

The five per cent. loan of the Commonwealth issued under an act of March 28th, 1831, will be redeemed on the 1st of July, at the Farmers' and Mechanics' Bank, Philadelphia, and the five per cent. loan issued under acts of 1828 and March 30th, 1831, will be redeemed on the 1st of August at the same bank. The redemption is by the Commissioners of the Sinking Fund.

New Creek Coal Company.

We have been furnished with the outlines of the proposed plan for placing the New Creek Coal Company in a productive position. The main features are comprised in a call upon the bondholders to surrender all overdue coupons, and receive new bonds for seventy-five cents on the dollar, commencing to draw interest six months hence; thus relieving the Company from embarrassment, and enabling it to develope new mines. The coal is said to be equal to the Cumberland, and in great demand at $1 50 on the Company's land at Piedmont. We are informed, by the same authority, that the New Creek Company own 10,000 acres of coal land, and have no floating debt other than the over-due interest on the bonds.—*Phila. Ledger.*

British Board of Trade Returns.

From the annual statement of the Commerce of the United Kingdom, recently issued by the British Board of Trade, we have compiled the following table, which compares the aggregates of the last three years, and shows the relative proportion which the commerce with this country bears to the total commerce of England, and to that carried on with France and the British Colonies:—

	1860. Imports.	Exports.
Total commerce	£210,531	£135,843
With United States	44,727	21,814
" France	17,774	.....
" Colonies	42,959	.....
	1861. Imports.	Exports.
Total commerce	£217,485	£125,163
With United States	49,389	9,064
" France	17,826	8,895
" Colonies	52,676	42,245
	1862. Imports.	Exports.
Total commerce	£228,693	£124,138
With United States	27,692	14,399
" France	27,663	9,210
" Colonies	42,959	41,984

From this table it appears first, that the imports of England last year from this country, constituted about one-eighth part of the total imports from all parts of the world, and the exports to this country about one-ninth of the total exports; secondly, that the foreign trade between the United States and England, notwithstanding the interruption of the war, is still larger than that carried on between England and France; thirdly, that for the food and other products of unskilled labor which constitute the chief part of our exports to England, she pays us about one-half in the products of her skilled labor, and the balance in commodities from tropical and other countries.

La Crosse and Milwaukee Railroad.

The La Crosse and Milwaukee railroad, from Portage to La Crosse was sold on the 25th ult. The Milwaukee *News* of that date, says:

The case of Greene C. Bronson *et al.* against the La Crosse and Milwaukee Railroad Co. and others, occupied the attention of our U. S. Circuit Court nearly all day yesterday. Mat. H. Carpenter appeared in behalf of the Minnesota Railroad Co., and made application for leave to file a bill of review to restrain the sale of the mortgaged premises described in the bill of complaint, which premises have been advertised to be sold to-day, at 2 o'clock p. m., at the Post Office.

The application was resisted by John W. Carey and J. W. Emmons on behalf of the complaints. The arguments of counsel on both sides were able, and were listened to attentively by the Court and many members of the bar. Upon the conclusion of the arguments of counsel, the Court (the Hon. Samuel F. Miller delivering the opinion) gave a very clear and decided opinion, refusing an injunction to stay the sale of the mortgaged premises, giving the views of the Court on the merits of the bill sought to be filed.

The Court remarked at the close of the opinion, that it was not necessary to pass on the question as to whether the bill of review sought to be filed disclosed sufficient interest in the Minnesota Railroad Co. to entitle it to the consideration of the Court; but indicated very strongly that the bill did not show such interest as would authorize the Court to interfere.

The importance of this decision will be appreciated, inasmuch as it involves the whole of the La Crosse Road from Portage to La Crosse, and the land granted by Congress, about 387,000 acres. The whole amount involved is about $4,000,000.

It is not improbable that another important question will arise, viz: whether the purchaser is entitled to the possession of the road, or only to the *pro rata* share of the earnings.

Holliday's Cove Railroad Bonds.

The Pennsylvania Railroad Company are offering for sale the first mortgage six per cent. bridge bonds of the Holliday's Cove Railroad Company, amounting to $300,000, issued to J. Edgar Thomson, Trustee, under an act of assembly of the State of Virginia, authorizing the construction of a railroad bridge across the Ohio river at Steubenville, confirmed by an act of Congress approved July 14, 1862. These bonds are for one thousand dollars each, secured by a mortgage redeemable in 1886. The coupons are payable in February and August, at the office of the Pennsylvania Railroad Company, and the principal at the Farmers and Mechanics' Bank, at maturity. This bridge will form part of a through line from Pittsburg to Cincinnati, under one management, twenty-nine miles shorter than any other route and fifty-eight miles shorter than the present route *via* Crestline. It will, probably, be ready for business throughout its whole extent by July 1, 1864. The tolls which will be charged are as follows:

For each passenger	15 cents.
For each ton of freight	15 "
For each eight-wheeled freight car	50 "
For each four-wheeled freight car	25 "
For passenger, express and baggage car	100 "

These tolls do not vary with the rates of freight, but are permanent and specificially pledged to the payment of the interest on the bonds, and twenty per cent. per annum to a sinking fund for the redemption of the bonds at maturity. A very limited traffic will yield an ample revenue to meet these requirements. Parties best acquainted with these bonds and their security pronounce them a first class investment.—*Philad. Ledger.*

Revenue Tax upon Products of Iron Foundries.

The Commissioner of Internal Revenue has made the following decisions with reference to taxes imposed upon various products of iron foundries:

1st. All steam engines, whether marine, locomotives or stationary, are subject to a duty of three per cent. ad valorem.

2d. Cast iron shafting is liable in all cases to a specific duty of one dollar and fifty cents per ton, under the act of March 3d, 1863. Wrought iron shafting, if held to be manufactured within the meaning of division No. 71, is liable to a tax of three per cent ad valorem.

3d. Railroad car wheels are taxable in all cases one dollar and fifty cents per ton. All other castings of iron exceeding ten pounds in weight, not otherwise provided for, are taxable one dollar and fifty cents per ton, by act of March 31st, 1863.

4th. Castings of all descriptions made exclusively for instruments, articles or machinery upon which duties are assessed and paid, are exempt from duty under section second, act of March 3d, 1863.

5th. Castings not exceeding ten pounds in weight, which are so well known and so generally used as to have a commercial value in themselves, are taxable three per cent. ad valorem, when not otherwise provided for.

6th. Castings used for bridges, buildings, or other permanent structures, are taxable one dollar per ton. Permanent structures are interpreted to mean bridges, buildings, monuments and edifices of all descriptions. Lamp posts, water and gas pipes are not held to be permanent structures; but all such castings are taxed at the rate of one dollar and fifty cents per ton.

7th. Stoves and hollow ware are taxed at the

rate of one dollar and fifty cents per ton of two thousand pounds.

8th. Casual and ordinary repairs are not taxable, but the renewal of any part of an engine, as, for instance, a boiler, cylinder, piston-rod, valve motion, or governor, such parts being considered manufactures in themselves, are taxable, when made to replace a corresponding part of an engine, broken or worn out, and thrown aside. The same is true of cars, and all machinery, when new parts are supplied.

Oil Springs (Ca.) Railway.

A great contest has been going on between the two great Railway Companies—the Grand Trunk and Great Western, with respect to the means of access to the Oil Springs. These lie between the main line of the latter road and its Sarina Branch. To reach them, the Grand Trunk Company must cross that branch, and a great fight has been made for the monopoly or the right to use each other's lines. It has at length been arranged that the Great Western Company shall build the line from the Springs station to its main line, and the Grand Trunk from its lines across the Sarnia branch of the Great Western to the Springs station, the buildings at this latter point to be common to the two roads, and each Company having the right to run over the whole branch from one main line to the other.—*Montreal Gazette.*

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending April 24, 1863, was as follows:

Passengers	$20,683 74
Freight and live stock	31,212 52
Mails and sundries	1,559 67
Total	$53,455 93
Corresponding week of 1862	47,870 72
Increase	$5,585 21

The earnings of the Grand Trunk Railway for the week ending April 25, 1863, were:

Passengers	$24,043 68
Freight and live stock	46,579 92
Mails and sundries	3,250 00
Total	$73,873 60
Corresponding week, 1862	65,726 25
Increase	$8,147 35

The traffic returns of the Northern (Ca.) Railway for the weeks ending April 18th and 25th have been as follows:

	April 18.	April 25.
Passengers	$1,794 80	$1,746 24
Freight	7,075 53	4,428 88
Mails, etc.	94 17	95 58
	$8,964 50	$6,270 70
Same weeks, 1862	6,971 15	9,561 82
Increase	$1,993 35	Dec. $3,291 12

Total traffic from 1st January, 1863	$126,780 83
Corresponding period of 1862	96,568 46
Increase	$30,212 37

The earnings of the Galena and Chicago Union Railroad for the 4th week of April, 1863, are:

Freight	$31,213 19
Passengers	8,349 18
Mails, etc.	1,250 00
Total	$40,812 37
Same week, 1862	28,901 68
Increase	$11,910 69

The earnings of the Michigan Southern Railroad or the 4th week of April, 1863, were $90,825 82
Same week, 1862 68,227 71

Increase $22,698 11

The earnings of the La Crosse and Milwaukee Railroad for three weeks in April, were:

	1863.	1862.	Increase.
First week	$15,245 60	$9,351 48	$5,894 12
Second "	22,027 78	9,925 58	12,102 20
Third "	23,239 24	11,140 92	12,098 32

Total increase $30,094 64

The earnings of the Illinois Central Railroad for the 3d week of April, 1863, were $66,932 25
Do., 1862 41,954 55

Increase $24,977 70
The earnings of three weeks are $188,336 37

The earnings of the Chicago and Northwestern Railway for the 3d week in April, 1863, were $22,311 57
Do., 1862 11,587 49

Increase $10,724 08

The earnings of the Chicago and Alton Railroad for the 4th week of April, 1863, were:

Passengers	$8,714 92
Freight	16,830 01
Sundries	974 83
Total	$26,519 76
Same week last year	19,514 45
Increase	$7,005 31

Morris Canal and Banking Company.

We have the report of this company for the fiscal year ending February 28, 1863. From this we learn that the canal was opened for business on the 1st of April, and that the navigation was maintained to a later period than usual, closing on the 20th of December.

The revenues of the company from tolls and other sources, were $303,154 39

And the expenses were:

Repairs of canal and works	$79,857 14	
Operating canal	33,268 22	
Salaries, law and other expenses	21,062 30	
Transportation expenses	1,636 85	
		135,814 51
Balance, profit of business		$167,339 88
Balance at credit, Feb. 28, 1862		12,720 76
		$180,060 64
Dividends on preferred stock		$117,500 00
Interest on mortgage bonds		41,310 00
Loss and depreciation of boats, etc.		11,142 43
Balance, surplus		10,108 21
		$180,060 64

Compared with the previous year, the revenues show an increase of $11,308 02; with a decrease in expenses of $7,588 36—making the increase in net earnings, $18,896 38.

The expenditures during the year for the permanent improvement of the canal and its works have been as follows:

Rebuilding inclined planes	$520 97
Lengthening locks	1,950 87
Piers, wharves and basins at J. C	19,796 96
Land damages	1,447 31
General improvement account	10,518 33
	$34,234 44

The rebuilding of the inclined planes is now completed according to the original plan adopted in 1850. This improvement has cost $679,102 23, to wit: Planes 6 and 9 west, and 12 east, constructed with double tracks, and overcoming an elevation of 220 feet, have cost $101,128 38, being at the rate of $459 67 per foot lift. The other twenty planes, overcoming an elevation of 1,229 feet, and constructed with single track, have cost $577,973 85, being at the rate of $470 28 per foot lift. The average elevation of the double track planes is 73.33 feet, while that of the single track planes is only 61.45 feet. This fact explains why the single track planes have cost more per foot lift, than the double track planes. No further expenditure will be required under this head until the trade of the canal is greater than can be accommodated upon a single track.

The expenditures at Jersey City have been made in accordance with the plan adopted by the Directors in 1859.

In the general improvement account, is embraced $5,518 13, expended for enlarging the basins, and improving the shipping facilities at Port Washington and Port Delaware.

In addition to the foregoing expenditures for permanent improvements, there has been charged to capital account the sum of $4,889 17, discount upon bonds sold—making the total expenditures on capital account $39,123 61; from which should be deducted $9,596 69, a reduction of the inventory of boats resulting mainly from losses in the great freshet in June last, leaving the net increase of capital account for the year, $29,526 92.

By reference to the annexed general statement, it will be seen that the company are free from floating debt, and from the earnings have paid the interest on their bonded debt, the usual dividends on their preferred stock, provided for the loss in boats sustained by the freshet, the depreciation of other boats, and for bad debts charged off, and have a net balance to the credit of profit and loss of $10,108 21.

GENERAL STATEMENT.

Cost of canal and appurtenances		$2,925,489 71
Assets:—		
Cash	$10,326 00	
Bills receivable, etc	24,522 68	
Materials	12,518 64	
		47,367 32
		$2,972,857 03
Capital stock—consolidated		$1,025,000 00
" preferred		1,175,000 00
Mortgage bonds		727,250 00
Current liabilities		35,498 82
Profit and loss—surplus		10,108 21
		$2,972,857 03

The entire tonnage of the canal the past year has been 612,018 tons.

D. VAN NOSTRAND,
BOOKSELLER, PUBLISHER AND IMPORTER,
3m42 No. 192 Broadway.

THE FIRM OF W. R. TRAVERS & CO. is this day dissolved by mutual consent. Either partner is authorized to sign the name of the firm in the liquidation of the business.

W. R. TRAVERS,
S. F. MASSETT.

Dated NEW YORK, May 1, 1863.

LIMITED PARTNERSHIP.

Notice is hereby given that the undersigned, JENKINS VAN SCHAICK, STEPHEN F. MASSETT, WILLIAM R. TRAVERS and GEORGE A. OSGOOD, all of whom reside in the city of New York, have this day formed a limited partnership pursuant to the provisions of the first title of the fourth chapter of the second part of the Revised Statutes of the State of New York, and the various acts of the Legislature amendatory thereof.

That the name of or firm under which the said partnership is to be conducted, is VAN SCHAICK & MASSETT.

That the general nature of the business to be transacted is the Stock Exchange and Brokerage business, and all financial transactions connected therewith, on commission. That the said JENKINS VAN SCHAICK and STEPHEN F. MASSETT are the general partners, and that the respective places of residence of the said general partners, are as hereinbefore stated, and the business of the said partnership is to be carried on in the City of New York. That each of the said special partners has contributed, as capital to the common stock of the said partnership, the sum of fifty thousand dollars. That the said co-partnership commences the first day of May, one thousand eight hundred and sixty-three, and will terminate on the first day of May, one thousand eight hundred and sixty-eight.—Dated NEW YORK, May 1, 1863.

JENKINS VAN SCHAICK,
STEPHEN F. MASSETT,

RAILROAD SLIDE TABLE

FOR SALE!

A COMPLETE SLIDE TABLE FOR DOUBLE or single truck cars, in perfect order, and with powerful and convenient gearing, for sale very cheap at

4t17 **No. 61 Hudson st.**

Burden, Hubbard & Co.,

MACHINISTS,

MANUFACTURERS of Horizontal, Portable and Hoisting Steam Engines, Sugar Mills, Saw and Grist Mills, Boilers, Hydraulic Presses, Pumps and Gearing for working mines, etc., etc. No. 102 Front st., BROOKLYN, N. Y.

AN INVALUABLE POCKET GUIDE

FOR THE ENGINEER AND MECHANIC!

THE

Mechanic's & Machinist's

PRACTICAL

BOOK OF REFERENCE

Containing Tables and Formulæ for use in Superficial and Solid Mensuration; Strength and Weight of Materials, Mechanics, Machinery, Hydraulics, Hydrodynamics, Marine Engines, Chemistry, and Miscellaneous Recipes. Adapted to, and for the use of all classes of Practical Mechanics. Together with the

Engineer's Field Book

Containing formulæ for the various methods of Running and Changing Lines, Locating Side Tracks and Switches, etc. Table of Radii and their Logarithms. Natural and Logarithmic Versed Sines and External Secants, Natural Sines and Tangents to every Degree and Minute of the Quadrant, and Logarithms of Natural Numbers, from 1 to 1,000.

BY CHARLES HASLETT,
Civil Engineer.

EDITED BY CHARLES W. HACKLEY,
Professor of Mathematics in Columbia College, in New York.

Issued in a compact pocket volume of 520 pages, containing 176 diagrams, bound in morocco, pocket-book form, PRICE TWO DOLLARS. *Copies mailed free of postage on receipt of price.*

The work is eminently a PRACTICAL **POCKET GUIDE** to ALL CLASSES OF **Mechanics** and **Engineers.** As a book for practical use in field work, it is confidently believed that this is more direct in the application of rules and facility of calculation than any work now in use. The original portion of this part of the work is submitted to the profession, fully confident that its use will be practical proof of its superior merits.

The tables and examples have been prepared with great care, and their accuracy may be relied upon. Further information can be derived from the circular containing the contents in full, which will be sent on application to the publisher. Inducements are offered to clubs of six or twelve, for particulars of which also apply to publisher,

JAMES G. GREGORY,
No. 46 Walker St., New York.

NEW YORK, HARLEM & ALBANY R. R.

For ALBANY, TROY, NORTH and WEST.

ON and after Monday, November 17th, trains will leave as follows:

For White Plains—8.15 A. M., from Twenty-sixth street depot, stopping at all stations.

For Albany—10.30 A. M., Mail Train, from Twenty-sixth street depot, stopping at Williamsbridge, White Plains, and all stations north to Chatham, and at Kinderhook, Chatham Centre and Schodack.

For Williamsbridge—11.15 A. M. and 8.30 P. M., from Twenty-sixth street depot, stopping at all stations.

For White Plains—2.30 and 5.00 P. M., from Twenty-sixth street depot, stopping at all stations.

For Pawlings—4.00 P. M., from Twenty-sixth street depot, stopping at all stations except Yorkville.

For White Plains, 6.15 P. M., from White Street depot, stopping at all stations.

RETURNING WILL LEAVE

Williamsbridge—5.30 A. M., 1 P. M. stopping at all stations.

White Plains—6.10, 7.15, 10.00 A. M. and 4.45 P. M., stopping at all stations.

Pawlings—6.20 A. M. stopping at all stations north of and at Fordham.

Albany—10.30 A. M. Mail Train, stopping at all stations north of and at White Plains, Williamsbridge, Kinderhook, Schodack and Chatham Centre on signal, for New York passengers only.

JOHN BURCHILL, Superintendent.

SMITH'S

Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of **SMITH'S AIR LIGHT FOR RAILROADS,** and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.

Cost per hour, 5 cents.

Cost of wicks, chimneys, per year, $4 80.

Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, **21 Nassau st.,** or by addressing

CHAS. W. WELSH,
Secretary.

NOTICE to CONTRACTORS.

ALBANY AND SUSQUEHANNA RAILROAD. —Sealed Proposals will be received by the undersigned, at the Office of the Albany and Susquehanna Railroad Company, No. 73 State street, Albany, until Tuesday, the 2d day of June next, at 10 o'clock A. M. of that day, for the Grading, Masonry, Bridging and Fencing of 31 miles of the line of said railroad, extending from Richmondville in Schoharie County, to Oneonta, in the County of Otsego.

The line will be divided into sections of convenient length, and proposals will be received for single sections or for the whole line.

The line will be ready for examination by contractors on and after Monday, the 25th day of May next, and Maps, Profiles and Plans, with Specifications, may be examined at the Engineer's Office, in Albany, on and after that date. Blank proposals with all necessary information will also be furnished to those wishing to propose for work.

Proposals should be enclosed in an envelope and endorsed "Proposals" and directed to the undersigned.

The proposals which may be received in pursuance of this notice will be opened by the undersigned and canvassed, and the results reported to the Directors to aid them in making a proper award of the work.

Parties proposing, who are unknown to the undersigned, will be required to give satisfactory references.

The right is reserved to reject any or all proposals, as may be deemed for the interests of th Company. Albany, April 24th, 1863.

5t18 C. W. WENTZ, Chief Engineer.

AMES IRON WORKS,
OSWEGO, N. Y.,
SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.

An imperfect sketch of our smallest size Machine.

PAYE'S PATENT FORGE HAMMER. A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Cramnton, Anderson & McLaren, Dulhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Kalgh's Point, Phila.; Mallory & Cottrell, Mystic Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Quinnes, Albany; Sweet Brothers, Syracuse.

FOX LATHES.
F. W. BACON & CO.,
No. 23 PLATT, corner of GOLD ST.,
NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. GEO. H. FOX & Co., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT REOILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downward is beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Picket's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years with uniform success, they confidently offer their services to those requiring such aid.

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS**, etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.

Address **HENRY RUTTAN,**
Coburg, Canada.

American Railroad Journal.

New York, Saturday, May 16, 1863.

The Gold Territories.—How the National Debt may be Lessened.

In the RAILROAD JOURNAL of last week, we brought to the notice of our readers, the enormous extent of the gold bearing territories of this country, embracing altogether a million of square miles, each of them estimated to be as prolific as California. We allude to the nine new territories, several of very recent formation, already beginning to assume the compactness of older settled countries, and inviting population by the enormous quantities of the precious metals of which even unskilled labor may secure its full share. The following interesting facts are derived from official documents, emanating from departments at Washington, and demonstrate the truth of statements which otherwise might be deemed fabulous.

COLORADO.—It appears from the reports of various officials resident in this territory, that "a development of mineral wealth superior to that of any other portion of the Pacific coast has taken place." Discoveries of great importance are being continually made; the surface and depths alike reward the toil of the searcher. According to Gov. Evans, millions of paying claims might even now be offered to competition with the certainty of large profits.

NEVADA.—Our Government has had similar gratifying information from this territory. Here are the great silver mines, and also the Potosi gold rock and silver mountain. The geologists of Nevada claim for it a superiority in richness over all the other territories! In August last there were 140 crushing mills in operation, which turned out weekly, each eight cords (so called) of ore, yielding $160 per cord.

NEW MEXICO.—According to the report of the Surveyor General, September, 1862, it appears that valuable gold fields had been discovered near the Colorado not far from the 35th parallel of latitude, and that emigration had begun to direct itself to that quarter; gold and silver had been previously obtained in large quantities in various other places when the rebellion broke out, and New Mexico became for a time the scene of Texan forays.

IDAHO AND WASHINGTON TERRITORIES.—These lying north of California, between the latitudes of 42° and 49° are also rich beyond calculation in the precious metals. About ten thousand claims have been worked successfully the last year, and every day increases the number. We may then safely assume that these territories are full of the precious metals. Where the native rock commonly produces $150 per ton, and this yield may be reasonably considered an average for the best quartz bearing districts, it is almost beyond the region of figures to determine how much gold and silver are to be taken out of these hundred millions of square miles.

The great question is how to make these territories most valuable to the country. We have not yet ended this war, and a large national debt is hanging over us. To our mind, the territories offer themselves at the very right moment to dispel all anxiety on that subject. The Commissioner of the Land office has already taken up the idea of disposing of the mineral lands, so as to produce the most revenue to the Government. The general opinion is, that the fee of these lands should be kept in the nation as a perpetual inheritance, and only licenses to work them should be issued for a certain per centage. This is probably the shape the subject will finally take.

With these remarks, we propose a practical adaptation of these mineral regions to the necessities of the nation. There is wealth enough there to pay off the national debt in a very few years; and there should be enough obtained at once to pay the interest of the debt and relieve the people from the taxation they now endure, and endure cheerfully, to their honor be it spoken. What is wanted is a system of Government mining, with proper Bureaus. The mining districts in each of the territories should be surveyed and mapped out, so to be easily divisible into claims, by known metes and bounds, as has been practised with other Government lands. Certain portions of these should be offered on leases at a certain rental, proportioned to the yield. This would take away all chance of an unequal bargain as between the Government and the lessee. Warrants for claims might also be issued for certain portions of the mines, in certain well-known localities, which would find a ready sale in the domestic and foreign markets, and would be a temptation to emigrants. No doubt the treasury would be largely benefited by the sale of these gold warrants. But finally, to turn these monntains of gold into the treasury, require in our judgment the following arrangements.

The establishment of a mint, assay office and crushing mills in each territory, to be carried on at the expense and for the profit of the Government. The crushing machines as now owned and managed by private capitalists, absorb from the rock worker without machines, the largest share of his gains. If the common hand laborer had the assurance of the Government that he should receive the full value of his ore, it would make a vast difference to him in his motive to labor, and in the beneficial result. In short, to express our opinions in a word, mining claims should be certain and plentiful.

The Government should furnish at convenient points all the conveniences for turning these ores into money, so that the laborer who unloaded a cord of gold ore at one end of the public building, could almost get the proceeds of it in gold dollars at the other end. If not the same day, yet at a very early one. The proceeds of the mines should be turned into coin on the spot, instead of being sent away thousands of miles to be assayed and stamped. For these services and aids the Government should charge a per centage or seignorage which it might do on almost its own terms.

Mining would become a certainty in this manner, officially directed and protected; and for this protection, regularity of operations, and prompt payment for labor, one quarter of the net proceeds would be cheerfully paid by the miner. Nor would the working of the mines in some rich localities be an unprofitable job for the Government to take itself. The Russian Treasury is largely replenished from the Ural by similar arrangements.

Our plan, then, is to turn these treasures of the territories into actual money, by the aid of the Government in establishing mills, assay offices and mints. This once known, Europe will be depopulated by the departure of the poor industrial classes to share in our great wealth. Let this system we have merely sketched be carried ont, and the national debt will disappear from our sight, and a state of prosperity be developed in this country to which the imagination is not yet equal.

Stock dividend paid Aug. 1, 1862, 5 per cent.	237,310 00	
Cash dividends declared, payable Feb. 1863, on the capital stock as increased, 49,943 full shares, 10 per cent	499,430 00	
Amounts charged during the year in settlement of old claims, and for worthless notes and accounts	32,016 61	
		1,006,066 61
Surplus		$27,570 14
Add surplus January 1, 1862		416,825 79
Total surplus January 1, 1863		$444,395 93

Compared with the previous year. the gross earnings show an increase of $761,663 39; with an increase in expenses of only $110,493 02—making the increase in net earnings, $651,170 37.

The investment in roads, depots and equipment, has been increased during the past year $286,940 62, which amount has been expended in the purchase of the Springfield, Mount Vernon and Pittsburg Railroad, and in permanent improvements made thereon; in the construction of additional side tracks; in the purchase of real estate for depot purposes; in the erection of freight houses; and in the purchase of additional freight cars and locomotives. The Superientendent, in his report, says:

Considerable improvement was made to buildings on the main line during the year, and charged to repairs of same, consisting of a new Freight House, 32 by 60 feet, at Wellington, also, at Grafton, a brick Freight House, 30 by 40 feet. A new Passenger House was also built at New London, 20 by 48 feet, and the Passenger and Freight House, at Berea, thoroughly repaired. Two brick Pump Houses were built, one at Galion, jointly with the B. & I. R. R. Co., and one at Grafton with the C. & T. Co. In both buildings boilers, and "Worthington's Steam Pumps," have been placed for suppling the stations with water, the expenses of both charged to building repairs. The Cleveland Freight and Passenger Buildings were also extensively repaired.

Repairs and renewals of Fences, although not as large, as in 1861, were sufficient to meet ordinary decay.

The track has been maintained in good condition with the following principal items of expense.

2,591	Gross tons Rails re-rolled	$61,127 17
250	" " new Rails	15,625 00
14,172	Rails repaired	7,004 59
67,943	Cross Ties	21,062 33
9,400	Joint Fastenings	8,361 94
1,677	New Chairs	861 16
	Frogs and Switches	5,000 00
679	Keg. Spikes	3,916 75

Extensive additions to side tracks were made at several stations to facilitate the passing of trains, and a large amount of gravel hauled for renewal of road bed.

No new bridges were required on the main line during the year, and the amount expended for repairs although light, was sufficient for safety and durability.

The purchase of the Springfield and Delaware Branch, increased the number of Locomotives five, but they were not sufficient for the Branch traffic and construction work. The U. S. Government made a requisition on the Company early in the year for one Locomotive, and one of our heaviest ten-wheeled engines was put in good condition and turned out to meet the order, the Company receiving the appraised value for it. To meet the pressing demand of business as far as possible, two engines were hired from the C. & E. R. R. Co., for about two months in the fall, the mileage made by them being included in our accounts. A contract was made in August for three new Locomotives, to be delivered during the fall months, one only was delivered before the close of the year, but so late as to be of little service in the year's business. The repairs to all engines have been as thorough as possible, under the extraordinary demand made by the greatly increased business, and the results obtained fully sustained their efficiency. It is confidently expected that the two new engines will be delivered early in the coming year.

The result of the yearly service of all engines is as follows:

Passenger service	262,298 miles.
Freight "	472,261 "
Fuel "	35,299 "
Graveling and repair service	41,965 "
Switching "	114,805 "
	926,628 "

Increase over 1861, 219,468 miles.
Cost per mile run, for repairs, 6.21 cents.
" " Oil, Waste and Tallow, 0.43 cents.

Two Engines are being changed to Coal Burners, in the Company Shops, and will be out early in 1863.

The three new Engines are to be Coal Burners.

With the Delaware and Springfield Branch, the Company received 54 House, Stock and Platform Cars. Many of them were unfit for use. Eleven have been broken up and eight re-built, in the Company Shops. The U. S. Government were supplied with 25 House Car bodies, on a requisition made early in the year, and these have been replaced from the Shops of the Company. The general repairs were fully maintained, and our numbers, with but two exceptions, were full at the close of the year. The number owned by the Company on 31st of December was as follows: House Cars, 394; Stock Cars, 123; Platform Cars, 109—Total, 626.

We were unable to supply the demand for Cars during the year.

The Passenger equipment was not increased, but received thorough repairs. 28 first class, 4 second class, 3 mail and express and 5 baggage cars, comprise the stock.

Number of through passengers carried, 40,140; way do., 191,802; soldiers, on government account, 48,117—total 280,059. The average rate received per mile was 2.57 cents. Tons of freight transported, 571,087; do., carried one mile, 57,083,044.

The assets and liabilities of the company, as appears on its books, are as follows:

Secretary and Treasurer—GEORGE H. RUSSELL.

Pittsburgh, Fort Wayne and Chicago Railway.

To the Editor of the RAILROAD JOURNAL:

DEAR SIR—I have pleasure in handing you, herewith subjoined, a statement showing the financial condition of this company at Feb. 28th ult.

It will be recollected that the balance of income account is the net result of the operations to the above date, after making all current charges for expenses of transportation, interest on bonds, (except the income bonds secured by the third mortgage,) and expenditures for extending and perfecting the railway, equipment and other appurtenances, (usually termed construction expenditures,) including also, the charge of $535,173, referred to in the first Annual Report, for the amount of the so-called Ohio and Pennsylvania Railroad Company's bridge bonds, and the Pittsburgh, Fort Wayne and Chicago Railroad Company's Chicago depot bonds. The reduction during the first two fiscal months, in the balance to the debt of income, December 31st ult. has been $37,160 04.

The approximate earnings for March ult. were $461,322 37, being an increase of over 56 per cent. over the corresponding months of last year; and for the first quarter to March 31st ult., they were $1,165,270 41, being an increase of 35 per cent. over the same period of 1862.

Respectfully &c., &c.

THO. D. MESSLER,
Comptroller.

Private Bridges.--Duty of Railroad and Canal Companies to Repair.

BRIDGES OVER RAILROADS AND CANALS IN THE STATE OF PENNSYLVANIA. THE WYOMING CANAL CO. HELD UNDER OBLIGATION TO KEEP IN REPAIR A BRIDGE DESTROYED AND RE-CONSTRUCTED BY THE LACKAWANNA AND BLOOMSBURG RAILROAD COMPANY.

This action was brought by one Jesse C. Ammerman against the Wyoming Canal Company to recover damages for the refusal of the defendant to repair a private bridge over their canal. The case was tried in the court of Common Pleas of Montour County, Pennsylvania. The material facts of the case are as follows:—

The commonwealth of Pennsylvania having constructed the North Branch Canal through the tract of land owned by the plaintiff, built on the premises a bridge over the canal with an abutment and the necessary embankment on each side, for the use and accommodation of the owners of the said farm. This bridge with its embankments, was kept in repair by the Commonwealth of Pennsylvania until the Governor, under the provisions of the act for the sale of the state canals," passed 21st of April 1858, assigned and transferred the canals to the Sunbury and Erie Railroad Company. In the 5th section of this act it is enacted that the Sunbury and Erie Railroad Company, or their assigns, immediately after taking possession of the said canals, shall be bound to keep up the same, including public and private bridges crossing the said canals, as heretofore done by the canal commissioners, in as good repair and operating condition as they now are." The Wyoming Canal Company subsequently became the owner of that part of the canal which passes through the plaintiff's farm, and took possession of the same. By an act of Assembly passed 5th April 1852 and a supplement thereto passed 3d March 1853, the Lackawanna and Bloomsburg Railroad Company was incorporated "with all the powers and subject to all provisions and restrictions prescribed by an act, entitled an act regulating railroad companies, approved the nineteenth day of February 1849" and were authorized to build and construct a railroad from Scranton to Luzern county, to connect with the Sunbury and Erie Railroad Company or Susquehanna Railroad Company, at the town of Sunbury or northward thereof, at any point in the counties of Northumberland and Lycoming. By another supplement, passed 5th of April 1855, the railroad company was authorized, "with the assent and under the direction of the supervisor of the North Branch Canal to locate their road at certain points thereof upon the berme bank of said canal." &c. The railroad company constructed their road from Scranton to connect with the Sunbury and Erie Railroad at the town of Northumberland, but it was after the Commonwealth had parted with her canals and the defendant became the owner of the part now in their possession, that the railroad company located and built their road through the plaintiff's land upon the berme bank of the canal, and in doing so tore down the superstructure of the canal bridge, took away the embankment and the wing walls of the abutment on the north side, converted it into a pier, and added seven and a half feet to its height—raised the abutment on the south side four and a quarter feet higher—increased the width of the base of the embankment and raised it to correspond with the increased height of the abutment, thereby making the embankment steeper and three feet narrower on the top. They then re-constructed the superstructure over the canal with the old material at this increased elevation, and with other materials, and extended the bridge forty nine feet over the railroad by two trestles to a new embankment—made by them on the north side.

The railroad company are required by the twelfth section of the act of 19th of February 1849, "for the accommodation of all persons owning or possessing land through which the said railroad may pass, to make or cause to be made a good and sufficient causeway or causeways, whenever the same may be necessary to enable the occupant or occupants of the said land to cross or pass over the same, with wagons, carts and implements of husbandry, as occasion may require and the said causeway or causeways, when so made," to "maintain and keep in good repair." The alteration, extension, and elevation of the bridge was rendered necessary to the railroad company locating their road as above stated. The canal company gave notice to the plaintiff, that if any alteration was made on the bridge by the railroad company, with his consent, they would consider themselves released from their liability to keep it in repair and the plaintiff gave notice to the railroad company that they could *not* make any alteration with his consent."

The bridge afterwards becoming unsafe, the plaintiff notified the Wyoming Canal Company to repair it, and on their refusing to do so brought this action.

On the trial the plaintiff requested the court to charge that the Wyoming Canal Company, as vendees or assigns, claiming under the vendee of the Commonwealth, became by the purchase of the North Branch Division of the Pennsylvania Canal, liable to keep up this private bridge on the land of Jesse C. Ammerman (as well as all other public and private bridges crossing said canal) as the same had been theretofore done by the canal commissioners, in as good repair and operating

condition as it was at the time of the sale of said canal by the commonwealth, for the benefit and convenience of said Jessie C. Ammerman, the then and present owner of the land, and that no act of the Lackawanna and Bloomsburg Railroad Company, done without the consent of said plaintiff, could release the defendants from their liability, and that under the evidence the plaintiff was entitled to recover damages. The Court refused to charge as requested, and instructed the jury that the bridge should be kept in repair by the Railroad Company and not the Canal Company; that the Railroad Company had by their acts taken the bridge out of the control of the Canal Company, and had released the Canal Company from their obligation to keep it in repair.

There was a verdict and judgment for the defendant and the plaintiff then appealed to the Supreme Court of the State. Upon the argument it was urged upon behalf of the plaintiff that the liability of the Canal Company to keep the bridge in repair was fixed by the act of April 21st 1858 (above cited), which imposed this duty upon the Sunbury and Erie Railroad Company *and their assigns*, which position, it was conceded, the Wyoming Canal Company occupied, that being thus bound, the company could not absolve themselves from this obligation. The plaintiff did not do so; and these were the sole parties to the contract. That by altering the bridge, the railroad company could not destroy this obligation between the plaintiff and the canal company, and that if the canal company permitted them to locate their railroad in such a way as to increase the cost of keeping up the bridge, without protecting themselves by requiring the railroad company to defray the additional expenses they must take the consequences. On the part of the defendant it was urged that the bridge which the defendant was "bound to repair" had been destroyed by the railroad company under the power granted in the charter, and a new structure rendered necessary which the canal company had nothing to do with but which the railroad company was bound to erect and keep in repair.

The following was rendered at the decision of the case, in favor of the plaintiff.

THOMPSON, J.—It was not denied, that, as assignees or transferees of the Sunbury and Erie Railroad Company, the defendants were bound to keep up all public and private bridges across the canal as theretofore had been done by the commonwealth. For a failure to repair the farm bridge on the plaintiff's land, this suit, after notice to repair it, was brought, and it was agreed on the trial below that repairs to the extent of $10 were required at the time and that this was the amount of the damages to be assessed if the plaintiff was entitled to recover. Certainly to all appearance this would seem to present a very clear case of liability on the part of the defendants to the plaintiff.

But the defendants contend, notwithstanding, against liability, because that the Lackawanna and Bloomsburg Railroad Company, have by virtue of their charter, located their road on the berme bank of the canal, and that this increases the magnitude and expense of keeping up the bridge over the canal, and that therefore they, the railroad company, are answerable to the plaintiff under the provisions of the general railroad act of 19th Feb. 1849, for not keeping up proper causeways over their road. But this is not the question here; it is the bridge over the canal that is in this controversy, and this the defendants are expressly bound to keep up. If the railroad company have injured the canal company in regard to it or increased their responsibility and expenses in keeping it in repair, the law will be very lame if it did not require them to make compensation, as it would be bound to do to any other proprietor who's property might be taken or injured by it. We have not the company before us however; but we can see that it is possible for it to be answerable also to the plaintiff under its charter; but if it were, this could not destroy the plaintiff's right to hold the canal company to its obligation. A man may have several parties bound to the performance of duties and obligations to him, and there being several so bound does not relieve either until satisfaction from some one is made. The assignments of error all relate to the same thing and are sustained. It was an error to charge that the canal company was not liable to repair the bridge in question, and the judgment must be reversed; but as the amount of the damages was agreed upon, if the plaintiff was entitled to recover, we will enter judgment now for that sum instead of putting the parties to a new trial. Judgment entered accordingly.

Marietta and Cincinnati Railway.

To the Stockholders of the Marietta and Cincinnati Railway, as re-organized:

The Board of Directors respectfully submit the following special report:

In consequence of the unsettled condition of the business of the road at the time, and the absence of the President in Europe, the second annual report was omitted.

The following brief statement of the affairs of the company is now presented, for the purpose of giving the stockholders an intelligent view of the present condition of the property:

1. The general account or balance sheet, showing the position of the Company on the first day of February, 1863.

2. A statement of the total revenue from traffic, and the working expenses, from the date of re-organization, 15th of August, 1860, to 1st of February, 1863.

3. A statement of the traffic and working expenses for the half year from 1st of August, 1862, to 1st of February, 1863.

4. A statement of earnings and expenses for the months of February and March.

Revenue Account from August 15th, 1860, to February 1st, 1863.

General charges, including Little Miami rent	18,643 02	
Rep'irs of railways, bridges, rolling stock, depots, water stations, and engine house and shops	24,302 67	
		79,225 85
Net earnings		$42,889 60

In the general revenue account, a balance of net earnings is shown of $328,974 25.

This sum is made up of the following items, to wit:

Construction		$206,093 38
Paid on account of Trustees' loan		19,925 22
Purchase of Union Railroad (acc't of)		54,363 46
Coupons 1st mortgage bonds		11,182 78
Materials on hand		1,058 36
Cash in bank		7,709 86
Outstanding balances	$92,311 15	
Less bills payable and pay roll	63,669 90	28,641 25
Total		$328,974 25

Construction.—The expenditure of $206,093 38 for construction, as stated in balance sheet, and making up a considerable portion of net earnings, has been directed to the rebuilding of a large portion of the equipment of the road, which, at the time of re-organization, had become greatly dilapidated; to the construction of new bridges, of which 2,000 lineal feet have been built; and to the excavation of the "Bridges" tunnel. The latter work is now completed, and only awaits the finishing of the western approach to be brought into practical use, thus displacing the principal obstacle to an economical working of the line. The work on the approach is progressing as fast as the nature of the material and confined space for operations will permit.

As a result of the above named expenditure, the equipment of the road is now in an efficient condition for moving the traffic.

The bridges which had become defective have been replaced with new structures, and the most difficult portion of the temporary lines adopted at the opening of the road removed.

Trustees' Loan.—It will be remembered that the sum of about $200,000 was advanced by parties holding the securities of the company, for the purpose of effecting a purchase of the property at the receiver's sale. Of this amount, the principal portion has been replaced by sales of mortgage bonds at 90c. But there is still remaining on 1st February, 1863, the sum of $20,463 64, due to parties making the advance. The Board have directed this to be paid on the first of May next.

First Mortgage Bonds.—Of the first mortgage bonds there have been issued, up to the first of February, 1863, $289,410 48; of this amount, $238,510 48 were issued toward payment of the "trustees' loan," and the residue of $50,900 as payment on the Union Railroad, agreeably to the contract for the purchase of that property.

The following resolution was adopted by the Board of Directors, at the meeting on 11th March, 1863:

"*Resolved*, That as a guarantee for the punctual payment of the interest upon the funded debt of this company, the first net earnings in each half of the fiscal year, to the extent necessary for the purpose, shall be set off and immediately deposited, as follows, viz: So much as may be necessary to pay the coupons upon the sterling bonds, in the London Joint Stock Bank, and such sum as may be necessary to pay the coupons of the dollar bonds, shall be deposited in New York, which deposits shall be held subject to this purpose only; and that public notice of the deposit shall be duly made by publications in the cities of London and New York, in such a manner as the President may direct."

By refrence to the statement of earnings for February and March, (No. 4,) it will be seen that a surplus beyond expenses has been realized of $42,889 60. In accordance with the foregoing resolution, funds have been deposited with the "London Joint Stock Bank," for the payment of interest on the sterling bonds, and with Messrs. Winslow, Lanier & Co., New York, for the interest on the dollar bonds, both payable 1st of August next.

Revenue from Traffic for Six Months.—By reference to the revenue account, (No. 3,) for six months, it will be seen that the total revenue from traffic, for the half year ending 31st January, was $323,815 83

The working expenses and the rent of the Little Miami Road, for the same period, was 165,285 68

Leaving as net earnings the sum of... 158,530 15

Less mortgage coupons, due 1st of February 11,182 78

This leaves the sum of..... $147,347 37

which would have been applicable to dividends had it not been necessarily expended for purposes of construction. A dividend of 8 per cent. on the first preference shares, amounting to $4,153,700 00, would have absorbed..... 124,611 00

This would have left a surplus of..... $22,736 37

Union Railway Purchase.—It will be remembered that the railway of this company being the nine miles in the valley of the Ohio river, between Scott's Landing and Belpre, opposite to the terminus of the Baltimore and Ohio Railway, at Parkersburg, was purchased by the trustees and ratified by the stockholders of this company at its first meeting. The purchase included, besides the nine miles of railway, four first class locomotives, and a lot of shop tools and machinery, much needed by this company. It is expected that the final payments under the contract will be made by this company so as to receive a title deed to this property, within the present fiscal year.

Hillsboro' and Cincinnati Railway Purchase.—The railway of this company, being thirty-seven miles in length, sixteen of which forms part of our trunk or main line, was also purchased as above.

For this property, payment was to be made in the shares of this company.

In pursuance of this contract, the holders of the first mortgage bonds of the Hillsboro' Company, are rapidly converting the same into the shares of this company, and there is good reason to expect that full payment for this property will be completed in time to procure the title deed previous to the next annual meeting.

Completion of the Railway.—The Directors have entered into a contract with Messrs. Dodge, Balch & Co., (a firm composed of five parties, all of whom are experienced contractors, and of good standing as practical business men,) for all the heavy work required to place the railway in good condition to be worked with safety and economy.

This contract embraces, in part, the following, viz:

The completion of the "Big Tunnel," at Pilcher's Summit.

Permanent earth embankments and masonry to displace all the wood trestles, between Chillicothe and the Ohio river.

Rebuilding of all the remaining original wood bridges on the line.

Cutting down the heavy grades, ballasting the track, and all the bridge, arch, and culvert masonry, required for this work.

Four powerful steam excavators are to be put in operation in filling up the trestles with earth, without delay. It is expected that twelve months of vigorous work will complete the tunnel and remove all serious obstacles, thus placing the line in a position to assert the advantages of its geographical position and accomplish its traffic satisfactorily.

Ample means for the completion of this work have been obtained by the negotiation in Europe of a sufficient amount of the first mortgage bonds of the company, on the most favorable terms.

Ohio River Bridge.—By an act of Congress, this company is now authorized to erect a railway bridge across the Ohio river, to connect its line of railway with that of the Baltimore and Ohio Railroad Company.

Negotiations are pending with that company for the immediate building of this bridge, and as the preliminaries of a contract have been substantially agreed upon between the two companies, by which each company is to contribute its fair portion of the cost, there is no doubt the work will be vigorously prosecuted at an early day.

Rates of toll are to be assessed upon the traffic passing over this bridge, to produce an income equal to the interest on its cost and its maintenance.

Early in the present fiscal year, the Baltimore and Ohio Railway (our only connecting line with the Atlantic seaboard) was again obstructed by the war in Virginia, and so continued until the 7th day of January, when it again resumed through business, thus depriving this company of all participation in the through traffic from and to the seaboard, from the 2d of September to the 7th of January, embracing the entire half year with the exception of thirty-five days.

The officers in charge of the "Traffic Department" estimate that the business traffic thus lost would have been equal to the capacity of the railway and its rolling stock, in their present condition, and of the average monthly value of from $80,000 to $100,000.

But for this calamity the net earnings would probably have been more than equal to the interest on the small mortgage debt ($289,410 48) of this company, and a dividend upon its entire preference share capital.

The Board feel that the days of despondency and gloomy foreboding in regard to this property, have passed away, and that it has entered upon a career of prosperity which gives assurance of a bright future.

During the last half year the earnings have been equivalent to the interest upon $5,000,000 per annum. This result has been accomplished in the face of most formidable obstacles.

The incompleteness of the track has been of itself a constant drawback upon the business and prosperity of the route. In addition to this, the frequent interruption of the Baltimore and Ohio Railroad by casualties of the war, has done much to impair that confidence which is so essential to the proper development of railroad property. Notwithstanding these discouragements, the earnings have become the basis of a credit which has already supplied the company ample means for perfecting its present track. As soon as this is accomplished, and the connection with the Baltimore and Ohio road secured, by a bridge over the Ohio River—thus affording a through and continuous gauge from Cincinnati to the seaboard—the stockholders may look with confidence for satisfactory dividends.

The Board are confident that the future wants of the company, either to further perfect the line, or to increase its motive power and equipment, or to make either or all of the proposed extensions, which may prove necessary to increase its traffic, or to secure its independence, can be obtained by further sales of its first mortgage bonds upon satisfactory terms.

Already the company have had overtures for the work incident to extending the line to Wheeling, Cincinnati and Dayton, and receive in payment the first mortgage bonds of the company. But the Board are not yet prepared to decide upon their policy in regard to these extensions. But developments are being rapidly made which must at an early day make our true policy apparent, and the stockholders may then rely upon such decided and energetic action as may be necessary to secure the true interests of this railway, without delay.

The Marietta and Cincinnati Railway has, in its geographical position, and in the topographical features of the country, perfect security against any future rival, and a greater breadth of country to support it than any similar enterprise in Ohio. When its connections are completed, it forms a system which secures its perfect independence, supplying railway facilities for at least one-fifth of the territory, and a corresponding portion of the population of the State of Ohio.

It is an "improvement" which, with more certainty than any other in the State, will continue to increase in its revenues for half a century to come. It is rendered so by its geographical, topographical and mineralogical features, of which fact, abundant proof will be found by a glance at an accurate map, delineating those peculiar features.

NOAH L. WILSON, *President.*

Amount outstanding 31st December, 1862		$2,454,000

—dated 1st April, 1861, and payable, coupons semi-annually, July and January, and principal 1st April, 1891, at New York City.

The Milwaukee and Prairie du Chien Railway are successors to the Milwaukee and Mississippi Railroad Company and are vested with the property by virtue of a sale under the process of foreclosure of a mortgage. The proceedings were for and on account of the several classes of creditors and stockholders of the old company, and the property purchased at the sale was conveyed to the present company, an association formed under the General Railroad Law of the State of Wisconsin.

The indebtedness (less sinking funds) of the Milwaukee and Mississippi R. R. Company on the 1st Sept., 1860, was as follows:

Due employees, etc., preferred by order of court		$35,112
Notes secured by mortgage of real estate		21,378
1st mort. 10 p. c. bonds, due July 1, 1861	$74,000	
" " 8 p. c. " " July 1, 1862	526.000	
" " 8 p. c. " " April 1, 1863	647,000	
" " 8 p. c. " " June 1, 1877	1,037,000	
" " 8 p. c. " " July 1, 1866	346,000	
Interest due on 1st mortgage bonds	805,960	—2,935,960
2d mortgage 10 p. c. bonds	$600,000	
Interest on 2d mortgage bonds	57,950	— 657,950
2d mortgage to Milwaukee City	$300,000	
Interest on the same	38,920	— 338,920
3d mortgage	$396,069	
Interest on the same	12,570	— 408,639
		$4,896,959
Amount due to Sinking Fund		138,208
Amount of mortgage and preferred liens		$5,036,167
Floating debt and interest	$525,347	
Claim of Milwaukee City	$234,000	
And interest to 1st January, 1860	59,000—290,910—	816,257
Whole indebtedness as claimed		$5,852,424
Share capital, general issue	$2,685,000	
" " issued for farm mortgages	767,800—	3,452,800
Total to be re-organized		$9,305,224

The road and property were purchased at a cost of $7,500,000 and paid for as follows—

First mortgage 7 per cent. 30 year bonds	$2,556,000
First class preferred 8 per cent. stock	1,095,000
Second class preferred 7 per cent. stock	1,086,800
Common stock	2,761,800

The arrangement reduced the old first mortgages from 8 to 7 per cent. bonds and converted the other classes of debt into preference shares, leaving the old common stock to come in at a scaled rating to make up the difference between the bonds and preferred shares and the total cost of $7,500,000.

The annexed is an abstract of the agreement of the bond-holders of the Mjlwaukee and Mississippi Railroad Company, dated 30th July, 1860, for the purchase of the road at any foreclosure sale and the re-organization of the purchasers:

First, Each 1st mortgage bondholder to receive for principal a new bond (convertible into the first class preference stock) secured by a 1st mortgage

of all the property of the company and for interest 1st class preference shares. The mortgage to be for 30 years at 7 per cent. and not to exceed $2,556,000, the amount of 1st mortgage bonds outstanding. The company to provide annually $204,480 (being 8 per cent. on $2,556,000) andafter paying interest at 7 per cent. the remainder to be applied as a sinking fund to redeem at par semi-annually an equal amount of 1st mortgage bonds. The bonds to be thus redeemed to be drawn for. Scrip stock to be issued with each bond with power to vote.

Second, The 10 per cent. second mortgage bondholders to receive for principal and interest 1st class preferred stock.

Third, The third mortgage bondholders to receive for principal and interest 2d class preferred stock.

Fourth, The City of Milwaukee for its claim of $234,000 to receive 2d class preferred stock.

Fifth, The floating debt holders to receive common stock for their debt and interest.

Sixth, So much of the stock as remains after deducting the above amounts from $7,500,000 to be divided pro rata among the stockholders.

The above plan of re-organization was carried out in its material form, and the new company commenced operations early in the year 1861.

Under the re-organization and in pursuance of an act of the Legislature passed 14th April, 1860, it is provided that "The preferred stockholders of the first and second class, shall elect the directors under the new organization, until a dividend shall have been earned on all the preferred shares of the several classes, when all of the preferred stockholders shall elect the directors, until a dividend shall have been earned on all the shares of the said company, both preferred and common stock, and thereafter all the shareholders of the said company shall elect the directors."

STATEMENT OF EARNINGS AND EXPENDITURES, 1862.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending May 1, 1863, was as follows:

Passengers	$19,119 61
Freight and live stock	33,860 35
Mails and sundries	1,294 23
Total	$54,274 19
Corresponding week of 1862	47,220 25
Increase	$7,053 94

The earnings of the Grand Trunk Railway for the week ending May 2, 1863, were:

Passengers	$23,800 10
Freight and live stock	53,422 67
Mails and sundries	3,300 00
Total	$80,022 77
Corresponding week, 1862	70,526 31
Increase	$9,496 46

The earnings of the Illinois Central Railroad for the 1st week of May, 1863, were ... $63,000 00
Do., 1862 ... 31,146 00
Increase ... $31,854 00

The cash collections in the Land office from the 1st to 8th were $30,119. The sales were large—to upwards of one hundred and twenty purchasers, amounting to $71,123.

The earnings of the Michigan Central Railroad for the 1st week of May, 1863, were ... $48,799 00
Same week, 1862 ... 44,161 00
Increase ... $4,638 00

The earnings of the Chicago and Rock Island Railroad for the 1st week of May, 1863, were ... $31,800 00
Same week, 1862 ... 22,400 00
Increase ... $9,400 00

The earnings of the Cleveland and Toledo Railroad for the 1st week of May, 1863, were ... $21,728 00
Same week, 1862 ... 16,600 00
Increase ... $5,123 00

The earnings of the Chicago and Alton Railroad for the 1st week of May, 1863, were:

Passengers	$10,416 74
Freight	21,448 31
Sundries	974 33
Total	$32,839 38
Same week last year	19,907 95
Increase	$12,931 43

The earnings of the Galena and Chicago Union Railroad for the 1st week of May, 1863, are:

Freight	$19,682 84
Passengers	8,719 22
Mails, etc.	1,300 00
Total	$29,702 06
Same week, 1862	28,762 07
Increase	$939 99

The earnings of the Detroit and Milwaukee Railroad for the 1st week in May were:

Passengers	$7,054 13
Freight and live stock	11,400 62
Mails and sundries	648 29
Total	$19,103 04
Same week, 1862	16,410 28
Increase	$2,692 76

THE BALL PATENT Improved Railroad Car Wheels.

CHATHAM BANK BUILDING, 182 Broadway, }
NEW YORK, May 1, 1863. }

The Proprietors of THE BALL PATENT IMPROVED RAILROAD CAR WHEELS, "TO PREVENT CARS RUNNING OFF THE TRACK," and for the SAFETY, ECONOMY and SPEED of the running of cars on Railways in general, would respectfully submit the same to railway companies and all others who desire an improvement in the present running of cars, for SAFETY and SPEED, THUS SAVING AN IMMENSE COST TO RAILWAYS and the lives of passengers, and at the same time a large increase of speed. The improved wheel is a double flange wheel and axle. These wheels can be adapted to any of the old rails. All the change necessary is the old frog, which can be taken out in sections when railroads cross, and the new frogs substituted in place of the old.

The single flange wheel can pass over them the same as the double flange. A single train of cars at a time can thus run over a single division or section as may be desired, where the NEW FROGS are inserted, and so on until the entire line is ready, as the cars and engines are supplied with the IMPROVED WHEELS; thus not interfering with other trains on the road. THE NEW FROGS consist simply of a plate of best quality of wrought iron, and does not cost one-fourth the amount of the frogs now in use. One of the old ones will replace one of the new as far as expense goes. The use of the DOUBLE FLANGE WHEEL upon Railroads for safety is wonderful, and can hardly be described. In a word, their use is as safe in or at the instant of an accident as the single flange is while running, where all right or no accident occurring.

The cars with the DOUBLE FLANGE WHEELS in either case remain stedfast on the track.

In running around curves so dangerous oftentimes, especially as all old tracks are liable to spread and thus the cars thrown off the track, involving the loss of many lives, THE DOUBLE FLANGE is just the improvement to meet this case. THERE IS NO MORE FRICTION than in the running of the single flange, in turning the curves. THE PLAY IN THE BEARING PART BETWEEN THE TWO FLANGES is one to two inches, and it cannot be for friction to be on but one side of the rails AT A TIME. It is self-evident that the play must be on one side of the rail or the other. There cannot be more friction than with the single flange. We would ask if there is not a TERRIBLE FRICTION in the case of the single flange, especially in passing curves, and more particularly those that are old and so liable to spread; and also where the track is laid around steep EMBANKMENTS IN AND ON THE MARGIN OF RIVERS? Is it not at such places especially that our dreadful railroad accidents mostly occur, causing such destruction of human life, and also of property?

With the DOUBLE FLANGE the cars are held firmly on the track, the double flange holding the weak, spreading track together, and WITH NO MORE FRICTION, UNLESS THE SPREADING RAILS CAUSE IT, THAN THE SINGLE.

The cars thus run securely and safely around the curves, and at an accelerated speed, if so desired.

THESE WHEELS can be made so that a speed of 50 miles an hour can be attained with perfect safety, and a sample WHEEL here in New York shows a speed of 60 MILES AN HOUR, with the same degree of safety. This is the one for the great Pacific Railway to San Francisco, Cal., and the only one that can attain that speed with safety. It is also as well adapted to other leading roads. Experiment has tested the principle by running a car of a few hundred pounds weight one hundred times around an exceeding short curve, with obstructions upon the outside track, and at every trial was perfectly proof against running off the track. It is well known that if obstructions are on the outside track around a curve, the wheels are instantly thrown off with the single flange; in the case of the breaking of an axle THE DESTRUCTION OF THE TRAIN AND LOSS OF LIFE are the usual consequences. In a word, THE ADOPTING of the DOUBLE FLANGE CAR WHEELS will prevent the running off of the cars and the consequent destruction of life and property on our public railways. On this point alone it appeals to all the best feelings of our nature as a public benefit, independent of any pecuniary considerations in any quarter. THE NEW YORK CENTRAL RAILROAD would save half a million of dollars some years by having our improved wheels on their cars and engines, and could, if they desired, attain a speed of 50 or 60 MILEs an hour WITH SAFETY, as they might wish, and also nearly save that amount, besides by adopting our "COMPOUND BLIND SELF-LOCKED RAIL."

SAFETY AND SPEED ARE THE TWO GREAT OBJECTS ATTAINED, and which are so much to be desired by all who are interested in railways, and especially the traveling public, who have a right to ask a decided improvement in these respects, particularly when we take into consideration the sacrifice of life that yearly occurs on our railroads, to say nothing of heavy losses. Other considerations also favor the adoption of these improvements now offered, viz:

It is believed, nay positively asserted, that the saving in one year's business on a single railway line WOULD PAY THE COST OF ADOPTING THESE IMPROVEMENTS; and it cannot be denied, the railway that carries its passengers safe, and at the same time largely increases its speed, will most assuredly be a great favorite with the traveling public far and near.

It may be asserted without fear of successful contradiction, that our DOUBLE FLANGE WHEELS are the only ones that can attain that end.

We therefore respectfully ask your earliest attention to this important improvement now offered to the railway public.

Railway companies cannot overlook the fact that SAFETY, ECONOMY AND SPEED are here obtained in adopting the great improvement.

THE IMPROVED RAIL heretofore referred to is THE "BALL PATENT COMPOUND SELF-LOCKED RAIL," which drops together without any bolts. THE INSIDE SECTION IS TWICE AS STRONG AS THE OUTSIDE SECTION OF THE RAIL ON THE BEARING PART. IT CAN BE LOCKED through its whole length, thus preventing the crumbling and wearing out of the inside section now so common with the rail now in use, by the running of cars over them, as was the case and the main objection to the use of the Winslow Compound Rail. MAKE THIS BLIND SELF-LOCKED RAIL of tough, good iron, and put it down weighing about 80 to 85 pounds to the yard, and they will last, under ordinary circumstances, forty years, and will not need repairs, thus saving an immense expense.

You have, then, a permanent and proper rail for railways, and your engines will last twice as long in running upon them. This patent commends itself to the railway public for economy, durability, and safety, with firmness over all other rails now in use.

We ask, also, for this improvement, the early attention of all railway companies.

☞ Orders are respectfully solicited from Railroad Companies for "THE RIGHT" OF THE IMPROVED WHEEL; also THE IMPROVED RAIL. The rights will be sold for a single company or for a state, either for the "Rail" or "Wheel," or both together. We will also fill orders for Wheels, Axles, and Rails.

CASH, BONDS, AND STOCKS, having a market value, received for the rights.

☞ All communications addressed to GEO. A. WHEELOCK, *active partner*.

Very respectfully,
WHEELOCK & CO.

American Railroad Journal.

Saturday, May 16, 1863.

Stock Exchange and Money Market.

The latest disturbances which the Money Market has undergone, have been produced by foreign influences, almost exclusively. Neither victory nor defeat seems to make much difference with the averages of the market; even gold has lost its elasticity, and exchange is in a comatose state. The only large sensations are those which are occasioned by the *London Times*, and Arthur Roebuck, "whose voice is still for war." We propose to dispel the panic which such false oracles create by a few words of common sense. The pretended fear of the foreign alarmists that the U. S. are seeking a war with England, is a transparent fraud, since none know better than they who express it, that Congress is the only power which can declare war, and that its earliest session will not take place until December next. They also know that the U. S. is not in a condition to carry on two wars at once, and is not likely to commit such a folly, whatever cause it may have for making such an attempt. All such talk in the *London Times* and *Post*, *Manchester Guardian* and *Liverpool Mercury*, is the merest nonsense of the hour, and an insult to the intelligence of their readers.

It is not the danger of a war to be declared on our part, that the English people have to encounter, but their own. For beyond all question there is a party in England, which for purposes of its own, desires the interruption of the amicable relations which have existed between the two

countries. This is the party which is out of office, and is as unscrupulous in its political management, as the meanest faction which raises its head among ourselves for temporary success. Yet even this party is held in check by circumstances if not by principle. It would be no pleasant position for even a successful clique to occupy just now in England, whose policy was a war with the U. S. Besides the infallible odium which would attend an alliance with a confederacy based on a principle which England has rejected with horror, there would be material consequences in the increase of taxation, now pushed to its last extremity, the destruction of English commerce, the interruption of all intercolonial communications, and an entire overturn of the British manufacturing interests. This would be the moment for the long meditated assault of France upon England, such as is the dream if not the hope of every ardent Frenchman, no matter under whose sway he may take his pinch of snuff. These are considerations which have their weight and influence even on the most unprincipled, and therefore we are not in the least surprised to find in a very late editorial article in the *London Morning Herald*, of the 24th of April, a journal extreme in its toryism and rabid with hatred of democratic institutions, the following timely invocation:

"To all honest and true-hearted men among the Northern Americans we protest that nothing can be further from our wish than to seek occasion of war with them, however much they may seem to have wronged us by outraging our trade. We entreat them to dismiss from their minds, as a diabolical suggestion, the hint of war with this country which has been whispered in their ears as affording some escape from their dilemmas. To ourselves there could be no greater calamity. We should not so much fear their power as deplore their enmity. To the deadly antagonism between North and South, to the desolation of America below the Potomac, there would be added a conflagration that would involve, at least, one continent in all the miseries of war, and a conflict between the elder and one of the younger branches of the English race, which, if prolonged would convulse both hemispheres and put the world back a century nearer to barbarism."—April 24.

It also appears that our minister at London has explained to the satisfaction of the British Government, the circumstances under which he gave a friendly letter to the owners of a British vessel bound to Metamoras. The noise made about this affair is simply ridiculous, and Mr. Adams' conduct, if he chose to defend it, was in strict conformity with British precedents. It is a matter of history that during the various blockades, which the French and English in the Napoleonic wars declared against each other, the English Government was in the constant practice of issuing letters of safe conduct, or licenses, to all the neutrals who would pay for them. The practice was defended on the ground that it was a great source of revenue. But with what face can these sensitive statesmen pretend, that Mr. Adams committed a crime, when we point to another fact, that during our war of 1812-'15, the British naval commanders on our coast sold permits to American vessels to trade. Admiral Hotham was famous for this kind of business, and there are parties still alive, or recently were, as for example Capt. Gardiner of Nantucket, who with such a pass pursued his business uninterruptedly and was allowed to sail unhurt through all the British blockading squadrons on our coast.

We therefore conclude there is not the slightest apprehension to be entertained of any rupture with England, however anxious some may be on both sides the water, men with bad motives who would bring it about.

What this country has to do, is to move right on, put down the rebellion, restore the Union, magnanimously forgiving the remnant of those who have taken up arms against us, a monument of their own folly, which will require no exasperating comments either from ourselves or our posterity.

We have again to record the increasing financial strength of the Treasury. The conversions of currency into the funded debt continue on an enormous scale, not only reducing the circulation afloat by hundreds of millions, but giving the Government all the cash it requires for its current expenses. We accord to Mr. Chase the highest praise for his financial skill, his clear perception alike of the wants and resources of the country; his cool persistence in his own plans amidst the solicitations and projects which have beset him from all quarters, which would have placed the war, the Government and the cause, not where it is now in the hands of the people, but of the city bankers. No such financial success ever attended the Pitts, or Peels, or Colberts, or Neckars of Europe. None such ever marked our own previous history.

All honor then to this distinguished statesman, who, in rare contrast to most of his associates, is found to be the right man in the right place.

The receipts with the Sub-Treasurer on Tuesday for conversion into the 5-20's reached two millions of dollars, the whole conversions thus far exceeds seventy millions, and no further issue of "greenbacks," or postal currency is necessary. It is quite possible, that no more will be required during the war, and if so, the return to specie payments will take place without the least revulsion or depreciation in ordinary and established values. The Money Market is easy, and gold lingers along between the 40s and 50s without much sign of life.

The railway market is in a lively condition, and prominent shares are in demand at advancing prices. It is reported that there is an effort making to change the direction of the Hudson River, and similar rumors prevailed in relation to the Harlem. We can, however, deny the report that Commodores Vanderbilt and Law were in the street buying up against each other, "the lion and the unicorn fighting for the crown." The lawyers having obtained possession of the outposts, have now laid siege to the disputed franchises, and as long as the litigants find money, the former will find arguments, no matter on which side.

It has been whispered that on examining the charter and acts amendatory of the Harlem road, particularly the acts of 1831 and 1832, no other company than theirs has any right to make any street railways at all! The right was vested in the stockholders by their acceptance of the same, and their payment of their money as a consideration; so that it is quite possible if the fight grows warm, we shall hear of an application to enjoin the use of all the city railways as an infringement of the rights of the Harlem stockholders. This would be a curious phase of the controversy indeed.

S. Hallett & Co.'s *Circular* for this week is of a political character, and evidently the work of a master mind. As it is not however, within our range of subjects we do not give it the usual place. Our tables will be found instructive and accurate, furnishing information to financiers and dealers in money, which cannot be found in any other journal tabulated in so convenient a form.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Finances of Connecticut.

The funded debt of the State is $3,000,000, and the unfunded debt, March 31, 1863, was $392,300.

On the 1st day of April, 1862, the balance in the Treasury to credit of the civil list was		$298,489 52
The receipts have been—		
From State bonds	$1,000,000 00	
From premium and interest on bonds	104,291 67	
From other sources	1,189,842 89	
		2,294,184 56
Total		$2,592,623 98
The expenditures have been for payments to families of vol'nteers	$582,704 97	
To the several Military Departments	1,502,000 00	
All other expenses	401,748 97	
		2,486,453 94
Leaving a total balance on hand of		$106,170 04
Total		$2,592,623 98

ANNUAL REPORT OF THE CITY INSPECTOR OF THE CITY OF NEW YORK Dec. 31, 1862. Document No. 4.

We are indebted to D. E. Delevan, Esq., for a copy of this interesting report, illustrating in the most complete manner the vital statistics of this great city, and offering subjects for profound study. Those would be appropriate to a purely philosophic Journal. We notice that the health of New York compares most favorably with that of London, the mortality being to each million of inhabitants, ratably, 21.244 in New York to 22.744½ in London. We see no reason why this city should not be the healthiest in the world. We have pure air, good water in abundance, and a system of sewerage which leave filth and disease without the least right of intrusion, if our Sanitary laws are properly executed.

LESSONS AND PRACTICAL NOTES ON STEAM, THE STEAM ENGINE, PROPELLERS &c., FOR YOUNG ENGINEERS, STUDENTS AND OTHERS.—Revised by J. W. King, Chief Engineer U. S. N., from the late work of W. H. King, U. S. N. Fourth Edition. D. Van Nostrand, 192 Broadway. Trubner & Co., London. Price. $2.00.

This work had its origin in the difficulty experienced by its author in educating himself for the management of the Steam Engine; finding the treatises to which he had recourse, either entirely theoretical, or practical; where in the one case, the student was left to find out the application of the rules as he could, or in the other, to apply the rules without understanding the reasons. This fault has been guarded against in this work, and the Young Engineer, as well as the Amateur in the Science of Steam will find every thing clearly explained, taught and made available. The chapters on steam, expansion valves, hydrometer, a very important one on casualties to steamers, (quite original in its design and of great utility;) boilers, materials, &c., are very interesting even to general readers. We recommend the subject of "Marine economy" page 153 to the consideration of those unscientific projectors, who believe in long ship canals to be filled up with vessels of 1000 tons burthen, and do not know there are some limits to the proportions between canals and vessels navigating them, and a certain economy in those proportions which if overlooked, renders wholesale calculations abortive, and expenditure useless. Why do not the British seamen use the Caledonian Canal. Why do they make a voyage of seven or eight hundred miles by sea, rather than go a few miles through this ship canal.

☞ Railroad Companies and Contractors, by referring to the advertisement of G. T. M. Davis, in another column, will find where they can obtain a lot of first quality American Railroad Iron.

Iron Production of Eastern Pennsylvania in 1863.

The condition of the iron making districts of Pennsylvania has greatly improved during the past year under the stimulus of a constant demand for iron at remunerative prices. In the Schuylkill district the following anthracite furnaces were in blast:

William Penn	2	Reading	1
Spring Mill	1	Pioneer	1
Merion	1	Leesport	1
Swede	1	Robesonia	2
Phœnix	3	Plymouth	1
Keystone	1		
Henry Clay	2	Total	17

making 76,000 tons of iron. Those not in blast were one of the Swede furnaces, one at Norristown, Port Kennedy and Hopewell, four only. Of these, two will be put in blast early in the present year, 1863, and others would have been but for the high price of labor to raise ores. This has been an important difficulty in the way of many of the iron works of the State. The production of the Schuylkill district proper was, in all, of anthracite and charcoal iron, about 80,000 tons; that of charcoal iron, from the Longswamp and one or two other furnaces, being about 4,000 tons.

The Lebanan Valley has had the following furnaces in blast:

At North Lebanon	3	The Donaghmore	1
At Cornwall	2		

In all six, and making about 30,000 tons of pig iron in 1862. The iron ore from the magnificent Cornwall mines is carried to a large number of furnaces on the Schuylkill and Susquehanna, in addition to supplying the furnaces in its vicinity, in consequence of its peculiar value for mixing with the ordinary ores.

In the Lehigh district the production of iron would have been very great during the year 1862, but for injury to several of the furnaces in the June flood. It was larger, in 1861, than in any other district of the United States for that year. The following furnaces were in blast in 1862:

Allentown Iron Co	4	Lehigh Valley	2
Thomas Iron Co	2	Trenton Iron Co	3
Lehigh Crane Iron Co.	5	Durham (below East'n)	1
Glendon	2		
Poco	1	In all	21

producing 175,948 tons of pig iron.

Three furnaces were not in blast. The production of single furnaces in the Lehigh Valley is very large, some going as high as 13,000 tons each, and the average of several being 10,000 tons. The injuries from the flood in June reduced the aggregate product probably 20,000 tons below what it otherwise would have been. The precise production of the leading works has been obtained to make up the above aggregate. A small quantity of charcoal iron was made in the Lehigh region in 1862, probably 2,000 tons.

The Susquehanna Valley had a full share of its furnaces in blast during 1862. In the upper portion of that valley there were, at Danville:

The Pennsylvania Iron Works	3 furnaces.
Columbia Furnace	1 "
The Bloom & Irondale, at Bloomsburg	2 "
The Lackawanna, at Scranton	4 "
In all	12 "

producing 56,000 tons of iron.

In the lower part of the Susquehanna Valley there were the Shamokin, Duncannon, Harrisburg, Middletown, Marietta, Safe Harbor, and two or three other furnaces in blast the greater part of the year. The whole number was about 14, producing, 38,000 tons of anthracite, and 3,500 tons of charcoal pig iron.

In the Interior the Freedom Iron Company, at Lewisburg, had one furnace in blast, and, with others near the Juniata, made about 8,000 tons of anthracite, and 15,000 tons of coke and charcoal iron. The Cambria works had there coke furnaces at Johnstown and one at Frankstown, making over 30,000 tons together.

The several districts sum up as follows:

	Anthracite.	Charcoal & Coke.
Schuylkill	76,000	4,000
Lebanon Valley	80,000	.....
Lehigh Valley	175,948	2,000
Upper Susquehanna	56,000	6,000
Lower Susquehanna	38,000	3,500
Juniata and Cambria District	8,500	55,000
Totals	384,448	70,000

The production of the coke and other furnaces of the western part of the State has not been obtained. It was larger than for several years previous.

The quantity of anthracite iron made in Pennsylvania *east of the mountain* for a series of years past is approximately stated in the table below for the years not fully reported; 1859 and 1862, only having been collected with accuracy.

	1859.	1860.	1861.	1862.
Schuylkill	73,500	70,000	60,000	79,000
Lehigh Valley	137,832	160,000	160,000	175,948
Upper Susqueh'a	37,500	35,000	40,000	60,500
Main Susqueh'na	37,000	48,000	50,000	68,000
Total tons	286,332	313,000	310,000	381,448

The quantity assigned in the previous table to the Lebanon as a distinct district is here put with the Susquehanna. The production of charcoal and coke iron in addition has varied from twenty to forty thousand tons in Eastern Pennsylvania, exclusive, of course, of the great Cambria works, which have alone produced about 30,000 tons of coke iron annually.

Rolled Iron: Bar, Rails, Plate and Forge Work.—Several extensive rolling mills have been added in 1862 to those previously existing in the State, two of which are on the Lehigh, one at Allentown, and one at Bethlehem. Together these have a capacity to roll 40,000 tons of bar and rails annually. A large new rolling mill for bar and sheet iron was put in operation near the close of the year at Sharon, Beaver county, west of Pittsburg. Two new and extensive steel works have been established at Pittsburg during the year, one by Naylor & Co., of Sheffield, England, and one by J. Parker & Brothers, of Pittsburg.

The production of rolled iron cannot be obtained with the same precision and facility as in previous years, in consequence of a natural hesitancy of proprietors at giving their business publicity. From the returns of those who have obligingly responded to inquiries as to the quantities rolled, it appears probable that the quantity rolled in Pennsylvania, in 1862, was much greater than in 1856; for which year it was stated, by Charles E. Smith, Esq., in the report of the American Iron Association, at 241,484 tons. The census of 1860 gives 259,709 tons as the amount rolled for the year ending June 1, 1860. There is a large increase in miscellaneous rolled iron, merchant bars, ship-plates, &c., and less, relatively of railroad iron. Statements from a considerable number of mills have been obtained on the Lehigh, at Pottsville, Reading, Danville, Johnstown and others nearer the city. These cannot properly be given separately, but they indicate an advance of perhaps, twenty per cent on the production of 1856, or about 280,000 tons in all rolled in Pennsylvania.

The value of this production at the prices prevailing during the year would increase the sum named in the census of 1860, nearly or quite twenty-five per cent, making over $15,000,000 in place of $12,643,500.—*Report of Phila. Board of Trade,*

Pittsburgh, Ft. Wayne & Chicago Railway.

The following is a synopsis of the annual report of Jno. B. Jervis, General Superintendent, dated February 25, 1863:

In report of February, 1862 the two most prominent items of improvement wanted, were on track and rolling stock. From causes noticed, there has been much less done during the year 1862, on the track, than had been anticipated. Scarcity of men, unfavorable weather in the early part of the season, and especially for the want of rolling stock, which was so absorbed by the general traffic, that it could not be spared for the improvement. A reduction of traffic was expected in the summer months, but this was but partially realized.

The work of raising, draining, and ballasting of track, and the substitution of stone masonry for the timber abutments of bridges, and for culverts, must necessarily progress slowly, from the interference with this kind of work by the general traffic of the Railway; hence the importance of improving time, to get it forward. These works, together with what will be required for hauling wood and coal engine fuel, need 18 trains of platform and coal cars through the season. But it is not probable, with the rolling stock we have and propose to have, that we can maintain over 12 trains, and these not in full before June or July next, and not average over 10 trains, of which 6 to 7 trains may be at ballast.

RAILS.

Out of 7,500 tons proposed for re-rolling, we received 7,129 tons of which only 5,554 tons were obtained in time for use in 1862; or less than expected for use in the year by about 2,000 tons.

Track relaid with re-rolled rails—miles	51.25
Track relaid with rails repaired at Smith's Forge, a large portion used, not to relay, but in supplying defective rails	33.25
Total renewals	84.50

This has greatly improved the track, but is scarcely more than the annual wants for the traffic of this Railway. We should aim to increase these renewals about 50 per cent. the present year. This, with $100,000 expended in raising, ditching, filling and ballasting, would give a decided improvement and materially economize future current expenses.

There have been 2 miles extension of second track, and an extension of side tracks, 5.02 miles; total, 7.02 miles. We suffer much inconvenience and delay from want of sufficient side track. My estimates provide for 11 miles additional side track this year; this is as small provision as should be thought of. Also 2¼ miles of second track west of Leetsdale.

We have too small a stock of rails to provide for repairs and re-rolling, and to increase this, and provide for new side and second track, it is estimated that we shall need 2,000 tons new rails the current year. The wants of increasing traffic will continue, for a long time, to absorb rails in the extension of sidings and double track, but I understand the necessity of keeping this down as much as practicable until other important improvements are more advanced.

In addition to what there is on hand, the estimates call for 182,459 cross-ties. The provision for cross-ties is regarded as no more than an average supporting provision, and will be chargeable to operating expenses.

ENGINES.

There have been 18 new locomotive engines obtained the past year. The Government took 3 engines in July last, and 1 very old engine blew up, reducing our old stock 4 engines; and the addition of 18 new ones increased our stock 9, during the year. These all came on the Railway between the 1st October and 30th December.

Excluding 2 steam cars, our total stock of engines is 119, with which the year 1863 has been commenced.

New rolling stock under contract:		
25 engines, at a contract cost of		$229,025
150 freight box cars	$105,250	
12 passenger coaches	40,800	
8 emigrant cars	9,600	
		155,650

Boarding Cars, used in Wood Trains	..	6	...	6
Tool Cars	..	7	...	7
Totals	245	648	388	1,281

PASSENGER STOCK.

58 first class coaches, in good order.
8 second class coaches in fair order.
6 mail cars, 3 need repairs.
14 baggage cars, 3 need repairs.
3 express " need small repairs.
8 emigrant " " general "

Total cost of repairs of freight cars	$117,624 38
" " " passenger cars	44,198 90
	$161,814 28
Repairs per mile run of freight cars	7.64 cents.
" " " passenger, mail, &c. cars	1.26 "
Earnings per mile run of freight cars	11.35 "
" " " pass., mail, &c. cars	36.11 "
Cost per mile run of trains	69.6 "
Ratio of expenses to receipts	50.07 per c.
Average tons of freight carried in freight trains	76.4 tons.

Estimates have been made for improvements and extraordinary repairs wanted; of this, there is needed for the current year, $1,348,660.

About $200,000 will be chargeable to operating account, being for extraordinary repairs, and $1,148,660 for improvements.

Not far from this amount will be needed for the current and the following year.

Included in the estimate, there is provision for rolling stock	$577,175
This item, is less, in my judgment, than it should be.	
There is no doubt it would be expedient to add to this, for ten more freight engines; but the indications of traffic may decide this hereafter.	
The next item in importance is the extension of second and side tracks, 18½ miles	120,000
New rails (exclusive of the provision made in the estimate for second and side tracks), and the re-rolling of old rails	224,280
For fencing and cattle guards	25,000
	$966,455
The remaining items are for station buildings, as engine and water houses and shops, and for stone in place of wood work, in renewing bridges and culverts, and for filling, raising and ballasting track	382,205
Aggregate	$1,348,660

During the last year, less was done than could have been done, had the wants of the work been well understood, and provision for funds made at an earlier day. The Board will see the importance of early deciding to what extent these improvements shall be made, so that as little time be lost as possible in carrying the work forward.

The true interest of the institution requires an expenditure of $2,000,000, as early as it can be advantageously done. It is very desirable this amount may be expended during this and the ensuing year. By this, the traffic would be enlarged and expenses would be a less ratio than at present. With such improvements completed, we may ordinarily expect a total annual traffic of $5,000,000, which, after paying interest and dividends on the stock, will leave means to go forward with improvements that will be demanded by the increasing traffic and the condition of the Railway. We can go on as we have done without so large an outlay, but it must be unsatisfactory to ourselves and our patrons. The Board will bear in mind, this is a long Railway, with a traffic from its Western terminus of over one million dollars per annum, and loudly calls for further facilities; that its works are incomplete, and large expenditures, as has already been stated, must be made, to render it economical in its working, and to meet the urgent demands that are made upon it.

The report of the General Passenger Agent shows an increase in passenger earnings, over 1861, exclusive of Government passengers, of (19.6) say 20 per cent. and about the same rate of increase on the competitive portion. In the table of the General Passenger Agent, the Government portion is left out, and therefore shows the increase of legitimate, or the ordinary class of traffic, and considering the condition of our works, is very satisfactory, as an indication of the growth and prospective value of this branch of our traffic.

The unusual rise in the price of labor and materials, necessarily advances our expenses, demanding a corresponding advance in rates of traffic; so far, we have been able to maiutain our rates in accordance with expenses. But we are to bear in mind, this has been done during a time of pressing traffic, and when, from the influence of navigation, it falls off, we shall doubtless have more difficulty in doing this. It will be difficult to secure a proper per centage of net earnings for the current year, but we hope to be able to maintain a good approxomation to this, and at same time give reasonable satifaction to the public.

SAVINGS' INSTITUTIONS OF MASSACHUSETTS.

The following table exhibits the progress and condition of the Savings' Institutions of this Commonwealth at quinquennial periods since 1835 and in 1861 and 1862:

	Institutions.	Deposits.	Total Deposits.	Aver. to each Depositor.	Total Expenses.	Expenses to Deposits.

Made at his Shops in Philadelphia. Employing only the most experienced workmen and BEST MATERIAL, he pledges himself to furnish a Spring of the greatest Elasticity, and one which shall be uniformly reliable in its carrying weight.

All Springs tested to double their usual load.

PHILIP S. JUSTICE,

No. 14 N. FIFTH St., Philadelphia. No. 42 CLIFF St., N. York.
SHOPS—Sr FIFTEENTH & COATES STS., PHILADELPHIA.

THE FIRM OF W. R. TRAVERS & CO. is this day dissolved by mutual consent. Either partner is authorized to sign the name of the firm in the liquidation of the business.

W. R. TRAVERS,
S. F. MASSETT.

Dated NEW YORK, May 1, 1863.

LIMITED PARTNERSHIP.

Notice is hereby given that the undersigned, JENKINS VAN SCHAICK, STEPHEN F. MASSETT, WILLIAM R. TRAVERS and GEORGE A. OSGOOD, all of whom reside in the city of New York, have this day formed a limited partnership pursuant to the provisions of the first title of the fourth chapter of the second part of the Revised Statutes of the State of New York, and the various acts of the Legislature amendatory thereof.

That the name of or firm under which the said partnership is to be conducted, is VAN SCHAICK & MASSETT.

That the general nature of the business to be transacted is the Stock Exchange and Brokerage business, and all financial transactions connected therewith, on commission. That the said JENKINS VAN SCHAICK and STEPHEN F. MASSETT are the general partners, and that the respective places of residence of the said general partners, are as hereinbefore stated, and the business of the said partnership is to be carried on in the City of New York. That each of the said special partners has contributed, as capital to the common stock of the said partnership, the sum of fifty thousand dollars. That the said co-partnership commences the first day of May, one thousand eight hundred and sixty-three, and will terminate on the first day of May, one thousand eight hundred and sixty-eight.—Dated NEW YORK, May 1, 1863.

JENKINS VAN SCHAICK,
STEPHEN F. MASSETT,
General Partners.
WILLIAM R. TRAVERS,
GEORGE A. OSGOOD,
Special Partners.

RAILROAD SLIDE TABLE
FOR SALE!

A COMPLETE SLIDE TABLE FOR DOUBLE or single truck cars, in perfect order, and with powerful and convenient gearing, for sale very cheap at

4t17 **No. 61 Hudson st.**

Burden, Hubbard & Co.,
MACHINISTS,

MANUFACTURERS of Horizontal, Portable and Hoisting Steam Engines, Sugar Mill-, Saw and Grist Mills, Boilers, Hydraulic Presses, Pumps and Gearing for working mines, etc., etc. No. 102 Front st., BROOKLYN, N. Y.

AN INVALUABLE POCKET GUIDE
FOR THE ENGINEER AND MECHANIC!

THE

Mechanic's & Machinist's
PRACTICAL
BOOK OF REFERENCE

Containing Tables and Formulæ for use in Superficial and Solid Mensuration; Strength and Weight of Materials, Mechanics, Machinery, Hydraulics, Hydrodynamics, Marine Engines, Chemistry, and Miscellaneous Recipes. Adapted to, and for the use of all classes of Practical Mechanics. Together with the

Engineer's Field Book

Containing formulæ for the various methods of Running and Changing Lines, Locating Side Tracks and Switches, etc. Table of Radii and their Logarithms. Natural and Logarithmic Versed Sines and External Secants, Natural Sines and Tangents to every Degree and Minute of the Quadrant, and Logarithms of Natural Numbers, from 1 to 1,000.

BY CHARLES HASLETT,
Civil Engineer.

EDITED BY CHARLES W. HACKLEY,
Professor of Mathematics in Columbia College, in New York.

Issued in a compact pocket volume of 520 pages, containing 176 diagrams, bound in morocco, pocket-book form, PRICE TWO DOLLARS. *Copies mailed free of postage on receipt of price.*

The work is eminently a PRACTICAL **POCKET GUIDE** to ALL CLASSES OF **Mechanics** and **Engineers.** As a book for practical use in field work, it is confidently believed that this is more direct in the application of rules and facility of calculation than any work now in use. The original portion of this part of the work is submitted to the profession, fully confident that its use will be practical proof of its superior merits.

The tables and examples have been prepared with great care, and their accuracy may be relied upon. Further information can be derived from the circular containing the contents in full, which will be sent on application to the publisher. Inducements are offered to clubs of six or twelve, for particulars of which also apply to publisher,

JAMES G. GREGORY,
No. 46 Walker St., New York.

NOTICE to CONTRACTORS

ALBANY AND SUSQUEHANNA RAILROAD.—Sealed Proposals will be received by the undersigned, at the Office of the Albany and Susquehanna Railroad Company, No. 73 State street, Albany, until Tuesday, the 2d day of June next, at 10 o'clock A. M. of that day, for the Grading, Masonry, Bridging and Fencing of 31 miles of the line of said railroad, extending from Richmondville in Schoharie County, to Oneonta, in the County of Otsego.

The line will be divided into sections of convenient length, and proposals will be received for single sections or for the whole line.

The line will be ready for examination by contractors on and after Monday, the 25th day of May next, and Maps, Profiles and Plans, with Specifications, may be examined at the Engineer's Office, in Albany, on and after that date. Blank proposals with all necessary information will also be furnished to those wishing to propose for work.

Proposals should be enclosed in an envelope and endorsed "Proposals" and directed to the undersigned.

The proposals which may be received in pursuance of this notice will be opened by the undersigned and canvassed, and the results reported to the Directors to aid them in making a proper award of the work.

Parties proposing, who are unknown to the undersigned, will be required to give satisfactory references.

The right is reserved to reject any or all proposals, as may be deemed for the interests of th Company. Albany, April 24th, 1863.

5t18 C. W. WENTZ, Chief Engineer.

NEW YORK, HARLEM & ALBANY R. R.

For ALBANY, TROY, NORTH and WEST.

ON and after Monday, November 17th, trains will leave as follows:

For White Plains—8.15 A. M., from Twenty-sixth street depot, stopping at all stations.

For Albany—10.30 A. M., Mail Train, from Twenty-sixth street depot, stopping at Williamsbridge, White Plains, and all stations north to Chatham, and at Kinderhook, Chatham Centre and Schodack.

For Williamsbridge—11.15 A. M. and 8.30 P. M., from Twenty-sixth street depot, stopping at all stations.

For White Plains—2.30 and 5.00 P. M., from Twenty-sixth street depot, stopping at all stations.

For Pawlings—4.00 P. M., from Twenty-sixth street depot, stopping at all stations except Yorkville.

For White Plains, 6.15 P. M., from White Street depot, stopping at all stations.

RETURNING WILL LEAVE

Williamsbridge—5.30 A. M., 1 P. M. stopping at all stations.

White Plains—6.10, 7.15, 10.00 A. M. and 4.45 P. M., stopping at all stations.

Pawlings—6.20 A. M. stopping at all stations north of and at Fordham.

Albany—10.30 A. M. Mail Train, stopping at all stations north of and at White Plains, Williamsbridge, Kinderhook, Schodack and Chatham Centre on signal, for New York passengers only.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of SMITH'S AIR LIGHT FOR RAILROADS, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.
In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.
You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

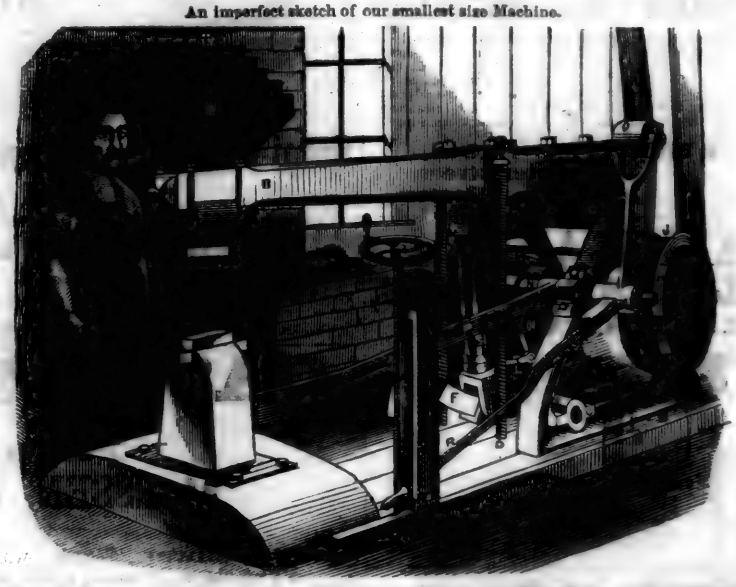
300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 23 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,



I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, 21 Nassau st., or by addressing
CHAS. W. WELSH,
Secretary.

AMES IRON WORKS,
OSWEGO, N. Y.,
SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.

An imperfect sketch of our smallest size Machine.

PAYE'S PATENT FORGE HAMMER, A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York, or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Crampton, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Kaigh's Point, Phila.; Mallory & Cottrell, Mystic, Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Guinness, Albany; Sweet Brothers, Syracuse.

FOX LATHES.

F. W. BACON & CO.,

No. 23 PLATT, corner of GOLD ST.,

NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. Geo. H. Fox & Co., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT REOILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is uncurinc; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downwards beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Picket's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years with uniform success, they confidently offer their services to those requiring such aid.

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS,** etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.

Wall Street.--The Elements of Success.

If Threadneedle street is the barometer of England, Wall street measures with equal sensitiveness the pecuniary atmosphere of the commercial Emporium. The pressure, or the absence of pressure, is clearly indicated by the state of its stock and money market; and to carry out our figure, it would seem sometimes, as if their mercurial element has gone to the utmost limits of expansion on the one hand, or contraction on the other, and that the whole instrument would fall to pieces, broken by being shaken up too much, or crushed by getting under foot.

The great plentifulness of the currency, which is received everywhere with confidence by the people, no matter to what extent it is being issued to sustain the Government and the cause, and is in fact preferred to the paper issued by the best Banks, for it has become universal in the use, must inevitably lead to a certain degree of confidence in its possessors, and as a consequence to continued speculations in a field where *for the time* all is gold that glitters. When up to a certain line, every buyer in a rising market makes money and every seller realizes it, the fascination or rather the temptation is too much for most people to withstand, who have any means with which to venture, or rather put up a margin. All former experience teaches us that the enormous advances of the last few days, or even weeks, cannot possibly be maintained as finally permanent. Harlem at 120 may be surpassed by Harlem at 150, but there is no such intrinsic value in the stock itself to warrant such a price, and nothing but its excellent management and its bright future have carried it more than once, through very serious attacks of insolvency. Still the reports of the enormous sums of money made every day in Wall street stir up the avarice of those who wish to get their share, and the excitement continues and will, up to the moment of a general panic, or liquidation, or a peace. A Wall street fortune is a dangerous possession. It is generally as freely expended as it is made. Why should a man who makes $5 or 10 or 20,000 by half an hour's perspiration, imagine that he can ever be poor. Yet there are numerous instances, unhappily too numerous, of reverses happening to precisely the very men who are for a brief period the masters of the street, and are looked upon as the leading spirits in the market, the veritable owners of Aladdin's lamp. These reverses, marked and instructive, everywhere the subject of comment whenever the moment of reflection arrives, make not the slightest difference, when the tide of speculation once fairly sets in. All embark, a few reach the point they aimed at, but the largest proportion of those who have enlisted in the venture, either sink out of sight in the depths they could not fathom, or are shattered in pieces by the returning waves, and strewed helpless wrecks along the shore.

These reflections have naturally suggested to our minds the question, what are the elements of success, what the assurances one may have of succeeding, if he is disposed to enter the field of competition. If we could answer this question as one might be answered in an exact science, we should no doubt oblige many anxious readers, but it is impossible to ensure them the power of appropriating the qualities which give success. We might lay down some good rules, but it is not every one who can understand or practice under them. To ensure success, in the words of an eminent authority in the street, it is necessary nay, indispensable, that the operator should thoroughly and unmistakeably understand the character and value of the property in which he is dealing. Next, he should comprehend the financial state of the country, and particularly the movements of the Minister of Finance, at a time when on the sagacity and faith of a single man the whole monetary power of the country is dependent; and next, he must be posted in all the combinations and plans of the market, and know the strength, characters, and purposes of the leading operators. These three elements we are informed, are sure to give success to their possessor, simple enough as they appear at first sight. But when we come to consider the subject, we perceive that to possess these elements is to be in the front rank of financiers. He who thoroughly understands the character, resources and the future of a great work like a railway for example, has to combine in his own person the experience of many, obtained after hard struggling; a minuteness of information covering details scientific and economical, and a general knowledge embracing results. In short he must know all that it is possible to know practically, theoretically, and historically of the subject in hand. This is the first step. The second is no easier. He should know the actual condition of the monetary affairs of the country, as well as he does his own. The condition of the Treasury, its wants, expenditures and movements must be thoroughly understood; an intimation from head quarters, has often made the fortune of a a friend. In short one must be a financier and understand the philosophy of money, and be a statesman to understand the exigencies of public affairs before he can fully come up to the second elementary requisition in the case. After becoming learned in the values of properties, and the prevailing system of finance, he must then know every body's business as well as his own! For this is the true intent and meaning of the third element with which we started. We confess we have no formula by which our readers may be guided to the attainment of this knowledge. There are men who have a natural faculty of acquiring this sort of information, but they generally have no others. The combinations of Wall street sometimes defy all the efforts of the curious or the designing. There are corners sometimes with large angles, so large that they are not suspected.

We fear after all, our readers have not learned much from these remarks of ours commenced in good faith, but really without positive conclusions. There are banking houses in this city which unquestionably possess all these elements of success, and are successful; but it would be a dangerous experiment to follow on the part of those who would imitate their example without their talents, their means, their vivacity, their coolness, their courage and their extensive and influential connections.

Aware of what is necessary to be known with regard to the finances of the Union, the States, the Banks, the Railways, and the various funded debts capitalised and treated as property in the business world, we give the best advice possible to offer our readers, when we tell them to consult the tables of the Railroad Journal. No man can safely buy or sell shares or bonds of any description known in the market, without constantly watching these columns of figures, and the corrected weekly reports of the transactions of the money market and stock exchange. These are nowhere else to be found in so perfect and convenient a form. Indeed to carry on a Banking or commission house without constant reference to these tables of ours would be impossible. We offer them one element of success then in our JOURNAL, a work of thirty years care and experience, and in its columns may be found the information most important to be had, and most difficult to acquire in every case of financial interest.

Bellefontaine and Indiana Railroad.

The earnings of this road for the year ending December 31, 1862, were as follows:

From passengers		$120,578 11
" freight		400,017 39
" mail		17,850 00
" express		10,704 46
		$549,149 96

And the expenses were:

Repairs of track	$79,513 25	
" engines	22,422 23	
" cars	57,511 41	
" buildings	11,454 70	
" bridges, etc	5,113 01	
Train expenses	44,850 79	
Depot and station expenses	28,586 92	
Wood	30,523 37	
Oil and waste	4,134 51	
Salaries	5,638 41	
Loss and damage	5,531 02	
Foreign agencies	6,952 13	
Freight expenses	6,816 06	
All other expenses	11,281 73	
		314,829 56
Net earnings		$234,320 42
Interest on bonds	$86,159 10	
Taxes on roads	6,044 51	
U. S. Tax on passengers	1,154 37	
		93,357 98
Balance		$140,962 44
From which has been paid for the redemption of over due income bonds		71,000 00
Surplus		$69,962 44
Compared with the previous year the gross earnings show an increase of		$144,617 09
With an increase in expenses of		79,219 83
Making the increase in net earnings		$65,397 26

The capital stock and first mortgage bonds, are unchanged from the last report. Two second mortgage bonds have been issued in redemption of dividend scrip. The amount of this scrip still outstanding is, $2,328.

Of the overdue income bonds in the hands of the C. C. & C. Railroad Company, $71,000 have been redeemed during the year from the earnings of the road; $1,000 by the settlement of an old account with the C., C. & C. Road, at Galion station: and $2,000 from proceeds of real estate specially set apart to these bonds; making a total of $74,000 redeemed, and leaving outstanding the sum of $25,000.

The real estate agent has redeemed, from the proceeds of real estate, $4,250 00, of bonds due January 1st, 1863—leaving $24,000 of that issue still outstanding.

The total amount of bonds thus redeemed and cancelled, is:

Overdue Incomes	$74,000
Real Estate	20,250
Total	$94,250
Deduct two 2d Mortgages issued	$20,000
Balance	$74,250

No charge has been made to construction account during the year. The new fencing done, amounting to about $1,300, has been charged to repairs of fences; and some small items of right of way to repairs of track. The construction account is considered closed at $3,030,583 92; being $25,682 91½ per mile of road.

The following is the General Balance Sheet December 31, 1862:

ASSETS.

Cost of Road and Equipment		$2,030,583 92
Unsold Real Estate		56,122 36
Proceeds of Real Estate in hands of Trustee		63,307 01
Bills receivable		24,261 58
Due from Executive Committee B. Line		134,392 45
Track Materials and Fuel on hand		20,594 09
Cash in hands of Agents to pay In'st.		32,650 25
Proceeds of Real Estate to apply on Income Bonds		8,343 05
200 Shares Col. Piqua and Ind. R. R. Stock, cost		10,000 00
One Bond of Marion Co., Ohio		1,000 00
		$3,376,254 71

LIABILITIES.

Capital Stock		$1,859,818 02
First Mort. Bonds, due in 1866		791,000 00
Second " " " 1870		164,000 00
Income B'ds, due in 1859	$38,500 00	
" " " 1870	86,500 00	
		$125,000 00
Real es'te b'ds, due in 1858	$1,000 00	
" " " " 1863	40,000 00	
" " " " 1866	48,000 00	
		$89,000 00
Total funded debt, $1,169,000.		
Dividend scrip		2,328 00
Car Loan from C., C. & C. R. R. Co.		11,737 29
Bills payable		2,126 27
Unpaid Interest on Bonds, due Jan. 1863 and after		36,753 90
Balance of Transportation Account.		294,496 23
		$3,376,254 71

Northern Liberties and Penn Township Railway.

The stockholders of this company, at their recent annual meeting in Philadelphia, elected Charles E. Smith, President, and A. Whitney, Wm. Sellers, John H. Towne, H. Pratt McKean, A. E. Borie, S. M. Felton, John Tucker, G. A. Nicolls, J. D. Steele, and James Millholland, Managers.

Camden and Amboy Railroad.

The Directors of the Camden and Amboy Railroad Company recently elected were Edwin A. Stevens, Jno. S. Livingston, Wm. Cook, Benjamin Fish, Jno. L. McKnight, Joseph P. Bradley, and Ashbel Welsh. The Company have straightened their track from Trenton to Dean's Pond, avoiding the bank of the canal, and have erected a splendid stone depot at Trenton.

Central Passenger Railway.

The recent election for directors of this road—being the new passenger railway from Philadelphia to Germantown—resulted in the choice of Peter Evans, President, and John Louty, George W. South, William F. Smith, J. M. Douglass, Louis J. Crans and Emanual Peters, Directors. At a meeting of the Directors, John Louty was elected Treasurer, and L. J. Crans Secretary. The company have already the new road in course of reconstruction, and as soon as rails for it can be procured, the work will be put in operation. This is the company authorized to use dummy engines.

Grand Trunk Railway.

CANADIAN AUDITORS' CERTIFICATE.

MONTREAL, 27th February, 1863.

The accounts of the Grand Trunk Railway Company for the half year ending 31st December, 1862, have now been carefully examined, the vouchers have been compared with the cash book, and the general balances with the various books and departmental returns, and the whole found correct. The capital account has been remodeled, and is now made up in conformity with the act of the last session of the provincial parliament. The system of keeping the accounts has been much simplified within the last twelve months. The general books are now in perfect accordance with those of all the departments and the English accounts, and may, we think, in every respect be considered satisfactory.

EDWARD T. TAYLOR, T. MORLAND, } Auditors.

REVENUE ACCOUNT, DEC. 31, 1862.

Dr.

Expenditure—On account of—	
Maintenance of way, stations, &c	£49,399
Renewal of permanent way, &c	70,257
Locomotive power, and repairs to engines	88,440
Repairs and renewals of cars	28,518
Traffic expenses	69,076
General charges	20,902
Miscellaneous expenses	4,965
Rent paid Champlain Railroad Co	411
Rent of rolling stock	595
Balance carried down	106,798
	£439,361

Cr.

Revenue—on account of—	
Passengers, mails, and expresses	£151,451
Merchandise and live stock	286,273
Rents receivable	1,040
Sundries	508
	£439,362
To postal and military revenue, from Aug. 8, to Dec. 31, carried to separate acco'nt	13,813
Balance carried down	92,985
	£106,798

CAPITAL ACCOUNT, DEC. 31, 1862.

Dr.

Expended on capital account to June 30, 1862, (1,096 miles)	£11,982,868
Amount of transfers from other accounts in general balances and charges, added during half year to 31st Dec. 1862	3,459,201
	£15,442,069

The amounts included in the above charge of £3,459,201 are as follows:

For interest (estimated to 31st December, 1862,) paid, or accrued and to be capitalised	£3,292,112
(Of this amount, £2,793,260 was shown in general balances at 30th June last.)	
For mortgages on lands bought but not yet paid for at Point Levi, Point St. Charles, and Kingston, now brought into the company's books	31,379
For balance of charges and claims upon the company, for construction of Three Rivers and Arthabaska line	97,533
(The company, however, do not admit their liability for the whole of these claims, and the matter is now under discussion, with a view to an equitable adjustment.)	
For balance of aid to subsidiary lines, under act of 1856 (paid by provincial government)	32,650
For capital outlay and charges during half year	8,027
Giving a total of	£3,461,701
Deducting from this a diminution (by a re-arrangement of the subscription) in the amount standing in the company's books as subscription to St. Lawrence Dock and Wharfage Company, (Quebec)	2,500
A net addition remains as stated above of	£3,459,201

Cr.

Share stock—	
Shares consolidated into stock	£2,774,960
Shares not yet consolidated*	64,373
Received on shares forfeited	1,380
Stock to be issued to town of Three Rivers, for subscription to Arthabaska line	32,877
Mortgage debentures—	
Island Pond debentures	90,000
British American Land Co.'s debentures	20,548
Montreal Seminary do.	20,548
Preference bonds and stocks—	
First preference bonds	2,000,000
Arrears of int., on do. to Dec. 31, 1862.	299,507
Second preference bonds	1,111,500
Arrears of int., on do. to Dec. 31, 1862.	137,863
Third preference stock (previously 7 per cent., debentures, 1862)	500,000
Arrears of int., on do. to Dec. 31, 1862.	95,757
Fourth preference stock—	
Previously Quebec and Richmond debentures	100,000
Previously 6 per cent. debentures	2,090,800
" 7 per cent. " 1867	500,000
" 7 per cent. " 1872	500,000
Arrears of int., on do. to Dec. 31, 1862.	515,875
Provincial debentures—Issued on account of Grand Trunk Railway	3,111,500
Amount received on unissued debentures and debenture certificates, alotted with forfeited shares—	
Company's.	3,650
Provincial	3,650
Balance	1,467,281
	£15,442,069

*Includes £61,643, 16s. 8d. shares in St. Lawrence and Atlantic line held by city of Montreal.

Note.—The amount carried into this account as arrears of interest is the total amount accrued, which will be adjusted as certificates are issued.

Erie and Pittsburg Railroad.

It is said that ground will soon be broken up in that part of the Erie and Pittsburg Railroad between Middlesex and Newcastle, being the only portion upon which work has not been commenced.

Buffalo, New York and Erie Railroad.

The Erie Railway Company have taken possession of all rolling stock and other property formerly belonging to the Buffalo, New York and Erie Railroad Company, (including the Genesee Valley Railroad) which will hereafter be known only as a branch of the Erie Railway. Under the lease, the Erie Railway Company are to pay, for the term of 490 years, the sum of $223,100 per year, in monthly installments, beside all taxes and assessments. That sum covers the interest on the entire bonded debt and 7 per cent per annum on the stock of the Buffalo, New York and Erie Railroad Co. The Bath *Courier* says that "the route to Baltimore, Philadelphia, and Washington is to be put in the most complete repair for the accomadation of travelers. The trains on the Williamsport, Sunbury and Northern Central Railroad are to run in connection with those on the Erie and this road, making it a most powerful and commodious consolidation of railroad interests. The great increase of travel between Western New York and Washington renders such an arrangement peculiarly desirable, and will have a strong tendency to attract travel from other routes. The interests of the traveling public will thus be greatly enhanced, and we look for a system of regularity and convenience not hitherto always enjoyed by railway pilgrims."

Indianapolis, Pittsburg & Cleveland R. R.

The earnings of this road for the year ending December 31, 1862, have been as follows:

From passengers		$139,629 67
" freights		291,141 51
" mail		11,687 50
" express		7,620 11
		$450,078 79
And the expenses were:		
Repairs of engines	$15,961 58	
" cars	40,940 31	
" track	42,744 99	
" structures, etc.	6,101 92	
Train expenses	31,927 67	
Depots and stations	16,126 46	
Wood	21,728 54	
Salaries	4,485 44	
Loss and damage	2,534 40	
Oil and waste	2,943 18	
Freight expenses	4,827 85	
Foreign agencies	4,948 98	
All other expenses	7,469 59	
		202,740 91
Net earnings		$247,337 88
Interest and state tax	$55,597 50	
Government tax	1,398 91	
		56,996 41
Balance		$190,341 47
From which has been paid—		
To sinking fund	$24,025 00	
New grounds and buildings	47,485 80	
Domestic bonds redeemed	31,000 00	
Last of floating debt	9,451 29	
		111,962 09
Surplus		$78,379 38

Compared with the previous year, the gross earnings show an increase of $118,265 84
With an increase in expenses of 36,866 58
Making the increase in net earnings $81,399 26

Capital stock and first mortgage bonds, remain as last year. The incomes (except $2,000) have been converted into 2d mortgages, though being in the hands of the Trustee, they still appear in the balance sheet. The last report announced the payment of the floating debt, which was accomplished at the date of the report, although the last payment was made in 1862. The domestic bonds bore ten per cent. interest. It is found that $1,000 of these was redeemed in 1861, and $31,000 have been redeemed in 1862, leaving $400 outstanding, that have not been presented for interest since January, 1861. They will be redeemed when found.

Of the first mortgage bonds $116,000 are now in the Sinking Fund.

The following is the General Balance Sheet for the year ending December 31, 1862:

ASSETS.

Cost of road and equipment	$1,838,508 29
Lands and lots	41,371 63
Bills receivable	26,285 96
Stock of C., P. & I. R. R. Co., at par	10,000 00
Due from other roads	8,025 53
Sinking fund	121,106 44
In hands of agents to pay Coupon Interest	22,776 09
Due from executive com'ittee B. Line	104,683 99
Material for track and fuel on hand.	10,485 53
In hands of Trustee, 1st mort. bonds	9,425 00
Individual accounts	1,170 32
	$2,193,838 78

LIABILITIES.

Capital stock	$835,971 26
Funded debt—1st mortgage bonds.	650,000 00
2d " "	314,000 00
Income "	27,000 00
Domestic "	400 00
Bills payable	11,036 28
Surplus earnings to Dec. 31, 1862	322,503 38
Unpaid dividends	757 54
Unpaid taxes	3,888 32
Interest and discount on S. F. bonds	27,718 37
Due to other roads	403 85
Cash	209 78
	$2,193,838 78

Mining Laws.

As the occupation of our gold bearing territories by a thrifty and industrious population is now rapidly going on, our Government will have to adopt some system of leasing and working the mines which are attracting this emigration. The British Government is, in this respect, in advance of ours, by having mining laws both in Nova Scotia and Columbia. From a late foreign paper we extract the following article in relation to the subject:

The mining laws of British Columbia have just been altered and amended, the better to suit the present condition of the mining region and to secure the interests both of the Government and of the miners. We give a summary under a few heads, which will suffice to convey an idea of the general nature and terms of the law:—

Licenses.—On payment of 1*l.* a year every person of whatever nationality, becomes a "free miner," which confers the right to mine in all parts of British Columbia. A licence is not compulsory, but a miner without it cannot evoke the protection of law in vindication of "mining rights." Laborers generally go without a licence.

Recording Claims.—The placer mines, or diggings, are called "claims," the ownership to which should be recorded or registered in the office of the district magistrate as an evidence of title. This registration costs 10s. 3d. for each "claim," and secures the miner "in the exclusive right to take the gold and auriferous soil upon or within" the same, so long as he continues to pay his annual licence fee. He can "carry the gold and soil away," and he is secured in his "flumes and property of every description, and in land for a residence." The fee is, however, reserved, as hereto-

fore, in the crown. Nothing could be more liberal than these terms.

Size of Claims.—Bar (in streams) or wet diggings, width, 100ft.; length, from high water mark to the lowest water level, for each "free miner." Dry diggings, 100ft. square. The same allowed for all other diggings not specially mentioned, so that the size of the "claims" generally in British Columbia is 100ft. square. Tunnel claims, a frontage of 100ft., irrespective of depth. The gold commissioner allows sufficient time, &c., for "prospecting," or testing, before "the full number of authorized miners" need be employed on each claim. This is a concession to modify the enactment which requires each claim to be worked *bona fide*, and not merely "colorably," to prevent monopoly. In these tunnel claims "each miner shall be entitled to 100ft. square," as I read the act—a quantity which many think excessive.

Rights of prospecting, water necessary for washing and other practicable privileges, are secured to the miners; their rights of property are defined; their liabilities set forth, and the modes of redress provided for, all equitably and liberally.

Quartz Claims (*working gold in situ*).—Size 150ft. in length, measured along the lode or vein, together with its spurs, dips, angles, to the extent of 100ft. in a lateral direction.

These dimensions are for each individual miner, although the rules and regulations issued in conformity with the act do not so state the size.

This act is considered an improvement on the old law, and it appears well adapted to meet the views of practical miners.

Contracts between Railroad Companies.—Assignments.

AGREEMENT BETWEEN THE PHILADELPHIA AND SUNBURY, AND THE SUNBURY AND ERIE RAILROAD COMPANIES. LAW OF PENNSYLVANIA AS TO ASSIGNMENTS PREFERRING CREDITORS.

By virtue of an act of the Legislature of Pennsylvania, passed March 13, 1847, the Philadelphia and Sunbury Railroad Company and the Sunbury and Erie Railroad Company, whose roads connect at Sunbury, by an agreement under their respective seals, agreed that the Sunbury and Erie Railroad Company should run their cars and locomotive engines upon the railroad of the Philadelphia and Sunbury Railroad Company, and erect buildings upon the line thereof, for the accommodation of the cars and engines employed thereon, for the period of three years from the 1st of April, 1857, at certain rates of tolls. The Sunbury and Erie Railroad Company were to retain a specified portion of the earnings made by them upon the road of the Philadelphia and Sunbury Railroad Company, and the balance was to be disposed of according to the provisions of the 6th section of the agreement, which was as follows, viz: "That the Sunbury and Erie Railroad Company shall and will pay the remaining earnings of the local trade and through trade, when received by them in cash, and not required to be retained and applied by the Sunbury and Erie Railroad Company for the purposes herein provided; and the same are hereby, by the said Philadelphia and Sunbury Railroad Company, assigned, transferred, appropriated, and shall be applied and paid in the following manner, viz: (but without any liability in the said Sunbury and Erie Railroad Company, to see to the application of said sums of money, or any of them,) the said Sunbury and Erie Railroad Company shall first pay thereout, unto Stephen Bittenbender the sum of $7,000, being the amount of indebtedness of the said Philadelphia and Sunbury Railroad Company, to him for repairs of cars, with lawful interest thereon until paid; and after payment thereof, shall next pay to Alfred R. Fiske, the sum of $1,800, being the amount of indebtedness of the said Philadelphia and Sunbury Railroad Company to him for services as superintendent, with lawful interest till paid; and after payment thereof, shall pay over and deliver all other sums which would, during the continuance of the contract, become due and payable to the said Philadelphia and Sunbury Railroad Company, into the hands of Edward S. Wheeler," to be applied to the payment of the interest accruing on the mortgage bonds of the said company, in the order of the dates of the mortgages. In March, 1857, the Sunbury and Erie Railroad Company, applied to Bittenbender to make an arrangement with him for repairing their cars and engines, Bittenbender refused to make any arrangement for this purpose until his claim against the Philadelphia and Sunbury Railroad Company for similar services, was settled. Mr. Merrick, the President of the Sunbury and Erie Railroad Company, then informed him of the provisions of the 6th section of the agreement between the two companies, and promised him that his claim should be paid out of the portion due or accruing to the Philadelphia and Sunbury Railroad Company as soon as sufficient for that purpose should be earned. Bittenbender then assented to the arrangement, and agreed to do the repairs for the Sunbury and Erie Railroad Company, and did do them while that company ran the road. After the Sunbury and Erie Railroad Company had run the road for some time Bittenbender believing that they had earned sufficient to pay him, sent his Attorney to Philadelphia to receive payment, and the President of the company promised to pay Mr. Bittenbender. An attachment execution was subsequently issued out of the District Court of Philadelphia by Robert Lucas, a judgment creditor of the Philadelphia and Sunbury Railroad Company, and served on the Sunbury and Erie Railroad Company, who then refused to pay Bittenbender, and this action was instituted.

The case now came before the Supreme Court of Pennsylvania, by an appeal on the part of the plaintiff from a verdict and judgment rendered upon the second trial of the case, in favor of the defendants. The following opinion was rendered by the Supreme Court upon the decision of the case; it affirms the judgment of the Court below in favor of the defendants:

WOODWARD, J.—The opinion of this Court, which defeated the plaintiff's recovery three years ago when this case was here, has never been reported and is mislaid, but the grounds of our ruling may be inferred from the reported case of Lucas *vs.* the Sunbury and Erie Railroad Company, 8 Casey 458. The plaintiff's debt was against the Philadelphia and Sunbury Railroad Company, his action against the Sunbury and Erie Railroad Company. The only *assumpsit* proved against the latter company, was the promise of its president to pay plaintiff's debt of future earnings of the road, as prescribed by the written agreement between the two companies, of 26th March, 1857. But we held that agreement to be in legal effect, an assignment for the benefit of the creditors of the Philadelphia and Sunbury Company, and consequently, that the preferences therein expressed were void. The promise of the assignee to pay, according to the expressed preferences was nothing more than a promise to execute the assignment, and the preferences being void, the promise could not be enforced of course.

We are asked now to reverse our former opinion, both in this case and in that of Lucas, and to hold that the paper of 26th March, 1857, is not in the nature of an assignment for the benefit of creditors. If we should so declare, the plaintiff's case would be well made out, for it was in evidence, that the Sunbury and Erie Company had received net profits enough to make good the promise of their president to Bittenbender. The reasons for considering the lease of 26th March, 1857, an assignment, are well stated in the opinions of Judges Hare and Read, as reported in 8 Casey 461, and are not to be repeated by me. Nor were they shaken by all that was urged in argument on the present writ of error. It was said that the rent reserved and assigned by the agreement of 26th March, 1857, was not capable of appraisement or of inventory under our act of Assembly, that the Sunbury and Erie Company had no power to act as trustee, and that the operative words of the instrument were an assignment directly to the creditors, Bittenbender and Fiske, and not to the Sunbury and Erie Company, in trust for them. For these reasons it was argued, that the instrument could not be supported as an assignment.

If these views are not sufficiently answered by the opinions that were delivered in Lucas's case, it may be remarked, that an assignment may be well made of any property of which the assignor has the actual or potential possession. In the leading case of Graham *vs.* Hawley, it was held that a party who had an interest in land, may grant all fruits that may arise upon it after, and the property shall pass as soon as the fruits are extant, as a parson may grant all the tithe-wool he may have in such a year, yet perhaps he shall have none. But a man cannot grant all the wool that shall grow upon his sheep that he shall buy hereafter, for there he hath it neither actually nor potentially. In Petele *vs.* Tatem, a tenant's assignment of his interest in crops grown in future years of the term was supported. In Watson *vs.* Bagaley, it was said that any binding appropriation of a *chose in action* to a particular use, by any writing whatever, is an assignment, or what is the same, a transfer of the ownership. Now the purport of the paper in question here is to place the railroad of the Philadelphia and Sunbury Company in the hands of the Sunbury and Erie Company, to be stocked, run and repaired, and after applying the proceeds to these objects so far as necessary, then to pay the remaining earnings to the preferred creditors, Bittenbender and Fiske. The railroad was property in possession, its future earnings were potential. Both interests, the actual and potential, passed to the Sunbury and Erie Company, and vested in that company for the purposes of the agreement. We see no reason why the road and its probable earnings could not have been inventoried and appraised as well as any other estate and its future rents, issues and profits. If both a term and rent are assignable; if contingent and potential interests may pass by a deed, they must be susceptible of both inventory and appraisement, for it would be absurd to hold that a deed could pass an interest that was too

unsubstantial to be valid. If the Sunbury and Erie Company had no power to act as trustee, this would not void the assignment. The Court would supply a competent trustee. The question raised in the case, however, has not reference to the capacity of the assignee, but to the fact of an assignment. For the reasons before given, we think an assignment though not intended, was in fact made. And made not directly to the creditors as argued, but to the Sunbury and Erie Company, in trust for the creditors. Though the trust is not very distinctly defined, and all liability for misapplication of moneys is released to the assignee, yet it is too apparent to admit of a doubt that the transfer of the property was by one company to the other in trust, for the benefit of creditors. At no time could Bittenbender have claimed possession of the road under the assignment. *He* was not to earn net profits by the use of it, but the Sunbury and Erie was to have the exclusive possession of the road and to earn the profits. And these when received "by them in cash, and not required to be retained and applied for the purposes herein provided for, shall be applied and paid in the manner following," &c. This was a grant not to Bittenbender and Fiske, but to the Sunbury and Erie Company, for their use and benefit. It was an express trust; we can make nothing else of it. But the preferences are void because forbidden by statute. For all purposes except the preferences the assignment is sustainable.

But here comes in another argument, that the preference of Bittenbender was lawful, because his bill was for repairs of the rolling stock, without which the road could not be kept up. Among execution creditors we do not allow one or more to seize and sell those appurtenances of improvement companies, without which they cannot accomplish the end of their being, but we put the creditors to process of sequestration by which the corporate property may be continued in productive use for the benefit of all creditors alike. And we do essentially the same thing here when we hold this an assignment for creditors, and cut out its preferences. The fact that Bittenbender's labor was expended on cars, entitled him to no preference in the assignment. It is hard to deny him a preference for so meritorious a claim, and it is with regret that we lay down the law against him. But we have to declare the legal effect of his position. He comes in under the assignment. The promise he lays in his declaration was a promise founded upon the assignment. The law forbids preferences in such assignments. The plaintiff's action is to enforce one of these preferences. To sustain this action would be to repeal a statute.

The judgment is affirmed.

Lake Shore, and Cleveland Columbus and Cincinnati Railroads.

Consolidation of Earnings.—The meeting of prominent railroad men, which has been in session here for the past few days, terminated its business on Saturday night and adjourned. We understand that the result has been an arrangment for the consolidation of the earnings of the Buffalo and Erie, Cleveland and Erie, Cleveland and Toledo, and Cleveland, Columbus and Cincinnati Railroads. This consolidation is of greater importance than any we have yet noticed, as the roads in interest comprise the best paying railroad stock in the country, and the agreement will settle a great many difficulties and jealousies that have existed between the management of the various roads.—*Cleve. Herald 11th.*

Cleveland, Columbus and Cincinnati R. R.

The statement made a few days since "that the Cleveland, Columbus and Cincinnati Company had made a settlement with some of the old debts due the road, which were nearly worthless a year ago, but will now yield over $300,000," has reference to the settlement between the Cleveland, Columbus and Cincinnati, and the Bellefontaine and Indiana, and the Indianapolis, Pittsburgh and Cleveland roads, of the indorsing of the half million of Columbus and Piqua bonds. The Cleveland, Columbus and Cincinnati Company has now arranged the matter with the two Bellefontaine roads by surrendering their portion of the Piqua at about $360,000, and has taken from those roads their stock at par. The stock of one division of the Bellefontaine line is worth about 75c., and the other 85c., so that the Cleveland, Columbus and Cincinnati Railroad will in the end receive very nearly $300,000 on the amount which that road advanced in taking up the half million Piqua bonds, and the interest that had accumulated.—*Cin. Gazette.*

Delaware and Hudson Canal.

The business of this company for the year ending March 1, 1863, has been as follows:

Sales of coal to March 1. 1863		$2,908,570 12
Canal and railroad tolls collected		316,376 97
Miscellaneous profits		102,643 25
Coal on hand at Honesdale, Rondout and N. York, and on line of canal		345,644 25
		$3,673,234 59
Coal on hand March 1, 1862	$354,446 00	
Mining coal	747,930 12	
Railroad transportation and repairs	341,592 86	
Canal repairs and superintendence	409,589 12	
Freight of coal on canal	524,280 84	
Labor and expenses at Rondout	63,551 10	
Rent, salaries, current expenses, &c. N. York office	38,249 77	
Coal yard and harbor expenses, taxes, interest, &c.	299,871 15	
Depreciation, account losses, &c.	33,913 52	
		2,813,784 48
Net profit		$859,450 11

—or about 11¼ per cent. on the capital stock of the company.

The Board has decided to pay the next dividend at the usual time in June, but thereafter the dividends will be published on the first Mondays of February and August.

The bonds of the company for $300,000—issued in 1858—will fall due on the 1st of June next, and then will be paid out of the sinking fund. The Board is strongly of the opinion that a prudent course in the division of profits should be steadily followed, until a sum sufficient for the payment of every outstanding debt, and the furnishing of an ample working capital, shall have been accumulated. When this shall have been accomplished, it will be for the stockholders to decide whether an addition to the capital stock shall be made with a view of returning to them what has been so retained, by an extra dividend in this form.

A freshet of unusual severity, in the early part of June last, caused more or less damage to all the lines engaged in carrying coal to tide water. This company was one of the chief sufferers; the canal having been breached at several points, and one of its two principal aqueducts—the one crossing the Lackawaxen—swept away. Six weeks of that part of the year most favorable for navigation—amounting practically to one-fourth of the whole season—were consumed in making necessary repairs, involving a very large outlay, and a loss of fully one-fifth of the estimated production of coal. Under such circumstances, the result of the year's business, as already given, is highly gratifying.

The quantity of coal brought to market in 1862 was 644,000 tons, being larger than in any previous year excepting 1861. This large quantity, together with the whole stock on hand at the beginning of the year, was readily sold; and the company has been obliged to buy elsewhere to meet the wants of its customers during the period of suspended navigation. Every effort has been made to provide for an increased production of coal in 1863, by accumulating a large stock on the banks of the canal, and by adding to its boating force; and in view of the present state and prospects of the coal trade, there is every reason to hope for a profitable business.

The following gentlemen have been elected directors for the ensuing year: Wm. S. Herriman, Charles N. Talbot, Edward J. Woolsey, G. Talbot Olyphant, Robert Ray, Samuel B. Schieffelin, Abiel A. Low, Robert L. Kennedy, James M. Halsted, LeGrand B. Cannon, John L. Aspinwall, John J. Crane, James R. Taylor.

President.—G. Talbot Olyphant.
Vice President.—Robert Soutter.
Treasurer.—Isaac N. Seymour.
Secretary.—James C. Hartt.

The City of Chicago.

If by a single example we desired to illustrate the rapid advance of this country beyond any other, if we were called upon to demonstrate the power of our institutions, the growth of our commerce, the irresistible energy of our people, the greatness of their industry and enterprise, their aptness in seizing upon their natural advantages, and their diligence in securing them, we should unhesitatingly point to the City of Chicago.

Twenty-three years ago it had a population of 4,479.

In 1850 the population was 29,963. In 1860, 109,260—having increased since the previous census, 79,297 or 364.6 per cent., and having become the eighth in rank among American cities. It now presents to the eye of the traveler one of the most engaging pictures on this continent, miles of wharves crowded with shipping, a northern vista where the waters of Michigan mingle with the horizon, beautiful streets and imposing edifices, long lines of warehouses and palatial residences, crowds of men busy in the active pursuits of trade, and endless trains of cars rushing in from the far West, laden with the products of our wide and exhaustless prairies.

To visit Chicago is like entering a new world; and here the mind for the first time realizes the vastness of that territory which lies beyond the Ohio, Mississippi and Missouri, and is becoming the noblest part of the republic, whether for area, population, production or resources. For hundreds of thousands of square miles pierced with railways and cut by canals, Chicago is the entrepot and mart; and from it, depart to the Atlantic coast by day and night at every hour of both, vessels and trains loaded to their fullest capacity, with the staple products of the northwestern world.

Nor is this all. Besides commanding the trade of the interior by its numerous lines of railways, and its water communication by canal with the Illinois River, it is at the head of Lake navigation, and has access to the ocean by natural and artificial outlets for vessels that safely cross the Atlantic. In 1836 a few schooners supplied this region with goods from a port on Lake Erie; now, seven side wheel

steamers, some of them more than a thousand tons in capacity, sixty-five propellers of 36,500 tons, seventy-six barks of 34,978 tons, fifty-two brigs of 17,626 tons, and *five hundred and forty-nine* schooners with a total burthen of 150,862 tons, are engaged in the trade of Chicago, and find constant employment during the season of navigation. Certainly no port in the world only 25 years old can exhibit any such results; so far from this indeed, not many of the oldest American or European ports can now compete with her. While some great foreign towns, centuries old and traditionally commercial, have their full share of the trade of the world, none but Chicago, more than a thousand miles from the sea, can produce such a marine list, or such fleets, the growth of less than one generation.

Certainly, whatever was the chief design of Providence in leaving those lake oceans full and overflowing in the heart of North America, the American people have not been slow in recognizing the advantage, and accepting the responsibility which has attached to the gift. These noble waters, Superior, Michigan, Huron, Erie and Ontario while exercising a vast climatic influence, and rendering another Siberia impossible on this continent within the ordinary range of animal existence, have offered the strongest and most pleasing inducements to human industry and enterprise. We too have our Mediterranean. The area of these lakes in square miles, is nearly if not quite equal to that of the former sea, if we include the Georgian Bay in our computation; while the whole extent of coast, if we take in the St. Lawrence is far greater. The shore line of the lakes is estimated at 6,240 miles. If we cast our eyes over the map of the Mediterranean, we are equally surprised to perceive, whether from the difference of institutions, governments or peoples, that notwithstanding the antiquity of its advantages, so to speak, there is but one port which is as flourishing as Chicago, and none which has risen so rapidly or is likely to advance so far.

Marseilles is the third City in France, ranking next to Paris and Lyons. According to the most recent accounts its population is even now, but about thirty thousand more than that of Chicago, if even that; though Marseilles existed six hundred years before the Christian era, and was a free commercial city in the year 1226. The tonnage of French vessels now engaged in its foreign trade, appears from our latest Consular returns to be but 180,000 tons, while that of Chicago as we have already stated, amounts to 250,000. So too of Genoa, the proud, the great port of Italy. This city, old and beautifully picturesque though it be, has not as many inhabitants as Chicago, and no such commercial activity. The operations of a single hour in the latter, would in Genoa appear like an insurrection. And so we might proceed to contrast every other city on the shores of the Mediterranean, all old and flourishing, perhaps, in the European sense, but none of them resembling the busy, growing, flourishing and commanding City of Chicago. No Spanish, French, Italian or Austrian ports present any such picture of progress and prosperity. This contrast shows the difference between a free or a subjected people.

By reference to the annual statement of the Boardo f Trade for 1862, it will be seen we have in no way drawn upon our imagination for our facts, or expanded them beyond the bounds of the severest truth.

Let us then rapidly glance at the business resources and capacity of Chicago. Here was introduced the great American labor saving machines, known as elevators; for when millions of bushels of wheat came to the city for sale or shipment, it was necessary to have commensurate capacity for handling and storing them. Whole cargoes to be transferred from vessel to storehouse, and from storehouse to vessel, now require for the purpose but a few hours, when hand labor would have been totally inadequate to its performance. These elevators can receive and ship 750,000 bushels per day, and store eight millions six hundred thousand bushels.

The quantity of flour received and forwarded for eight years is as follows:

	Received.	Forwarded.
1855	320,312	163,419
1856	410,989	265,389
1857	489,934	250,648
1858	662,540	470,402
1859	887,821	186,351
1860	945,348	698,132
1861	1,479,284	1,603,920
1862	1,927,371	1,828,164

The quantity of wheat for the same period is as follows:

	Received bushels.	Forwarded.
1855	7,535,097	6,298,135
1856	8,767,760	8,364,420
1857	10,554,761	9,846,052
1858	9,639,614	8,850,257
1859	8,050,766	7,166,698
1860	14,427,083	12,402,197
1861	17,385,002	15,835.953
1862	13,978,116	13,808,898

The following is the quantity of corn received and forwarded during the same periods:

	Received.	Forwarded bushels.
1855	8,532,377	7,517,626
1856	11,888,398	11,129,668
1857	7,409,000	6,814,615
1858	8,252,641	7,726,264
1859	5,401,870	4,349,360
1860	15,262,394	13,700,113
1861	26,369,989	24,372,725
1862	29,574,328	29,452,610

The quantity of oats received and forwarded in 1862 was as follows:

Received 4,678,722 bush. Forwarded 3,112,-366. Of rye it was 1,038,825 bushels, of barley 872,053 bushels.

The pork and beef packing business of Chicago has grown into the largest proportions, and its progress is without parallel even in the United States. As it was discovered that the Chicago cut pork known as English middles, found particular favor in the Liverpool and London markets, the knowledge was turned to account with the usual sagacity of American shippers, and large packing houses were constructed of the best description. The number of swine received and shipped in 1862 was:

Received Live	1,110,971
" Dressed	237,919
Shipped Live	446,506
" Dressed	44,629

Of beef cattle the same year the receipts were 209,655 and the shipments 112,745, of which about 60,000 were packed.

Of lumber there were received:

In feet 384,317,924 of lumber; 196,562,000 of shingles; 41,191,800, of lath; of which were forwarded 189,277,079 of lumber; 55,761,630 shingles; 16,966,000 laths.

Consumed at Chicago	122,050,135 of lumber.
" "	117,884,370 shingles.
" "	18,720,750 laths.

We have not room to follow up these interesting statements with others equally striking, but would remark that the trade in salt, hides, highwines and alcohol, lake fish, coal, wool, lead, (the latter reaching to more than twelve millions of lbs. the last year,) and of vegetables, has been proportionably extensive. It will be remembered that all the articles enumerated were of domestic origin and are the foundation of this enormous traffic. The receipts and shipments by the Lakes were accordingly on the same great scale. It appears for example, that 1,146,118 barrels of flour 13,406,825 bushels of wheat and 30,345,425 of corn were sent to market by the lakes, and other products of the West in countless varieties, and four hundred and forty seven commission houses find full occupation in handling and forwarding these products.

The prosperity of its inhabitants has proceeded step by step with that of the City, and nowhere can be found more of the comforts and elegances of life, nowhere a greater liberality of bestowment for any good and patriotic purpose.

The great movement with which Chicago has lately connected herself, under the pressure upon her of the production of the West, rapidly increasing beyond all calculation, is that of a ship canal, by which vessels may pass from the Mississippi into Lake Michigan and from Lake Erie into the Hudson. The project has been most ably and earnestly pressed upon Congress, our own New York Chamber of Commerce and State Legislature, and will be the particular subject for consideration at a great convention to be held in Chicago the 2d of June. To that body we shall look for a careful, accurate and scientific report on the subject.

But it is sufficient for us at this time to look at Chicago as she is, with interminable lines of railway which reach to the gulf of Mexico and the Atlantic with a uniform gauge, radiating in all directions over our fertile Western plains and prairies, and which, after cutting through rocks sparkling with gold and silver, are to terminate only on the shores of the Pacific. It is sufficient to consider that she is the mistress and at the head, of navigation of the largest inland seas on this continent, and that her sails whiten, and her screws toss into foam, the purest and most beautiful of waters. With a vast domestic, and increasing colonial trade, likely to be facilitated by the enlargement of the present canals of Canada, or the construction of new ones by natural routes such as the earliest missionaries discovered, there seems to be no limitation to her extension or prosperity. Chicago therefore may be set up as a standard American city, for the admiration of the world. Her rise and progress are subjects worthy the study of those persons abroad who would discredit republican institutions, because they have been endangered by traitors. There will be many more such cities as Chicago, before this Government has fulfilled its great mission. There is no other spot on the Globe where such phenomena can occur, or where there is any more the lamp of Aladdin to work its wondrous changes. Not in Great Britain, not in France, not in Italy, not in Germany, there may be on the Russian Pacific Coast no where (with this possible exception) but in this country, is there any place to build up such cities. In none of these countries could the site for any such city as Chicago be found; yet we contemplate many more such, like Cincinnati, St. Louis, Buffalo, Cleveland, all of Western origin, and with which our wilderness will one day be studded.—*Samuel Hallett & Co's American Circular.*

American Railroad Journal.

Saturday, May 23, 1863.

Stock Exchange and Money Market.

The heavy advances in the Stock Market in some of the railway lists which have either been the favorites of the hour, or have been crowded into corners, were met on Tuesday last by a sudden fall. Erie went down 5 per cent., and Harlem which had gone up almost 50 per cent. beyond its supposed real value, fell off 12½ per cent. On what principle a stock which has not paid any dividend for many years, could be sought for so eagerly at 112 to 118 is beyond our comprehension, unless it be that it is contemplated, as it is now reported, to form a grand combination of all the city railway companies with the Harlem at the head, and in this way secure the construction of the track in Broadway. To place the Harlem in the best possible condition it will, however, be necessary to raise half a million of dollars beyond its present capital. At the election for directors, held on Tuesday last, a change was made in the direction, by a vote of nearly two-thirds of the shareholders, and a board was elected of a character which effects the management. Mr. Campbell being no longer a director, became ineligible as President, and Com. Vanderbilt has been elected in his stead, and Wm. E. Morris, a civil engineer, and recently President of the Long Island Railroad, was chosen Vice President, and will be the executive officer of the company. Mr. Campbell retires with the respect and confidence not only of the shareholders but of the public, and will in all probability be called to employ his experience and ability in a new enterprise of importance to the City of New York.

The flurry in the market which the fall of Tuesday occasioned, was particularly felt by weak operators, of whom at present there is a large class, and who are sure to be sacrificed on such occasions. It is understood the leading banks conferred together on the best method of checking the tendency to speculation, and some of them refused to continue the practice of certifying the checks of their heavy customers, in advance of their balances as is now customary, strange to say, to a great extent.

The conversions into Government loans continue on a large scale. The deposits with Mr. Cisco for that purpose, have been going on at the rate of more than a million a day during the week, and the balance in his vaults on Tuesday, was $25,699,964 63. The aggregate of exports of produce and merchandize the preceding week was $2,479,642, and the amount of specie quite inconsiderable. The condition of our foreign trade is satisfactory, yet it is plain enough to be seen by the marine lists, that our port was never before fre-

quented by so many foreign ships as now. The explanation is easy enough. The operations of the Florida and Alabama have alarmed our ship masters and merchants, and foreign flags even of very inconsiderable and uncommercial powers are used to escape the depredatory assaults of the confederate cruisers. It is certainly a source of deep mortification, that though we have nearly five hundred vessels of war, two small rebel steamers can cruise in the Caribbean, with perfect impunity and destroy our finest merchant ships. Not only this, but they habitually enter the most frequented West India ports without difficulty, when a squadron properly stationed off those places could make such visits impracticable.

The last arrivals from England bring the satisfactory intelligence that the British Government is resolved to maintain its neutrality, practically as well as theoretically, and the feeling for the present is more favorable to this country than it has been for many months. The recent discovery of the real objects of the voyage of the Peterhoff, has put a damper on the zeal of those who sought to make her capture and detention a cause of difficulty with our Government. It now turns out that the mails which were given up so readily by our department of State, against the advice of the legal adviser of the President, and the remonstrance of the Secretary of the Navy, were not even demanded by the British minister. The retention of them would have been lawful, is customary, and in conformity with international law.

Gold has for the present lost its popularity. It seems to have settled down to about 150 without animation, and the truth is there is not a commodity in the country that is so little wanted at this moment as gold.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Trade and Commerce of Chicago.

We are indebted to Seth Catlin, Esq., Secretary of the Chicago Board of Trade, for a copy of the "Fifth Annual Statement of the Trade and Commerce" of that city. We had intended to compile from this interesting document the principal facts which it furnishes of the business operations of Chicago the past year, but being anticipated in our purpose by the *Circular* of S. Hallett & Co., evidently prepared from the same source, we republish the latter entire.

The Pacific Railroad.

The Springfield (Ill.) *Journal* states that Messrs. Ross, Steele & Co. have contracted to build 350 miles of the great railroad to the Pacific. This division, or rather separate work, lies within the boundaries of Kansas, beyond which the Union Pacific railroad properly commences. It is intended to have the first forty miles opened the present year. In addition to the grants of land and bonds made by Congress, it is stated that the company have also secured by purchase from the Indians over 500,000 acres of valuable lands on the route. These can be readily disposed of for cash, thereby furnishing in part means to extend the road as it progresses. The whole line through Kansas is to be completed within four years from date. The rails, spikes, &c., are already purchased, and the work will be pushed on vigorously without cessation.

New York and Harlem Railroad.

The following gentlemen have been elected directors of this company for the ensuing year:

Cornelius Vanderbilt, Wm. C. Wetmore, Daniel Drew, John Harper, A. B. Baylis, H. T. Clark, Jas. H. Banker, John Steward, John Alstyne, Augustus Schell, Addison G. Jerome, A. J. Akin, and W. E. Morris.

Cornelius Vanderbilt was unanimously elected President of the company. Mr. Vanderbilt accepted the position upon the condition that he receive no compensation for his services, and that the company appoint some suitable person to act as Vice President, who should discharge such of the executive duties as the company might from time to time direct. Whereupon, Mr. William E. Morris was unanimously elected Vice President of the company.

Steam on Canals.

The experiments with steam navigation on the Erie Canal are said to have proved unsatisfactory. One firm have taken the engines out of their boats and are having the vessels converted into horse towing boats, and the Rome, Watertown and Ogdensburg Railroad Company have withdrawn their eight propellers and sold them to the owners of the Delaware and Raritan Canal.

Lake Superior Mining.

The March products of the mines, as far as reported, are as follows, viz:

Minesota,	227,702 lbs—	113	tons	1,702	lbs.
Rockland,	32,083 " —	16	"	88	"
Superior,	16,118 " —	8	"	118	"
National, nearly		28	"		

The Mass mine has been tributed on north lode, supposed to be identical with that of the Knowlton, with very good results.

The Ogima are driving a cross-cut north from the bottom of the mine, on the main vein, which is in 45 feet, and is supposed to be in the vicinity of a lode on which a shaft was sunk some years since, a few rods south of the copper house. This shaft yielded some very good barrel and stamp copper. The mine is producing more heavy copper than it has done for some weeks past, a mass of over a ton weight being exposed in an underhand stope west of No. 2 shaft.

Measurements recently made, demonstrate that the Evergreen Bluff vein crosses the Ogima property for about 470 feet, and they propose commencing a shaft thereon next week. Judging by the size and weight of masses from the Evergreen Bluff, the mine is looking and producing as well as ever.

The Quincy Mines for March, yielded 106.84 tons of ingots. The product of the Isle Royale was not over 20 tons, and that of the Portage Mine 10 tons 1738 lbs.

The products of the Cliff Mine for the first quarter of 1863 are very favorable, viz:

For January	150	tons	57	lbs.
" February	132	"	462	"
" March	130	"	450	"
Total for three months	412	"	969	"

Each tone of rock stamped in 1862 cost 17.4 cents less than in 1861, owing to improved methods of handling rock from the mine and sand in the wash house. The total cost of preparing stamping

and dressing in 1861 was $80,668 07, or $1.72 cents per ton, while for last year it was only $1 28.6 per ton.

Isle Royale Mining Co.

The following is a statement of the assets and liabilities of this company February 1, 1863:

Assets, viz:		
100,200 lb. Ingot Copper sold and unsold, in hands of Revere Copper Co., net sales of which since received...		$31,328 05
135,750 lb. Ingot Copper at the mine, as per return from Portage Lake Smelting Works, estimated at 29c. net		39,367 50
Due from Revere Copper Co		3,364 45
Cash in hand of Treasurer		373 99
Cash at Mine, February 1st		2,848 32
Supplies at mine, February 1st		22,698 00
		$100,185 31
Liabilities:		
Drafts accepted	$7,882 14	
Drafts advised, in transitu	6,028 78	
Notes payable	13,250 93	
Loan account	702 80	
Liabilities at Mine, Feb. 1	24,830 09	
		52,694 74
Balance of available assets over liabilities, February 1, 1863		$47,490 57

No account is taken above of the mineral at the mine, February 1, not smelted, which if estimated, would still further increase the assets.

The product of the mine, as smelted by the Portage Lake Smelting Works, has been: In the year 1861, 1,331,055 lbs of mineral, which yielded 896,139 lbs fine copper; in the year 1862, 1,178,980 lbs of mineral, which yielded 826,770 lbs fine copper. The reason of the decline in production for the year 1862, is satisfactorily given in the report of Mr. Eschweiler, the agent at the mine. The year 1863 is confidently looked to for a greater yield than ever before, and recent advice from the mine are most encouraging.

Visit of the Governor to the Hoosac Tunnel.

GREENFIELD, May 20, 1862.

Governor Andrew and Council and the Commissioners of the Troy and Greenfield Railroad and Hoosac Tunnel arrived here last evening to make an official visit in reference to a resumption of work on the line. A large number of the citizens assembled and gave the Governor a very enthusiastic reception. Cannon were fired, bonfires were lighted, and an appropriate speech of welcome was made by Hon. Whiting Griswold, which was responded to in a very patriotic and eloquent manner by His Excellency.

Buffalo and Lake Huron Railway.

The bill asked for by the Buffalo and Lake Huron Railway Company, to construct a tunnel from Hamilton to Caledonia is likely to become law. It will be remembered that this is a part of the original Hamilton and Port Dover Railway, which was graded and ties provided, and which came so near being completed. The cost to the Buffalo and Lake Huron people will not be large, and probably the expenditure may be justified by the experiment. Those who have no faith in the profit of the project are not slow to suggest that this movement is only an effort on the part of Mr. Carter, the manager of the Buffalo Railway, to retrieve for a time his waning popularity. It was the general expectation that until his advent to the management of the road, shareholders had begun to realize dividends, but this expectation was being disappointed, and in order to keep the prospect still probable, is alleged the motive for the extension to Hamilton.—*St Catherines Post.*

☞ The Detroit *Advertiser* remarks that "the St. Lawrence is the natural highway of the commerce of the Northwest, east of the Mississippi. That it must one day be the actual highway of that commerce is inevitable. Whatever tends to promote the improvement of the navigation of the St. Lawrence, and the communication between Lake Erie or Lake Manitoulin and Lake Ontario, will not be likely to meet with warm encouragement from the merchant princes of New York. They know that nothing can so strongly tend to delay these improvements as the retention of the South in the Union; that it is not probable that the St. Lawrence can be effectively opened to Northwestern commerce until Canada shall become a member of the Union; that the South would strongly oppose the acquisition of Canada which would lessen the value of the Mississippi; and that a large portion of the Northwest, having the free use of the Mississippi, would oppose the acquisition of Canada, though less strenously." We believe that the Merchants of New York are not unwilling that the Northwest shall have all the outlets to the sea they desire. They know that the return trade must come by the way of New York. Coarse staples may take the cheapest routes, but fine goods will seek the quickest.

Agricultural Colleges.

The following States have accepted grants under the act of Congress of July 2d, 1862, donating public lands to the several States and Territories which may provide Colleges for the benefit of Agriculture and the Mechanic Arts:—New York, Pennsylvania, Illinois, Rhode Island, Minnesota, Vermont, Kansas, Kentucky, Missouri and Iowa. The General Land Office has in course of preparation the proper instructions which will serve as a guide to the officers charged with executing the act.

Albany and Susquehanna Railroad.

An Act amending the several acts authorizing town subscriptions to the stock of the Albany and Susquehanna Railroad Company; to extend the time for the completion of said road, and to regulate the weight of the iron rail to be used thereon. [Passed March 4, 1862; three fifths being present.

The People of the State of New York, represented in Senate and Assembly do enact as follows:—

SECTION 1. In any case where the Commissioner or Commissioners of any town, authorized to subscribe to the stock of the Albany and Susquehanna Railroad Company, shall have filed in the town and county clerks' offices, proof by affidavit of the consent of a majority of the tax payers, their heirs or legal representatives of such town, preliminary to a subscription on behalf of said town, to the stock of said company, such proof by affidavit shall be valid and conclusive to authorize said subscription to the stock, and the issue of bonds to the amount specified in such proof and clerical or other defect in such proof by affidavit, shall not invalidate it.

SEC. 2. When the commissioner of any town shall neglect or refuse to make report as required by law, to the board of Supervisors, of the amount required to pay principal or interest on the bonds issued by such town, or any Supervisor shall neglect or refuse to levy upon such town, the amount so reported, such commissioner or Supervisor shall forfeit and pay as a penalty for such neglect or refusal, the sum of two hundred and fifty dollars, to be collected by the president of the said company, and applied by him to the payment of the principal or interest due or to become due on the bonds issued by such town.

SEC. 3. The provisions of an act entitled "An act to extend the time for the completion of the Albany and Susquehanna Railroad, and to comply with the conditions of the act authorizing the city of Albany to make a loan to said company," passed April fourteenth, eighteen hundred and fifty seven are hereby extended five years in addition to the time now allowed by law.

SEC. 4. The Albany and Susquehanna Railroad Company may lay down and use in the construction of their road, iron rail, not less in weight than fifty three pounds to the lineal yard.

SEC. 5. This act shall take effect immediately.

New Railroad Project in Michigan.

We understand that the company formed some time since for the purpose of constructing a road from the city of Flint to Fentonville or some other eligible point on the Detroit and Milwaukee Railroad, have recommenced surveying the route. We further learn that the capital stock $250,000, has all been taken, a very large portion by Eastern capitalists, and that it is the intention of the directors to prosecute the work vigorously until its completion. This will form the only link now needed to connect this city with that rich and productive country known as the Saginaw Valley. Its completion will open a new era in affairs which can scarcely fail in course of a few years, to be of great commercial advantage to Detroit.—*Detroit Adv., May 9.*

Pictou (N. S.) Railway.

Arrangements are being made by the Chief Commissioner of Railways, to locate the eleven mile section from Truro to Whall's Mills. Mr. Wightman, Mr. Smellie and Mr. J. Young are to be put upon the work, and locate the road, as fast as it can be advantageously done. Operations will be vigorously prosecuted, and the grading put under contract as soon as circumstances will permit. The road is to be constructed on the very best principles, and with all the latest improvements, and the rails to be of the fished pattern.—*Nova Scotian.*

Safety of German Railways.

It is stated that, during last year, 60,500,000 travellers went over a distance of 836,000,000 of miles (German) on German railways; that only 13 persons were injured and 5 killed, and that out of these eighteen cases eleven were due to the imprudence of the travellers themselves, and were in no way attributable to the railways or their officials. Of railway employees and workmen 225 were injured and 115 killed. Of other persons, neither passengers nor railway men, 90 were killed and 84 injured; 36 of these went on the rails with a suicidal intention.

The New Erie and Cleveland Railroad Project Abandoned.

We understand that the difficulties between the Cleveland and Erie and Buffalo and Erie Railroad managers have been adjusted, and that the proposed new railway between Erie and Cleveland will, therefore, not be built. It is stated that the proposed branch of the Cleveland and Erie Road from Ashtabula to the Atlantic and Great Western Road, will be built, and that the Buffalo and Erie Company will approve the scheme.—*Cleve. Herald.*

Consolidation of the La Crosse with the Milwaukee and Western Railroad.

We are told by authority we cannot question, that the western division of the La Crosse road and the Milwaukee and Western road have already consolidated. The terms of the consolidation we are not acquainted with. The consolidation disposes of the assertion that the recent sale of the western division of the road was intended to benefit Chicago.

The break from Columbus to Portage we are assured will be at once constructed—and an independent route from the Watertown Junction to a point in connection with the Milwaukee and Chicago depot is in contemplation.—*Milwaukee Sentinel.*

Detroit and Milwaukee Railroad.

It gives us great pleasure to announce to our readers, and especially the people whose business relations require them to use the Detriot and Milwaukee Railway, that Hon. C. C. Trowbridge has been elected President of that Company, in place of C. J. Brydges, Esq., who has resigned. Mr. Trowbridge has been connected with the railway from its first inception, first as Treasurer and Secretary, then Resident Director, and now as President, and has labored continuously and faithfully to give to the people of that line a first class road.

There never was an enterprise of the same magnitude and importance prosecuted and carried through to completion under greater difficulties and embarrassments than the Detroit and Milwaukee Railway. After exhausting every resource which was available in the State, the Great Western Railway or Canada was appealed to for aid to complete the road. A long and persevering effort on the part of the then President was successful, and Mr. Trowbridge the Secretary and Treasurer was dispatched to England to sign the contracts with the President. The undertakings which were then enter into by the company have been faithfully carried out under every difficulty, and the day, we hope, is not distant when the Great Western Company will be amply repaid for all their advance. We consider the selection of Mr. Trowbridge most fortunate, as we deem him the best qualified for the place of any man living.—*Detroit Free Press.*

Winona and St. Peter Railroad.

Notwithstanding the great difficulty of procuring laborers, the work on the Winona and St. Peter Railroad is progressing satisfactorily. There are now about one hundred and forty men employed, mainly on the heavy work in the bluffs, and the number is now being increased as rapidly as men can be obtained from abroad.

The Company have recently purchased eighty additional cars and three locomotives for the use of their road.—Seven of these cars have arrived; the others are now on their way hither. They have also purchased a sufficient quantity of iron to lay the track as far as St. Charles. Of this iron there are now one thousand eight hundred bars on the way this side of Chicago.—*Winona Republican.*

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending May 8, 1863, was as follows:

Passengers	$18,470 36
Freight and live stock	27,599 49
Mails and sundries	1,234 38
Total	$47,304 23
Corresponding week of 1862	44,902 56
Increase	$2,401 67

The earnings of the La Crosse and Milwaukee Railroad for 1st week of May were:

	1862.	1863.	Increase.
Freight	$20,485 95	$23,949 20	$3,463 25
Passengers	4,917 78	6,958 89	2,041 11
Miscellaneous	645 50	675 00	29 50
Total	$26,049 23	$31,583 09	$5,533 86

The earnings of the Terre Haute and Alton R. R. for the 1st week of May, were ... $22,994 81
Same week last year ... 17,002 35
Increase ... $5,992 46

The earnings of the Detroit and Milwaukee Railroad for the 2d week in May were:

Passengers	$7,829 84
Freight and live stock	13,251 30
Mails and sundries	707 15
Total	$21,788 29
Same week, 1862	15,354 43
Increase	$6,433 86

The earnings of the Toledo and Wabash Railroad Company for the 1st week of May, 1863, were ... $30,090 32
Same week, 1862 ... 25,005 33
Increase ... $5,034 99

The earnings of the Chicago and Northwestern Railway for the 1st week in May, 1863, were ... $23,287 31
Do., 1862 ... 16,665 79
Increase ... $6,621 52

The earnings of the Cleveland and Toledo Railroad for the 2d week of May, 1863, were ... $23,480 00
Same week, 1862 ... 16,151 00
Increase ... $7,329 00

The earnings of the Galena and Chicago Union Railroad for the 2d week of May, 1863, were:

Freight	$21,989 58
Passengers	7,810 35
Mails	1,300 00
Total	$31,099 93
Same week, 1862	33,091 99
Decrease	$1,991 16

The earnings of the Chicago and Rock Island Railroad for the 2d week of May, 1863, were ... $29,383 00
Same week, 1862 ... 20,267 00
Increase ... $9,106 00

The earnings of the Michigan Southern Railroad for the 2d week of May, 1863, were ... $61,142 00
Do., 1862 ... 47,574 00
Increase ... $13,568 00

The earnings of the Chicago and Alton Railroad for the 2d week of May, 1863, were:

Passengers	$12,834 46
Freight	21,864 41
Sundries	1,035 83
Total	$35,734 70
Increase	$13,688 88

Susquehanna Canal Co.

At the recent annual meeting of the shareholders of this company, the following gentlemen were elected directors: Geo. W. Leuffer, of Pennsylvania, President; Samuel C. Ford, D. D'Invilliers, Wm. P. Jenks, Dr. Jos. Pancoast, Robert J. Mercer, Franklin Platt and John Aikman, of Pennsylvania, and Geo. W. Dobbin, William Keyser, Thomas Wilson, Wm. R. Penniman and Joseph Cushing Jr. of Maryland, Managers.

The business prospects of this Campany are attracting the attention of capitalists, by reason of great advantages confidently anticipated from a connection with the Canal of the Pennsylvania Railroad Company, which is to be deepened as far up as Huntingdon, thus affording an outlet for the increasing coal tonnage from that region, and which the railroad by its immense and more profitable tonnage cannot conveniently accommodate. The Pennsylvania Railroad Company, we are informed, has appropriated $200,000 to the deepening of this Huntingdon branch of the canal, making it in capacity equal to that of the Susquehanna. This connection consummated, with the increased tonnage from the Huntingdon coal mines, we shall confidently hope for the establishment of the credit of the securities of the Susquehanna and the prompt payment of the interest on its bonds, with an early return of profits to shareholders. The recent advance in the prices of the shares and bonds of the company seem, therefore, not to be without good cause.—*Phila. Ledger.*

Improved Railroad Car Wheels.

CHATHAM BANK BUILDING, 182 Broadway,
NEW YORK, May 1, 1863.

The Proprietors of THE BALL PATENT IMPROVED RAILROAD CAR WHEELS, "TO PREVENT CARS RUNNING OFF THE TRACK," and for the SAFETY, ECONOMY and SPEED of the running of cars on Railways in general, would respectfully submit the same to railway companies and all others who desire an improvement in the present running of cars, for SAFETY and SPEED, THUS SAVING AN IMMENSE COST TO RAILWAYS and the lives of passengers, and at the same time a large increase of speed. The improved wheel is a double flange wheel and axle. These wheels can be adapted to any of the old rails. All the change necessary is the old frog, which can be taken out in sections when railroads cross, and the new frogs substituted in place of the old.

The single flange wheel can pass over them the same as the double flange. A single train of cars at a time can thus run over a single division or section as may be desired, where the NEW FROGS are inserted, and so on until the entire line is ready, as the cars and engines are supplied with the IMPROVED WHEELS; thus not interfering with other trains on the road. THE NEW FROGS consist simply of a plate of best quality of wrought iron, and does not cost one-fourth the amount of the frogs now in use. One of the old ones will replace one of the new as far as expense goes. The use of the DOUBLE FLANGE WHEEL upon Railroads for safety is wonderful, and can hardly be described. In a word, their use is as safe in or at the instant of an accident as the single flange is while running, where all right or no accident occurring.

The cars with the DOUBLE FLANGE WHEELS in either case remain stedfast on the track.

In running around curves so dangerous oftentimes, especially as all old tracks are liable to spread and thus the cars thrown off the track, involving the loss of many lives, THE DOUBLE FLANGE is just the improvement to meet this case. THERE IS NO MORE FRICTION than in the running of the single flange, in turning the curves. THE PLAY IN THE BEARING PART BETWEEN THE TWO FLANGES is one to two inches, and it cannot be for friction to be on but one side of the rails AT A TIME. It is self-evident that the play must be on one side of the rail or the other. There cannot be more friction than with the single flange. We would ask if there is not a TERRIBLE FRICTION in the case of the single flange, especially in passing curves, and more particularly those that are old and so liable to spread; and also where the track is laid around steep EMBANKMENTS IN AND ON THE MARGIN OF RIVERS? Is it not at such places especially that our dreadful railroad accidents mostly occur, causing such destruction of human life, and also of property?

With the DOUBLE FLANGE the cars are held firmly on the track, the double flange holding the weak, spreading track together, and WITH NO MORE FRICTION, UNLESS THE SPREADING RAILS CAUSE IT, THAN THE SINGLE.

The cars thus run securely and safely around the curves, and at an accelerated speed, if so desired.

THESE WHEELS can be made so that a speed of 50 miles an hour can be attained with perfect safety, and a sample WHEEL here in New York shows a speed of 60 MILES AN HOUR, with the same degree of safety. This is the one for the great Pacific Railway to San Francisco, Cal., and the only one that can attain that speed with safety. It is also as well adapted to other leading roads. Experiment has tested the principle by running a car of a few hundred pounds weight one hundred times around an exceeding short curve, with obstructions upon the outside track, and at every trial was perfectly proof against running off the track. It is well known that if obstructions are on the outside track around a curve, the wheels are instantly thrown off with the single flange; in the case of the breaking of an axle THE DE-

STRUCTION OF THE TRAIN AND LOSS OF LIFE are the usual consequences. In a word, THE ADOPTING of the DOUBLE FLANGE CAR WHEELS will prevent the running off of the cars and the consequent destruction of life and property on our public railways. On this point alone it appeals to all the best feelings of our nature as a public benefit, independent of any pecuniary considerations in any quarter. THE NEW YORK CENTRAL RAILROAD would save half a million of dollars some years by having our improved wheels on their cars and engines, and could, if they desired, attain a speed of 50 or 60 MILEs an hour WITH SAFETY, as they might wish, and also nearly save that amount, besides by adopting our "COMPOUND BLIND SELF-LOCKED RAIL."

SAFETY AND SPEED ARE THE TWO GREAT OBJECTS ATTAINED, and which are so much to be desired by all who are interested in railways, and especially the traveling public, who have a right to ask a decided improvement in these respects, particularly when we take into consideration the sacrifice of life that yearly occurs on our railroads, to say nothing of heavy losses. Other considerations also favor the adoption of these improvements now offered, viz:

It is believed, nay positively asserted, that the saving in one year's business on a single railway line WOULD PAY THE COST OF ADOPTING THESE IMPROVEMENTS; and it cannot be denied, the railway that carries its passengers safe, and at the same time largely increases its speed, will most assuredly be a great favorite with the traveling public far and near.

It may be asserted without fear of successful contradiction, that our DOUBLE FLANGE WHEELS are the only ones that can attain that end.

We therefore respectfully ask your earliest attention to this important improvement now offered to the railway public.

Railway companies cannot overlook the fact that SAFETY, ECONOMY AND SPEED are here obtained in adopting the great improvement.

THE IMPROVED RAIL heretofore referred to is THE "BALL PATENT COMPOUND SELF-LOCKED RAIL," which drops together without any bolts. THE INSIDE SECTION IS TWICE AS STRONG AS THE OUTSIDE SECTION OF THE RAIL ON THE BEARING PART. IT CAN BE LOCKED through its whole length, thus preventing the crumbling and wearing out of the inside section now so common with the rail now in use, by the running of cars over them, as was the case and the main objection to the use of the Winslow Compound Rail. MAKE THIS BLIND SELF-LOCKED RAIL of tough, good iron, and put it down weighing about 80 to 85 pounds to the yard, and they will last, under ordinary circumstances, forty years, and will not need repairs, thus saving an immense expense.

You have, then, a permanent and proper rail for railways, and your engines will last twice as long in running upon them. This patent commends itself to the railway public for economy, durability, and safety, with firmness over all other rails now in use.

We ask, also, for this improvement, the early attention of all railway companies.

☞ Orders are respectfully solicited from Railroad Companies for "THE RIGHT" OF THE IMPROVED WHEEL; also THE IMPROVED RAIL. The rights will be sold for a single company or for a state, either for the "Rail" or "Wheel," or both together. We will also fill orders for Wheels, Axles, and Rails.

CASH, BONDS, AND STOCKS, having a market value, received for the rights.

☞ All communications addressed to GEO. A. WHEELOCK, *active partner*.

Very respectfully,
WHEELOCK & CO.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, May 9, 1863.

THE ANNUAL MEETING of the Shareholders of the Illinois Central Railroad Company for the election of Directors, and the transaction of any other business, will be held at the office of the Company in the City of Chicago on WEDNESDAY, May 27, 1863, at 12 o'clock, noon.

The transfer books will be closed from the 18th May, and re-opened on the 1st of June.

2t L. A. CATLIN, Secretary *pro tem.*

THE FIRM OF W. R. TRAVERS & CO. is this day dissolved by mutual consent. Either partner is authorized to sign the name of the firm in the liquidation of the business.

W. R. TRAVERS,
S. F. MASSETT.

Dated NEW YORK, May 1, 1863.

LIMITED PARTNERSHIP.

Notice is hereby given that the undersigned, JENKINS VAN SCHAICK, STEPHEN F. MASSETT, WILLIAM R. TRAVERS and GEORGE A. OSGOOD, all of whom reside in the city of New York, have this day formed a limited partnership pursuant to the provisions of the first title of the fourth chapter of the second part of the Revised Statutes of the State of New York, and the various acts of the Legislature amendatory thereof.

That the name of or firm under which the said partnership is to be conducted, is VAN SCHAICK & MASSETT.

That the general nature of the business to be transacted is the Stock Exchange and Brokerage business, and all financial transactions connected therewith, on commission. That the said JENKINS VAN SCHAICK and STEPHEN F. MASSETT are the general partners, and that the respective places of residence of the said general partners, are as hereinbefore stated, and the business of the said partnership is to be carried on in the City of New York. That each of the said special partners has contributed, as capital to the common stock of the said partnership, the sum of fifty thousand dollars. That the said co-partnership commences the first day of May, one thousand eight hundred and sixty-three, and will terminate on the first day of May, one thousand eight hundred and sixty-eight.—Dated NEW YORK, May 1, 1863.

JENKINS VAN SCHAICK,
STEPHEN F. MASSETT,
General Partners.
WILLIAM R. TRAVERS,
GEORGE A. OSGOOD,
4t19 Special Partners.

NEW YORK, HARLEM & ALBANY R. R.

CHANGE OF TIME.

SUMMER ARRANGEMENT, commencing MONDAY, May 18, 1863, Trains will leave Twenty-sixth street Depot:

For Albany—10.30 A. M., stopping at Williamsbridge, White Plains, Bedford, Croton Falls, and all stations north to Chatham, Chatham Centre, Kinderhook, and Schodack, connecting with New York Central R. R. for all points west, and with the Northern R. R. for Saratoga and all points north.

For Croton Falls—8.15 A. M., stopping at all stations.

For White Plains—8.15, 10 A. M., 2.30, 4.10, 5 P. M., stopping at all stations.

For White Plains, 6.15 P. M., from White Street Depot.

For Dover Plains—4 P. M., stopping at White Plains and stations north to Dover.

For Williamsbridge—8.15, 10 A. M. 2.30, 4.10, 5, 6.15 and 8.30 P. M., stopping at all stations.

RETURNING WILL LEAVE

Albany—9.10 A. M. on arrival of Northern and Western Trains, stopping at all stations from Chatham to Croton Falls, also Bedford, at White Plains, and Williamsbridge.

Dover Plains—5.45 A. M., stopping at all stations north of and at White Plains.

Croton Falls—5 P. M., stopping at all stations.

White Plains—6.10, 7, 8.20 A. M., and 12.30, 4.15 P. M., stopping at all stations.

Williamsbridge—5.30 A. M. stopping at all stations.

JOHN BURCHILL, Superintendent.

NOTICE to CONTRACTOR S

ALBANY AND SUSQUEHANNA RAILROAD. —Sealed Proposals will be received by the undersigned, at the Office of the Albany and Susquehanna Railroad Company, No. 73 State street, Albany, until Tuesday, the 2d day of June next, at 10 o'clock A. M. of that day, for the Grading, Masonry, Bridging and Fencing of 31 miles of the line of said railroad, extending from Richmondville in Schoharie County, to Oneonta, in the County of Otsego.

The line will be divided into sections of convenient length, and proposals will be received for single sections or for the whole line.

The line will be ready for examination by contractors on and after Monday, the 25th day of May next, and Maps, Profiles and Plans, with Specifications, may be examined at the Engineer's Office, in Albany, on and after that date. Blank proposals with all necessary information will also be furnished to those wishing to propose for work.

Proposals should be enclosed in an envelope and endorsed "Proposals" and directed to the undersigned.

The proposals which may be received in pursuance of this notice will be opened by the undersigned and canvassed, and the results reported to the Directors to aid them in making a proper award of the work.

Parties proposing, who are unknown to the undersigned, will be required to give satisfactory references.

The right is reserved to reject any or all proposals, as may be deemed for the interests of th Company. Albany, April 24th, 1863.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of SMITH'S AIR LIGHT FOR RAILROADS, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

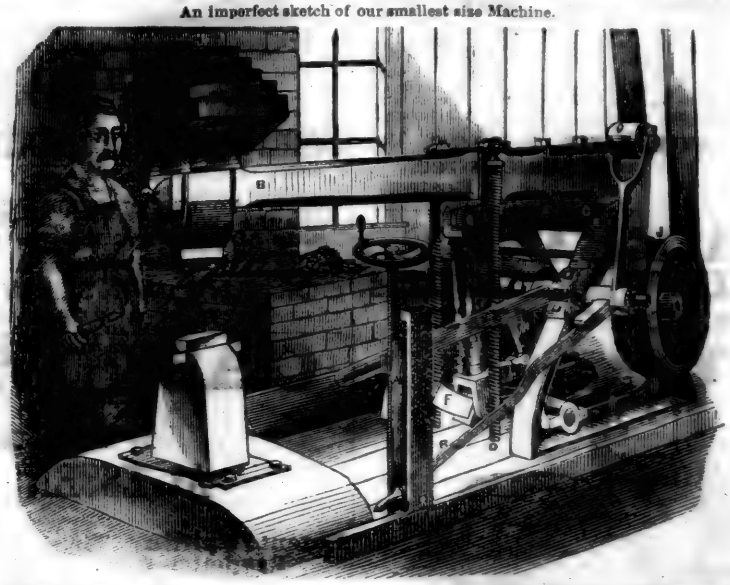
NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:
Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.
Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.
In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.
You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

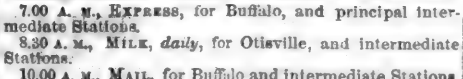


DR. GEORGE HAND SMITH:
Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.
Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,
I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, 21 Nassau st., or by addressing
CHAS. W. WELSH,
Secretary.

AMES IRON WORKS,
OSWEGO, N. Y.,
SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.



An imperfect sketch of our smallest size Machine.

PAYE'S PATENT FORGE HAMMER, A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York, or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Dunean & Cramston, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Kaigh's Point, Phila.; Mallory & Cottrell, Mystic, Conn.; J. FOX LATHES.
F. W. BACON & CO.,
No. 23 PLATT, corner of GOLD ST.,
NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. GEO. H. FOX & Co., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT REOILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downwards beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Picket's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years with uniform success, they confidently offer their services to those requiring such aid.

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS**, etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.

Address **HENRY RUTTAN,**
Coburg, Canada.

New York, Saturday, May 30, 1863.

Niagara Falls Ship Canal.

At a special meeting of the Chamber of Commerce of this city, on Monday last, Mr. Littlejohn from Oswego, representing by delegation the commercial interests of that place, brought to the notice of the Chamber, the subject of a ship canal proposed to be constructed around Niagara Falls. The reports in the daily papers of his remarks, neither do him nor his subject justice; indeed some of the reports attribute to him the greatest absurdities. The positions taken by Mr. Littlejohn were simply these, that for more than thirty years the project of a ship canal around the Falls had been considered and advocated by the first intellects of this country, and if the Erie Canal had terminated at Oswego as was first contemplated instead of Buffalo, this ship canal would have been made. Political considerations and local interests were however as potent in those days as they have been since, and the Canal was extended, happily for the Country as it proved, to Lake Erie. The force of the combinations alluded to, influenced and carried with them the legislation of the day. Several surveys of routes for this Ship Canal were made in former years, demonstrating the feasibility of the work, and its accomplishment with a moderate outlay. One of these surveys by Capt. Williams (of the U. S. Topographical Corps we believe,) was for a route of an interior character, and based on the fact that the Tonawanda Creek could be used as far East as Pendleton, and that thence down the valley of the Eighteen mile creek, a distance of twelve miles to the lake, the canal could be constructed under remarkably favorable circumstances and at no very great expense. This route is the one we prefer as it would be entirely beyond the reach of the enemy, while its lake terminus would have the advantage of a safe harbor and plenty of water for the largest vessels.

On the other hand, the canal of seven miles *around* the Falls would terminate in a river harbor of contracted dimensions, within the reach of the enemy's fire, and even in its construction, from the geoleogical peculiarities of the region would labor under great disadvantages.

The necessity for the construction of this canal, so long talked about and delayed for reasons obvious enough, is now become apparent as Mr. Littlejohn contended, from the circumstance of the pressure of Western production, and the other pressure at Chicago for an enlargement of the Erie Canal. It was clearly shown by the speaker that if the Niagara Falls Canal was made, it would afford the West a free and cheap navigation, with the exception of the short canal connection proposed, to within 172 miles of the Hudson river, thus saving the tolls now paid on freight between Buffalo and Syracuse, so far decreasing the cost of transportation. Ships of 1000 tons could come from the upper lakes to Oswego, with free navigation, and the profits of the voyage and on the cargo would be greater, as larger quantities would move together—the facility of communication which nature has completed except at one point, presenting facilities almost equal the broad Ocean itself. The speaker alluded to the Chicago project in a very fair spirit, and only urged upon the Chamber that this Niagara Ship Canal should have fair treatment at the hands of its delegates, as well as all others who should meet at Chicago to consider the main question. The immense production of the West, to be yet extended incalculably, calls for enlarged facilities of transportation; and here is one of obvious value which could be brought into immediate use, cheapen the cost of transportation, and in no way interfere with any other projects of similar import. The Welland Canal, by which the commerce of the upper lakes finds its way to the lower, will not pass vessels of more than four hundred and fifty tons, and is now crowded to its full capacity. The business of the West requires vessels of greater burthen than formerly, for small vessels are no longer equal to the work, although the vessels now employed at Chicago are over two hundred and fifty thousand tons burthen.

The question of a possible change of this traffic through new Canadian Canals was also discussed by Mr. Littlejohn with fairness and ability. His remarks were well received by the Chamber, and all the speakers in reply, among whom were Mr. Low, Mr. Cooper and Mr. Sturgess expressed their approbation of his views, and their assent to his general propositions. He was specially supported by Mr. Bloodgood who complimented him on the clearness and force of his statements, and then proceeded to show the enormous amount of business originating in the West, the number of vessels employed in the Lake trade, the positive advantage to the Western shippers if they could bring larger freights at a time with a free and unshackled navigation to within a few miles of the Hudson river, a difference most plainly affecting the producer and consumer. He inquired if navigation without tolls was not cheaper than with them, and viewed the proposition as one too clear to require anything beyond the statement itself. As a military necessity, he also showed the vast advantage this ship canal would be in passing large war vessels from Lake Erie to Lake Ontario, made invulnerable to any opponents of the size of Monitors, which vessels could not safely navigate those lakes and would be worth nothing after they had passed up the Erie Canal. He also referred to the proposed Ottawa Canal route in Canada, the character of the navigation of the St. Lawrence, and the natural impediments which exist there; at the same time favoring all the Canadian projects of internal improvements on the principle of their increasing our own foreign commerce, and also binding the Canadians in our interests and obliging England to keep the peace. He also declared that the commercial prosperity of the provinces is inseparably connected with the growth of the North Western States. He moved a vote of thanks to Mr. Littlejohn which was unanimously carried.

It is to be hoped the Niagara Falls Ship Canal will therefore attract the particular attention of the Chicago Convention, and no jealousies or local

interests will stand in the way of the broad and palpable fact, that the products of the West may be economised vastly in their movements to market by being exempt from tolls for 178 miles of the distance they are now subjected to between Buffalo and Syracuse. Here is a water way which they may enjoy, with the slight interruption of ship canal tolls for seventeen miles, which if a National work, should be free, without being subjected to the caprice of any Canal Boards, not always constituted of the most intelligent minds. This Ship Canal, if at once constructed, would ease the whole pressure at present felt on the Erie, particularly in the Spring and Fall when forwarders crowd their business into a few days and then clamor for more facilities, through during the summer months there is no pressure at all. Fifteen boats per hour are passed easily through the locks at Lockport, equal to three hundred and sixty per day, or two thousand eight hundred and eighty every eight days. Now there are but two thousand canal boats as we are informed on the canal, and as these are always scattered along the line three hundred and fifty miles in extent, it is clear that its capacity has never yet been overtasked. The Ship Canal proposed would take off the pressure for nearly half the distance above, and reduce the pressure upon it for nearly that distance below, as it would be a shorter line and be more quickly navigated than a long one.

Jeffersonville Railroad.

The earnings and expenses of this road for the years ending December 31, 1861 and 1862 have been as follows:

Earnings:	1861.	1862.
From passengers	$150,211 11	$336,147 84
" freight	129,574 08	172,587 32
" mails	11,850 00	11,850 00
" express	6,353 73	7,278 24
	$297,988 92	$527,863 40
Expenses:		
Repairs of road	$51,175 71	$73,092 33

" machinery	8,421 33	17,523 86
Running trains	29,770 56	39,870 08
Station expenses	20,518 85	24,873 30
Fuel	21,704 20	23,441 02
Oil and waste	1,229 70	2,854 15
Rents	4,083 27	4,517 29
Salaries	6,000 00	5,487 90
Stock killed	3,423 36	1,703 00
All other expenses	7,436 78	16,595 36
	$163,328 31	$224,753 36
Net earnings	$134,660 61	$303,110 04
Add balance, December 31, 1862	160,323 90	
Sale of old iron, copper, etc	2,562 37	
Telegraph receipts, etc	1,429 41	
	$467,425 72	

Disbursed as follows:		
Interest on bonds	$48,180 42	
City of Louisville—interest paid by her on 199 bonds	11,999 70	
Taxes	2,578 98	
New cars	27,525 10	
Government tax	4,740 15	
Telegraph line	1,647 12	
Overcharges	1,677 57	
Fencing, etc	776 32	
		99,125 37
Balance, December 31, 1863		$368,300 35

The gross earnings from all sources during the year were $581,855 18; and the disbursements, $323,878 73—leaving a surplus of earnings of $207,976 45. During the past year there has been paid over to the sinking fund, for the redemption of first issue of bonds, $87,730; from which fund there has been redeemed 47 bonds, leaving a balance of that fund in the hands of the United States Trust Company, New York, on the 31st of December last, of $39,812 63, for the retirement of bonds advertised, and upon which interest has been stopped. In addition to these 47 bonds, the company has purchased, during the year, by their private agents, 20 more, making in all 67 bonds of this class retired during the year, at a cost of $65,229 10; which sum being deducted from the surplus earnings, will leave a balance of $142,747 35 surplus means on last year's business. The immediate resources of the company, as stated in the annexed balance sheet, amount to $345,295 58; and the liabilities to $170,415 90—leaving of surplus means, $174,882 39. The report says:

The receipts from the transportation of passengers, freights, mails and express, largely in excess of the receipts of any previous year, has enabled our officers to work the Road at a greatly reduced percentage of said receipts—to make important and extensive repairs and additions to the Buildings, Roadway, Motive Power and Rolling Stock—to reduce materially the mortgage debt, and still leave a large surplus fund at our disposal at the close of the year. This surplus, consisting mainly of dues from the United States War Department, has been applied, as soon as realized, to the redemption of additional Bonds of the first mortgage. In the month of February, sixty-two Bonds were purchased by private Agents of the Company and cancelled, and forty-one Bonds have been advertised for, upon which interest will cease on April 3d. At that date the first mortgage debt will be reduced to $45,000, and it will undoubtedly be extinguished by July 1st of the present year.

The item "Redemption Fund of Mortgage Bonds," in the "Balance Sheet," is represented by twenty-three $1,000 Bonds of the second mortgage, and fourteen $105 interest Bonds, purchased during the past year by the Company's Agents for the sum stated ($18,617 65,) and making the actual amount of the second mortgage debt at the close of the year less than is set forth in the "Balance Sheet," by the above number of Bonds.

It will be seen from the Secretary's Report, that the working expenses during the past year, bear to the receipts a proportion of 42 58-100 per cent. This proportion, however, does not show the true relation which the former bears to the latter. The Construction Account having been closed for many years, it has been the usage to charge working expenses with many items of expenditure properly belonging to Construction, as they go to enhance the value of the franchise; had such expenditures during the past year been passed to their proper accounts, the proportion of working expenses to receipts would have been reduced to forty per cent. or less.

The receipts from passengers and freight for the current year are thus far indicative of a business equally as good as that which has distinguished the past year. The gross earnings for the quarter ending March 31st, will reach within a fraction of $150,000. It may not be prudent to calculate upon as large receipts for the remaining months; but should our most moderate anticipations be realized, the close of the year will witness the extinguishment of the first mortgage debt, the payment of all arrearages of interest to the city of Louisville, the creation of a sinking fund for the redemption of the second mortgage, with a fair prospect at an early day of dividend payments to stockholders.

The equipment of the road consists of 15 locomotives; 10 first class, 2 second class, and 2 sleeping cars; 5 baggage, 119 box, 15 stock, 1 coal, and 61 flat cars. The number of miles run by engines during the year has been 312,859, at a cost for repairs of $16,288 91, or 5.20 cents per mile run.

BALANCE SHEET DEC. 31, 1862.

Pittsburgh, Ft. Wayne and Chicago Railway.

PITTSBURGH, PA., May 20th, 1863.

To the Editor of the RAILROAD JOURNAL:

DEAR SIR—I have pleasure in handing you, herewith subjoined, a statement showing the financial condition of this company, at March 31st ult.

It will be recollected that the balance of income account is the net result of the operations to the above date, after making all current charges for expenses of transportation, interest on bonds, (except the income bonds secured by the third mortgage,) and expenditures for extending and perfecting the railway, equipment and other appurtenances, (usually termed construction expenditures,) including also, the charge of $535,173, referred to in the first Annual Report, for the amount of the so-called Ohio and Pennsylvania Railroad Company's bridge bonds, and the Pittsburgh, Fort Wayne and Chicago Railroad Company's Chicago depot bonds. The reduction during the first fiscal quarter of this year, in the balance shown at the debit of income account, December 31st ult. has been $148,878 75.

The approximate earnings for April, were $464,357 34, being an increase of 64¼ per cent. over the corresponding month of last year, and for the first four months to April 30th ult., they were $1,629,627 75, being an increase of 42⅛ per cent. over the same period of 1862.

Respectfully &c., &c.

THO. D. MESSLER,
Comptroller.

GENERAL ACCOUNT, MARCH 31, 1863.

Cost of railway, equipment and structures		$17,886,728 38
Cost of supplies on hand for current operations	$502,636 73

Vermont Central Railroad.

An adjourned meeting of the holders of the first mortgage bonds of the Vermont Central Railroad Company was held this forenoon at the Meionaon. Hon. Thomas M. Edwards of Keene, N. H., was chairman, and John M. Pinkerton of Boston, Secretary. O. W. Davis submitted a report of a committee appointed at a meeting April 7, in which it was stated that the committee could not report a plan of settlement with the Vermont and Canada Railroad Company, and recommended that the bondholders empower a committee to adjust the matters of difference.

The report was accepted, and on motion of Dr. E. Howe of Cambridge, seconded by Judge Hepburne of Philadelphia, the same committee was authorized to settle and adjust all questions at variance between the different interests on such terms as they might deem to be just to the several interests, provided that the permanent capital of the Vermont and Canada Railroad Company shall not exceed the sum of $2,000,000, and provided that the settlement to be made shall be such as will close the construction account of the Vermont and Canada Railroad Company. It was also provided that the committee should make no deduction to the second mortgage bondholders of what was due to the holders of the first mortgage. The committee consists of O. W. Davis, Joseph Andrews, and Otis Drury.—*Boston Journal, April 7.*

Cincinnati, Hamilton and Dayton Railroad.

The income and expenses of this company for the fiscal years ending March 31, 1862 and 1863, have been as follows:

Income:	1862.	1863.
From passengers	$272,117 30	$348,893 39
" freight	298,289 69	446,633 03
" mails, etc	36,854 57	47,167 21
" rents of track, etc.	30,914 11	25,078 57
" " real estate	2,063 75	2,208 09
" interest, etc	5,966 21	7,323 57
	$646,205 57	$877,403 86
Expenses:

Watching bridges	5,579 08	4,562 45
Rent of D., X. & B. R. R.		10,725 00
Miscellaneous	12,374 06	18,168 78
	$316,490 99	$390,936 81
Balance of earnings	$229,714 58	$486,467 05
Interest on bonds	$93,601 66	
State taxes	13,922 57	
Interest revenue tax	6,770 89	
	105,653 62	
Net income for the year		$370,813 43
Dividends, Oct. 1862, and April 1863, 5 per cent. each and government tax		222,247 42
Surplus for the year		$148,566 01
Surplus previous year		95,157 74
Total surplus March 31, 1863		$243,723 75

Compared with the previous year, the gross earnings have increased $231,198 29; with an increase in expenses of only $74,445 82—making the increase in net earnings $156,752 47. The number of passengers carried during the year was 441,250—an increase over the previous year of 82,258.

The company have leased perpetually the Dayton and Michigan road and equipment, at an annual rental equal to the interest on a fraction less than $22,000 per mile. The total expenditure for construction, real estate, and equipments of the Cincinnati, Hamilton and Dayton Railroad amounts to about $57,000 per mile. The two roads now cost this company an average of say $32,500 per mile. The report says:

The connection of the roads at Dayton is such as renders that road fairly a continuation of our line. It extends from the fertile valley of the Big Miami River, one hundred and forty miles to Maumee Bay, on Lake Erie, making with this road, a distance of two hundred miles between Cincinnati and Toledo; a shorter route than any other between Cincinnati and the lake.

The country traversed by the Dayton and Michigan road is comparatively new, and the sources but imperfectly developed. It is a valuable agricultural district, and when towns shall have arisen along its line, and manufactories become established, it is believed the local business of the road will be greatly increased. This, added to the valuable through business it will always command, leaves little doubt that the leasing of the road was a wise and judicious measure.

The contract for a division of business and earnings between this company and the Little Miami, and Columbus and Xenia Companies, has been in operations for three years, with entire satisfaction to all parties; and we believe with advantage to the public.

The passenger business continues to increase, so that we are now under the necessity of running six trains daily each way over the road. To this period, we have received and delivered our passengers in the freight depot at Cincinnati, very much to their annoyance, as they have sometimes to walk through and climb over the freight.

The plans are now nearly matured for a passenger depot, to front on the corner of Fifth and Hoadly streets, and to extend through to Sixth, the building of which we expect to have completed during the present year. The surplus earnings of the past year, after payment of transportation expenses, State and general government taxes, investment in sinking fund, interest on bonds, and ten per cent. to stockholders, will be ample to erect a passenger depot creditable to the company, and make other improvements necessary for an increasing business.

The company, with a view to relieve their freight depot from too great a pressure of freight, and at the same time to bring into profitable use vacant land, have during the past year erected four warehouses, forty feet front by sixty-seven feet deep, three stories high, adjoining their tracks in the City, at a cost of $17,951 79. These warehouses are all now under rent, and there is a demand for more. Besides paying a profitable rent, the tenants of these warehouses bring business to the road.

BALANCE SHEET, MARCH 31, 1863.

Superintendent.—DANIEL MCLAREN.

☞ A meeting of the citizens of Cooperstown has been held for the purpose of initiating measures for the early construction of a branch railroad from that village, to connect with the Albany and Susquehanna Railroad.

Railroad Stocks.--County Subscriptions.

SUBSCRIPTION BY ALLEGHENY COUNTY, PENN. TO THE PITTSBURGH AND CONNELLSVILLE RAILROAD COMPANY. THE COUNTY AUTHORIZED TO LEVY TAXES SUFFICIENT TO PAY THE INTEREST UPON ITS BONDS ISSUED FOR THE PAYMENT OF ITS SUBSCRIPTION.

In 1843 an act passed the Legislature of Pennsylvania authorizing subscriptions by Allegheny County to the stock of the Pittsburgh and Connellsville Railroad Company. In April 1853 another act was passed giving authority to the county to borrow money to pay for such subscriptions. The county, by its commissioners, made a subscription and issued county bonds in payment; but, subsequently refused to pay the interest on the bonds, on the ground that by a proviso in section 7 of the act of April 15th 1834, they were debarred from doing so; that section enacting that no tax in any county shall in any one year exceed the rate of one per cent, on every dollar of the adjusted valuation," and the current expenses of the year being added to the amount of interest due on the bonds it exceeded the sum of one per cent of the entire value of the taxable property in the county.

The case came before the Supreme Court of Pennsylvania upon an alternative *mandamus*, awarded on the relation of Wm. G. Armstrong, against the commissioners of Allegheny county. The court holds that the proviso to section 7 of the act of 15th of April 1834, is a limitation upon the taxing officers merely, and in no way controls the Legislature, who may repeal the same expressly or impliedly by legislation inconsistent therewith. The grant of authority by the legislature to county commissioners to create a debt, and to provide for the payment of the interest thereon, is an enlargement of the power, to assess taxes to meet the demand, and an implied repeal of any conflicting statutory limitation. That, therefore the act of 1843, authorizing the subscription, and the act of 1853, giving authority to borrow money to pay such subscriptions, and to make provision for the payment of the principal and interest of the money so borrowed, as in other cases of loans of said counties, virtually repeal the proviso of 1834, limiting assessments, so far as it conflicts with their provisions, and empower the commissioners to levy taxes sufficient to meet the obligations incurred under said authority.

The following is the opinion of the court, rendered at the decision of the case.

THOMPSON, J.—After judgment for the relator in this case, we entertained a motion in behalf of the respondents to amend their return to the alternative writ of *mandamus*, in the particular hereinafter to be noticed, and without stopping to discuss any question of practice, as to the right to amend at the time it was proposed, we proceed to notice the amendment itself.

The original return, declared in our opinion to be insufficient, involved the question of power in the commissioners to direct the assessment of taxes beyond one per cent, in any one year, on the adjusted valuation of taxable property in Allegheny county, but as it was defective in not setting forth the aggregate valuation of property in the county, or the estimated amount of the ordinary expenses for the year, it was overruled.

The amended return now shows, that the aggregate valuation of taxable property in the county is $26,080,568; that the estimated current expenses for the year 1861, is $174,532, and that the railroad interest accrued and payable within that year, under judgments of this court, amounts to the sum of $157,500. Assuming from the return, that it is the intention of the county officers to provide for this interest, as well as the current expenses of the county, it is very evident that it will largely exceed one per cent on the valuation of the taxable property. The question now presented is, can the commissioners, as the law is, levy a tax exceeding ten mills, or one per cent, in any one year? for if they can we have decided that they must do it. The limitation referred to is to be found in a proviso to section 7th of the act of 15th April 1834. It is as follows: "*Provided*, That no tax in any county, shall, in any one year, exceed the rate of one per cent on every dollar of the adjusted valuation."

Every question touching the power of the legislature to authorize county commissioners to make such a subscription as was made in this case, and the exercise of the power by such functionaries, has been heretofore decided and the only question before us at this moment, is the effect of the grant of authority to create the debt, and to provide for the payment of interest in view of this limitation. Did it enlarge the power to assess taxes to meet the demand? That it did we cannot doubt. The limitation was upon the taxing officers. It was made to control them and could not control the legislature. Nothing but a constitutional mandate could have that effect, and so it must be conceded now, there was no such barrier in the way of legislation on the subject of municipal corporations; that, therefrom, was not in the way. The limitation was but the expression of the sovereign will towards subordinate authorities; it had no effect on the legislature itself. There being no constitutional prohibition to a change of the law on this subject, the legislature was free to dispense with the limitation entirely, or so far as to include within it the super-added duty of providing for new liabilities. This could as well be done by requirements totally inconsistent with the limit fixed, as by express provision. Where not expressed, it may be implied, whenever it is clearly and necessarily incident to the duty enjoined in the legislative mandate or authority.

The act of 1843 authorized certain counties named, and among them Allegheny, to subscribe to the stock of the Pittsburgh and Connellsville Railroad Company, and the act of 18th April 1853 gave authority to borrow money to pay for the subscriptions so made or to be made, and "to make provision for the payment of the principal and interest of the money so borrowed as in other cases of loans of said counties." We have decided that issuing bonds was a mode of borrowing money. The commissioners of Allegheny made the subscription, and issued their bonds in payment, but refuse to provide for the payment of interest, alleging that they cannot exceed the limit of one per cent, per annum.

They are required by the statute to make provision for the payment of interest, and of course in the manner they contracted to pay it; that was semi-annually. This was to be done in the usual mode adopted by counties. That certainly was by taxation, as that is the ordinary resource of municipal bodies. The respondents so understand it, as is evident by this plea, for in it they only set up the limitation as operating to prevent them from so raising the necessary amount. Now the legislative mandate was to make provision in the ordinary way; that is by taxation, without regard to any limitation whatever, excepting only the amount needed for the payment of the interest. That is in conflict, say the respondents, with a former act limiting the amount of the annual tax. What of that? The legislature are to be presumed to have known that, and notwithstanding, required the performance of a duty inconsistent with it. If the county made the subscription, she had the question of limitation in her own hands. The language was in effect, "if you subscribe you must provide money to pay interest, and if it exceeds the limits fixed for your protection, you must take the responsibility of that." The county did subscribe, and the act referred to was undoubtedly an implied repeal of the limitation which stood directly in the way of the performance of the duty enjoined. To hold otherwise, would be to allow the clearest requirement of the law to be defeated, and a palpable fraud to be committed upon bondholders who advanced their money on the faith of the authority given, and duty enjoined as a consequence thereof, by the legislature. A construction leading to such results cannot be made in this case—the law is too plain for that.

We have, however, on this subject, an authority directly in point. I mean the case of Amey *vs.* the city of Allegheny, recently decided in the Supreme Court of the United States. The facts of that case are as follows: By the act of 8th of May 1850, the authorities of Allegheny city were forbidden to increase the indebtedness of the city above the sum of $500,000. The terms of the act are very explicit. Subsequently thereto, the legislature authorized a subscription of $200,000 to the Ohio and Pennsylvania Railroad Company, with a re-enactment of the limitation including the last sum, in 1852 a further subscription of $200,000 was authorized by the legislature, without reference to the limitation. The subscription was however made, and the bonds of the city issued for the amount. A suit was brought in the Circuit Court of Pittsburgh for the recovery of certain unpaid coupons held by the owner of some of these bonds, and the defence set up was, that the bonds were unauthorized, and therefore invalid, as they were in excess of the limitation of the indebtedness of the city. On a difference of opinion of the judges in the circuit court, the case was removed into the Supreme Court at Washington, where the defence was overruled, Wanie J., delivering the unanimous opinion of the court. In that opinion it is said, "the political power which allowed the first subscription, could at a succeeding session of the legislature, give authority to the city to make a second; and we see that such was given by the act of the 14th April 1852.

* * * * * *

Upon a careful consideration of the amended return, we are of opinion that it affords no justification to the respondents in refusing the assessment of such taxes as may be required to meet the payment of the interest on railroad subscriptions by the courts, notwithstanding the limitation in the act of 1834. This return or plea being therefore insufficient in law, is overruled, and the decree in the case remains as passed.

Commerce of New York--April, 1863.

The Custom House tables of the foreign commerce of the port of New York for April supply the following figures:

Imports.	1861.	1862.	1863.
Entered for consumption	$5,395,809	$7,141,197	$9,493,830
Entered for warehouse	4,187,678	3,853,218	6,456,208
Free goods	3,351,905	2,232,315	1,328,216
Specie	1,953,001	26,152	107,061
Total entered at the port	$14,886,393	$13,252,882	$17,385,315
Withdrawn from warehouse	1,761,245	4,405,410	4,132,633
Cash duties	1,643,362	4,140,952	3,957,198
Exports.			
Domestic produce	$9,255,648	$8,002,094	$11,581,933
Foreign produce, dutiable	231,784	607,678	375,224
Foreign produce, free	209,573	56,350	74,949
Specie	1,412,674	4,037,675	1,972,834
Total exported from the port	$11,109,679	$12,703,797	$14,004,940
Total, exclusive of specie	9,697,005	8,666,122	12,032,106

The following is a statement of the imports and exports for the first ten months of the fiscal year:

	Imports incl. specie.	Domestic Exports. Merch'dise.	Specie.	Total.	Exports of foreign merchandize, dutiable and free.

1852	" 16	171	" 18	216 "	1861	Apr. 8	937	" 26	231 "

The distribution of this steamboat trade was as follows:

From La Crosse, Wisc.	273	From Fox Lake, Minn.	3
" Dunleith, Ill.	236	" Minnesota River.	318
" St. Louis	99	" Stillwater, Minn.	4
" Pittsburg	4		

The average tonnage of the steamboats engaged in this trade was in 1858, 205 tons and in 1861, from 250 to 300 tons.

Red River Trade.—A little steamer of 60 tons was launched at Shayenne in 1859. Another boat has recently been placed on the river. The trade is chiefly with the Red River settlement and consists largely of imports and exports of the Hudson Bay Company. The principal depot of this business is Georgetown. The following shows the weight of merchandize as also the number of passengers carried by steamer to and from the Selkirk settlement for the years 1860 and 1861:

Years.	Freight (pounds) carried. To Fort Garry.	From Ft. Garry.	Both ways.	Passengers.
1860	433,643	89,306	522,949	123
1861	826,483	91,576	918,059	308

—and in 1861, 60,000 pounds were carried down the river in barges, making in all 886,483 pounds or 443 tons carried to the settlement and 46 tons brought from it.

Minnesota River Trade.—This river was first ascended by steamboats in 1850. In 1851 three boats went up the river. In 1855, the arrivals from the Minnesota at St. Paul were 119; in 1857, 292; in 1859, 300 and in 1861, 318.

Upper Mississippi Trade.—The Falls of St. Anthony terminate the continuous navigation from the south; but above, the still, broad and deep river presents a long chain of slack water navigation interrupted only by the Sauk Rapids and Little Falls for 352 miles to the northwest or nearly to the Falls of Pokegoma to which point a steamboat ascended in 1859. On the first of these navigable reaches from St. Anthony to St. Cloud one boat has run regularly during the warm season and a second boat is to be placed on the line. The principal depots of this trade are Minneapolis and St. Anthony. At the first named there were in 1861, 45 arrivals, and probably at the latter an equal number.

RAILROAD SYSTEM OF MINNESOTA.

On the 3d March, 1857, Congress granted to the then Territory of Minnesota lands amounting to 4,399,141 acres to aid in the construction of certain railroads.

These railroad lines as surveyed and located are as follows:

	Projected.	Located.
Minnesota & Pacific—Stillwater *via* St. Paul & St. Anthony to a point 7 miles south of Sioux Wood with Red River	222	222 miles.
Minnesota & Pacific—Branch Line from St. Anthony *via* St. Cloud & Crow Wing	400	116 "
Southern Minnesota—West St. Paul *via* Shakopee, Belle Plaine, St. Peter, Mankato, etc., in the direction of the mouth of the Big Sioux	165	114½ "
Southern Minnesota—Branch from St. Anthony to Shakopee	25	23½ "
Transit—Winona *via* St. Peter to Dakota Line	268	175 "
Root River—La Crescent to Rochester	79	79 "
Minneapolis & Cedar Valley—Minneapolis *via* Faribault to Iowa State Line	112	112 "
	1271	852 "

In this system no provision was made for communication with Lake Superior. This omission was supplied by the State Legislature in 1861 which made a grant of swamp lands for such a line, and which as surveyed and located from St. Paul to Duluth is 171 miles. The lands thus donated embrace about 500,000 acres capable of easy drainage.

In consequence of the financial depression following the panic of 1857, the State attempted in the spring of 1858 to aid the companies entrusted with the construction of the land-grant railroads by a loan of State credit. For this purpose bonds were issued to the extent of $2,275,000, but the scheme failed to secure the confidence of the public, and the market price of the bonds declined to a merely nominal value. The companies defaulted, and the roads, lands and franchises and other assets reverted to the State, leaving the following amounts of graded roads among the assets:

Minnesota & Pacific—from St. Paul to Clear Lake	62.50 miles.
Southern Minnesota—from Mendota to Belle Plaine	37.50 "
Transit—from Winona to point near Ashland	50.00 "
Root River—from La Crescent to point near Houston	20.25 "
Minneapolis & Cedar Valley—in disjointed sections	69.25 "

—making the total graded 239½ miles.

The Legislature of 1861 made another attempt to secure the construction of these roads. The lands and assets were regranted to new companies on the condition of completing 20 miles before the 1st January, 1862, and a deposit of $10,000 was exacted as a pledge of good faith. In consequence of the political events which have since transpired, little was done under the new law except by the Minnesota and Pacific Company, which completed and commenced operations on the line between St. Paul and St. Anthony on the 2d July last, and is making every effort to open the line to Anoka during the summer of 1863. The Winona Transit is also progressing and 11 miles are ironed.

BANK STATEMENT.

The number of banks in the State on the 1st January, 1863, was seven and their condition as follows:

Resources—Loans and discounts, $107,405; due from brokers, $26,548; stocks on deposit with State Auditor at their par value, $266,412; State stocks not so deposited, $57,800; specie, $25,665; cash items $50,383; real estate and office furniture, $1,033; loss and expense account, $21,379; bills of solvent bank, $22,200; due from banks, $27,783—total, $606,609.

Liabilities—Capital, $318,000; circulation, $170,079; due to banks $3,100; due depositors, $92,876; due to others $11,660—total, $606,609.

Iowa County Bonds.

The United States Circuit Court for the circuit embracing the State of Iowa has decided that county subscriptions to railroad companies are void, and that bonds given by counties to aid in the construction of railroads in this State are constitutionally invalid. This is a virtual repudiation of the obligations incurred by counties in Iowa to aid in the construction of railroads. By this desion Dubuque county will get rid of two hundred thousand dollars of obligations, and on the same principle Dubuque city will be relieved of a railroad debt of some four hundred and fifty thousand dollars.—*Dubuque Herald.*

Railroads of the State of New York.

REPORT OF STATE ENGINEER.

OFFICE OF THE STATE ENGINEER & SURVEYOR, ALBANY, February 17, 1863.

To the Hon. the Legislature of the State of New York:

In compliance with section 103, chapter 140, Laws of 1850, I would respectfully submit the Annual Report on Railroads, for the year ending September 30, 1862, as prepared by my Deputy, S. H. Sweet, as follows:

REPORT.

During the year seven companies have been organized, and their articles of association have been filed as required by law, in the office of the Secretary of State. The following is a list of the companies organized, and of the enactments relating to railroads passed by the Legislature of 1862:

Adirondac Estate and Railroad Company.—An act to facilitate the construction of the road of this company. Time extended for completion; chap. 90, Laws of 1862.

Albany and Boston Railroad Company.—Articles of association filed January 9, 1862.

Brooklyn, Bath and Coney Island Railroad Company.—Articles of association filed February 19, 1862.

An act for the relief of this company; chap. 407, Laws of 1862.

Brooklyn City and Rockaway Railroad Company.—Articles of association filed April 7, 1862.

Buffalo and Allegheny Valley Railroad Company.—An act permitting this company to extend their road, and extending the time for building the same; chap. 143, Laws of 1862.

Erie Railway Company.—An act concerning this company, certain bondholders to received preferred stock on the surrender of their bonds; required to file a statement of the amount of capital stock in the office of the Secretary of State; consolidating the Buffalo Branch of the Erie Railway Company with this company, &c.; chap. 66, Laws of 1862.

Erie and New York City Railroad Company.—An act authorizing certain towns of Chautauqua and Cattaraugus counties to subscribe for the capital stock of this company; chap. 95, Laws of 1862.

An act to extend the time for the completion of road; chap. 357, Laws of 1862.

Grand street and Newton Railroad Company.—An act to amend the act authorizing the laying of a double railroad track in the city of Brooklyn and town of Newtown, passed April 16, 1860; chap. 199, Laws of 1862.

Lebanon Springs Railroad Company.—An act to extend the time for completion of road; chap. 444, Laws of 1862.

Long Island Railroad Company.—An act to amend chapter 277, of the laws of 1839, authorizing the construction of a branch road; chap. 413, Laws of 1862.

North River and Wall street Ferry Railroad Company.—Articles of association filed February 12, 1862.

Rochester City and Brighton Railroad Company.—Articles of association filed May 31, 1862.

Troy and Cohoes Railroad Company.—Articles of association filed February 11, 1862.

Troy Union Railroad Company.—An act to authorize the city of Troy to borrow money to pay such amount of the bonds of said city issued to this company, due January 1, 1863; chap. 59, Laws of 1862.

Utica City Railroad Company.—Articles of association filed August 13, 1862.

Watervliet Turnpike and Railroad Company.—An act to authorize the Watervliet Turnpike Company to construct and maintain a railroad on their present road, and to extend the same, &c.; chap. 233, Laws of 1862.

An act to amend the General Railroad act of 1850, relating to the weight of rails to be used; chap. 449, Laws of 1862.

ABSTRACT OF THE REPORTS OF THE RAILROAD CORPORATIONS FOR THE YEAR ENDING SEPTEMBER 30, 1862.

TABLE A.—*Stock and Debts.*

Amount of capital stock per charter and acts of the Legislature	$102,054,400 00
Amount of capital stock subscribed for	69,259,538 66
Amount of capital stock paid in per last report	66,028,351 92
Amount of capital stock now paid in	87,404,685 69
Amount of funded debt, as by last report	45,780,139 02
Amount now of funded debt	69,067,983 90
Amount of floating debt, as by last report	1,865,503 50
Amount now of floating debt	1,670,270 94
Total amount now of funded and floating debt	70,738,254 84

TABLE B.—*Cost of Construction and Equipment.*

For grading and masonry	$81,179,897 14
For bridges	2,206,130 05
For superstructure, including iron	22,983,028 57
For passenger and freight stations, buildings and fixtures	4,872,983 36
For engine & car houses, machine shops, machinery and fixtures	2,068,879 89
For land, land damages and fences	8,116,148 67
For locomotives and fixtures, and snow-plows	5,178,730 19
For passenger and baggage cars	2,645,363 02
For freight and other cars	3,843,562 47
For engineering and agencies	5,276,927 24
Total cost of construction and equipment	$145,186,963 18
Total cost of same, excluding city roads	136,559,727 09

TABLE C.—*Characteristics.*

Length of roads in miles	3,319.34
Length of roads laid	2,800.57
Length of roads in operation, excluding city roads	2,710.80
Length of double track, including sidings	1,112.95
Length of branches laid	454.09
Length of double track on same	24.18
Length of equivalent single track, exclusive of city roads	4,216.56
Number of engine houses and shops	193
Number of engines	769
Number of first class passenger cars	1,148
Number of first class passenger cars, excluding city roads	691
Number of second class and emigrant cars	210
Number of second class cars, excluding city roads	143
Number of baggage, mail and express cars	242
Number of freight cars	10,689

TABLE D.—*Business of the Year.*

Passenger Transportation:	
Miles run by passenger trains	17,299,684
The same, excluding city roads	6,448,777
Number of passengers of all classes carried in cars	59,690,601
The same, excluding city roads	12,870, 45
Number of miles traveled by passengers, or number of passengers carried one mile, city roads not included	344,830,369
Freight Transportation:	
Miles run by freight trains	9,596,696
Number of tons carried in freight trains	6,506,135
Total movement of freight, or number of tons carried one mile	858,402, 01
Classification of Freight:	Tons.
Products of the forest	422,743
Products of animals	1,877,929
Vegetable food	1,389,238
Other agricultural products	291,163
Manufactures	702,421
Merchandise	873,366
Other articles	1,449,275
Total tonnage	6,506,135
Excluding City Roads;	Miles.
Average rate of speed of ordinary passenger trains, including stops	20.48
Average rate of same, when in motion	24.87
Average rate of speed of express passenger trains, including stops	27.67
Average rate of same, when in motion	31.74
Average rate of speed of freight trains, including stops	11.52
Average rate of same, when in motion	14.43
Average weight, in tons, of passenger trains, exclusive of passengers and baggage	68.78
Average weight, in tons, of freight trains, exclusive of freight	137.81

TABLE E.—*Cost of Maintenance of Roadway.*

Allotted to Passenger Transportation:	
Repairs of road-bed and way, exclusive of iron	$744,144 73
Cost of iron for repairs	394,643 03
Repairs of buildings	134,452 63
Repairs of fences and gates	25,495 69
Taxes on real estate	138,725 22
	$1,437,461 30
Allotted to Freight Transportation:	
Repairs of road-bed and way, exclusive of iron	$1,510,531 45
Cost of iron for repairs	869,215 03
Repairs of buildings	283,883 67
Repairs of fences and gates	56,498 58
Taxes on real estate	261,775 10
	$2,981,898 83
Allotted to passenger transportation	$1,437,461 30
Allotted to freight transportation	2,981,898 83
Other costs not allotted	350,320 92
Total cost of maintenance of road w'y	$4,769,681 05
Total cost, excluding city roads	$4,658,675 95

TABLE F.—*Costs of Repairs of Machinery.*

Allotted to Passenger Transportation:	
Repairs of engines	$475,174 04
Repairs of cars	485,543 74
Repairs of tools, &c	34,756 22
Incidental expenses, oil, fuel, &c	40,370 46
	$1,035,844 46
Allotted to Freight Transportation:	
Repairs of engines	$862,013 39
Repairs of cars	1,546,550 71
Repairs of tools, &c	72,260 90
Incidental expenses, oil, fuel, &c	82,025 97
	$2,562,850 97
Allotted to passenger transportation	$1,035,844 46
Allotted to freight transportation	2,562,850 97
Other costs not allotted	55,075 39
Total cost of repairs of machinery	$3,653,760 82
Total cost, excluding city roads	$3,614,900 87

TABLE G.—*Cost of Operating the Roads.*

Allotted to Passenger Transportation:	
Office expenses, stationery	$59,319 61
Agents and clerks	312,527 34
Labor, loading & unloading freight	19,777 05
Attendance of porters, watchmen and switchmen	152,345 14
Wood and water station attendance	40,002 19
Conductors, baggagemen and brakemen	265,844 97
Enginemen and firemen	243,965 77
Fuel, and cost of labor in preparing for use	671,303 02
Oil and waste for engines & tenders	82,277 96
Oil and waste for cars	11,815 81
Loss & damage of goods & baggage	5,805 87
Damages for injuries to persons	48,485 36
Damages for property and for cattle killed	7,297 08
General superintendence	74,465 24
Contingencies	348,653 25
	$2,343,885 66
Allotted to Freight Transportation:	
Office expenses, stationery, &c	$69,171 90
Agents and clerks	576,161 90
Labor, loading & unloading freight	791,325 89
Attendance of porters, watchmen and switchmen	275,797 96
Wood and water station attendance	65,224 53
Conductors, baggagemen and brakemen	431,872 80
Enginemen and firemen	486,378 48
Fuel, and cost of labor in preparing for use	1,263,719 87
Oil and waste for engines & tenders	159,929 93
Oil and waste for cars	47,635 58
Loss & damage of goods & baggage	90,998 41
Damages for injuries to persons	6,479 60
Damages for property and for cattle killed	17,382 12
General superintendence	135,988 43
Contingencies	430,160 60
	$4,848,078 11
Allotted to passenger transportation	$2,343,885 66
Allotted to freight transportation	4,848,078 11
Other costs not allotted	1,475,836 57
Total cost of operating roads	$8,667,800 34
Total cost, excluding city roads	$7,241,998 58

TABLE H.—*Earnings and Payments.*

Earnings:	
From passenger business	$9,873,004 84
The same, excluding city roads	7,582,666 55
From freight business, city roads excluded	18,545,978 84
From other sources	1,088,196 72
The same, excluding city roads	1,034,474 24
Total earnings	$29,507,180 40
The same, excluding city roads	$27,163,119 63
Payments other than for Construction:	
For transportation expenses	$17,882,071 79
The same, excluding city roads	16,029,914 67
For interest	4,915,706 62
The same, excluding city roads	4,811,173 83
For dividends on stock	2,405,890 50
The same, excluding city roads	2,008,490 50
Amount carried to surplus fund	1,017,461 35
The same, excluding city roads	940,544 34
Total payments	$26,221,130 26
The same, excluding city roads	$23,790,123 34

TABLE I.—*Accidents.*

Number of passengers killed	22
Number of passengers killed, excluding city roads	1
Number of passengers injured	45
Number of passengers injured, excluding city roads	24
Number of employees killed	51
Number of employees injured	28
Number of others killed	80
Number of others injured	42
Total number killed	153
Total number injured	115
Total number killed, excluding city roads	141
Total number injured, excluding city roads	84

Deductions from the foregoing Results.

If we exclude the city road, we have as follows:

Average cost per mile, of road and equipment	$50,391 04
Average cost of road and equipment per mile of single track	32,386 52
Average number of miles traveled by each passenger	39.55
Average number of passengers in each train	59.86
Average number of miles each ton of freight was transported	131.78
Average number of tons in each freight train	89.45
Aggregate movement of passenger trains is equivalent to passing over the road	2,128 times.
Aggregate movement of freight trains is equivalent to passing over the road	8,541 times.
Average number of trains passing daily over the road, about	15½
Average cost per mile of road, for maintaining roadway	$1,718 82
Average cost per mile of road, for repairs of machinery	1,333 76
Average cost per mile of road, for operating road	2,672 03
Average cost per mile of single track for maintaining roadway	1,104 85
Average cost per mile of single track for repairs of machinery	857 81
Average cost per mile of single track for operating road	1,717 51
Average sum received for carrying one passenger one mile	2.17 cents.
Average sum received for transporting one ton of freight one mile	2.14 cents.
Average number of miles of travel for each passenger killed	21,523,778
Average number of miles of travel for each passenger either killed or injured	3,609,509
Average number of passengers carried for each one killed	544,237
Average amount of dead weight moved for each passenger carried	1.15
Average amount of dead weight moved for each ton of freight transported	1.54

Average expense is 59 per cent. of all the earnings.

COST OF TRANSPORTATION AND EXPENSES ON GROSS EARNINGS.

Deductions from the reports of several of the principal companies, showing, 1st. Average sum received per ton per mile on freight. 2d. Average cost per ton per mile transporting freight. 3d. Per centage of transportation expenses to gross earnings.

Name of Road.	Average per ton per mile. Received for transporting.	Cost of transporting.	Per cent of transportation expenses on gross earn'gs.
Buffalo, N. York and Erie	2 03	1.22	66.54
Buffalo and State Line	2 78	1.45	51.33
Erie Railway	1 89	.95	61.63
Hudson River	2 26	1.20	51.89

The following statement shows the extent and condition of the railroads in England up to 1861, *also those of this State up to September* 30, 1862, *from which satisfactory comparison can be drawn:*

Classification.	Railroads in England.	State of N. Y.
Cost of roads and equipments	$1,740,000,000	$136,559,727
T'l last year's re'ipts.	140,000,000	27,163,119
Per cent of expenses in operating same on receipts	47 per ct.	59 per ct.
Miles of double track.	6,690	1,137
" single " .	3,743	1,573
Equiv'lent " " .	17,000	4,216
Tons of iron used in making road	3,660,000	445,210
No. of ties for supporting rail	30,000,000	9,275,200
No. required to renew every year	2,400,000	713,477
No. of locomotives employed	5,081	769
No. of freight and baggage cars	180,574	10,881
No. of passenger cars.	15,076	2,192
No. of tons carried during year	90,000,000	6,506,135
No. of passengers carried during year	163,435,678	12,870,465
Average per mile of railroad	180,000	50,891
Receipts from freight business	75,000,000	18,545,978

RECOMMENDATIONS.

I would respectfully urge upon the Legislature the great necessity of amending that portion of the General Railroad Act of 1850 which relates to the annual reports of the companies to be made to this department. My predecessor, the Hon. Van R. Richmond, in his two last reports, called the attention of the Legislature particularly to this point. In the one for the year ending Sept. 30, 1861, he says: "Since 1850, great and important changes have been made in the management of railroads; and there are now many conditions and circumstances connected with the business operations of our railroads which cannot be brought out under the present form of reporting. For instance, we are unable to distinguish the way freight from that which passed over the entire length of the road; neither can we determine whether the movement is to or from tide water. We have no separate account of the live stock which is transported, no special account of the milk business; and there are many other particulars which it is important to have given in detail, which cannot now be reached."

The rapid increase in city or horse railroads, and their growing importance, demand that a special form should be laid down for the annual reports. At the passage of the general act, it was not forseen that these railroads would be, to any great extent, introduced, and no special provisions were made, and as a majority of them are formed under this act, and are obliged to make annual reports, it is important that some uniform rule should be adopted. The reports, as now made, are necessarily imperfect and incomplete, and it is impossible to tabulate them so as to give a satisfactory comparison.

The earnings of ten Companies that have filed their reports for the past year amount to $2,290,338 29, which is equal to nearly one-third the amount received from passenger business on all the railroads in the State using steam as a motive power.

For several years past the Legislature has passed many acts authorizing the formation of city railroad corporations, and have not required them to make annual reports. Many of these Companies are not even required to file articles of association with the Secretary of State. The Companies thus created are organized for the same purpose as those incorporated under the general law, and should, in my opinion be placed under the same general provisions.

I would therefore suggest that the act of 1850 be revised, especially that portion which relates to the form of the annual report to be made to this department, and that a special form be adopted for city roads.

Respectfully submitted.

WM. B. TAYLOR,
State Engineer and Surveyor.

DOCUMENTS ACCOMPANYING THE ANNUAL REPORT ON RAILROADS.

1. Tabulated results compiled from the reports of the respective companies, comprised in tables A, B, C, D, E, F, G, H and I.
2. Tables of comparative statements for five consecutive years, 1858, 1859, 1860, 1861, 1862, of the most important statistics, as reported by the companies.
3. Reports of the different Railroad Companies for the year ending September 30, 1862.
4. Comptroller's apportionment of expenses charged to Railroad Companies, for the year ending September 30, 1862.
5. A map of the State, on which is given the position of all the railroads.
6 A general plan of a wrought iron bridge, adopted by the New York Central Railroad.

Railroad Earnings---Weekly.

The traffic of the Great Western Railroad for the week ending May 15, 1863, was as follows:

Passengers	$19,437 93
Freight and live stock	26,189 76
Mails and sundries	1,235 57
Total.	$46,863 26
Corresponding week of 1862	43,582 80
Increase	$3,280 96

The earnings of the Grand Trunk Railway for the week ending May 9, 1863, were:

Passengers	$23,981 15
Freight and live stock	51,277 31
Mails and sundries	3,200 00
Total.	$78,458 46
Corresponding week, 1862	73,178 76
Increase	$5,279 70

The earnings of the Detroit and Milwaukee Railroad for the 3d week in May were:

Passengers	$7,767 33
Freight and live stock	11,706 21
Mails and sundries	639 35
Total	$20,112 89
Same week, 1862	13,952 42
Increase	$6,160 47

The earnings of the Cleveland and Toledo Railroad for the 3d week of May, 1863, were $23,839 00
Same week, 1862 15,723 00
Increase $8,116 00

The earnings of the Chicago and Rock Island Railroad for the 3d week of May, 1863, were $43,586 00
Same week, 1862 20,016 00
Increase $23,570 00

The earnings of the Illinois Central Railroad for the 2d week of May, 1863, were $72,846 94
Do., 1862 44,443 20
Increase $28,403 74

The earnings of the Terre Haute and Alton R. R. for the 1st 2 weeks of May, were $48,202 97
Same weeks, 1862 33,672 46
Increase $14,530 51

The earnings of the Chicago and Alton Railroad for the 3d week of May, 1863, were:

Passengers	$13,319 50
Freight	22,720 55
Sundries	1,035 83
Total	$37,075 88
Same week last year	24,832 68
Increase	$12,243 20

The following is a comparative statement of the earnings of the La Crosse and Milwaukee Railroad for weeks ending May 14, and 21, 1863:

	May 14.	May 21.
Freight	$23,027 02	$19,509 43
Passengers	7,225 56	6,892 08
Mails, etc.	670 80	685 00
	$30,923 38	$27,086 46
Same weeks, 1862	28,147 16	24,933 09
Increase	$2,776 22	$2,153 37

The earnings of the Galena and Chicago Union Railroad for the 3d week of May, 1863, were:

Freight	$35,984 00
Passengers	8,445 54
Mails	1,300 00
Total	$45,729 54
Same week, 1862	35,080 13
Increase	$12,649 41

The earnings of the Michigan Southern Railroad for the 3d week of May, 1863, were $53,214 00
Do., 1862 41,547 00
Increase $11,617 00

The earnings of the Michigan Central Railroad for the 3d week of May, 1863, were $49,921 06
Same week, 1862 31,816 10
Increase $18,104 96

The earnings of the Chicago and Northwestern Railway for the 2d week in May, 1863, were $23,589 30
Do., 1862 19,561 47
Increase $4,027 83

The earnings of the Milwaukee and Prairie du Chien Railroad for the 2d week of May, 1863, were $18,072 85
Same week, 1862 29,405 11
Decrease $11,332 26
Total for the two weeks in May, 1863 $41,868 43
Do. do. do. 1862 52,703 24
Decrease $10,836 81

Albany and Susquehanna Railroad.

This company are now advertising for proposals for the construction of 31 miles of their road, extending from Schoharie to Oneonta. There are thirty-five miles, from Albany to Schoharie Creek, already graded, and the company are now laying the track; the materials, iron, &c., for which are already bought and paid for, together with three engines, passenger and box cars sufficient for present use. The town bonds and the $500,000 appropriated by the State, together with the first mortgage bonds to that point, will complete the road to Oneonta. The Directors then estimate that the $1,000,000 subscribed by the city of Albany, together with the bonds to be issued by the towns along the lines west, and the balance of the first mortgage, will complete the road to Binghamton, and all this without making a second mortgage.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.
Buffalo, New York and Erie:

American Railroad Journal.

Saturday, May 30, 1863.

Stock Exchange and Money Market.

The extraordinary earnings of our great lines of Railway during the present war are the subject of much interest, not only to those who derive their income from that source, but to those who regard the fact as an indication of the resources, the enterprise and the prosperity of the country. The increase of the traffic is without a parallel in our history, and the well managed companies have wisely taken advantage of it to reduce their indebtedness, and to get out of the hands of their old creditors. By referring to our table of Railroad earnings the following remarkable results are seen, of the many which that table discloses.

The earnings of the Erie Railway show an increase in April of $312,383, over the corresponding month of the preceding year. The earnings for the past six months have been $5,416,446 For the whole year 1862 they were $8,400,334.

The increase of the Hudson River in April was $68,330, the earnings for the last six months $2,195,032. For the whole year 1862, they were $2,922,970.

The increase of the Illinois Central in April was $75,995. For the last six months the earnings were $1,801,731, and for the year 1862 $3,445,827.

The increase of the earnings of the Harlem in April was $23,118 above the sum at the corresponding period the last year. The amount received for the last six months was $726,911. For the year 1862 they were $1,213,177.

The Pittsburgh, Fort Wayne and Chicago shows an increase in the same month of $181,662. The

earnings for the last six months were $2,364,944 against $3,745,310, for the whole of 1862.

It is evident that the industry of this Country has taken advantage of the plentifulness of money, which is acting in its favor as capital, and producing enormous profits. Our canals and railways are the arteries through which this stream of prosperity pulsates; and we can hear its regular beat, not only in the heart of business, like New York, but in every vein and every limb of the body politic and commercial. It is natural that out of this state of things, not only a strong confidence should arise in the future, but a strong necessity to prepare for it. New and important plans of internal improvement are therefore being everywhere suggested.

One of the most important movements of the day, is that in favor of a ship canal between the Illinois River and the Hudson, of capacity sufficient to enable steamers and ships of a thousand tons burthen to pass through from the Mississippi to the ocean. It is a project of vast dimensions, has enlisted a powerful array of talent and money in its favor, it directly influences the commercial interests of New York, and the agricultural interests of the Northwestern States, and when these combine and act in accord, they are generally irresistible. Thus it is made clearly evident that the production of our Western States and territories is outrunning the facilities for getting it to market, and it is asked with much anxiety, what is to be done, when their products in the space of a very few years are to be increased one hundred fold. Besides the naturally rapid increase of our fixed population, emigration from abroad is setting in with a resistless tide. One thousand passengers per day or very nearly, are landing at our wharves. Ireland is being depopulated under an extraordinary impulse of its people to join their prosperous friends and relatives in the United States. It is clear then that we must have cheaper lines of transit than those we now enjoy, and to effect this object they must be projected and executed on a grander scale than they yet have attained. This idea expands itself at present into the proposition already stated, and it is beginning to be discussed with great warmth, not merely by the professional agents who have undertaken to promote it, and have already received thousands of dollars for their services, but by communities and individuals who have no other than the purest and most patriotic motives, and look solely to the advancement of the public interests. A convention is to meet at Chicago on the 2d of June to consider this subject, and will be attended by a large representation of our most eminent business men and public characters. We had intended to have accepted the invitation of the Committee of Arrangements to be present on that occasion, but it is not in our power. We therefore propose to present in the fairest and most impartial manner, the views which are entertained by the friends and the opponents of the measure; for this is a question so momentous, as to deserve the fullest consideration, not only of its expected advantages, but its possible difficulties.

Those in favor of it then, put forth the undeniable facts that the production of the West is increasing at the most overwhelming rate, that the cost of transportation to the Atlantic must be cheapened so as to render cultivation more profitable to the farmers, and to swell the aggregate and value of our foreign commerce.

This fact being admitted, the question arises how is this to be accomplished. Chicago taking the lead in this question from her unrivalled position, her great activity, her large commerce, and her wealth, proposes and warmly advocates the plan of a great ship canal, so that vessels of at least one thousand tons may pass practically from New Orleans to New York and *vice versa*. As additional arguments, she asserts that unless these views are carried out, she will be driven to seek an outlet through the Canadas, and has indeed already made overtures to the Canadian Government to induce it to open new outlets, such as that offering upon the Georgian Bay and by the Ottawa. The merchants of New York respond and ask why, if we can control the business of the West, should we permit it to be transferred to our foreign neighbors?

At the first glance there would seem to be no possible reply to arguments such as these, and that the scheme would be found worthy of immediate acceptance, *nemine contradicente*.

But we should not consider ourselves impartial journalists if we did not state the doubts which prevail on the subject in the minds of many, who are profoundly versed in the functions of commerce and finance, and whose opinions are entitled to the gravest consideration. To the enlargement of the Illinois Canal to the size and for the uses proposed there is no objection. That canal is supplied artificially with water on its highest level, when a deep cut would turn through its channel the waters of Lake Michigan, clean out and purify those of the Chicago river now threatening a summer pestilence to the busy population on its banks; it would swell the volume of the Illinois, increase its navigable power and give an outlet to the Gulf of Mexico of the hundreds of stately craft now shut up in the lakes during the winter season, so that they could be then employed elsewhere in profitable engagements. There is no reason why at the termination of the ordinary season at the North, the five or six hundred vessels that now trade at Chicago should not pass down through the Illinois Ship Canal into the Mississippi, and be fully occupied in a coastwise business.

The shipmasters of the lakes would then have constant employment, and their capital would not lie dormant as it now does, for six months at a time.

But when we come to the proposition to turn the Erie Canal into a ship canal, very different consequences and very different considerations present themselves. They may be thus briefly stated.

First, it involves the aid of the General Government. We are utterly opposed to the plan of having any other controlling interest in our public works than our own. Just as soon as any public money was granted in aid of our canal system, the people of the Northern and Western States would insist upon shaping its policy. They would have a right and would continually be exercising it, of interfering with our tolls, our regulations and our management. The United States Government would be often called on to pass laws affecting and directing that management, and thus there would be perpetually arising a conflict of interests and jurisdictions, which would endanger not only our prosperity but our peace. We have seen how on the Scheldt and the Elbe, the tranquillity of European States has been again and again disturbed by apparently so small a question as that of tolls.

Second. It is also contended with great force that long ship canals are not practically useful, are costly of construction, difficult of repair, and expensive of maintenance. A steamer or a ship of a thousand tons would move but slowly in a water channel with but one or two feet of water under her keel. The masts, funnels and rigging would be in constant danger if standing, from collisions, with bridges, buildings and locks, or would have to be lowered and laid on the decks in this long voyage of four hundred miles. A ship of 1,000 tons could not be towed over two miles an hour under the most favorable circumstances, and the fastest propeller would not, if of the capacity stated, move more than five miles an hour without tearing the banks of the canal in pieces. It was found that the express packet boats on the Erie some years since, when permitted to run at the rate of six miles an hour between Utica and Syracuse, did so much injury that they were withdrawn.

Third. To the construction of this ship canal are opposed the considerations, that it will create a large new debt at a very inconvenient period; that it will render useless for many years our present work, and practically break up its business for the time; that the route presents engineering difficulties of an extraordinary character in many places well-known to engineers; that the supply of water for lockage is not even now, sufficient at all seasons; that the capacity of the Erie is yet untried; that its locks can pass fifteen boats or 3,000 tons per hour each way; that the pressure only exists early in the Spring and late in the Fall; while for several months in the Summer season there is no pressure at all; that this difficulty could be entirely overcome by a better arrangement of their business by the shippers, and by a reduction of tolls during the summer months, which would equalize and distribute the transportation; that the locks can be trebled without disturbing the parts in use, and finally that it is cheaper to carry one thousand tons in four boats of 200 tons, than to move it in one steamer through a canal, since besides its load, it has to carry an excess of weight, in engines, coal and crew; a total loss in a canal navigation like this proposed.

Finally. Should this canal be constructed, and had it complete success, the City of Chicago would be in imminent danger of sinking into a second class town. It would have no transhipment, would require no elevators, it would have no trade with Canada as it has now. The best part of its railway traffic from the West would be transferred to vessels; the Illinois railway would be of no such value as it has now, and in short every other respectable place on the ship canal might become of as much consequence as Chicago itself. It would be like any other town on the canal, or like the numerous cities on the Hudson River, all on an equality or very nearly, in their advantages, while the great stream of business is continually moving between the points of production and of sale and export.

We trust that the Chicago gentlemen will not let the present opportunity pass without considering all these objections and taking them for what they are worth. They might as well be answered now as hereafter. It will be perceived we have avoided alluding to the Canadian view of the subject, and the advantage of a foreign trade, where Montreal is to Chicago, what Liverpool is to New York; nor have we taken any note of the railway systems now existing, nor of the opening of the Mississippi, on the pent up and diverted traffic of the West, which will with peace most certainly resume its old channels. We have looked simply and squarely at the one point, is a ship canal practicable and will it answer? Shall it be pushed through at once, or be the work of deliberation, economy and time.

We have no further space at this time to enlarge on the condition of the Money Market the past week. We refer to our tables for the record of its doings, merely remarking that the National, State, and railway securities are firm, gold is falling with exchange, our foreign and domestic commerce is highly prosperous, and money is plentiful and must remain so.

The Vermont and Canada Railroad Company have declared a dividend of 4 per cent, free of government tax, payable June 1. Stockholders residing in Vermont will be paid at the office of the Treasurer in St. Albans. All others at the Market Bank Boston.

The committee appointed at the meeting of bondholders of the Vermont Central Railway, held April 7th, and continued at the meeting held May 7th, have opened an office in Boston. The authority adopted at the meeting is ready for signature, and the committee will be in attendance daily to give any desired information to bondholders.

The Delaware and Hudson Canal Company have declared a semi-annual dividend of five per cent. out of the profits of the Company, payable on and after the 20th day of June next, at the office of the Company, No. 29 William st., corner of Exchange-place.

The Pacific Mail Steamship Company have declared a dividend of five (5) per cent, out of the net earnings of the last three months, payable, free of United States tax, at the office of the Company on demand.

H. Meigs, Jr., and Smith, 52 Wall street have for sale First Mortgage 6 per cent Bridge Bonds of the Holiday's Cove Railroad Company, part of $300,000 issued to J. Edgar Thomson, Trustee, to build a bridge across the Ohio River at Steubenville. This bridge is to be used by the Pennsylvania Railroad. The bonds are payable in 1868. Interest in February and August, and they are secured by a sinking fund of twenty per cent. of the earnings after paying interest and expenses, and they are recommended as a desirable investment.

The Stock books of the Milwaukee and Chicago Railroad Company are closed at the New York office for the present. The books for transfer will remain open at Milwaukee until the 5th proximo, when they will be closed for a week to perfect the arrangement for a consolidation with the Chicago and Milwaukee Railroad Company. Parties in whose name stock may stand on the day above mentioned will be entitled to new stock in the Consolidated Company, and to the reserved assets of the Company.

The Portland, Saco and Portsmouth Railroad pay a dividend of $3 per share June 10, clear of Government tax.

The New York and New Haven Railroad Company will pay its coupons on its bonds due June 1st at the Bank of the Republic.

A dividend of $4 per share, free of Government tax, has been declared by the Nashua and Lowell Railroad Company.

The Lehigh Coal and Navigation Co. have declared a dividend of 3 per ct., subject to a deduction of the National tax, owing to a restrictive clause in the deed of trust.

The back interest on the Missouri State bonds, we hear, is to be funded at the next meeting of the Legislature.

The Lake Erie and Pacific Railroad Company are offering for sale their entire issue of $890,000 mortgage bonds, bearing seven per cent interest.

The United States Trust Company has been appointed registrar of transfers, and M. K. Jessup & Co. transfer agents of the preferred and common stock of the Chicago and Alton Railroad Company.

The following is a statement of the public debt up to the 8th of May, 1863:

Old Public Debt	$67,221,591 80
20-Year Bonds	50,000,000 00
6 per cent 5-20 Year Bonds	81,452,811 96
3-Year Bonds	139,996,950 00
Oregon War Debt	878,450 00
2-Years 6 per cent Notes, Certificates of Indebtedness and Temporary Loans	252,931,126 37
United States Notes, including Fractional Currency	399,900,956 00
Total	$992,381,886 13
Less amount in Treasury	8,648,643 39
Total	$983,733,242 74

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois coupon bonds, 107@109½; Miss. and Mo., 27@32½; do., L. G. bonds, 61@68; Canton Co., 34¾@37¾; Cumberland Coal pref., 25@32; Minnesota Mining Co., 110; American Coal Co., 60@70; Quicksilver, 46@47; Central American Transit Co., 40@54½; N. Y. Milwaukee and Prairie du Chein Railroad.

A meeting of the stockholders of this company was recently held in this city for the purpose of considering the practicability of extending the road from its present terminus to St. Paul by way of Macgreggor. Allan Campbell presided. Remarks were made by Mr. Meyer and others explanatory of the project, and a Committee consisting of Messrs. Meyer, Lane and Campbell, appointed to examine the plan and report at some future time as to its feasibility, and whether at the present crisis sufficient capital can be raised.

Panama Railway.

The business of the Panama Railway for the first three months of the present fiscal year has been as follows:

January	$154,596 92
February	138,078 40
March	159,774 84
Total	$452,450 15

The following gentlemen have been elected directors of this company for the ensuing year: Wm. H. Aspinwall, Edwin Bartlett, Henry Chauncey, Samuel W. Comstock, Edward Cunard, David Hoadley, Governeur Kemble, Theodore W. Riley, John Steward, Wm. Whitewright, Jr., Joseph W. Alsop, August Belmont, Howard Potter.

☞ The Meadville *Journal* says that the Franklin branch of the Atlantic and Great Western Railway, is graded its entire length, and the iron is laid twelve miles from Meadville. It is thought the work will be completed by the 1st of June.

☞ It is expected that the extension of the line of railroad from Boston to Woonsocket will be opened for travel in June or July.

Railroad Earnings--Monthly.

The business of the Illinois Central Railroad in April was:

LAND DEPARTMENT.

Acres construction lands sold	7,828.78	for	$87,319 47
Acres interest fund lands sold	3,689.60	"	33,860 00
Acres free land sold	2,997.54	"	35,945 71
Total sales during the month of April, 1863	14,515.92	"	$157,125 18
To which add town lot sales			1,744 30
Total of all			$158,869 48
Acres sold since Jan'y 1, 1863	63,298.70	for	$671,788 97
Acres sold previously, net sales	1,198,326.00	"	15,139,473 89
Total	1,261,624.70	"	$15,811,262 86
Construction bonds cancelled previous to March 31, 1863			$2,854,500 00
Cash collected in April			122,385 41

TRAFFIC DEPARTMENT.

Receipts from passengers	$105,153 61
" freight	146,131 00
" mails	6,358 38
" rent of road	4,000 00
" other sources	6,000 00
Total receipts in April, 1863	$267,642 94
" " 1862	191,647 85

The business of the Philadelphia and Reading Railroad Company for the month of April, 1862 and 1863, has been as follows:

	1863.	1862.
Received from coal	$324,549 26	$178,375 14
Do. merchandise	55,577 75	44,874 87
Do. travel, etc.	49,802 42	40,424 13
	$429,929 43	$258,674 14
Transport'tion, roadway, dumpage, renewal fund, and all charges	250,023 17	134,682 45
Net profit for the m'th	$179,906 26	$123,991 69
Do. previous 4 mos.	780,890 08	465,270 93
Total net profit for 5 months	$960,796 34	$589,262 62

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of April ult., compared with the same period of last year, were as follows, viz:

	1863.	1862.
From freights	$299,091 32	$188,620 68
" passengers	146,151 14	75,230 58
" express matter	2,600 00	2,600 00
" mails	7,825 00	7,825 00
" rent of railway	7,083 33	7,083 33
" miscellaneous	1,606 00	1,335 61
Total	$464,357 34	$282,695 20
Increase		$181,662 14
Earnings from Jan. 1 to April 30	$1,629,627 75	$1,146,151 28
Increase for 4 months		$483,476 47

Increase for April, 64¼ per cent.; increase to April 30, 42⅛ per cent.

The earnings of the La Crosse and Milwaukee Railroad for April were:

	1862.	1863.
Freight	$27,687 95	$75,564 73
Passengers	18,517 35	29,520 16
Miscellaneous	2,560 80	2,668 71
	$48,766 10	$107,753 60
Increase		$58,987 50

The business of the Cleveland and Mahoning Railroad for April was as follows:

	1862.	1863.
Gross earnings	$32,560 84	$41,903 93
Expenses	12,998 80	16,350 83
Net earnings	$19,562 04	$25,553 10
Increase		$5,991 06

From January 1st to April 30th.

	1862.	1863.
Gross earnings	$100,481 49	$130,797 41
Expenses	46,121 62	53,716 81
Net earnings	$54,359 87	$77,080 60
Increase		$22,720 73

The earnings of the Chicago, Burlington and Quincy Railroad Line, for April were:

Between Chicago, Burlington and Peoria, 264 miles.

	1862.	1863.	Increase.
Freight	$71,464 44	$202,731 59	$121,267 15
Passengers	45,559 80	47,512 33	1,952 52
Mails & misc.	3,493 88	4,274 00	780 12
Total	$120,518 12	$254,517 92	$133,999 80

Between Galesburg and Quincy, 100 miles.

	1862.	1863.	Increase.
Freight	$20,962 61	$37,249 41	$16,286 80
Passengers	16,710 72	13,811 00	*2,899 72

Total	$8,494 48	$8,158 63	$10,535 45
Increase in April, 1863, over April, 1861			$2,040 97
" " " " " 1862			2,476 88

The receipts of the Harlem Railroad for April, 1863, were $118,075 10
April, 1862 94,957 56
Increase $23,117 54

The earnings of the Hudson River Railroad for April, 1863, were $270,675 92
April, 1862 202,346 11
Increase $68,329 81

The earnings of the Chicago and Northwestern Railroad for April, 1863, were as follows:

Passengers	$35,665 72
Freight	62,138 88
Mail	2,038 33
Express	1,008 33
Miscellaneous	58 33
Total	$100,904 59
March, 1862	54,178 28
Increase, 85 per cent.	$46,726 31

The earnings of the Norwich and Worcester Railroad in April, 1863, were $31,647 85
April, 1862 26,748 09
Increase $4,890 86

The earnings of the Toledo and Wabash Railway Company for the month of April were:

	1862.	1863.
Passengers	$35,628 20	$16,394 56
Freight	96,482 34	67,187 84
Total	$132,110 54	$83,582 40
Increase		$48,528 14

The earnings of the Cleveland and Pittsburg Railroad for the first four months of 1863 compare as follows with the same months of 1862:

	1862.	1863.	Increase.
January	$84,000	$129,000	$45,000
February	78,500	123,500	45,000
March	90,000	140,000	50,000
April	100,000	165,000	65,000
Total 4 months	$352,500	$557,500	$205,000

The earnings of the Housatonic Railroad for April, 1863, were $32,145 56
" 1862 20,126 53
Increase $2,019 03

The earnings of the Michigan Southern and Northern Indiana Railroad for April, 1863, were $267,693 00
April, 1862 193,120 00
Increase $74,573 00

The earnings of the Chicago and Alton Railroad for April, 1863, were $127,204 88
April, 1862 72,035 82
Increase $55,169 06

The earnings of the Michigan Central Railroad for April, 1863, were $238,495 00
1862 175,695 00
Increase $62,800 00

The Chicago and Rock Island Railroad earned in April, 1863 $122,255
April, 1862 71,076
Increase $51,179

The earnings of the Rome, Watertown and Ogdensburg Railroad Company were:

April, 1863 $43,039 45
" 1862 33,256 51
Increase $9,782 94

The earnings for the last nine months, since the new road to Ogdensburg has been in use, show an increase of $92,977 62 over the same period of the previous year.

The earnings of the Cleveland and Toledo Railroad in April, 1863, were $117,908
April, 1862 87,915
Increase $30,093

Postal Currency.

Heretofore it has been generally estimated that the quantity of change in circulation in this country was $50,000,000. Now it appears that fifteen millions only of the postal currency has filled all the channels of circulation. The government has printed only eighteen millions, and it has three millions on hand for which there is no call.

It would be well if the mint made an effort to furnish the public with an additional quantity of nickel cents. The amount of gold and silver coined is very small, and it would seem quite practicable to apply some portion of the unused machinery to the production of nickel change. At present, applicants for it have to wait from twelve to fifteen weeks for even small amounts.

☞ The Michigan Southern and Northern Indiana Railroad Company have ordered six 30-ton locomotives to be manufactured with all possible dispatch, the motive power of the road being insufficient for the present demand. The same may also be said of the entire rolling stock of the line, and large orders for freight cars are now in the hands of manufacturers.

SAFES.

FIRE AND BURGLAR-PROOF SAFES.

M. MOSSMAN,
24 West Broadway.

2 Second Hand LOCOMOTIVES.
10 GRAVEL CARS.....$165

ONE ENGINE, 18 tons; Cylinder, 14×20; 5½ ft. wheels; with crank. Price.....$6,000.
One Engine, 20 tons; Cylinder, 15×20; 5 ft. wheels; fitted for coal or wood. Just put in good order, with new Boiler. Price.....$7,000.

AN INVALUABLE POCKET GUIDE
FOR THE ENGINEER AND MECHANIC!

THE
Mechanic's & Machinist's
PRACTICAL
BOOK OF REFERENCE

Containing Tables and Formulæ for use in Superficial and Solid Mensuration; Strength and Weight of Materials, Mechanics, Machinery, Hydraulics, Hydrodynamics, Marine Engines, Chemistry, and Miscellaneous Recipes. Adapted to, and for the use of all classes of Practical Mechanics. Together with the

Engineer's Field Book

Containing formulæ for the various methods of Running and Changing Lines, Locating Side Tracks and Switches, etc. Table of Radii and their Logarithms. Natural and Logarithmic Versed Sines and External Secants. Natural Sines and Tangents to every Degree and Minute of the Quadrant, and Logarithms of Natural Numbers, from 1 to 1,000.

BY CHARLES HASLETT,
Civil Engineer.

EDITED BY CHARLES W. HACKLEY,
Professor of Mathematics in Columbia College, in New York.

Issued in a compact pocket volume of 520 pages, containing 176 diagrams, bound in morocco, pocket-book form, PRICE TWO DOLLARS. *Copies mailed free of postage on receipt of price.*

The work is eminently a PRACTICAL **POCKET GUIDE** to ALL CLASSES OF **Mechanics** and **Engineers.** As a book for practical use in field work, it is confidently believed that this is more direct in the application of rules and facility of calculation than any work now in use. The original portion of this part of the work is submitted to the profession, fully confident that its use will be practical proof of its superior merits.

The tables and examples have been prepared with great care, and their accuracy may be relied upon. Further information can be derived from the circular containing the contents in full, which will be sent on application to the publisher. Inducements are offered to clubs of six or twelve, for particulars of which also apply to publisher,

JAMES G. GREGORY,

THE FIRM OF **W. R. TRAVERS & CO.** is this day dissolved by mutual consent. Either partner is authorized to sign the name of the firm in the liquidation of the business.
W. R. TRAVERS,
S. F. MASSETT.
Dated NEW YORK, May 1, 1863.

LIMITED PARTNERSHIP.

Notice is hereby given that the undersigned, JENKINS VAN SCHAICK, STEPHEN F. MASSETT, WILLIAM R. TRAVERS and GEORGE A. OSGOOD, all of whom reside in the city of New York, have this day formed a limited partnership pursuant to the provisions of the first title of the fourth chapter of the second part of the Revised Statutes of the State of New York, and the various acts of the Legislature amendatory thereof.

That the name of or firm under which the said partnership is to be conducted, is VAN SCHAICK & MASSETT.

That the general nature of the business to be transacted is the Stock Exchange and Brokerage business, and all financial transactions connected therewith, on commission. That the said JENKINS VAN SCHAICK and STEPHEN F. MASSETT are the general partners, and that the respective places of residence of the said general partners, are as hereinbefore stated, and the business of the said partnership is to be carried on in the City of New York. That each of the said special partners has contributed, as capital to the common stock of the said partnership, the sum of fifty thousand dollars. That the said co-partnership commences the first day of May, one thousand eight hundred and sixty-three, and will terminate on the first day of May, one thousand eight hundred and sixty-eight.—Dated NEW YORK, May 1, 1863.

JENKINS VAN SCHAICK,
STEPHEN F. MASSETT,
General Partners.
WILLIAM R. TRAVERS,
GEORGE A. OSGOOD,
4t19 Special Partners.

NEW YORK, HARLEM & ALBANY R. R.

CHANGE OF TIME.

SUMMER ARRANGEMENT, commencing MONDAY, May 18, 1863, Trains will leave Twenty-sixth street Depot:

For Albany—10.30 A. M., stopping at Williamsbridge, White Plains, Bedford, Croton Falls, and all stations north to Chatham, Chatham Centre, Kinderhook, and Schodack, connecting with New York Central R. R. for all points west, and with the Northern R. R. for Saratoga and all points north.

For Croton Falls—8.15 A. M., stopping at all stations.

For White Plains—8.15, 10 A. M., 2.30, 4.10, 5 P. M., stopping at all stations.

For White Plains, 6.15 P. M., from White Street Depot.

For Dover Plains—4 P. M., stopping at White Plains and stations north to Dover.

For Williamsbridge—8.15, 10 A. M. 2.30, 4.10, 5, 6.15 and 8.30 P. M., stopping at all stations.

RETURNING WILL LEAVE

Albany—9.10 A. M. on arrival of Northern and Western Trains, stopping at all stations from Chatham to Croton Falls, also Bedford, at White Plains, and Williamsbridge.

Dover Plains—5.45 A. M., stopping at all stations north of and at White Plains.

Croton Falls—5 P. M., stopping at all stations.

White Plains—6.10, 7, 8.20 A. M., and 12.30, 4.15 P. M., stopping at all stations.

Williamsbridge—5.30 A. M. stopping at all stations.

NOTICE to CONTRACTORS

ALBANY AND SUSQUEHANNA RAILROAD. —Sealed Proposals will be received by the undersigned, at the Office of the Albany and Susquehanna Railroad Company, No. 73 State street, Albany, until Tuesday, the 2d day of June next, at 10 o'clock A. M. of that day, for the Grading, Masonry, Bridging and Fencing of 31 miles of the line of said railroad, extending from Richmondville in Schoharie County, to Oneonta, in the County of Otsego.

The line will be divided into sections of convenient length, and proposals will be received for single sections or for the whole line.

The line will be ready for examination by contractors on and after Monday, the 25th day of May next, and Maps, Profiles and Plans, with Specifications, may be examined at the Engineer's Office, in Albany, on and after that date. Blank proposals with all necessary information will also be furnished to those wishing to propose for work.

Proposals should be enclosed in an envelope and endorsed "Proposals" and directed to the undersigned.

The proposals which may be received in pursuance of this notice will be opened by the undersigned and canvassed, and the results reported to the Directors to aid them in making a proper award of the work.

Parties proposing, who are unknown to the undersigned, will be required to give satisfactory references.

The right is reserved to reject any or all proposals, as may be deemed for the interests of th Company. Albany, April 24th, 1863.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of SMITH'S AIR LIGHT FOR RAILROADS, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

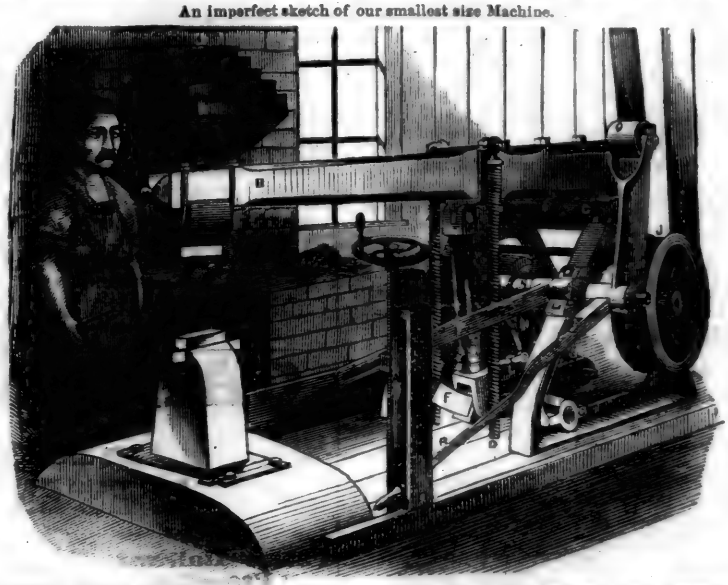
NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.



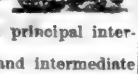
300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, 21 Nassau st., or by addressing

CHAS. W. WELSH,
Secretary.

AMES IRON WORKS,
OSWEGO, N. Y.,
SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.

An imperfect sketch of our smallest size Machine.



PAYE'S PATENT FORGE HAMMER. A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York, or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Crampton, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Kaigh's Point, Phila.; Mallory & Cottrell, Mystic Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Guinness, Albany; Sweet Brothers, Syracuse.

FOX LATHES.
F. W. BACON & CO.,

No. 23 PLATT, corner of GOLD ST.,

NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. GEO. H. FOX & Co., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT RE-OILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downwards beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Picket's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years, with uniform success, they confidently offer their services to those requiring such aid.

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS,** etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.

Address **HENRY RUTTAN,**
Coburg, Canada.

American Railroad Journal.

New York, Saturday, June 6, 1863.

Ottawa and Champlain Canals.

We have before us a report of the select committee of the Canadian parliament, to whom was referred at its late session, the subject of the Ottawa Canal; or in other words, that of a water communication between Montreal and the Georgian Bay of Lake Huron by the way of the Ottawa River. We have in the course of the last few months kept the readers of the JOURNAL acquainted with the latest movements in that direction, and these have acquired great importance since the question of a ship canal between the Mississippi and the Hudson has been agitated in Congress, the New York Chamber of Commerce, and our own State Legislature.

The report illustrates the practicability of establishing a navigable line of communication by the Ottawa and Mattawan Rivers, Lake Nipissing and French River, a route indicated by the maps as a natural one, and proved to be such by several minute surveys. By these it is ascertained beyond all doubt, that a through navigation with twelve feet of water may be obtained at an expense of $24,000,000, and that it will shorten the distance between Montreal and Chicago three hundred and fifty miles. This estimate includes the enlargement of the Lachine Canal and contemplated locks with chambers of 250 by 50 feet. If the Lake of the Two Mountains can be made a part of the line, as it is now asserted it can be, the cost will be reduced by three millions. If a mere boat canal were constructed with six feet draught of water and locks 250 by 30 feet, the outlay necessary would be but six millions. This proposition finds however, but little favor. The distance saved is thus stated:

From Montreal to Mackinaw by the St. Lawrence and lakes is	1,108 miles.
And by the way of Ottawa	650 "
Gain of the latter route	368 "

The difference of time is also estimated in the report as follows, allowing the speed of a vessel on the river and lakes at 8 miles per hour, on the canal 3, and 1½ minutes detention in locks for each foot of water filled or emptied during the lockage:

1st the Welland Canal voyage and route require	196 hours.
2d the Ottawa	149 "

It is also stated that the Lake Nipissing and others near the source of the Mattawan should be united and be made a summit feeder to supply the connecting links to the Huron and to the Ottawa, in the one direction fifty miles, and the other thirty; and the supply will be equal to any demand for slack water or canal navigation. All other desiderata are found without difficulty by the engineers in the shape of harbors, levels and streams. It is not necessary for us to repeat the arguments of the report in favor of the project founded on the immense production of the Northwestern States. This latter is well-known to the readers of the JOURNAL from the numerous statements which have from time to time appeared in its columns. The most interesting portion of it however, is that which avowedly favors the construction of a ship canal between the St. Lawrence and the Hudson Rivers, as a continuation of the Ottawa improvement, and the suggestion comes at a very auspicious moment for its examination and consideration. It is not a new idea, though it comes in a new dress and makes a most respectable appearance. If ship canals are to come into fashion, here is a good opportunity to be embraced at a comparatively small expense. The Sorel River is sixty-nine miles in length and navigable from its mouth to Chambly, from whence a short canal proceeds to Lake Champlain. The Chambly Canal connects the St. Lawrence by a canal from St. John to Chambly basin, and is 12½ miles long by 24 feet wide, with a depth of water of 8 feet, and a lockage of 74 feet only. The lake is navigable for vessels of the largest size for its whole length to Whitehall, where the Champlain Canal debouches, and this canal sixty-four miles long connects at its Southern termination with the Hudson. The cost of the construction of the latter was but one million two hundred thousand dollars, and to enlarge it would not be costly. It has also innumerable sources of water supply, and its whole lockage is but eighty-four feet.

The idea of a ship canal in this direction has been a favorite one with the statesmen of the time. In the House Documents No. 136 communicated to Congress in 1852, by the then Secretary of the Treasury, Thos. Corwin, we find the following statement: "The construction of a ship canal from the St. Lawrence to Lake Champlain so as to bring the propellers of Chicago to Burlington and Champlain is now engaging the consideration of the Canadian Government. The project originated with the Hon. John Young, Chief Commissioner of the public works in Canada; and there is little doubt from the favor it has received from the public that *it will be speedily accomplished.* The cost would only be between $1,500,000 to $2,000,000 and its construction is indispensable to protect the revenues of the St. Lawrence Canals from the competition of the Ogdensburg Railroad. The construction of such a work must produce a corresponding enlargement of the Northern New York Canal, whereupon there will be a connexion between Lake Erie and tide water on the Hudson *via* the St. Lawrence, which may be navigated without transhipment, downward in four and upward in five days." Nor was the existing trade even in 1851 on the Chambly Canal an unimportant one. It is stated in the same report that the tonnage of British bottoms, over it was then 81,594 tons, and American 9,147 tons.

The State Engineer of New York in his report of February 1851, also said "there is another and I apprehend a *still cheaper route* by water to Lake Champlain, soon to come into competition at the

North, which will produce as cheap or cheaper rates to Boston than the above, (*via* Ogdensburg Railroad.) The freight by that route afloat on Lake Champlain may find cheaper transport to New York than to Boston."

The value of the local trade in that year was of itself enormous, the Canadian traffic of the Vermont district alone was $1,552,325; the tonnage of Lake Champlain was 197,500 tons.

The Canada trade of the Champlain districts in the same year was reported at $1,043,286.

Nor is this the only evidence at hand which bears on this subject. We have before us the proceedings of a meeting held in Troy in 1849, at which Major-General Wool presided, and also a report of the Montreal Board of Trade, of which Thos. Ryan, Esq., was President. The feasibility of the plan and its enormous advantages were fully set forth in the documents referred to, and are found in another report of the Secretary of the Treasury on the commerce of British America. We quote from this the following interesting statements: "To the City of New York the construction of this work is of the greatest possible importance. With the Champlain Canal of sixty-six miles to Troy, or seventy-two to Albany, enlarged to the same size as the proposed canal (the Chambly Ship Canal,) vessels from any Western lake port could without breaking bulk discharge *at the port of New York*, and could there reload with emigrants and merchandize direct for the West." We have not space to give all the calculations which accompanied this statement, by which the advantage in distance, lockage and time was shown over that enjoyed by the route of the Erie Canal. We may find it necessary to go into the subject at greater length on some future occasion.

But we have said enough to show, we believe, that while the subject of ship canals is receiving so much attention, the plan to connect the St. Lawrence with the Hudson by the way of Lake Champlain is fully entitled to the gravest consideration, and the convention at Chicago will not have half done its duty to the West or the East without giving it very full and a very impartial examination. As regards the particular interests of the City of New York we may ask a single question. Is it best to have a ship canal that will secure the trade of the West from one point, Chicago, or by another cheaper route which will not only get the Chicago trade, but of all the lakes, and the Ottawa and St. Lawrence Rivers? "We pause for a reply."

The Five-Twenty Bonds.

A great many inquiries are made for explanations of these bonds, especially from people from the interior who have money to invest at 6 per cent., but suppose that the 5-20's only draw 5 per cent per annum. For the benefit of such the following explanations are given:

Five-twenty bonds draw six per cent interest, payable semi-annually, in coin, with coupons attached. Coupons are certificates, each representing six months interest on the face of the bond, and one is cut off and retained by the Treasurer of the United States when the interest for each six months is paid. They are called "five-twenty bonds" from the fact of their being made redeemable at the option of the government in five years, and payable in twenty years. Registered bonds are made payable to order, and are transferable at the Treasury Department. They draw six per cent interest, payable semi-annually, in coin, which is endorsed when paid, as they contain no coupons. Five-twenties are payable to bearer, and therefore the holder is, *prima facie*, owner, and can draw the interest. Certificates of indebtedness are now made payable in one year from date with six per cent interest, payable with the principal when due. All two years certificates that have been issued are now due and interest stopped, by public notice.

Pacific Railroad of Missouri.

The earnings of this road for the fiscal years ending February 28, 1862 and 1863, have been as follows:

Main Line—	1862.	1863.
From passengers	$380,942 27	$253,029 67
" freight	294,833 51	396,589 74
" mails	28,350 00	28,350 00
" rents	1,711 35	1,311 75
" Telegraph	469 36	674 90
	$706,306 49	$679,956 06
Less State of Mo. not allowed	9,240 80	.....
Total	$697,065 69	$679,956 06
Transportat'n expenses	353,978 53	452,557 58
Net earnings	$343,087 16	$227,398 48
Southwest Branch—	1862.	1863.
From passengers	$93,863 97	$88,228 98
" freight	82,663 48	149,452 85
" mails	3,799 97	3,800 00
Total	$180,327 42	$241,481 83
Transportat'n expenses.	70,470 70	112,595 58
Net earnings	$109,856 72	$128,886 25

The operating expenses show a much larger per centage of the gross earnings than they otherwise would, from the fact that the government pay, for transportation between St. Louis and Rolla, only the actual cost to the company of the work, leaving no margin of profit; and this traffic to and from Rolla is a very large share of the whole year's business. The report says:

It will be seen, on referring to the last Annual Report, that the debt at that time, excluding that of the State was as follows, viz:

Bills payable	$271,348 63
Audited accounts	130,844 34
Making in the aggregate	$402,192 97

All of the foregoing debt has been fully paid, excepting three notes given Messrs. Diven, Stancliff & Co., amounting in the gross to nearly seventy-five thousand dollars; being balance due for work on the Southwest Branch; the payment of the same being secured by mortgage on the unsold "Free Bonds" belonging to the Main Line—there being no security of the Branch to give the contractors who had in good faith given their labor to that work.

The audited accounts shown in the annexed statement have at this date been paid, and there is no debt of the Company other than the State's that could not be paid on presentation.

The Company, for all its supplies as well as material for replacing the road, asks no credit, but on the contrary all purchases are made at the lowest market price for cash.

All indebtedness of every character incident to, and growing out of, dealings with Messrs. Kirkwood, Porter & Co., and Thomas L. Price, in their several contracts with the Company, have been settled, paid, and receipts for the same in full are filed in the proper office of the Company.

It was seen early in the year that the rolling stock of the Company was insufficient for the business offering; indeed, the Chief Engineer had in the two last Annual Reports urged upon the Directors the necessity of increasing the same, and notwithstanding there was a considerable outstanding debt of the Company, yet it was deemed expedient to increase the motive power; and although two new locomotives were put on the track in May, yet orders were issued for the completion of two others, and the same were placed on the track in January—all of which have been paid for. In this connection, it is well to state that orders had been issued before the greatly increased price in engines, as well as everything else, for four more locomotives, all of which will be delivered during the present spring.

From time to time, our own shop, under the management of Mr. Charles Williams, Master Mechanic, has turned out forty freight cars, and good progress has been made on twenty-five others.

We especially refer to the succinct and intelligent report of Mr. Thomas McKissock, Chief Engineer and General Superintendent, for the details of the year. He shows, among other interesting matters, that several of the bridges have been entirely rebuilt, while others have been extensively repaired, as well as one span of the Osage, and two spans of the Gasconade replaced, and others will be the ensning year. On the Main Line, upwards of fifty thousand, and on the Branch, twenty thousand cross-ties have been renewed; while five hundred tons of iron rails, from the Cambria Works, have been purchased and placed in the track to supply those worn—the ties and iron alone costing upwards of fifty thousand dollars, which is charged as track repairs to transportation; also, that the repairs to locomotives and cars at our own shop have been very extensive; and in fact the rolling stock and road itself is in a better condition than at any time in three years past.

The water tank at Sedalia, as well as the station house at Jefferson City, were accidently destroyed by fire the past year, and the replacing of them is also a charge to the operating expenses; and yet, notwithstanding these extensive repairs of bridges, cross-ties, tank and station houses, and repairs of

track and rolling stock, the road has been operated at an expense of 56.9 per cent.

But little progress has been made in the extension of the road the past year, owing to the large outstanding debt, and the continued and increasing demands for materials, rolling stock and repairs, yet the rail is laid to Dresden, distant seven miles from Sedalia, and the road will be operated to that point in a few days; while the road bed is being graded to Knob Noster and Warrensburg, and, unless some unforeseen calamity befalls us, the road will be opened to the latter point during the year.

The Board had confidently hoped that the General Assembly at its late session would have provided for the immediate extension and completion of the road to Kansas City, and with that view proposed such measures as would, in their judgment, have accomplished the purpose; but the General Assembly thought otherwise, and adjourned without giving the road any legislation other than a bill instructing the Governor not to sell the railroads until otherwise instructed.

Since the last Annual Report the remaining "Free Land Bonds" outstanding have been purchased, and the same destroyed and the lands wholly released of the entire encumbrance.

The Company have not been able to consumate a satisfactory contract with the General Post Office Department for the transporting of the United States mails, but, from late information, at an early day the whole matter will be satisfactorily arranged; the contract having expired last July, the amount due on the contract, if the same is renewed, is $22,224 13.

SOUTH-WEST BRANCH.

There has been no extension of this road since the last Annual Report, and the road is still subject to forfeiture by reason of the act of the General Assembly, approved March 3d, 1857.

The road remains in an unfinished condition, with all its means applicable to its construction exhausted, excepting its county and individual subscriptions which are wholly unavailable, and is at this time largely in arrears to the Main Line.

The same care has been extended to this road, bridges, rolling stock, &c., as to the Main Line, and it may be safely stated that the same is in good condition.

Efforts were made to get the General Government, as a military necessity, to extend this road, and although at one time we were in hopes that such would be done, yet nothing definite has as yet been settled on; but we still continue our exertions.

On referring to the last Annual Report, it will be seen that Congress by joint resolution, approved March 11th, 1862, instructed the Secretary of War to adjust and pay this road for transportation, notwithstanding they claimed the land grant required the service free of charge.

The joint resolution, referred to, required the accounts to be adjusted on the basis that the Company were to have "as near cost as may be." Every effort was made to obtain, in the adjustment of our accounts, some allowance for the *cost of constructing the road*, but without success; so that for transportation over the road from St. Louis to Rolla, the Company is only allowed "as near cost as may be," and on the accounts adjusted under the said resolution the deductions are as follows, which is a dead loss to the Company, subtracting from the gross earnings at the cost of the operating expenses, or what would have been net earnings of the roads:

St. Louis to Rolla	$100,806 78

There has been little, if any, business in the Land Department, as the whole country around the Granby Mines is desolated, which has entirely destroyed all revenue from the leases on the mineral land of the Company. There has been no change in the policy of the Directors in the general management of the road, and the same care in guarding the track our predecessors inaugurated still continues.

The equipment of the road consists of 12 passenger and 22 freight locomotives; 20 first class, 7 second class, 1 hospital, 6 baggage and express, and 414 cars for freight, etc; also 21 stationary engines for pumping water, sawing wood, etc.

President.—GEORGE R. TAYLOR.

Vice President.—DANIEL R. GARRISON.

Directors.—George R. Taylor, Robert Campbell, Adolphus Meier, James E. Yeatman, Oliver A. Hart, Robert Barth, John Cavender, Henry L. Patterson, Daniel R. Garrison, Robert K. Woods, Benjamin Stickney, Charles H. Peck, Wm. M. McPherson.

Secretary and Treasurer.—FREDERICK L. BILLON.

Chief Eng. and Sup't—T. MCKISSOCK.

Exports of Great Britain.

From the British Board of Trade returns for the month of March, which have just been issued, we learn that the total exports of British and Irish produce and manufactures for the month, and three months ended 31st March, in the last three years, were as follows:

	For the month.	For the 3 months.
1861	£10,958,880	£27,660,248
1862	9,664,000	26,423,763
1863	10,217,473	27,561,204

These returns compared with the corresponding month of last year, show an increase of £552,824, or nearly 6 per cent. in the declared value. Compared with March, 1861, which was a rather active month, there is a decrease of about 6½ per cent. The British shipments of cotton goods have been only about 10 per cent. less in value than those of last year, and 35 per cent. less than those of March, 1861.

Lateral Railroads in Pennsylvania.—The Acts of 1832 and 1858.

THE NECESSITY OF A PROPOSED ROAD, AFTER AN APPEAL FROM A REPORT BY VIEWERS, IS A QUESTION EXCLUSIVELY FOR THE COURT. THE ONLY QUESTION FOR THE APELLATE JURY IS THE AMOUNT OF DAMAGES.

On the 10th of December, 1859, John H. Peterson and James B. Corey, filed their petition in the District Court of Allegheny County, for a lateral railroad twenty feet in width from their coal mines through the coal lands of Wm. H. Brown, to the Monongahela River. Viewers were appointed December 31st, 1859, who reported on February 24th, 1860, the road necessary and useful for private purposes, and finding the damages to Wm. H. Brown to be $2,500. After the report of the viewers was filed, Wm. H. Brown filed exceptions, which were on hearing dismissed, the Court being of the opinion that the road was necessary for private use. On the 13th of March, 1860, he appealed from this finding and report; and on the 14th of April, 1860, Corey and Peterson filed their bond, with sureties in $5,000, reciting their application for a lateral railroad, and conditioned "that the said James B. Corey and John H. Peterson, their heirs, executors or administrators, will and truly pay or cause to be paid unto the said Wm. H. Brown, his certain attorney, heirs, executors, administrators, or assigns, *all such damages as may be assessed* in favor of the said Wm. H. Brown, under the provisions of the said recited act and its supplements without any fraud," &c., &c. This bond was given under the act of Assembly, approved April 20th, 1858, entitled "a further supplement" to the act entitled, "An act regulating lateral railroads," passed May 5th, 1832. Under this act of Assembly and bond, Corey and Peterson entered upon the strata of coal owned by William H. Brown, and drove their road nearly through the same, cutting across Brown's coal in such a manner as to prevent him from driving his main entry through the same to large bodies of coal which he owned in the rear of said road. During the progress of their work, and after they had commenced, complainant filed his bill for an injunction, but owing to recess in Court it could not be heard. The motion for a preliminary injunction was argued, when the Court suggested that, as they had great doubts about the act, and had refused to approve other bonds, since a careful examination of the act defendants should answer, and have the case put in shape for a final decision by the Supreme Court.

The complainant after reciting the facts, claimed:

1. That under this bond he had no security for his coal taken and other damages, in case he should succeed in finally defeating the road on his appeal.

2. That after the appeal was taken, the proceedings to file and approve the bond, and construct and use the road were not legal and valid; and,

3. That the bond should have been filed with the petition.

The Court below overruled the demurrer, *pro forma*, and on hearing the case on bill and answer, decreed that the complainant's bill be dismissed with costs. The case was then removed to the Supreme Court of the State, and argued by the counsel of the respective parties. The complainant counsel maintained that the bond required by the act of Assembly does not furnish *adequate security* as required by the fourth section of the seventh article of the constitution, because it provides only for "such damages as may be assessed under the provisions of the act to which this is a supplement." The act thus referred to, viz., of May 5th, 1832, contains no provision for the assessment of damages in case the road should be found *unnecessary* by the jury on the appeal, before whom the necessity or usefulness of the road is an open question. But even if the act were free from all objections, it requires that the bond shall be filed with the petition which was not done in this case. For the defendant it was contended that the only question to be tried on the appeal in this case was the amount of damages.

The following opinion was delivered by the Supreme Court upon the decision of the case, affirming the decree of the District Court:

STRONG, J.—This appeal raises the question whether under the lateral railroad act of 1832, and its supplement of April 20, 1858, the determination of the necessity and usefulness of the proposed road, is, after an appeal from a favorable report of viewers, exclusively for the Court; or whether it is to be submitted to the appellate jury for retrial. In Horner and Roberts' Lateral Railroad, (1 Wright 33,) we said it would seem that all which can be tried by the jury on the appeal since the supplementary act of 1858, is the amount of damages. After reviewing the construction which we then gave to the statute, we are convinced that it carries out the legislative intention, and is the only one which would not lead to absurdity. The course of legislation from 1832 to the present day evidences that the policy of encouraging lateral railroads has been growing in favor. Even the first act, that of May 5th, 1832, while it allowed an appeal from the report of viewers, did not require that those viewers should report upon the necessity of the road, nor did it expressly enact that the appellate jury should pass upon it. This Court, however, decided in Harvey *vs.* Lloyd, as well as in Hays *vs.* Risber, that on the trial of the appeal the jury should not only assess the damages of the land owner, but also find whether the proposed road was necessary and useful for public or private purposes. This construction of the law made it a departure from the legislative usage which has always prevailed in providing for appeals from reports of viewers upon the damages caused or expected to be caused by the location and construction of other railroads. In such case the appellate jury have nothing to do with the question of the necessity of the road. It is observable also, that the act of May 5th, 1832, as construed, worked several practical inconveniences. The applicant for a lateral railroad was compelled to await, not only the trial of the appeal, but also the result of a writ of error (which by a supplementary act was allowed,) before he could commence the construction of the road. In many cases also there was imposed upon him the burden of trying repeatedly the question whether the proposed road was necessary, and trying it before different juries. If the road passed through lands of several owners, as many appeals might be taken as there were owners, and on the trial of each the same issue be presented. Five juries might find the road necessary, and a sixth find against it. This was an anomaly and productive of no good, either to the petitioner for the road or to the land owners. To remove some of these evils, if not all, the supplementary act of April 20th, 1858, was passed. It obviously intended that the question, whether the road is necessary or not, shall no longer be open after the viewers and the Court have passed upon it and found it to be so. It expressly requires the viewers to report in writing whether the road asked for is necessary for public or private use, a requirement not found in the act of 1832, and then, if the Court concur with the viewers, authorizes the "opening, constructing, completing and using the road," notwithstanding appeals from the report of viewers upon the applicants giving bond to pay the damage thereafter to be assessed. It is not to be supposed that the legislature meant to authorize the construction and use of the road while its necessity remained undetermined. Such a provision could have benefited nobody. No road would ever be constructed during the pendency of an appeal, if the apellate jury might find it unnecessary, and by their finding defeat all right of the applicant to use the road and make his expenditure in its construction a dead loss. And it may be inferred that the Court and not the jury was designed to be the final judge of the necessity, from the fact that no provision is made for the assessment of damages, in case the road should finally be defeated. The act contemplates no defeat of the road as possible, after the viewers have reported it necessary, and the Court concurring in their opinion have affirmed the petitioner's bond. We hold, therefore, that in these cases the necessity of the road asked for is not a question to be submitted to the appellate jury.

It follows that the complainant has security for all the damages which he can sustain, and that the answer of the defendants to which he demurred was a full defence to his bill.

Let the decree of the District Court dismissing the bill of the complainant be affirmed.

Atlantic and Great Western Railway.

At the annual election of the "Atlantic and Great Western Railway in New York," held at the company's office in Jamestown on the 25th ult., the following gentlemen were chosen directors for the ensuing year:

Wm. Reynolds, J. J. Shryock, Wm. Thorp and John Dick, Meadville, Pa.

Wm. Hall, A. F. Allen, W. D. Shaw, and S. E. Marvin, Jamestown, N. Y.

M. Kent, Franklin Mills, Ohio; W. S. Streator, Cleveland; N. Marsh and S. L. M. Barlow, New York; and T. W. Kennard, London, England.

At a subsequent meeting of the new board, Wm. Reynolds, Esq., was elected President, and W. A. Bradshaw, Esq., Secretary and Treasurer. Executive Committee appointed: W. Reynolds, A. F. Allen, Wm. Hall, J. J. Shryock, T. W. Kennard. Finance Committee: J. Dick, W. D. Shaw, W. S. Streator.

J. M. Dick, former Treasurer of the New York and of the Pennsylvania Companies, and Wm. Thorp, Secretary of the same, resigned previous to the election, and W. A. Bradshaw was appointed to succeed both as local Treasurer and Secretary.

J. M. Dick has been appointed Treasurer and Secretary of the Central organization.

Alex. Sheldon, Esq., has been appointed Council and Attorney for the company.

Boston and Lowell Railroad.

The earnings of this road for the year ending September 30, 1862, were:

From passengers		$175,198 32
" freight		222,347 42
" mails		6,610 17
" express		6,506 94
" rents		1,224 62
		$411,887 47

And the expenses were:

Repairs of road	$49,207 45	
" engines & cars	33,743 70	
" bridges	2,780 26	
" gates and fences	5,181 05	
" depots	3,558 77	
Merchandize expense	25,256 51	
Wages	45,927 05	
Taxes, insurance, etc.	10,199 88	
Fuel	36,495 53	
Rents to all other roads	39,316 20	
Oil and waste	5,000 43	
All other expenses	26,347 75	
	$283,104 58	
Balance interest account	26,720 00	
		309,824 58
Net income		$102,062 89

The gross income of the road from the traffic for the year has been $410,662 85; the expenses $283,104 58; and the net income, $127,558 27. Compared with the preceding year, the receipts show a decrease of $68,593 79; with a decrease in expenses of $50,844 03—making the decrease in net income only $17,749 76. The balance of the interest account, amounting to $26,720, and all dividends payable to the stockholders during the year amounting to $50,325, have been placed to the debit of profit and loss before that account was made up.

The balance to credit of that account Sept. 30, 1861, was		$366,953 54
The net receipts from the traffic of the year have been		127,558 27
Do., from other sources		1,224 62
		$495,736 43
During the year that amount has been charged with the amount of one dividend paid	$50,325	
Balance of interest account	26,720	
		77,045 00
		$418,691 43
From which is to be deducted the amount of a dividend payable Jan'y 1, 1863		73,200 00
Leaving a surplus of		$345,491 43
Add balance accumulation of Sinking Funds		17,470 97
		$362,962 40

The amount of the Sinking Fund September 30, 1862, was, $136,420 97, which was to have been increased on the 31st December by the amount of the semi-annual deposit of $9,150, and one year's accumulation. In accordance with the terms of the contract with the holders of the bonds of the company, that fund has been increased during the

past year by the payment to the trustee of $18,300, and by accumulation, $5,763 38.

The whole debt of the corporation, as stated in the annexed balance sheet, is $461,055 50.

No addition has been made to the construction account during the year—all sums expended having been charged to current expenses.

The condition of the corporation is as follows:

ASSETS.

Cost of road, depots and equipments	$2,428,592 79
Notes receivable	3,588 87
Trustee of Sinking Fund	136,420 97
Flats at East Cambridge	6,796 33
Fuel, material, etc. on hand	76,781 32
Cash	75,027 62
	$2,727,207 90

LIABILITIES.

Capital stock	$1,830,000 00
Bonds—1873	440,000 00
Notes payable	18,000 00
Dividend, etc.	3,045 50
Balance profit and loss	418,691 43
Bal. accumulation of Sinking Fund	17,470 97
	$2,727,207 90

Hanover Branch Railroad.

The earnings of this road during the year ending March 31, 1863, have been as follows:

From freight, passengers, etc.		$32,400 81
" working Gettysburg Railroad		4,800 00
" " Littlestown "		1,311 00
		$38,511 81

The expenses were:

Transportation	$4,398 33	
Motive power	3,626 71	
Fuel	4,438 31	
Repairs of road and cars	3,676 73	
Car service	1,075 56	
Telegraph	123 63	
Oil, waste and tallow	863 70	
Salaries, office expenses, etc.	1,052 28	
		19,255 25
Balance		$19,256 56

The receipts from all sources during the year have been as follows:

Earnings as above	$38,511 81
Balance from last year	581 95
Sale of materials, rents, etc	847 20
Materials used in excess of purchase	2,228 17
	$42,169 13

The disbursements were:

Working expenses, as above	$19,255 25	
Renewal expenses	388 85	
Extraordinary	4,050 02	
Bonds	12,000 00	
Interest, taxes, etc.	2,044 10	
Materials	3,255 76	
		40,993 98
Balance in treasury		$1,175 15

The gross earnings exceed those of the preceding year $5,893 36, with an excess of expenses of only $224 89—making the increase of net earnings $5,668 47.

There were carried over the road during the year 5,639 way and 949 through passengers. Tons of freight received, 14,035; do., forwarded, 18,384—difference 4,352 tons. Number of miles run by engines, 49,608. The report says:

The contract with the Littlestown Railroad Company for working that road, expired on the 1st of January, and that with the Gettysburg Railroad Company expired on the 1st of April. Owing to the very considerable advance in all kinds of supplies, and also of the labor required to operate railroads, it was found necessary to advance the rates on the former company from $4 per day, to $125 per month—and on the latter company from $400 to $475 per month—amounts which barely indemnifies this company for its disbursements. Under the existing circumstances, however, when the transportation business of this road does not furnish *constant* employment for two setts of hands and is beyond the capacity of one sett, it is doubtless an advantage to operate these roads at a moderate charge. An agreement has also been made with the former contractor for the repairs of the road, at an advance of $600 over the previous contract—or of $2,800 for the year, including the ballasting of three miles of track. An understanding has also been effected with the Hanover Telegraph Company, which has been recorded in the respective journals, by which the duties of this company are more clearly set forth and its privileges more effectually guaranteed.

The stock account of shareholders, on which *partial* payments on stock only were made, still remaining open on the books of the company, has by a resolution of the board been closed, and in compliance with the 18th section of the charter (which gives authority after due notice, and which notice was given to the delinquent stockholders,) have declared such stock and payments thereon, forfeited to the company. The report of a committee of stockholders to investigate the stock account, shows that the whole number of shares originally subscribed, was 2,417—of which number 2,336 were paid in full, 35 shares paid in part, and 46 on which no payments have been made. If the result of this investigation be sustained, the capital stock of the company will be $116,800.

The large amount of capital seeking safe investment prior to the 1st of April, enabled the board to obtain the required amount at 4 per cent. per annum, to avail itself of the privilege reserved in the agreement with the bondholders, of redeeming the mortgage debt at an earlier period than ten years. These bonds are now extinguished, and in their stead a floating debt has been established. The favorable terms on which this loan was effected, is evidence that the high credit which the company has heretofore enjoyed is unimpaired. With the continuation of a fair business, and no unforseen contingency, it is hoped that ere long this debt will also be liquidated, when dividends from the "net earnings" which have been long deferred, can be regularly declared, and when the stockholders who have evinced so much patience in not receiving direct returns from their investments, can congratulate themselves on possessing a road with its equipments, unencumbered with either a funded or a floating debt.

GENERAL STATEMENT.

Capital stock		$116,800 00
Mortgage bonds		17,400 00

Cumberland Coal and Iron Company.

At a meeting of the stockholders of the Cumberland Coal and Iron Company, held at their offices on the 1st inst., the following gentlemen were unanimously elected directors; Edward H. Tracy, President; David Palmer, A. S. Jarvis, George W. Pratt, Jacob Goedel, Chas. A. Rapallo, James H. Barre, O. Oddie, Robert P. Getty, Henry C. Bowen, H. H. Bowen, S. L. Woodhouse and M. H. Kerr, Directors.

☞ We call the attention of our readeas to the card of Messrs. BRITTON & WARNER, Bankers and Brokers, 23 Wall street. Mr. Britton has been long and favorably known by his connection with the Stanwix Hall in Albany, and the Everett in this city. We hope the new house will be as popular as the two with which he has heretofore been connected.

Copper Mining on Lake Superior—A Pyramid of Dividends paid out of the Profits of the Cliff Mine.

The Pittsburg and Boston Mining Company, owners of the Cliff mine on Keweenaw Point, Lake Superior, have paid to the stockholders thereof in the fourteen consecutive years ending December 31, 1862, these dividends, to wit:

1849	$10	per	share	$60,000
1850	14	"	"	83,902
1851	10	"	"	60,000
1852	10	"	"	59,050
1853	15	"	"	80,887
1854	18	"	"	108,000
1855	13	"	"	77,920
1856	30	"	"	179,900
1857	30	"	"	180,000
1858	—	"	"	159,968
1859	9	"	"	177,988
1860	..	"	"	.....
1861	4	"	"	77,560
1862	4	"	"	80,000
Special dividend endowing North Cliff Mining Co.				50,000
Total				$1,445,075
Capital stock paid in by stockholders				$110,905
Number of capital shares				20,000

The subjoined extract of the report of the Pittsburg and Boston Mining Company dated March, 1863, exhibits the results of the company's operations in 1862, and also the estimates for the current year 1863.

In 1858 a dividend of ten dollars per share was paid on 6,000 shares, and five dollars per share on 20,000 shares, the number of shares having been increased from 6,000 to 20,000 in that year. The report says:

The mining year 1862 terminated with the month of November, and the Directors, in consequence of the delay in presenting their report, before referred to, are now enabled to give an approximate estimate of the operations of the year.

The amount of rough copper produced was as follows:

Masses	1,295,700 lbs.
Barrel work	593,509 "
Stampings	1,273,238 "
Making a total of	3,162,447 lbs.

or 1,581 447-2000 tons, being an average monthly product of 131 1537-2000 tons.

Of the foregoing there were shipped during the season of navigation 1,447 432-2000 tons, leaving on hand at the mine and mine landing at the lake, 134 15-2000 tons.

The actual and estimated product in refined copper is as follows:

Copper already refined and sold	1,665,004 lbs.
Copper in New York	50,386 "
Copper on hand at Pittsburg Furnace	13,000 "
Estimated amount in slags and slag copper at furnace	88,800 "
Estimated product in refined copper of the 134 14-2000 tons at the mine at 62 77-100 per cent.	168,233 "
Total probable product	1,985,373 lbs.

There have already been sold of the year's product 1,665,004 lbs., realizing the sum of $411,985 27, or a net average of 24 55-100 cents per pound.

after deducting commissions and freight on so much thereof as was sold in New York.

The probable cash receipts from sales of the entire product of the year may, therefore, be estimated with reasonable accuracy as follows:

Copper already sold, as stated above	$411,985 27
Copper, 50,336 lbs. in N. Y., estimated at net 35 cts. per lb.	17,617 60
Copper to be produced from slag and slag copper on hand at furnace, 101,800 lbs. at 35 cts. per lb.	35,630 00
Copper to be produced from ore on hand at the mine, 168,233 lbs. at 35 cts. per lb.	58,881 55
Realized from sales of silver	2,921 69
Total from sales copper and silver	$527,036 11
Add receipts from rent and South Cliff Mine	5,310 18
Total receipts	$532,342 29
Ascertained expenses of the year	$300,902 61
Smelting charges for year, probable	24,000 00
Making the total expenditures	324,902 51
And leaving a probable net profit on the operations of the year 1862 of	$207,443 68

against $60,370 13 for the year 1861.

In regard to the mining operations and prospects of the current year, it affords the Directors much pleasure to state that they are in the highest degree encouraging. Mr. Watson, the intelligent Superintendent of the mine, gives us strong assurances predicated upon the general appearance of the mine at the present time, of a considerable increase in the product, and which will not, in all reasonable probability, fall below 1,700 tons—and may exceed that amount. The capacity of the mine, as will be seen by the Superintendent's report, is being gradually enlarged, and presented on the first day of July last, an area of 7,037 fathoms of ground opened for stoping, as against 6,129 fathoms at the corresponding period of the preceding year; being an increase during the year of 908 fathoms.

The amount of ground stoped or worked out during the last named period, was 2,929 fathoms, producing an average of 1,060 lbs. of rough copper per fathom, and maintaining fully the general character of the Cliff lode, as one of the richest hitherto developed in this or any other country.

At a corresponding rate of yield per fathom, for the 7,037 fathoms already opened, the product would be 7,459,220 lbs. of rough copper, which estimated to contain 60 per cent. of pure copper, would produce 4,475,532 lbs., which at the present market value would command more than one million and a half of dollars.

If the expectations of the Directors should be realized by a product of 1,700 tons for the current year, equivalent at 60 per cent. to 1,020 tons of pure copper, and the present market value of the article should undergo no material change, the net earnings of the year will be very largely in excess of any previous year. Estimating that amount of copper at 35 cents per pound, a price considerably below the present ruling rates, the cash value of the product would be $714,000; and assuming that the cost of production should be considerably increased, so that the expenditures may reach $350,000, the resulting net profits would authorize dividends to the amount of $18 per share; or if $64,000 were added to the contingent fund or working capital, which it is desirable somewhat to increase, would leave a dividend fund equal to $15 per share from the earnings of 1863.

Staten Island Railroad.

The Staten Island Railroad Company has been taken out of the hands of the receiver, and reorganized by the election of Wm. H. Vanderbilt, President; F. Ockershausen, Treasurer; and P. Stevens, Secretary.

Railroads and Canals of Canada.

The following is an enumeration of the several railroads in the Province at the end of 1862—

Corporate Lines.	*Places connected.*		*Distances.*
Brockville and Ottawa	Brockville	Smith's Falls	37.0
Perth Branch	Smith's Falls	Perth	10.5
Berlin Branch	Preston	Berlin	11.0
Buffalo and Lake Huron	Fort Erie	Goderich	161.0
Carillon and Grenville	Carillon	Grenville	12.5
Cobourg and Peterboro'	Cobourg	Peterboro'	28.3
Erie and Ontario	Niagara	Chippewa	17.0
Galt and Guelph	Galt	Guelph	16.0
Grand Trunk—			
Montreal District	Montreal	Vermont Line	130.0
Quebec District	Richmond	Point Levi	96.0
Riviere du Loup District	Chaudiere Junction	Riviere du Loup	118.0
Three Rivers Branch	Three Rivers	Arthabasca	27.0
Victoria Bridge and approaches	(Over the St. Lawrence at Montreal)		6.0
Toronto District	Montreal	Toronto	333.0
Kingston Branch	Junction	Kingston	2.0
Sarnia District	Toronto	Sarnia	190.0
Great Western—			
Main Line	Hamilton	Windsor	186.0
Toronto District	Hamilton	Toronto	38.0
Niagara District	Suspension Bridge	Hamilton	43.0
Sarnia District	Komoka	Port Sarnia	52.0
Galt Branch	St. George's	Galt	12.0
Industry Village	La Norale	Industry Village	12.0
London and Port Stanley	London	Port Stanley	24.0
Montreal and Champlain	St. Lambert	Rouse's Point	49.0
Montreal and New York	Montreal	Mooer's	45.0
Northern	Toronto	Collingwood	95.0
Bel Ewart Branch	Lefroy	Bel Ewart	1·6
Ottawa and Prescott	Prescott	Ottawa City	54.0
Port Dalhousie and Thorold	Port Dalhousie	Thorold	5.0
Port Hope, Lindsay and Beaverton	Port Hope	Lindsay	43.0
Rawdon and Industry	Rawdon	Industry Village	16.0
Stanstead, Shefford and Chambly	St. John	Magog	80.0
Welland	Port Dalhousie	Port Colborne	25.0
Total mileage of railroads in Canada			1,975.9

The progress of railroad construction for the ten years ending with the year 1862 is shown in the following table:

Corporate Titles.	1853.	1854.	1855.	1856.	1857.	1858.	1859.	1860.	1861.	1862.

The total cost of the railroads of Canada has been about $123,500,000, or $60,688 per mile.

The following is a general description of the canals and river improvements of Canada, and their cost to the end of 1862:

	Canals.	Length in Miles.	Dimensions in Feet—Top.	Dimensions in Feet—Bottom.	Lockage in Feet.	Locks—Number.	Chambers—Length.	Chambers—Width.	Chambers—Depth.	Cost of Construction up to Jan. 1, '63.
	Welland Canal:

	Burlington Bay Canal	4.0	—	—	—	—	—	—	—	308,328
	Chambly Canal	12.0	—	24	74	9	122	24	8	433,800

* Embracing the Gallops, Junction, and Iroquois sections of canal.

† The Rideau Canal, constructed originally by the Imperial government for military purposes, has only lately come into the hands of the provincial government, and as yet has cost simply the annual outlay for repairs.

Financial Condition of Minnesota.

(Continued from page 506.)

Valuation—The valuation of property according to the census of 1850 and 1860 was as follows:

Census Years.	Assessed valuation. Real estate.	Personal property.	Total.	Estimated or true value.
1850	$97,363	$164,725	$262,088	$262,088
1860	25,391,771	6,722,002	32,118,773	52,294,413

The State valuation yearly since 1849 is shown in the annexed table:

Years.	Counties.	Valuation.	Population.	Years.	Counties.	Valuation.	Population.
1849	1	$514,936	4,049	1856	24	$24,394,395	100,000
1850	6	806,437	6,077	1857	31	49,336,673	150,037
1851	3	1,282,123	7,000	1858	37	41,846,778	156,000
1852	8	1,715,855	10,000	1859	40	35,564,493	162,000
1853	6	2,701,437	14,000	1860	41	36,738,460	172,123
1854	13	3,508,518	32,000	1861	41	38,712,427	185,000
1855	18	10,424,157	40,000	1862	43	30,000,000	200,000

The following table exhibits the elements of real and personal property in the State in 1860 & 1861:

		1860.	1861.
Area of organized counties	acres	20,435,180	20,435,180
Land assessed	"	6,404,491	7,171,559
Land assessed	value	$20,992,687	$22,561,765
Real estate in cities and towns	"	11,033,514	10,547,758
Total value of real estate	"	32,026,303	32,909,523
Value of personal property	"	4,712,107	5,802,904
Total valuation	"	36,738,410	38,712,427

—the valuation for 1862 was largely decreased by the depopulation of the border counties on account of Indian disturbances and the Auditor considers the total valuation would not exceed $30,000,000.

Taxation.—The taxes levied upon the people of Minnesota are equivalent on the average to a little more than one and a-half per cent. upon the assessed valuation; and supposing them divided equally among the population they amounted in 1860 to $3.27 and in 1861 to $3.32 per capita. It must be observed, however, that much the greater part of these taxes are for local purposes—

The State tax in 1861 at 4 mills on the $1 amounted to	$152,919
The local taxes were equal to 12 mills on the $1 or	461,017

The distribution of the several taxes in 1860 and 1861 is shown in the following table:

	1860. Rate in mills per dollar.	1860. Amount of taxes.	1861. Rate in mills per dollar.	1861. Amount of taxes.
State tax	4.00	$146,933	4.00	$152,919
School tax	2.50	91,847	2.50	95,574
County tax	3.74	137,400	4.28	163,763
Township tax	1.15	42,249	1.07	41,035
Bridge tax	0.11	4,042	....	.....
Road tax	0.66	24,247	0.66	25,270
Poor tax	0.19	6,980	0.04	2,042
Other special tax*	3.00	110,215	3.90	148,780
Total	15.35	$563,913	16.06	$613,958

* Includes city and town tax, which in 1861 was $73,573 or 1.93 mills per centum.

It must not be inferred that the whole of the above taxes are collected. The State tax for 1860 was delinquent to the amount of $43,877, and that for 1861 of $91,173. Thus if every one paid his proper share, the quota might be materially diminished. From the commencement of the State government in 1858 to the end of 1862 the amount delinquent was $292,682 sufficient for the ordinary expenses of the State for two years, or sufficient to pay off the State debt.

Receipts and Expenditures.—The returns for the year ending the 1st December, 1862, present the following figures:

State taxes—revenue	$94,559 65	
" " interest	38,442 06	$133,001 71
U. S. War tax	$40,263 44	
Poll tax	23,012 10	63,275 54
Sundry resources: sales of school lands, etc.		20,085 08
Balance in Treasury 1st Dec., 1861		4,729 42
Total		$221,091 75
Paid on Auditor's warrants	$137,505 71	
Paid U. S. on account of direct tax	47,030 17	184,535 88
Balance in Treasury 1st December, 1862		$36,555 87

The ordinary expenses of the State government for each year since its establishment have been:

	1858.	1859.	1860.	1861.	1862.
Executive	$16,300	$24,500	$18,500	$16,640	$18,943
Judicial	22,100	22,500	19,200	18,762	19,753
Legislature	99,895	*——	37,856	19,036	18,640
Printing	54,284	15,000	14,120	12,336	12,864
State prison	2,137	4,000	3,954	6,668	6,612
Normal school	.....	2,000	2,000	1,315	.....
Current cost of government	$194,716	$60,000	$95,630	$74,757	$76,812
Miscellaneous expenses	29,957	26,000	29,936	26,975	†43,618
Total expenses	$224,673	$86,000	$125,296	$101,732	$120,430

* No legislative session in 1859.

† Including for extra legislative session $6,906, and for extra printing $1,800; also military expenses $4,506.

Public Debt.—On the 1st December, 1862, the public debt of the State amounted to $350,000, viz:

8 per cent. loan of 13th March, 1858	$250,000
7 per cent. loan of September, 1861	100,000

The laws authorizing these loans provided an annual tax sufficient for their redemption at maturity and for the payment of interest thereon. The tax levied is now two mills on the dollar valuation.

There was also outstanding on the 1st December, 1862, endorsed scrip to the amount of $55,918.

Besides the above the State has issued 25 years 7 per cent. bonds to the railroad companies of the State to the amount of $2,275,000, for which it is contingently liable for principal and interest.

Property of the State.—This consists chiefly of lands donated by Congress for schools, salines, etc. the actual extent of which is not yet ascertained. The quantity of school lands appraised up to the end of 1862 was 135,982 acres, of which 38,017 acres had been sold for $242,531 which sum belongs to the permanent school fund. The State's interest in the railroads amounts as above to $2,275,000.

Cape May and Millville Railroad.

On the 20th ult the cars commenced running on this road as far as Port Elizabeth; and we understand that in the course of a few days the extension of the road will be completed to Dennisville, which is about half way to Cape May. We learn that the arrangements of the Company are such as to afford a guaratee that the line will be extended to within a short distance of Cape May in time for the bathing season, and that the prospects for business upon it are, independent of the pleasure travel, of the most flattering character.

Milwaukee and St. Paul Railroad.

In the United States District Court of Wisconsin at Milwaukee, on the 7th ult., the following proceedings were had:

Ordered by the Court, That the Receiver deliver over to the Milwaukee and St. Paul Railway Company, the said railroad and appurtenances between Portage City and LaCrosse, and the rolling stock and property specially described in the decree.

And it is further ordered by the Court, That a full and perfect inventory be taken by the Receiver, of all rolling stock other than the forty box cars especially mentioned in the decree, and of all personal property belonging to the said LaCrosse and Milwaukee Railroad Company, including such as have been procured by the Receiver now on hand, and that he make report of the same on the 8th day of June next. And as in pursuance of the act incorporating the LaCrosse and Milwaukee Railroad Company, a continuous road has been constructed and operated between LaCrosse and Milwaukee, and the interests of the public requiring that the said road as constructed and operated shall continue to be so operated, it is ordered by the Court (reserving the right to rescind, change or modify this order at any time hereafter) that the said Milwaukee and St. Paul Railway Company, and the receiver, who continues to be the receiver of the eastern end or division of said La Crosse and Milwaukee Railroad, between Milwaukee and Portage City, jointly operate said road between LaCrosse and Milwaukee without interruption. That the said Milwaukee and St. Paul Railway Company, and the said receiver jointly employ all the agents and persons necessary for the proper operating of said road. That the revenues of said road be paid to the receiver as heretofore, who shall keep all accounts and books for the inspection of said Company, and said Company may keep duplicate books. And that all payments and disbursements for necessary expenses in operating said road shall be paid out of the joint fund, each division of said road to be entitled to its proportion of revenue, and to be charged with its proportion of disbursements, and that the said receiver pay coupons of bonds in prior mortgages as heretofore.

American Railroad Journal.

Saturday, June 6, 1863.

Stock Exchange and Money Market.

There has been a more active demand for money the last week, naturally arising from the absorption of currency by the conversion of the 5 20's, which is now going on upon a large scale, and filling the treasury with ample means for the wants of the Government. We perceive from the *Circular* of S. Hallett & Co., which we reprint in another column, that Mr. Chase finds himself in so strong a financial position, that he is able to enunciate his general policy. In a letter to those gentlemen of recent date, he says no proposition for a permanent loan payable otherwise than in American gold, or anywhere else than at the U. S. Treasury, has ever been entertained or is likely to be entertained, and no authority has been given to any one to negotiate a loan abroad on any other terms, than would have been accepted for the same from American capitalists. It would seem however from the Secretary's letter notwithstanding, that at one time a foreign loan was not unconsidered. For it is very evident that if foreign capitalists had placed one or two hundred millions in our funds, it would have reduced foreign sympathy for the South by just about that extent.

We also learn that there is not in the Department a single unsatisfied disbursement in any branch of the public service.

Under these assurances the public have acquired fresh confidence in the stability of the public funds, and the certainty of their redemption. By the very act of conversion, the people themselves are adding to the power of the Government, sustaining

the currency by withdrawing from circulation all that cannot be employed at high profits, and preventing the necessity of a much further issue. The Railway market is steady and hopeful. The rise and fall in various descriptions are not large, and are attributable to combinations, and speculations for the moment, rather than for the future. Gold still lingers in the neighborhood of the fifties and exchange is 161 or thereabout. The balance in the Sub-treasury in this city on Tuesday was $24,557 50 and the week's exports were $4,606,695 against $3,301,894 the week preceding.

One of the problems of railway finance at the present moment, connected with the operations of Grant and Banks, and which is exciting considerable attention among railway speculators, is the effect to be produced on the future value and earnings of those lines of railway, which since the closing of the Mississippi, have enjoyed a monopoly of the western traffic. It is the opinion of some that the river once opened, the former current of business will be resumed; it is the opinion of others, that its trade having now found a new channel will continue to follow it, and that the Eastern railways will maintain their advantage.

We imagine that the laws of commerce will be found quite as inexorable in the future as in the past, and that the trade on the Mississippi will be governed hereafter, as it has been hitherto, by the cost of transportation and the purchasing capacity of New Orleans. Wherever goods can be taken at the cheapest rates and sold to the best advantage, there will be the favored mart of merchants and shippers.

In the first place, there is no such river in the whole world as the Mississippi. As our readers well know, it was discovered in 1672 by the celebrated Marquette, a priest of the Jesuits, who passing from Lake Champlain by the route of the Ottawa to Lake Huron, and thence making his way to the Fox river from Wisconsin, reached the Mississippi in Latitude 42° 50N. and floated down to the Arkansas, from which point he returned to Canada. In 1682 the fearless LaSalle sailed down the river, from Wisconsin to the Gulf of Mexico. The French however, took but little advantage from this discovery. The attempts to open a trade under the lead of M. Crozat, and afterwards by the Mississippi Company ended in nothing. Not until its purchase from the Emperor Napoleon in 1803, did its commerce assume any value. In 1769 New Orleans had a population of 3,190; in 1788, 5,331; in 1797, 8,056; in 1810 seven years after it had become Americanized 17,242; in 1820, 27,176; in 1830, 46,310; in 1840, 102,193; in 1850, 116,375; in 1860 it had reached 168,675. Its extent of steamer navigation through its numerous tributaries is fully 20,000 miles, and its proximity to the West Indies and Central and South America, gives it unrivalled advantages as a commercial port. Its business having been stimulated by northern enterprise, increased with gigantic strides, and its foreign exports were only second to those of the city of New York. All these advantages were forgotten in a moment of folly, and New Orleans which consented to follow the fortunes of a few ambitious and unscrupulous politicians, sacrificed her real and solid interests. Recent events however indicate that a reaction in the sentiments of the people of Louisiana has taken place, and within a few weeks past, there have been strong indications of a desire of the planters to re-enter the Union under the old condition of things, while thousands of bales of cotton and hogsheads of sugar have now made their appearance on the levees ready for export, and the supplies are coming in with unexpected regularity. Counting upon a restoration of the former political status we must expect a return of its normal effects, and we therefore do not doubt that on the return of peace the commercial advantages of New Orleans will re-assert their power and influence.

It is well known that the cities of Cincinnati and St. Louis have made loud complaints at the heavy losses sustained in their business in consequence of the charge in its route. The increased charges on railway transportation have been an actual loss to production. It is asserted that millions of dollars have been sunk by their producing customers, in the cost of freight by the railway lines, and fully understanding this, it has been one of the temptations held out by the Confederate Government to the North Western States, that by joining it in their efforts to establish their independence, the free navigation of the Mississippi should be secured to them. And it is the opinion of many intelligent and patriotic Union men of the Western States, that should the North consent to a separation of the States, all the States lying on the Mississippi and Missouri, under the inexorable necessities of commerce, would be compelled finally to join their fate with that of the confederates. We can see then that the opening of the Mississippi is a necessity for the preservation of the Union, and the operations of our armies in that quarter, are not merely to be estimated for their importance as a means of military success, but as a commercial and political agency of the very greatest consequence. The whole question then takes this form. Given any point on the Missouri and Mississippi, which is the cheapest route to the place from which the products of the vallies they drain, can be exported? If it is cheaper to send bulky articles such as cotton, tobacco, whiskey, bacon and sugar to New Orleans than by the Northern or Central Railway routes to New York, that is the direction those articles will take. No Chambers of Commerce, no railway combinations, no newspaper opinions will have the least effect in preventing it.

We imagine therefore that our Eastern railways must reasonably expect a diminution in their traffic, certainly to the extent we have indicated, nor will a reduction in their rates make any material difference. On the other hand, they may fairly expect to gain from the increased production, and the demands of the increasing population of the North Western States, all the business they may lose by the opening of the Mississippi. To this result they have a right to look with confidence. And with no narrow spirit of jealousy, should they regard a return to the former condition of things. The great rivers of the West like the great Lakes of the North, are priceless blessings to the people who inhabit their shores. Without them, our Country would have been but a trackless waste, and our commerce of but little value.

There is still another circumstance to be considered. It will under the most favorable circumstances be several years before the navigation of the Mississippi can assume its former peaceful character, and the passage of merchant steamers become entirely safe. Every possible obstruction will be interposed by hostile parties lurking along its banks, and a guerilla warfare kept up, will be as fatal to its commerce, as the possession of Vicksburg or Port Hudson.

The restoration of business will therefore be gradual on this river, and in that respect will give the Eastern Railway Companies time to adjust their business and conform their regulations to the changes. So that a sudden and absolute diminution of their traffic is not to be anticipated, and the market will not break down by any immediate revulsion. In such cases of gradual change, losses are divided infinitesimally and "no body is hurt."

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New Railroad Route.

We learn from the Philadelphia *Ledger* that Surveyors are now engaged in surveying the road which is to connect the Philadelphia and Trenton Railroad with the Pennsylvania Railroad, in accordance with a charter recently obtained. The new route is to connect with the Trenton road near Frankford, and run westwardly, crossing the Second street road near Nicetown lane, and thence crossing the Germantown Pike near Rising Sun village and the Lamb tavern, and passing the west side of Glenwood and Odd Fellows' Cemetery, to the river Schuylkill near Girard avenue, at which point it will connect with the Pennsylvania Railroad, so as to have the use of the junction road now under construction. By means of this route, passenger cars and government freight can be run directly through from New York to Washington, without change of cars.

National Canal Convention.

In another place, we publish the brief proceedings of the Convention held at Chicago, in relation to the subject of a Ship Canal. We regret that its session produced nothing but a few resolutions of a general character; no statistics, estimates, or opinions of Engineers were brought forward on this occasion, to give the public any precise information on the subject, when just now, they would have been of great value. There are ample materials, private and official, including the report of Mr. Gallatin in 1811, those of Mr. Corwin when Secretary of the Treasury, of the Board of Trade of Montreal, and the recent one of the Committee of the Canadian Parliament, which in careful hands, would have shed much light on the business and necessities of the Great West.

The Towsontown Passenger Railway.

The work on the Passenger Railway on the York Turnpike is progressing with vigor. It was expected that by this time the track would be laid to near Govanstown, and by another month to Towsontown. The ballasting being a tedious process will consume another month, so that it is not expected to have the cars running before the first of August. In addition to the line connecting with Charles street line, there will be a line laid along Greenmount Avenue, connecting with Gay street line, the timber and rails being prepared and deposited on the street ready for the excavation of the street. At the Towsontown terminus the depot and stables will be erected on the old toll gate lot, at the intersection of Pennsylvania Avenue with the York Turnpike, just below Ady's hotel.—*Towsontown, Baltimore, Adv.*

Railroad Police.

The New York Legislature, at its last session, passed an act empowering the Governor to appoint policemen on railways, on the application of the proper officers of the respective companies. The salaries and other expenses are to be paid by those parties who make the application. The bill was prepared by Mr. Hugh Masterson, a detective on the Erie Railway, and the passage of the law was mainly due to his exertions. The law as it was passed, gives the same power to the policemen on the several railroads of this State as is granted to the police of the towns, cities, and villages through which the roads pass, thus enabling them to make arrests for crime in any county throughout the line of the roads. The law has just been put into operation upon the Erie, the New York Central and the Hudson River Railroads, and thus far it is said to have worked admirably.

The British Quarterlies.

The last number of the *London Quarterly* contains a valuable article on the industrial resources of India, from which we learn much of the railway system of that country, prosecuted on a gigantic scale. Two thousand five hundred miles are now in operation, and two thousand more will be, in the course of another year. We are under obligations to the American publishers, Messrs. Scott, Walker & Craighead, for early copies of these *Quarterlies*, now issued from their new office, 38 Walker street. We do not see how any family, with the least pretensions to a love of literature, can be without these, the most valuable and interesting reprints of the day.

Consolidation of the Lake Shore, and Cleveland, Columbus and Cincinnati, Railroads.

The annual meeting of the stockholders of the Cleveland Painesville and Ashtabula Railroad Company will be held in Cleveland on the 10th inst., for the election of directors, and for the transaction of such other business as may come before them. There will also be held at Cleveland on the same day, a special meeting of the Cleveland, Columbus and Cincinnati Railroad Company. At these meetings there will be submitted for the approval or disapproval of the stockholders, a contract entered into on the 8th ult., by the Convention of Directors, for a joint running arrangement of these Companies, with the Cleveland and Toledo, the Erie and North East, and the Buffalo and State Line Railroad Companies.

The terms of the consolidation of traffic, previously agreed upon by the several boards of directors, are substantially as follows:

ARTICLE 1. That the earnings of the Roads owned by the parties hereto, which shall consist of earnings and income derived from the transportation of persons and property, mails and express, rents of tracks (where the rents are received, instead of and for the Company's proportion of fares and freight), and also all other income derived, by rent or otherwise, from the use, by railroads and others, of depots or tracks; and also income from all real estate and fixtures used or retained by either of the parties, for depot or track purposes, shall be aggregated and divided between the parties, in manner as provided in Article 2.

ART. 2. From the earning derived by each party hereto from the sources mentioned in Article 1, fifty [50] per cent. thereof shall be retained for running expenses, &c., by each party, on the amount earned by them respectively, and the balance of said gross earnings, shall be aggregated and divided between them in the following proportion, to wit: The said first party—Cleveland, Columbus & Cincinnati—shall receive twenty-eight [28] per cent. thereof; the said second party—Cleveland and Toledo—shall receive twenty-one and one-half [21½] per cent. thereof; the said third party—Cleveland, Painesville & Ashtabula—shall receive twenty-six and ninety-three hundredths [26 93-100] per cent. thereof; and the said fourth party—Buffalo and State Line—shall receive twenty-three and fifty-seven hundredths [23 57-100] per cent. thereof.

"The objects to be attained by this arrangement," as stated in the Circular of L. M. Hubby, Esq., President of the C., C. & C. R. R. Co., "are the allaying of jealousies and competition, and the saving the expenditure of money growing out of such jealousies and competition; the more equal distribution of cars; the more perfect connection of tracks and trains, and the more equal distribution of the expense thereof; and the mutual protection that would be afforded by the united company, against formidable competing roads, constructed and being constructed. United, these Companies would have a strength, it is hoped, to successfully meet any competition that might be brought against them; while either Company, singly, might not be so fortunate. In this arrangement neither Company parts with any of its corporate rights, or the advantages of separate management."

Jefferson Railroad, Pennsylvania.

Engineers are engaged in surveying the route for the Jefferson Railroad from Hawley *via* Honesdale to Lanesboro. There are two routes in view—one along the Lackawaxen Creek through Prompton and thence north; the other along Dyberry Creek directly north from Honesdale. The former route is said to be a very easy grade, and would undoubtedly be more advantageous and convenient for this section; but the latter is for the interest of Honesdale.—*Carbondale Advance, May 23.*

LaCrosse and Milwaukee Railroad.

In reference to the eastern division of this road, the *Mercantile Democrat* of April 11th, says:

"An application was made in the United States District Court, on Wednesday, for the possession by the Milwaukee and Minnesota Company, of the eastern division of the LaCrosse Road. This, of course, involves the dismissal of the present Receiver of the road. The argument by the Minnesota Company, in favor of the application, was heard on Wednesday afternoon. The Court refused to hear the argument on the other side, until he had taken time to consider whether he would entertain the application at all. Yesterday morning the Court decided not to entertain the application, thus leaving the eastern division of the road still in the hands of those now running it."

Long Dock Company.

The annexed circular has been issued by the Long Dock Company:

OFFICE OF LONG DOCK CO., ERIE BUILDINGS,
NEW YORK, June 1, 1863.

To the Shareholders and Creditors of the Long Dock Company.

The Erie Railway Company having given notice of its intention to pay off the amount of the capital of this company in twelve months from the 1st of June, 1863, (whereupon, as successors to the rights of the New York and Erie Railroad Company, the Erie Railway Company will be entitled to receive possession of the entire property of this company, upon assuming all the liabilities secured upon the property which may then exist,) in pursuance of and in accordance with the contract with the New York and Erie Railroad Company, dated July 1, 1856, and the contract supplemental thereto, dated April 1, 1857.

And the directors of this company having, at the request of the Erie Railway Company, authorized the issue of 3,000 of its bonds of $1,000 each, payable in thirty years, bearing interest at 7 per cent. per annum, payable semi-annually on the 1st days of June and December, for the purpose of reducing and discharging liens, interest and debts for which this company is responsible, &c., said three thousand bonds being secured by a new mortgage upon the property and franchises of this company executed to John Earl, William and Dudley S. Gregory as Trustees, with a stipulation in said mortgage that eight hundred of said bonds shall be issued only for the purpose of paying off the capital stock; and that five hundred of said bonds shall be used to pay (or exchange for) the five hundred bonds of this company dated the 15th of August, 1857; and a further stipulation that four hundred of said bonds, or such part thereof as may be necessary for that purpose, shall be issued only to pay off the principal due and to become due on existing mortgages on said property given for the purchase money of the lands and real estate.

Notice is hereby given that should the shareholders of this company elect, within sixty days

from the 1st of June, 1863, to surrender their shares to the company, they will receive in lieu thereof and in exchange for every $1,000 of said stock so surrendered one mortgage bond of the proposed issue at par, with 3 per cent. in cash in addition at the time of the exchange; said cash payment being an equivalent to a prepayment for one year of the amount that would be due or payable on said stock (under said contracts) beyond the amount of interest that will be received on the bonds taken in exchange for the stock.

To holders of said five hundred bonds the privilege is extended of exchanging their bonds for those of the propcsed issue, with the right to receive at par, at the time of the exchange, one additional bond for every bond so exchanged. The election to make such exchange is also to be made within said sixty days.

HORATIO N. OTIS, Treasurer L. D. Co.

St. Louis, Alton and Terre Haute Railroad.

The earnings of this road for twelve months since re-organization, have been as follows:

May	$112,383	December	$135,617
June	93,766	January	109,808
July	67,720	February	110,603
August	90,000	March	120,310
September	95,969	April	123,115
October	118,887		
November	129,166	Total	$1,307,344
Expenses (say 50 per cent.)			653,672
Interest on bonds			$469,000
Interest on sinking fund			25,000
Interest on preferred stock			119,000
			613,000
Surplus			$40,672

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending May 22, 1863, was as follows:

Passengers	$19,524 53
Freight and live stock	26,057 98
Mails and sundries	1,591 63
Total	$47,174 15
Corresponding week of 1862	41,716 57
Increase	$5,457 63

The receipts of the Grand Trunk Railroad for the 2d week in May, 1863, were $74,531 67
Do., 1862 68,936 67

Increase $5,595 00

National Canal Convention.

The National Canal Convention assembled at Chicago on the 2d June inst., C. J. Filley, Mayor of St. Louis, was appointed temporary chairman, assisted by M. M. Strong of Wisconsin, A. M. Clapp of Buffalo, and W. H. McHenry of St. Louis as temporary Secretaries. The convention was welcomed to Chicago by Dr. Brainard in behalf of the Board of Trade, Mercantile Association and the citizens generally. A committee of two from each State, one from each territory and from the District of Columbia was chosen to nominate permanent officers and prepare the rules of proceeding. The convention then adjourned to 3 P. M. to receive the report of the committee on organization. On re-assembling at that hour, the committee through Gov. King, reported the Hon. Hannibal Hamlin for President, and the Hon. Hiram Walbridge, who had been unanimously proposed by the New York delegation in the committee for President, as Vice-President at large; and the following additional Vice-Presidents: From Maine, Jedediah Jewett; New Hampshire, Hon. J. M. Edwards; Vermont, Lewis Follet; Massachusetts, Lorenzo Sabine; Rhode Island, the Hon. J. R. Arnold; Connecticut, Calvin Day; New York, the Hon. Erastus Corning; New Jersey, Marcus L. Ward; Ohio, D. S. Scott; Indiana, the Hon. Geo. W. Julian; Illinois, Gen. James W. Singleton; Michigan, A. E. Bissell; Wisconsin, Levi Blossom; Minnesota, the Hon. J. M. Taylor; Iowa, Ebenezer Cook; Missouri, George Partridge; Kansas, Marcus J. Parrott; District of Columbia, Dr. Peter Barker.

For Secretary at large, Col. J. W. Foster, and one Secretary for each State were named.

The report was unanimously adopted.

The President on taking the chair returned thanks for the honor conferred. Various routine resolutions were then adopted, and speeches followed from Gen. Walbridge and Mr. Drake, and the convention adjourned until the next day to meet at 9 A. M.

At the appointed hour, Mr. Ruggles offered a resolution in favor of a ship canal around Niagara Falls, and debate was had thereon. At the afternoon session the following preamble and resolutions were reported from the committee:

The loyal States assembled in national convention at Chicago, desirous of cementing closer the Union, for perpetuating our nationality forever, of providing for the common defense and promoting the general welfare of our whole country, adopt the following resolutions:

First. That we regard the construction and enlargement of the canals between the Mississippi and the Atlantic, with canals duly connecting the lakes, as of great military and commercial importance. We believe such enlargement or construction with dimensions sufficient to pass gunboats from the Mississippi to Lake Michigan, and from the Atlantic to and from the Great Lakes, will furnish the cheapest and most expeditious means of protecting the Northern frontier, and at the same time will promote the rapid development of the union of our whole country.

Second. That these works are demanded alike by military prudence, political wisdom, and the necessities of commerce. Such works will be not only National but Continental, and their accomplishment is required by every principle of sound political economy.

Third. That such national highway, between the Mississippi and the lakes, as far as practicable should be free, without tolls or restrictions, and we should deprecate the placing of this great thoroughfare in the hands of any private corporation, or State. The work should be accomplished by the national credit, and as soon as the cost is reimbursed to the National Treasury, should be free as the lakes to the commerce of the world.

The resolutions were adopted without a dissenting voice.

Mr. Ruggles for himself offered a resolution that the Convention is of the opinion that the increased stimulus to be given to agriculture and commerce by the proposed enlargement of the canals will far increase the foreign commerce of the country; that the import duties on return cargoes will very far exceed the interest on the cost of the proposed works, and produce a fund for its rapid reimbursement. Carried unanimously.

A resolution was adopted for the appointment of a Committee by the President to prepare a memorial to the President and Congress, presenting the views of the Convention, and urging the passage of laws necessary to carry them into full effect; the Committee to have power to open such correspondence as may be expedient, and in their discretion call any further convention, five members of said Committee, at any meeting duly ratified by the Chairman, to constitute a quorum.

The President of the Convention announced the Committee as follows:

N. Arnold of Illinois, Samuel L. Carey, of Kentucky, Henry L. Dawes of Massachusetts, S. C. Hersey of Maine, S. M. Edwards of New Hampshire, J. S. Morrill of Vermont, Duncan Stewart of Michigan, R. J. Arnold of Rhode Island, Calvin Day of Connecticut, S. J. Howe of Michigan, P. Chamberlain of Ohio, R. P. Hill of Iowa, E. Nye of New Jersey, A. E. Lowe of New York, R. Blaksley of Minnesota, Dr. Anthony of Kansas, and J. T. Lewis of Wisconsin.

Gen. Walbridge of New York closed the Convention by submitting a series of patriotic resolutions which were carried amid intense enthusiasm, after which the Convention adjourned *sine die.*

The Financial Policy of the Government.

Important Letter from the Secretary of the Treasury.

Among the many invitations to the investment of capital, a crowd of commercial and productive enterprises divide attention with the National Loans. For the payment of the latter, is pledged the faith of a nation rich in all the resources of positive wealth; while the safety of the former is also largely dependant upon the financial policy to be pursued by the Government. We had intended this week to discuss that policy and examine the guaranties offered to the lender, the producer and the trader; but most of this labor happily has been spared us by the receipt of a letter from the Secretary of the Treasury, giving important facts in regard to the condition of his department and declaring his policy in reference to various perplexing questions which he has been compelled to determine. We regret that we have not permission to publish the letter itself; a document so comprehensive in its ideas, so clear in its statements, so frank in its declaration and so patriotic in its spirit, that it would have been no less creditable to the author than satisfactory to the public. As it is, we must content ourselves with the use of the facts it contains, adding a few comments by way of illustration.

1. "No proposition for a permanent loan, payable otherwise than in American gold, or anywhere else than at the Treasury of the United States, has ever been entertained, or is likely to be entertained" by the present head of the department; and "no authority has been given to any one to negotiate a loan abroad on any other terms than would have been accepted for the same loan from American capitalists."

It appears that the idea of inviting proposals both at home and abroad, for a loan payable after ten years, has been postponed if not definitely abandoned, in consequence of the great success of the Five-Twenty subscriptions; "and all authority to receive proposals abroad for such a loan, was withdrawn as soon as it was determined not to ask for it at home." The Secretary does not now judge it desirable to receive a large foreign loan, even for Five-Twenties at par in New York. He does not admit the idea that under any circumstances, foreign capitalists or business men should be preferred to our own; and this sentiment is no less wise than patriotic, appreciated as it is by the people who are so liberally rallying to his support.

2. "There is not in the Department a single unsatisfied requisition for disbursement in any branch of the public service. The Army has been paid in full to the first of March, and the payment to the first of May, already largely advanced, will soon be completed. Unless serious military reverses should be experienced,

there is every reason to believe that on the first of June (the letter bears date May 25th,) every liquidated demand on the Treasury will have been satisfied, and that our financial condition will be more satisfactory than at any period since the outbreak of the rebellion." This, of course, is independent of the large debt contracted during the war.

3. The Department has no Agents abroad for the negotiations of Loans. Certain gentlemen who went to Europe on other business, *incidentally* were authorized *to receive proposals* for Loans; but even that authority has since been withdrawn. The errand of Hon. Robert J. Walker, who was meditating the trip on matters of private business, but who went at the Secretary's request, was not at all to borrow money, but to correct, in the financial circles abroad with which he is familiar, "serious misapprehensions in regard to our resources and strength." It is a source of satisfaction to know that in this object, the labors of the distinguished ex-Secretary have been eminently successful.

These are the chief points discussed, and they are of great gravity in their bearing upon the financial future of the country. The well-known intention of Secretary CHASE to substitute National Bank Notes for the present currency, as fast as it can readily be done, does not materially affect us; as the *volume of currency* will, in either case, be made commensurate with the necessities of the country and the war.

From the commencement of the rebellion, its convulsions have agitated the financial, no less than the political world. Commerce has been interrupted and its channels changed; immense values have been in many instances destroyed, and in others newly created; the character of the currency has been revolutionized, so that the rates of foreign exchange depend more upon the momentary mercantile value of gold, than, as heretofore, on the balances of trade. These results were inevitable in a country so new as ours, while prosecuting a gigantic war, subject to the open disapproval and the secret but active hostility of the great powers of Europe. We were too young to have realized large accumulations of capital; and yet our necessities demanded the most extraordinary expenditures. It only remained for the Government, looking boldly in the face all the dangers that beset it, to devise and execute such measures as should supply a needy exchequer, *by means drawn from the resources of the country itself*, and yet procured without oppressing the people by onerous burdens of taxation, and without paralyzing the various industries which are the source of our national power.

That the measures adopted and now in full operation, have fulfilled these wise conditions, let the results attest. A Treasury amply supplied, a rapidly improving national credit, an entire absence of floating debt, (except the Treasury Notes used as currency,) a state of unexampled industrial activity and pecuniary comfort among the people;—these are the present fruits, towards which the hands of unwilling Europe are already being extended. Never was money more plenty or more productive; never were investments more rich in reliable income. To compare the condition of our people with that of the needy operatives of Lancashire or Lyons, would be unkind; the comparison is already made by the latter, and the answer is given in the swelling current of emigration again setting westward across the Atlantic.

* * * The Secretary of the Treasury has well chosen this moment to declare to the people the success of his measures, and to assure them of a stable policy in the future. He will ask no loans at present, except as the work of conversions continues; least of all, will he offer to the foreign capitalist, terms more profitable than he has already accepted from the American. If the European lender now desires to invest in the richest income-paying national securities in the world, he must come into the American market *and compete fairly with the American people in his purchase.* This assurance is invaluable to those now investing in the Five-Twenty Bonds of the Government.

So far, too, as his policy can affect the rates and supply of money, it seems to be all that our business men can desire. The absorption of currency will be gradual, and continually relieved by disbursements, and by the creation of new currency which the requirements of the War Department render inevitable. He evidently alike deprecates inflation and panic; and will avoid measures likely to result in sudden and feverish fluctuations in prices; preferring even that the desirable depreciation of gold, shall occur gradually and from natural causes, rather than so suddenly as to create stringency and loss and distress. The whole plan of his financial system, aims at *stability*. From a policy so wisely inspired, we can derive no other augury than one of sustained confidence on the part of the people, and continued and increasing ease in money; and these must prove the prolific parents of such renewed activity in American industry, as will make the present but the commencement of a new era of individual enterprise and national prosperity, such as no past years of the Republic ever have witnessed.—*Samuel Hallett & Co.'s American Circular.*

THE FIRM OF W. R. TRAVERS & CO. is this day dissolved by mutual consent. Either partner is authorized to sign the name of the firm in the liquidation of the business.

W. R. TRAVERS,
S. F. MASSETT.

Dated NEW YORK, May 1, 1863.

LIMITED PARTNERSHIP.

Notice is hereby given that the undersigned, JENKINS VAN SCHAICK, STEPHEN F. MASSETT, WILLIAM R. TRAVERS and GEORGE A. OSGOOD, all of whom reside in the city of New York, have this day formed a limited partnership pursuant to the provisions of the first title of the fourth chapter of the second part of the Revised Statutes of the State of New York, and the various acts of the Legislature amendatory thereof.

That the name of or firm under which the said partnership is to be conducted, is VAN SCHAICK & MASSETT.

That the general nature of the business to be transacted is the Stock Exchange and Brokerage business, and all financial transactions connected therewith, on commission. That the said JENKINS VAN SCHAICK and STEPHEN F. MASSETT are the general partners, and that the respective places of residence of the said general partners, are as hereinbefore stated, and the business of the said partnership is to be carried on in the City of New York. That each of the said special partners has contributed, as capital to the common stock of the said partnership, the sum of fifty thousand dollars. That the said co-partnership commences the first day of May, one thousand eight hundred and sixty-three, and will terminate on the first day of May, one thousand eight hundred and sixty-eight.—Dated NEW YORK, May 1, 1863.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of SMITH'S AIR LIGHT FOR RAILROADS, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

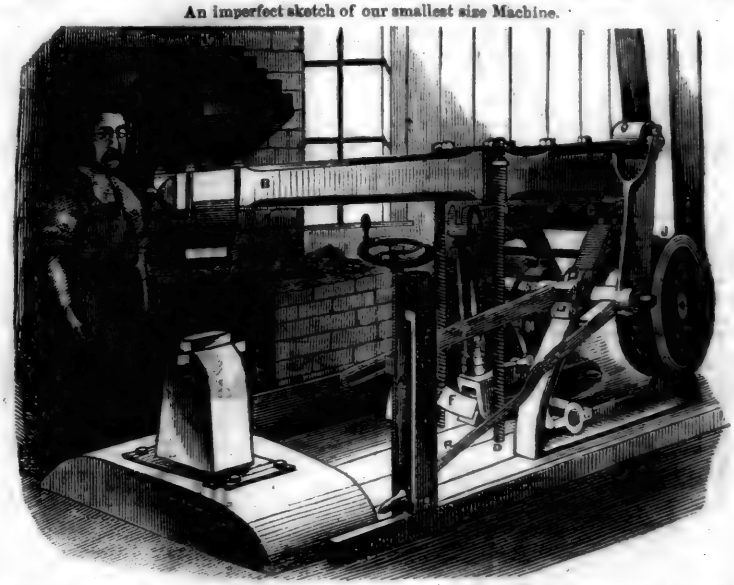
300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2¼ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,



I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, 21 Nassau st., or by addressing
CHAS. W. WELSH,
Secretary.

AMES IRON WORKS,
OSWEGO, N. Y.,
SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.

An imperfect sketch of our smallest size Machine.

PAYE'S PATENT FORGE HAMMER, A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York, or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Crampton, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Kaigh's Point, Phila.; Mallory & Cottrell, Mystic Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Guinness, Albany; Sweet Brothers, Syracuse.

FOX LATHES.
F. W. BACON & CO.,
No. 23 PLATT, corner of GOLD ST.,
NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. GEO. H. FOX & Co., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT REOILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downwards beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Picket's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years, with uniform success, they confidently offer their services to those requiring such aid.

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS,** etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.
Address **HENRY RUTTAN,**
Coburg, Canada.

American Railroad Journal.

New York, Saturday, June 13, 1863.

☞ Mr. Theo. T. Moran has retired from the firm of Moran Brothers, and together with Mr. A. G. Crane and Mr. Wm. R. Gould, Jr., have formed a copartnership for the purpose of transacting a banking and stock commission business, under the firm of MORAN, CRANE & Co., at No. 50 William st., for the purchase and sale of Government securities, bonds, stocks, gold and commercial paper.

☞ Messrs. W. & L. E. GURLEY, of Troy, long and favorably known as the manufacturers of Engineers' and Surveyors' instruments, have just taken possession of their new factory, rebuilt on the site of the one lately destroyed by fire, occasioning them a heavy loss. We trust that their energy, which proves to be equal to their skill, will be crowned with great and deserved success.

☞ At a meeting of the subscribers to the "*Chicago and Alton Railroad Library Association*," held in Bloomington, Ill., on 31st of March, the following gentlemen were elected officers of the association for the ensuing six months: O. Vaughn, President; C. E. Carter, Vice President; H. F. Keith, Secretary; and M. L. Steele, Treasurer.

The object of this association is to establish and maintain a Reading Room and Library, and to promote the intellectual improvement of its members. Suitable rooms have been fitted up for this purpose in the railroad depot at that place.

Launch at Ogdensburg—Railway Connections between Boston and the West.

There was launched at Ogdensburg, N. Y., on the 27th ult., a steamer named the St. Lawrence, of 125 feet length, 31 breadth, furnished with two propellers, worked by engines of sixty horse power, and destined to form the connecting link across the St. Lawrence River between the Northern (Ogdensburg) Railroad, and the Grand Trunk Railway at Prescott, Canada, by which freight from Chicago and the West can be shipped directly through to Boston, and landed at tide water without handling or cartage. Upon the main deck of this boat are to be laid tracks, so that six cars of the broad gauge pattern used on the Grand Trunk can be taken across the river and placed beside the narrow gauge cars used on the route from Ogdensburg to Boston, and the freight transferred from the one to the other, according to its destination. During the past year the rails of the Grand Trunk have been extended through the town of Prescott to the bank of the river, where a commodious freight house has been built. The boat has a portion of her machinery on board, and it is expected will be completed and ready for operation by the last of June. She is to be iron clad sufficiently to protect her from the ice in the winter. She is built and owned in common by the Grand Trunk, and the line of roads between Ogdensburg and Boston, and will cost not far from $30,000.

A large number of Bostonians were present, among whom were General George Stark, General Manager of the line between Boston and Ogdensburg; Hon. Onslow Stearns, of the Northern road; Hon. J. Gregory Smith, General Manager of the Vermont Central; George V. Hoyle, Esq., Superintendent of the Ogdensburg; and John D. Hatch, Esq., of the Vermont Central. The Boston *Journal* says:

We learn that the several roads composing the line between Boston and Ogdensburg are perfecting arrangements which will enable them to give Boston a very much larger share of the Western traffic than it has heretofore enjoyed, and to secure which the merchants of Boston invested money by millions in the upper roads composing this line. When these negotiations are completed these roads will be, so far as the transmission of freight is concerned, consolidated, and will be prepared to send freight through with promptness and dispatch, and at rates which ought to secure for the line a fair business. There are running in connection with the cars a line of fifteen propellers between Ogdensburg and Chicago and Milwaukee, giving a boat daily between those places.

Two obstacles which have heretofore existed to the bringing of Western freight in large quantities, and at cheap rates over this route, have been the failure to connect the cars directly with tide water, and the want of proper storage room. There is a good prospect that the first named obstacle will be speedily removed. The roads are now in negotiation with the parties who control the Grand Junction road for the use of that road, so that their cars laden with Western produce will pass over it directly on to the wharves and piers in East Boston, and discharge their contents into vessels or warehouses, saving thereby all expenses of carting and a large per centage of the cost of loading.

The Legislature of 1861 gave Ammi C. Lombard, Esq., proprietor of the well-known "Lombard's wharves," in East Boston, authority to connect his wharves and warehouses by rail with the Eastern and Grand Junction roads. This has been done, so that extensive and commodious property is brought in direct connection by rail with the Eastern, Fitchburg, Maine and Lowell roads and through them with Ogdensburg and the West. At these wharves there is accommodation for twelve large ships to load or discharge at once, and they are lined with substantial brick warehouses, of a storage capacity of from 100,000 to 150,000 barrels bulk. The tracks for the cars are laid between the warehouses and the docks, and freight can be discharged direct into either as may be desired. Goods received on storage can also be discharged direct from the warehouses into vessels or into the cars.

Cleveland and Toledo Railroad.

The annual meeting of the stockholders of this company will be held at company's office, in Cleveland, on the 17th inst., for the purpose of electing directors for the ensuing year and transacting such other business as may come before them. At which meeting an arrangement for the consolidation of this company with the Cleveland, Columbus and Cincinnati Railroad Company, the Cleveland, Painesville and Ashtubula Railroad Company, the Buffalo and State Line, and the Erie and North East Railroad Companies, will be submitted for their approval, which consolidation

is to continue for the term of 25 years, and gives this Company 21½ per cent. of the earnings of the four roads.

Little Miami and Columbus and Xenia Railroad Companies.

We have received a copy of the Seventh Joint Annual Report of these companies—being the Twentieth Annual Report of the *Little Miami*, and the Thirteenth of the *Columbus and Xenia*. The gross income derived from the joint operations of these roads during the years ending November 30th, 1861 and 1862, has been as follows:

	1861.	1862.
From passengers	$566,236 36	$649,727 53
" freight	612,174 72	792,789 98

	658,480 10	
Leaving a surplus for the year	$31,169 48	

The following statement exhibits the earnings and expenses for the past seven years—the rental paid to the Dayton and Xenia Railroad Company, amounting to $28,000, being embraced in the working expenses of the years 1859, 1860, 1861 and 1862:

	Earnings.	Working Expenses.
1856	$1,209,636 00	$562,675 01
1857	1,163,162 59	645,561 12
1858	1,200,499 29	579,235 34
1859	1,276,574 73	688,561 40
1860	1,289,844 84	693,313 29
1861	1,288,503 02	664,443 28
1862	1,566,396 48	806,628 40

The total income from all sources during the year was	$1,632,487 90
And the expenditures	942,838 32
Making the net income	$689,649 58
Of which the Little Miami Railroad Company's share is	$459,766 39
And the Columbus and Xenia Railroad company's share	229,883 19
	$689,649 58
The net profits in 1861 were	$532,114 69
In 1862 they were	689,649 58
Increase	$157,534 59

Exclusive of dividends on stocks, the net income of 1862 exceeds that of the previous year, $126,108 89.

The assets and liabilities of the joint company are as follows:

Assets.

Rolling stock and shop machinery	$739,693 93
Bills receivable	29,622 98

November 30, 1861, it was	1,657,609 09
Increase	$2,341 94

The account with the stockholders is as follows:

Surplus November 30, 1861	$191,065 47
Net profits for the year	161,749 74
	$352,815 21
Dividend No. 22, June 1, 1862	$74,540 00
" 23, Oct. 7, 1862	76,099 98
Discount on bonds sold in 1861	3,653 07
Surplus Nov. 30, 1862	198,522 16
	$352,815 21

The value of the rolling stock of the joint companies is $739,693 92. This company's proportion is therefore, $246,564 64; and the Little Miami Company's proportion, $493,129 28. The decrease in the equipment of the joint companies has been $11,317 42.

The equipment of the road consists of 38 locomotives; 34 passenger, 17 baggage, mail and express, 396 box, 33 box stock, 35 rack stock, 99 platform, 21 lime and 54 gravel cars.

The number of miles run by engines has been: With passenger trains, 367,890; with freight trains, 437,782; with wood, gravel and construction trains, 41,260—total, 846,882, an increase over the previous year of 31,974.

The following statement exhibits a comparison of mileage and cost of repairs for six years:

	Miles run.	Cost of repairs.	Cost per mile run.
1857	666,546	$65,479 46	9.82 cents.
1858	637,835	59,031 92	9.25 "
1859	732,924	54,407 41	7.43 "
1860	796,187	60,778 92	7.63 "
1861	814,908	55,469 20	6.80 "
1862	846,882	65,395 35	7.95 "

The following is a comparative statement of the

mileage and cost of repairs of passenger cars for the past and preceding years:

	Miles run.	Cost for repairs.	Cost per mile run.
1861.....	1,765,468	$17,417 15	0.99 cents.
1862.....	1,877,655	20,787 28	1.10 "
Increase...	112,187	$3,370 13	0.11 "

The mileage and cost of freight cars during the same time has been:

	Miles run.	Cost for repairs.	Cost per mile run.
1861.....	5,668,678	$45,673 03	0.80 cents.
1862.....	6,201,387	71,988 49	1.15 "
Increase...	532,709	$26,301 46	0.35 "

The cost of renewal and repair of iron rail, renewal of cross ties and chairs, opening ditches, renewal and repair of culverts, cattle guards and other masonry, repairing fences, surfaceing track, etc., has been $179,663 04; against for last year, $131,956 26—an increase of $47,707 78. The following materials have been used in renewals during the year: 1,933 tons iron rail, 15,125 chairs, 131,600 lbs. spike, 60,466 cross-ties, and 7,420 iron rails repaired—the total cost of which has been $80,638 03.

The cost of repairs of road per mile run by locomotives and cars in 1862 was 2.01 cents. In 1861 it was 1.60 cents.

The expense of maintaining the road has been unusually large. The track of the Columbus and Xenia road, not being ballasted, has required, under the heavy business of the year, 50 per cent more labor to keep it in proper surface than in any previous year. The ballasting of this road, which has now become indispensable, will form an item of much expense in repairs of road. Not less than 2,600 tons of new iron will be required the coming year.

The increase in cost of repairs of bridges has been $4,620 10. The building of the bridges over Darby Creek and Deer Creek, has caused by far the larger portion of this expense. The bridging is now in excellent condition, and much less expense will be required to keep them in repair during the current year.

During the year, 2,308 panels of new fence have been built. A new passenger house and a new freight house have been built at South Lebanon.

The whole number of passengers carried was 463,886—of which 359,920 were local, and 103,966 through passengers. Number of passengers carried one mile, 29,052,993. The total number of tons of freight transported was 419,900—of which 289,211 were through, and 130,689 way. The number of tons carried one mile was 35,440,931. The report says:

"The experience of the past year, in the operation of the roads has served to still more clearly demonstrate the advantages of the contract with the Cincinnati, Hamilton and Dayton Railroad Company. In its bearings upon the income and working expenses of the two companies, it seems alike advantageous to each, and just to the public, and there is every reason to believe that the most satisfactory results will continue to be experienced from it."

The officers and directors for 1862, are as follows:

LITTLE MIAMI RAILROAD COMPANY.

President—W. H. CLEMENT.

Directors—Jos. C. Butler, Joseph Torrence, Nathaniel Wright, James Hicks, Jr., Larz Anderson, W. H. Clement, Alphonso Taft, Chas. H. Kilgour, Henry Hanna, John Bacon, Abraham Hivling, Jos. R. Swan.

Auditor—D. G. A. DAVENPORT.

Secretary—CHAS. H. KILGOUR.

Treasurer—S. E. WRIGHT.

Superintendent—E. W. WOODWARD.

COLUMBUS AND XENIA RAILROAD COMPANY.

President—JOS. R. SWAN.

Directors—Wm. Dennison, Jr., Robert Neil, D. W. Deshler, L. Goodale, Wm. B. Hubbard, Jos. R. Swan, Geo. M. Parsons, W. H. Clement, Larz Anderson, Henry Hanna, Abraham Hivling, Simon Gebhart.

Vice-President—W. H. CLEMENT.

Superintendent—E. W. WOODWARD.

Secretary and Treasurer—CYRUS FAY.

New Jersey Railroad and Transportation Company.

The annual meeting of the stockholders of this company was held in Jersey City on the 4th inst. The Annual Report of the directors was read by Mr. F. Walcott Jackson, the efficient superintendent of the road, of which the following is an abstract:

The working operations of the road produced in receipts a total of $1,111,086 75; a greater amount than for any previous year except 1860. The expenses were $458,962 43—showing also an increase over previous years, the same causes, more or less, affecting them last year as in the preceding year; and in addition thereto was the increased cost of all articles required for the use of the road during the latter part of the year. The expenses per mile were 89.58 cents, against 84.60 cents for 1861, arising from the causes stated above and from the fact that the tonnage per mile was greater than ever before; the increased weight of the trains, particularly of those transporting troops, adding largely to the fuel expenses and to the wear on the passenger cars, those only having been used for this service. The ratio of expenses to earnings was 41 3-10 per cent, a slight diminution from that of 1861. The profit and loss account for the year shows a balance of $111,878 80 an excess of $50,776 08 over the preceding year, after paying two semi-annual dividends of five per cent each, amounting to $439,770. Interest on bonds, $41,050. Transit duties, State tax and government tax, $59,425 52. The amount of the tax, transit duty, interest and dividends paid to the State of New Jersey for the year was $53,002 73. The government tax from the 1st September, the date from which this tax was paid, was $14,617 79; this amount includes the tax on the dividend paid directly by the company, and so much of the amount as was paid for that purpose may be looked upon as an increased dividend to the stockholders, who would otherwise be called upon to pay it. The following statement gives the operations for the last three years, in a condensed form, for comparisons:—

	1860.	1861.	1862.
Gross receipts...	$1,113,881	992,767	1,111,086
Expenses.....	443,161	412,786	458,962
Net earnings..	$670,720	579,981	652,124
Ratio of expenses to earnings...	39¾ pr ct.	41 6-10pc.	41 3-10pc.
Dividends	$374,900	439,670	439,770
Surplus.....	218,248	61,102	111,878
Number of pass..	2,833,113	2,322,598	2,394,625
Tons of freight ..	115,653	99,550	110,215
Miles run.....	522,731	487,894	512,349
Running expenses per mile, cents.	84 7-10	84 6-10	89 58-100

The Treasurer's statement for the first four months of the present year gives the receipts as $340,518 72; for the same period last year the receipts were $271,006 43—an increase this year of $69,512 29. The expenses for the same period have also increased, but thus far not in a greater ratio as compared with the past year. We must look, however, for largely increased expenses, arising from the enhanced cost of the necessary materials for maintaing and operating the road, from the increase of wages, and also from the payment of the government tax; a larger amount in proportion to its receipts being paid by our company than by most others, as the tax is placed on the receipts from passengers, which comprise five-sevenths of the whole. In view of the very great increase in the cost of operating the road and the large amount of the government tax, it may become the duty of the directors to increase the rates of fare (as has been done by other companies in freight rates, and by some in both freight and passenger rates), in order in a measure to meet these expenditures. Whatever is done will be in the spirit that has heretofore governed this company, that of granting to the public the cheapest and best accommodations, at the same time protecting the interests of those whose money has been invested to provide them. In reviewing the business of the road for the year the directors have still the happiness of presenting unblemished the record of freedom from fatal accident to any person in the cars. The number of passengers transported during the year was about 3,000,000 (including commuters), making a total of more than 42,000,000 from the beginning.

An arrangement has been entered into between all of the companies between New York and Washington securing a continuous double-track railroad the whole, or nearly the whole distance, thereby avoiding the changing of cars, straightening most of the present unnecessary curves, bridging the Susquehannah, and substituting embankments for bridges over the Bush and Gunpowder Creeks, and by the purchase of thirty first-class passenger cars, making the route through, as far as practicable, one complete line.

The funded debt has been reduced by the payment of $10,000, leaving $678,000 outstanding; of this amount, $485,000, bearing 6 per cent interest (the loan effected for the purchase of the property and privilege of the Associates of the Jersey Company), become due on the 1st of August next. It is the intention of the Directors to pay off this loan at its maturity and to negotiate a new loan for $450,000, issuing 15-year bonds at the same rate of interest (6 per cent) per annum, payable semi-annually, and to provide a sinking fund for the payment of the same, by the annual investment of such a sum as will produce, with the interest thereon, the requisite amount at the end of the period for which the loan is made. The income or profit and loss account at the end of the year amounted to $400,016 77, or nearly 10 per cent on the capital. This amount is partly invested in permanent additions to the road, partly in property increasing and protecting our sources of revenue, and the balance is in cash.

The following are the receipts of the road for the first four months of 1862 and 1863:—

Jan. Feb. March and April.	1862.	1863.
Way line passengers....	$104,873 33	$129,602 52
Freight—Elizabeth, Rahway, and N. Brunswick	18,842 18	24,425 89
Freight—Newark.....	12,188 06	14,082 35
Commutations.....	20,610 06	24,586 57
Miscellaneous.....	7,693 04	8,769 84
Philadelphia lines.....	78,531 10	109,350 21
New York & Erie and Northern R. R.....	8,173 97	5,877 88
Morris & Essex, pass....	4,308 66	5,237 92
Trenton freight	7,285 03	18,635 54
Total.....	$271,006 43	$440,518 62
Gain.....		$69,512 29

After the reading of the report the following directors were elected:—John S. Darcy, Dudley S. Gregory, Henry R. Remsen, Hamilton Fish, Abraham O. Zabriskie, Alfred L. Dennis, George R. Chetwood, Martin A. Howell and Ferdinand Suydam.

Subscriptions to Railroad Stocks.--Liability of Corporators.

ORIGINAL SUBSCRIPTION, HOW AFFECTED BY A NEW CONTRACT WITH THE CORPORATION. CONDITIONAL SUBSCRIPTIONS, WHEN VALID. CORPORATION, HOW FAR BOUND BY ACTS OF THE PRESIDENT.

The Pittsburgh and Connellsville Railroad Company brought an action against Andrew Stewart to recover a balance alleged to be due from him on account of his subscription for one hundred and fifty shares of the capital stock of the company. On the 8th day of June 1847, the defendant subscribed for one hundred and fifty shares at $50 per share. On the 28th of November 1848, he gave his proxy to vote at the annual election for directors, and at a meeting of the stockholders was elected a director. In June 1853, he voted in person for the acceptance of the supplement to the company's act of incorporation, passed April 18 1853, and of the subscription of Allegheny county for $750,000 to the capital stock of the company. From this date up to December 1856, he voted at stockholders' meetings, and acted as a director of the company, and on the 4th day of November 1853, paid in cash $375 on account of his subscription, being $2.50 on each of the one hundred and fifty shares subscribed for.

The defence was, that in November 1847 the road was abandoned, and that from 1848 to 1852 the company released money subscriptions to its stock; that a short time after the election of what was known as the Larimer board in December 1847, defendant wished to be released from his subscription; that Larimer, the president, prevailed on him to retain it, and told him if he would, that the Company would take the amount of subscription in cross ties, when the road should be made through defendant's lands in the mountains; and that at a subsequent conversation between Larimer & Stewart, at the time the Chief Engineer was elected (July 1853) Larimer said they would now push the road through, and referred defendant to the Engineer for the size of the ties, and afterwards proceeded to cut some of them.

The positions taken by the plaintiff were, that the subscription was unconditional; that defendant could have released himself at any time, but instead of so doing he did not transfer his stock to the company, and depended upon the verbal promise of Larimer; that whatever the understanding or agreement was between him and Larimer, it was not binding on the company, their directory never having made or ratified any such agreement with him, and in opposition to such an agreement defendant gave his own interpretation to his subscription, by paying $250 on each share of the one hundred and fifty shares at a subsequent period, to writ, November 4th 1853.

At the trial there was a verdict and judgment in favor of the defendant. The plaintiff then sued out this writ of error and asked for a new trial on the ground that the Court below erred in refusing to charge the jury as requested by the plaintiffs and in receiving the testimony of Larimer and Hill.

The Supreme Court of Pennsylvania now decides in favor of the defendant and affirms the judgment of the Court below. The following is the opinion delivered at the decision of the case.

STRONG, J.—On the 8th of June 1847, the defendant subscribed for one hundred and fifty shares of the capital stock of the Pittsburgh and Connellsville Railroad Company. In November and December of the same year, by certain acts and resolutions of the company, which it is not necessary now to enumerate or describe, he, in common with other subscribers for stock, was released from the obligations of his subscription. That the effect of the action of the company was such a release was ruled in McCully *vs.* the plaintiff in this case, and it has not been controverted here. But the plaintiff on this trial submitted evidence, from which they contended the jury might infer a renewed subscription by the defendant, or a resumption of the obligation of June 8th, 1847, from which he had been discharged. They showed that in November, 1848, he voted by proxy at an annual election for directors; that he was himself elected a director; that he acted as such, and as a stockholder, down to Dec. 1856, and that on the first day of November, 1853, before any call for installments on stock were made, he paid $375. These acts were doubtless cogent evidence of a subscription of some kind, and in the absence of proof of a special contract, they would have warranted the jury in inferring that the defendant had, after his release in November or December 1849, assumed afresh the obligation to take one hundred and fifty shares, and of course, to pay for them in cash according to the calls. Such acts could have been accounted for on no other supposition than that there was an existing engagement of that nature. But they are shorn of their importance by the fact that there was a special contract, accounting for them all; an express contract of conditional subscription to which they are referable. The defendant proved that after his release from his subscription of July 8th, 1847, and before any of those acts from which an unconditional obligation is sought to be inferred, it was agreed between him and General Larimer, the president of the company that if he would continue his subscription, the company would receive payment for it in cross-ties when the railroad should be made through his land, and that upon these conditions he assented to holding the stock. If there was such a contract between the parties, it fully accounts for the defendant's subsequent action as a stockholder and director of the company. The law will not permit a contract to be implied when there is one expressed. "*Expressum facit cessare tacitum*," is an acknowledged maxim, both of the law and common sense. It was said by Lord Kenyon in Cutter *vs.* Powell, "Where there is an express contract between the parties none can be implied." It matters not to this case whether the evidence relied upon by the plaintiff's be regarded as a foundation for the implication of a contract, or as instruments of proof of an express one. Even if the defendant never was released from the old subscription made on the 8th of June, 1847, yet if the contract made with Genl. Larimer in November or December of that year, was not unauthorized, it was a valid contract, it amounted to a substitution of the duty to pay in cross-ties at a time not yet arrived, in lieu of the duty to pay in cash on call. The only substantial question in the case, therefore is, whether that special contract was binding on the company.

It is no longer to be doubted that an incorporated company after it has obtained its letter patent, and effected its organization, may receive conditional subscriptions to its stock. It may stipulate with subscribers that they may pay in any manner mutually agreed on, and it can enforce a subscription only according to its conditions. Not so with subscriptions made before a company is organized. They must be unconditional. There is no authority existing anywhere to receive them on terms, or to vary the mode of payment. The difference is a well recognized one in our law, as well as in the law of other states. Clearly, then, the plaintiffs, who were an organized company in November 1847, with letters patent already obtained, could engage with the defendant that if he would hold on to his subscription, or renew it (it having ceased to be binding) he might pay it by furnishing materials for their road, and pay it when the road should be extended to his land. And if the plaintiffs did thus engage, they cannot enforce payment in cash, nor payment before the time appointed. It is objected however that the special contract made with General Larimer, by which the defendant agreed to hold the stock on condition that payment might be made in cross-ties, was not binding on the company for want of authority in General Larimer to make it. If not, then it was not binding on the defendant, for both parties must be bound or neither. Yet, it was in form at least, an express contract, and it therefore necessarily precluded the implication of any other as we have seen. But it cannot be maintained that the act of General Larimer, was not binding on the company. He was the president. The contract was made as one of the witnesses testified, in the room where the board of directors met, at the first or second meeting after General Larimer was elected, when the board was entering into session, or had been in session. A number of the directors were present. A large number knew of the arrangement, and approved it. The witness could not say how many were present, but he testified that all may have been, and that the principal part knew and approved of the arrangement. Some two or three months afterwards the board adopted a resolution ratifying and confirming all contracts and agreements which General Larimer had made, and subsequently the defendant was instructed to go on and make the ties, which he did, until the instructions were countermanded. Under these circumstances, and with this evidence in view, the court could not have instructed the jury as they were requested, that the contract did not bind the company. Without any evidence of approval by the directors such instruction would have been erroneous. Had the president given a promissory note in the name of the company, it will hardly be insisted that the holder must in the first instance have given evidence to show that he had authority to give it. Authority would be presumed. Much more, when the stock of the company was to be taken might he receive a conditional subscription, which, if accepted by the company, must be taken with its attendant conditions. Nor was the court in error in refusing to charge that the payment by the defendant of $375, after the special contract with the company through General Larimer, estopped him from setting up that contract as a defence against a claim to the payment of the whole subscription in cash. It was not paid in answer to any call, for no call had then been made. At most, then, the payment was only an act to which

he was not compellable, if the contract was proved. The plaintiffs lost nothing by the payment, and it could not therefore work an estoppel. The defendant might have paid all in cross-ties. He paid some when not called for in money, but did not thereby assume an obligation thus to pay all.

The judgment is affirmed.

Trade and Commerce of Milwaukee.

The annual report for the year 1862, being the Fifth Annual Statement of the Chamber of Commerce in the flourishing and beautiful city of Milwaukee, has been received from J. B. Kellogg, Esq., Secretary of the Board, and deserves attentive consideration. This city, whose position is in every way commanding, may be considered as the twin of Chicago, and in many respects its rival. Its harbor we have fully described in our issue of March 15, 1862, when reviewing the report for 1861, so that we shall now confine ourselves to a review of the topics embraced in the document already referred to. We are particularly struck with the variety of information which it contains, the clearness of its statements, the precision of its tables, and the spirit of confidence in the resources and trade of the port, which so unmistakeably breathes in every page.

The population of Milwaukee is on the increase. By the Census of 1850, it was 20,061. In 1860 it was 45,246. It has extensive manufactures and valuable water power, all of which are in activity. The report claims for it the credit of its being "the greatest primary wheat market in the world;" greater of course, if this be true, than Dantzic or Odessa, no small pre-eminence.

	Bush.
Receipts of wheat at Milwaukee in 1862	15,613,995
" " " Chicago	13,978,116
On hand at the beginning of the year at Milwaukee	1,826,931
At Chicago	1,855,902
Forwarded at Milwaukee	14,915,680
Ground at City Mills	1,113,645
Forwarded at Chicago	13,808,898
Ground at City Mills	1,304,900
Thus it appears the wheat trade of Milwaukee was in 1862	17,440,926
Of Chicago	15,834,018

This is attributed to the position and superiority of the adjacent soil which produces a superior grade of wheat, and of the climate. The prices it brings in the Eastern markets are also adduced as evidence of the superiority of the article. So also the fact that the shipments in 1862 exceeded those of 1861 by nearly two millions of bushels, through the crop was a short one. If we include the shipment of other articles of domestic produce, we obtain an aggregate of 24 millions of dollars during the same period.

The total of receipts and shipments of flour and grains is as follows:

Receipts in bushels	19,099,789
Shipments	18,732,485

The grain storage room and shipping facilities are indicated by the following table:

Elevators and warehouses	3,055,000
Shipping capacity per day	672,000

In addition to the cereals we find, that of grass seed, the amount received was 8,684 bushels, the lowest market price for clover seed during the year being $3.25 and the highest $5.25.

Beans, 9,202 bushels, varying in price from $1 to $2.00.

Cranberries, 2,959 bushels, the crop having fallen off many thousand bushels.

Of hides, the receipts were 110,292 and all but 32,042 were taken and tanned by the home manufacturers. The large increase in receipts over those in 1861, viz., 58,425, shows a large advance in this department of trade.

Of wool, the receipts were 1,314,210 lbs., and the same amount was forwarded, of which 207,400 lbs went by the lakes. The trade in this staple proved satisfactory and profitable to all engaged in it. The value of wool shipped was estimated from the returns at three quarters of a million of dollars.

Of butter, the receipts were 1,068,967 lbs., and the shipments, 1,238,406 lbs. This is an increase over 1861—in receipts of 584,000 lbs., and in shipments of 600,700 lbs.

Of eggs, the total receipts were 2,959 bls., against 2,856 bbls. in 1861.

The lumber trade shows a large falling off. In 1862, the receipts were 38,858,000 feet. In 1861, 56,554,000 feet—a decrease of 17,696 feet. The receipts of shingles in 1862 were 13,385,000, against 19,601,000 in 1861—a decrease of 6,216,000. Of lath, the receipts were, in 1262, 3,950,000; in 1861, 2,823,000.

The arrivals of salt during the season of 1862 comprised 137,167 bbls., 5,019 sacks, and 240 tons in bulk—equal in the aggregate to 144,109 bbls., against 137,596 the previous year. The market was not supplied fully, and all but 5,000 bbls Syracuse, was of domestic origin. The products of Saginaw were 240,000 lbs., but none of it reached Milwaukee.

The receipts of pork were 6,957 bbls., and the shipments, 56,434. Of beef, the receipts were 1,602 bbls., and the shipments, 33,174 bbls., and 3,217 trcs. Lard, received, 2,067 lbs. and 26,224 lbs.; shipped, 6,751 trcs., 12,986 bbls., and 1,160 kegs. Tallow, received, 803 bbls., and 82,008 lbs.; shipped, 4,750 bbls. Of bacon then were shipped 12,665 boxes. The exports of pork, beef, lard and bacon, compared with the shipments of the preceding year, show an increase of: 16,070 bbls. pork, 19,334 bbls. beef, 17,501 bbls. lard, and 3,948,825 lbs. of bacon. Reduced to pounds, the aggregate shipments in 1862 were 30,553,668, against 14,682,103 lbs. in 1861.

The receipts of highwines and whiskey in 1862 were 19,311; in 1861, 2,865; and in 1860, 26,368—about half of which in each year were manufactured at Milwaukee.

The receipts of coal in 1862 were 24,860 tons against, in 1861, 31,608 tons—a decrease of 6,708 tons.

Of rags, the receipts were 378,601 lbs., and 1,204 bales. An equal amount was probably received from local and other sources.

The imports of general merchandize are stated as follows:

Packages by lake	142,137
Tons "	198
Packages Hardware	28,389
Iron bars and bundles	91,941
Stoves No.	19,575
Nails kegs	63,429
" tons	100
Pig iron tons	1,178
Highwines, bbls.	9,724
Alcohol bbls	2,263
Packages of liquor	3,113
Salt, bbls	144,109

Of groceries, the receipts were: Sugar, 32,693 bbls., 4,376 hhds., and 421 boxes. Molasses, 6,507 bbls., and 149 hhds. Coffee, 11,155 sacks. Tea, 11,403 chests. Apples, 49,191 bbls. Oil, 10,172 bbls., and 318 casks.

The foreign trade was large. The amount of goods imported, under the reciprocity act was but $4,475 while the exports were $2,366,253, and the other imports paying duties at American ports were $13,481 00. No vessels cleared from Milwaukee for European ports during the year, although several had done so in previous years.

The Lake Commerce was large. The arrivals from Canadian ports were as follows:

American vessels	168	82,579 tons.
Canadian "	66	16,053 "
From American ports:		
Vessels	3,147	1,390,841 "
Total arrivals	3,381	1,489,478 "

The departures were for Canadian ports:

American vessels	183	81,585 tons.
Canadian "	78	21,584 "
For American ports:		
Vessels	2,995	1,389,206 "
Total departed	3,256	1,502,325 "

The number and tonnage of the lake craft trading with Milwaukie are thus stated:

Sailing Vessels.

Year.	No.	Tonnage.	Valuation.
1857	849	225,419	$7,599,700
1860	581	173,736	4,352,600
1862	851	355,101	8,356,470

Propellers.

1857	117	59,891	2,959,500
1860	77	43,390	1,690,900
1862	120	65,458	3,228,500

The vessels belonging to the District of Milwaukee were two steamships, each upwards of one thousand tons, four tugs, and one propeller of 209 tons—in all 2,546 tons, eight barks, eight brigs and one hundred and seven schooners the largest upwards of four hundred tons, in all, 26,480 tons.

The Railway system of Milwaukee comprises the Milwaukee and Prairie du Chien, the LaCrosse and Milwaukee, the Milwaukee and Western, the Milwaukee and Horicon, the Milwaukee and Chicago, and the Detroit and Milwaukee. The last is the direct route East from Milwaukee, and the fine Steamships Detroit and Milwaukee ply between it and Grand Haven on the Eastern Shore. Two propellers also ply during the winter. The Journal contains tabulated descriptions of all these railways, to which we refer our readers for further particulars.

There are in Milwaukee 361 wholesale and 516 retail establishments, six incorporated Banks with capital $1,050,000; specie $238,350 61; circulation $483,573.

Also nine private Bankers, but additional banking capital is needed. There are 219 manufacturers, the water power is abundant, building is rapidly extending and for architectural beauty, few western cities surpass Milwaukee; and the harbor is accounted the finest on the lakes and open at all seasons. Such is the picture which is presented us of the present condition of the city, and it stands among the first that now cluster on the shores of the great inland seas.

Utica and Black River Railroad.

We understand the surveys for the extension of the Black River Railroad have been completed as far as Martinsburg, both by the river and the village route. Careful estimates of the cost are now in course of preparation. It is to be hoped that the route will be fixed and work promptly commenced.—*Utica Herald.*

Central Ohio Railroad.

From the Report of the Receiver we have obtained the following statement of the earnings of this road for the years 1861 and 1862:

	1861.	1862.
Passengers	$278,187	$257,350
Freight	372,493	342,274
Mail	27,575	27,668
Express	21,460	21,549
Total	$699,716	$648,838
Decrease in 1862		$50,878

The receipts of the year were $717,598 01, including the balance on hand at the commencement of the year, and the balance on hand when the report was closed was as follows:—

Due from other roads	$46
Due from individuals	959
Due from United States for transportation	1,188
Due from bills receivable	9,973
Cash on hand	57,030
Total	$69,195

New York Central Railroad.

Workmen are now employed in grading the track for another line of rails between Churchville and this city, which, when completed, will form a double track between this city and Buffalo. It is reported that this work will be completed during the summer. There is already a double track between this city and Syracuse, with the exception of a short distance of ten miles, which will be finished at an early day.—*Rochester Dem.*

Great Railroad Scheme in South America.

We understand that Mr. Wm. Wheelwright of Newburyport, whose enterprise has so successfully developed the railroad capabilities of Chili, is at present urging forward the scheme of a railroad from Rosario, in the Argentine Provinces of South America, to Cordova, to connect the Atlantic and the Pacific. He has obtained liberal grants from the authorities of that country of lands, etc., and his English friends have issued proposals in London for subscriptions to the project, by a company with a capital of eight million dollars. The traffic of such a road would, it is stated, be very great.

Manchester and Lawrence Railroad.

The directors of this company for the ensuing year are: N. G. Upham, E. J. M. Hale, John Flint, N. G. White, Asa Fowler, E. H. Straw, Amos Tuck.

Property and Indebtedness of Detroit.

The following is a statement of the corporate property of the city of Detroit:—

Public budildings and markets	$179,000
Parks	104,000
Schoolhouses and lots	128,300
Fire department property	63,797
Water works	749,631
Real estate	2,709
Total	$1,227,428
Indebtedness.	
Municipal bonds	$339,968
Unpaid claims, 1862	1,857
Unpaid warrants, 1862	6,378
Total	$348,205
Less bonds in hands of commissioners of sinking fund and resources applicable to extinguishment of debt	52,808
Total	$295,397
Water bonds	650,000
School Board indebtedness	$20,846
Less balance due on uncollected taxes	18,651— 5,694
Total	$951,091
Value of property over indebtedness	276,337

Exports from Canada.

An abstract from the "Tables of Commerce and Navigation" showing the quantities and values of the domestic products and manufactures of Canada exported to foreign countries for each of the ten years ending ending 31st December, 1861. By Richard S. Fisher, M. D., *Editor of Colton's Atlas of the World, etc.*

CLASSIFICATION OF EXPORTS.

Official Years.	Products of the forest.	Vegetable food & products.	Animals & their products.	Products of the mines.	Products of the sea.	Manufactures.	Miscellaneous.	Total Value.
1852..	$6,578,339	$4,725,457	$1,183,719	$33,756	$297,849	$79,133	$107,501	$13,005,574

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending May 29, 1863, was as follows:

Passengers	$21,340 13
Freight and live stock	26,622 58
Mails and sundries	1,995 74
Total	$49,958 45
Corresponding week of 1862	41,883 88
Increase	$8,074 56

The earnings of the Grand Trunk Railway for the week ending May 23, 1863, were:

Passengers	$22,955 77
Freight and live stock	3,200 00
Mails and sundries	54,475 32
Total	$80,631 09
Corresponding week, 1862	70,616 80
Increase	$10,014 29

The earnings of the Chicago and Alton Railroad for the 4th week of May, 1863, were:

Passengers	$11,557 11
Freight	21,926 30
Sundries	974 33
Total	$34,457 74
Same week last year	30,626 19
Increase	$3,831 55

The earnings of the Galena and Chicago Union Railroad for the 4th week of May, 1863, were:

Freight	$48,452 76
Passengers	9,873 59
Mails	1,300 00
Total	$59,626 35
Same week, 1862	63,260 74
Increase	$3,634 39
For May, 1863	$166,156 88
For May, 1862	158,194 03
Increase	$7,952 85

Corrected earnings for the previous month, $136,601 18.

The earnings of the Illinois Central Railroad for the 1st week of June, 1863, were ..$97,846 00
Do., 1862 ..... 53,508 00
Increase $44,338 00

The earnings of the Michigan Southern Railroad for the 4th week of May, 1863, were ..$91,300 84
Do., 1862 ..... 61,483 41
Increase $29,817 43

The earnings of the Cleveland and Toledo Railroad for the 1st week of June, 1863, were $24,039 00
Same week, 1862 ..... 16,914 00
Increase $7,125 00

The earnings of the Detroit and Milwaukee Railroad for the 4th week in May were:

Passengers	$8,677 51
Freight and live stock	9,190 92
Mails and sundries	624 36
Total	$18,492 79
Same week, 1862	13,842 75
Increase	$4,650 04

☞ The machine shops of the Atlantic and Great Western Railroad, to be built at Meadville, are to be erected of stone, on the upper end of the island, and will cost, it is said, nearly $300,000.

FEDERAL, STATE, COUNTY, AND CITY SECURITIES.

American Railroad Journal.

Saturday, June 13, 1863.

Stock Exchange and Money Market.

The activity in the Stock Market has been of a down hill character since our last issue. A panic was almost at hand, when gold went down on Tuesday to 142 and few takers, and exchange was languid after dropping from 1 to 2 per cent. on recent prices. It is said the bears have preponderated under the influence of our successes in Louisiana and on the Mississippi, having for the nonce found it to their advantage to rejoice at our victories and to growl over our defeats. The bulls who have been really the best friends of the Government, find they can toss nothing higher than it has already gone, and will be obliged to alter their tactics, in conformity with the events which are reducing values to a peace standard. Harlem fell in a few minutes full ten per cent. on Tuesday last, and those parties who bought in at 112 find little profit on their speculations. It is utterly impossible for this stock to retain its present rates, unless the company succeed in laying down its rails through Madison Avenue to the Central Park, through Broadway to the Bowling Green, unite with the Housatonic at Kent, and extend its lines from Chatham to Albany, and cross the bridge to that city.

Without these improvements no dividends may be expected for years to come. Many other really valuable stocks sympathized with the tone of the market, as will be seen by reference to our tables. In the meantime the Treasury is growing stronger. It has become quite a passion to invest in Government securities, under the general belief

that they are the strongest in the market, and the farthest from insecurity in the end. The interest is regularly paid in gold, while the dividends on all other investments are paid in paper, at nearly fifty per cent. discount. This fact, has no doubt, much to do in deciding the public to prefer the 5 20's and Government certificates. The balance in the Treasury on the 1st of July will be about thirty millions of dollars. A general impression prevails abroad, that the North is to be finally successful. The *London Times* complains bitterly of the North for continuing to be prosperous and cheerful, and the *London Daily News*, which has in its issue of May 19th, a long and carefully written editorial on "The Situation," concludes with this remark. "Upon the whole, therefore, it appears that so far from the North having any reason for despondency, the result of the struggle has been distinctly in their favor, and is daily becoming more so." When the fall of Vicksburg and Port Hudson shall have been announced, it will clearly be perceived abroad as is now well understood amongst ourselves, (we use the words of the *London Daily News* in the article already quoted,) that "the only States which now remain in the undisputed possession of the Confederates are the two Carolinas, Georgia and Alabama."

Another element is commercially working in our favor. Cotton is no longer king, and being dethroned is become a loyal subject of the Union. The number of bales already arrived at New Orleans since the expedition of Banks, is upwards of 10,000, and the arrivals are at the rate of five and six hundred per day. It is also ascertained that parcels in various places have been secreted, in some amounting to six thousand, which are awaiting a favorable opportunity to reach the same port. A large number of vessels loaded with the article have also been recently captured by our cruisers; forty-three vessels having fallen into their power within the last month. Such operations must tell strongly on the approaching result.

The Chicago Ship Canal Convention adjourned without practically effecting anything of the least value. The project of widening and deepening the Erie Canal was actually smothered under the load of other propositions of less cost and equal plausibility. Certainly a canal around Niagara Falls, which can be cut within a short time, and at a very moderate expense, deserves a preference at this moment over every other. This will give almost free navigation between Chicago and Ogdensburg, and unlimited scope for the employment of large vessels. If to this, is added the enlargement of the Chambly and Champlaine Canals, we shall have a continuous navigation for large vessels between Chicago and New York. The lockage on the last named routes will be comparatively trifling, not requiring more than fourteen locks of ten feet lift. Our expressed preference of the route between Lakes Erie and Ontario by the way of the Tonawanda and the Eighteen mile Creek has called forth the criticisms of parties of influence residing on the Niagara river, who contend that Lewiston offers the best possible harbor for vessels passing through the proposed ship canal. We do not dispute this, but it is liable to the objection that it would expose our communications to the fire of land batteries on the British side, and to endless disputes as to jurisdiction. It would also facilitate smuggling, while the harbor at Eighteen mile Creek could never be endangered by an enemy's fortifications. Any attack on it would have to be made by shipping, which we could resist by fortifications as well as our own iron clads, and in either case we might reasonably count on being successful.

All the accounts of the Chicago assemblage concur in declaring it a complete failure, and when we know the machinery and the motives which were at work to bring it about, we are not surprised at the result.

We now think the friends of the two projects we favor, should call a convention at Albany to take steps to promote them, and bring them before the next Legislature. The State of New York is fully able to construct both the Niagara Falls and the Champlaine Ship Canals, and it is her true interest not to use, or even ask for a cent of the public money for the purpose. It would be a dangerous thing to have any canals within our own territory, owned even indirectly by the U. S. Government or any of the Western States. It would tend to perpetual disturbances, create a conflict of jurisdictions, and embroil us with the Western States. We are astonished that this view of the subject was passed over by the speakers at Chicago.

The Money Market is said to have been stringent the last week. We can well believe that speculators whose margins were decreasing every day might have felt a pinch, or those who were operating largely on a small capital, were in a tight place, but we imagine that money is not scarce, nor is likely to be for those who are engaged in regular or legitimate transactions.

The following statement shows the great extent of the navigation of the lakes. It is compiled from the Marine Register for 1863, just issued by the Board of Lake Underwriters:

Steamers	134
Propellers and tugs	253
Barques and barqueantines	191
Brigs and brigantines	79
Schooners	1,030
Sloops	14
Barges	60
Total	1,704

The Chemung Railroad Company have declared a dividend of 3 per cent.

The Trustees of the Illinois and Michigan Canal will pay a dividend of 5 per cent. on the principal of the registered canal bonds, at their office, No. 54 Fulton street, on July 1.

The State Treasurer of Michigan gives notice that State bonds, Nos. 1 to 50 inclusive, dated 1st July, 1858, will be paid on the 1st July at the Metropolitan Bank.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Galena and Chicago Railroad.

At a meeting of the Board of Directors of this company held at Chicago on the 4th inst., William H. Brown was elected President, and Orrington Lunt Vice President. The following compose the Executive Committee: Orrington Lunt, John Wentworth, Geo. Watson, and E. K. Rogers.

Hudson River Railroad.

At the recent annual meeting of the shareholders of this company the following board of directors was elected: Samuel Sloan, James Boorman, John David Wolfe, Edward Jones, William Kelly, D. Thomas Vail, M. H. Grinnell, Leonard W. Jerome, William R. Travers, Paul S Forbes, James T. Sanford, John M. Tobin, and Addison G. Jerome.

At a subsequent meeting of the new Board, Mr. Samuel Sloan was re-elected President and Mr. D. T. Vail, Vice-President. Mr. Boorman having declined to serve another term in the management, for reasons personal to himself, which he briefly stated to the Board, Mr. Francis Skiddy was made a Director to take his place.

The following resolutions of the Board, appre-

ciative of the past services of the President and Superintendent were unanimously adopted:

Resolved, That the thanks of the Board are eminently due and are hereby tendered to the Hon. Sam. Sloan, for his faithful and successful management of the finances of this Company, and for the untiring energy and devotion to its interests, exhibited in the general mangement of the operations of the road, to which we are largely indebted for our present prosperous condition.

Resolved, That the thanks of the Board are hereby tendered to Mr. A. F. Smith, Superintendent of the Road, for the exercise of his great mechanical skill in the service of the Company, and especially for his successful improvement in the mode of adapting wood-burning engines to the use of coal, and for his valuable improvements in coal-burning engines, whereby great savings have been effected to the Company.

Northern, N. H., Railroad.

The directors of this company chosen at the Annual Meeting on the 4th inst., consist of Onslow Stearns of Concord, John A. Burnham of Boston, George W. Nesmith of Franklin, Uriel Crocker of Boston, Josiah Minot of Concord, Joseph W. Clark, and George A. Kettell of Boston.

New York and New Haven Railroad.

The income of this company for the year ending March 31, 1863 was:

From passengers	$801,754 18
" freight	166,614 78
" mails, expresses, extra baggage, and interest on loans	68,068 81
	$1,036,437 77

And the expenses were:

Transportation expenses	$222,302 91	
Repairs of roadway, &c	109,535 84	
" " equipment	137,069 61	
Fuel, oil and waste	83,880 62	
Haulage by horse-power	29,552 60	
		582,341 58
Leaving, as earnings on transportat'n		$454,096 19

The resources of the year, and the disposition of the same, have been as follows, viz:

Cash on hand, April 1st, 1862	$118,643 28
Mortgage bonds, sold at par	110,000 00
Increase of accounts payable	73,276 45
Earnings on transportation business	454,096 19
	$756,015 92
Coupons for the year	$129,120 00
Loss, operating Canal road	20,349 34
Dividends paid during the year	360,000 00
Increase of materials on hand	2,257 14
Wharf extension at New Haven, less $600 received for gravel pit sold	183 66
Engine, baggage car, and 2 passenger cars less old engines and car sold in exchange	2,089 94
Cash on hand, April 1st, 1863	242,015 82
	$756,015 92

It will be observed that four dividends, of 3 per cent. each, were paid during the past year, up to April 1st, 1863; but of these, two were paid from the earnings of previous years. By the preceding Annual Report, it will be seen that one dividend was passed over that year, and a cash surplus therefor remained in hand of more than $60,000, which was soon after increased by the sale $110,000 of Mortgage Bonds, at par, disposed of to replace so much of the earnings of a former year (1860), used towards retiring an old issue of Bonds maturing at that time. The last two dividends paid were made from the earnings of the past year, still leaving sufficient means for one further dividend, which has been declared and paid since this Report was made up.

The result of the year's business, as by itself, is as follows, viz:

Earnings as above		$1,036,437 77
Expenses		582,341 58
Profits		$454,096 19
Canal road loss the year	$20,349 34	
Coupons payable	129,120 00	149,469 34
Leaving applicable to dividends		$304,626 85

The expenses amounted to 56 3-10ths per cent. of the Receipts, and the Earnings applicable to Dividends amounted to 10 1-6 per cent. nearly on the Capital Stock.

The improvement noticed in the last Annual Report, as then beginning to show itself, continued throughout the year; the largest increase being from the 1st of July last, and resulting in a gain of more than twenty-five per cent. over the previous year, and the largest business of the Company since its organization; while the per centage of expenses for the year, as will be noticed, is somewhat reduced from that of previous years. We are led to suppose, from present indications, that the volume of business may not be much disturbed the coming year; but, in this connection, it is proper to state that the passenger and dividend tax of three per cent., and the enlargement of State taxes on the increased valuation of the Stock of the Company, (now amounting, in all, to about $50,000 per annum more than heretofore), together with the rapid advance in materials used and labor required, necessarily increase our expenses, and may demand a correspouding increase in rates of traffic.

In conformity with the vote at your last annual meeting, the Board has disposed of $110,000 6 per cent. mortgage bonds, and thereby withdrawn this sum from the previous surplus earnings, making the same available for dividends. Under this action the present Bond Account of the Company now stands at $2,000,000, viz:

7 per cent Bonds due Dec. 1st, 1866	$912,000
6 " " Mortgage Bonds, due Oct. 1st, 1875	1,088,000
	$2,000,000

The litigations in relation to the fradulent stock issued by Robert Schuyler remain in very much the same condition as at the date of the last Report. The "Omnibus" suit is on the calender for the present May Term of the Supreme Court, and may perhaps be heard. A confident opinion is entertained by the Counsel of the Company, that the judgment confirming the separation of the spurious from the genuine stock will be affirmed. A considerable number of additional suits have been commenced in the Courts of New York and Connecticut, for damages by reason of alleged negligence, growing out of those frauds, but none of these have yet been brought to trial. The case of Woodruff & Henning against the Company, in the Superior Court in the City of New York, which directly involved that question, and in which it was decided, at the Special Term by Judge Woodruff and at the General Term before a full Bench, that the Company was not liable, has been appealed to the Court of Appeals by the plaintiffs; but owing to the crowded state of the Calendar of that Court, it has not yet been reached for argument. The Directors have no reason to doubt that the pending suits will be equally unsuccessful to the parties bringing them, with those already prosecuted.

The number of miles run by passenger trains during the year was 418,743; by freight trains, 97,024; by service trains, 3,043—total, 518,810. Number of passengers carried, 1,174,171; do carried one mile, 41,348,675. Tons of freight moved, 74,707; do., moved one mile, 4,429,874. Number of passenger trains, 6,372; average cars per train, 5½. Number of freight trains, 1,252; average cars per train 11½. Average weight of passenger trains loaded, 130 tons; do. freight trains, do., 175 tons. Average receipts per passenger per mile, 2.15 cents; per ton of freight, 4.09 cents. Of the passengers carried, 864,856 were local, and 309,315 to and from other roads; 579,959 were passengers over the Harlem railroad; 264,904 commuters over do.; and 329,308 passengers beyond do. Of the freight moved, 29,111 tons were local, and 45,596 tons to and from other roads.

The equipment consists of 28 locomotives; 74 passenger, 16 baggage and mail, and 317 freight cers—of which, 6 locomotives, 6 passenger, 3 mail and baggage, and about 150 freight cars are used to operate the Canal road.

The cost of fuel for running the trains the past year has been 14.43 cents per mile—or about 15 per cent more than for the preceding year. Tons of coal used, 8,450; cords of wood, 1,848; cords of kindlings, 801.

The number of miles run by engines on the Canal road, was 92,541. Tons of coal used, 234; cords of wood, 2,435; cords of kindlings, 38.

The earnings of the Canal road were $128,516 83, and the expenses, $148,866 17—loss $20,349 34. Last year the loss in operating this was $40,675 48.

Condensed Balance Sheet.

Railroad; including the Franchise, Right of Way, Grading, Masonry, Bridging, Fencing, Superstructure, Iron, Station-Houses, Shops, Fixtures, Furniture, Machinery, Engineering, Agencies, Interest, Discount on Bonds, &c. &c.		$4,643,832 84

New York Canals.

The quantity of flour, wheat, corn and barley left at tide water, from the commencement of navigation to the 31st of May, inclusive, during the years 1862 and 1863, was as follows:

	Flour, bbls.	Wheat, bush.	Corn, bush.	Barley, bush.
1862	127,000	4,520,800	1,323,300	301,901
1863	130,700	2,625,000	3,221,300	46,600
Inc	3,700	*1,895,200	1,900,500	*255,300

*Decrease.

By reducing the wheat to flour, the quantity of the latter left at tide water this year, compared with the corresponding period of last year, shows a deficiency equal to 375,340 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide water, from the commencement of navigation, to and including the 31st of May, in the years indicated:

Canal open—	1861. May 1.	1862. May 1.	1863. May 1.
Flour, bbls	81,300	127,000	13,700
Wheat, bush	3,042,900	4,520,800	2,625,600
Corn	2,060,200	1,323,600	3,224,300
Barley	95,200	301,900	46,600
Oats	700,000	460,200	1,327,000
Rye	34,400	167,500	42,800
Beef, bbls	100	4,493	4,607
Pork	1,102	54,687	121,807
Bacon, lbs.	800	2,876,300	908,800
Butter	35,200	17,300	5,700
Lard	13,300	1,483,000	9,284,700
Cheese	91,900	326,400	325,700
Wool	4,400	.....	1,800

Report of the Commissioners of Emigration.

From the Report of the New York Commissioners of Emigration, made to the Legislature, we learn that the whole number of passengers landed during 1862 was 105,385. Of these, 29,097 were citizens, or persons not subject to bonds or commutation, and 76,306 were aliens from whom commutation was paid or bonds executed, showing an increase in alien emigrants of 10,777 over 1861, and being 28,856 less than in 1860, 3,016 less than in 1859, 2,283 less than in 1858, and 107,467 less than in 1857; while the proportion to the average of former years, since 1847, is much less than half. Of these emigrants, 32,217 were from Ireland, 27,740 from Germany, 7,975 from England, and 8,874 from other countries.

The number of destitute foreign emigrants landed at this port who were relieved, forwarded to their destination and furnished with employment during the last five years, is 16,558.

The whole number of inmates in the hospital and in the other department, during the year, was 3,247, being 1,832 less than in 1861, and 1,482 less than in the year preceding. The average weekly number at any one time was about 637. The net cost of support of the Emigrant Hospital and Refuge was $46,740 40, being $9,097 less than in 1861. $12,769 less than in 1860, $8,746 less than in 1859, $30,099 less than in 1858, and $62,701 less than in 1857, amounting to considerably less than one half the expense of that year, and one fourth the expenses in 1855, or in several preceding years.

The average yearly cost of support was about $72 44 a head, being about $10 78 per person more than in 1861, but $9 less than in 1860. Deducting salaries for doctors, officers, and other employees, it amounts to $48 13 for each indivi-

dual per annum. Of the 637 persons supported on Ward's Island, 375 were patients in the Hospital, and 262 were inmates of the Refuge Department. The entire cost last year was $1 39 a head per week.

On the 31st December, 1862, there remained 655 inmates against 716 at the same time in 1861.

The number receiving medical or surgical aid was 2,445 cases treated in the Hospital, against 6,147 in 1856, 6,893 in 1857, 5,067 in 1858, 3,668 in 1859, 3,864 in 1860, and 4,129 in 1861.

By comparison with former years, it is shown that the number of steamers landing passengers at Castle Garden has increased from 22, bringing 5,111 passengers in 1856, to 109, bringing 34,247 passengers in 1860; to 95, bringing 21,110 passengers in 1861, and to 100 steamers, bringing 25,843 passengers in 1862.

The number of persons who landed at Castle Garden was 81,458, arriving in 470 vessels, from 13 different ports.

None of these vessels were overcrowded with passengers, the average number in each vessel being 173. Of these, 38,312 reported their intended destination to be the State of New York; 7,599 Pennsylvania and New Jersey; 6,519 to New England; 2,333 to the Southern States; 19,819 the West; and 6,885 to Kansas, Nebraska, Canada, &c.

The receipts of the Commission during the year 1862 amounted to $174,354 29, includiog commutation money received from owners and consignees of vessels for alien passengers, $151,286; interest on $50,000 7 3-10 Treasury notes, with premium on gold added, $1,850 09; for rent of Castle Garden, $7,500; compromise of special bonds, $8,400 42, etc.

The aggregate expenses were $138,524 56. The balance remaining on hand January 7, 1863, was $17,744 78.

The indebtedness at the close of the year 1861 was $141,716 84, while at the close of the year 1862 it is $103,462 09.

The number of aliens arriving at this port since 1847, has been as follows:

Year.	Number.	Year.	Number.
1847	129,962	1855	136,328
1848	189,176	1856	142,342
1849	220,791	1857	183,773
1850	212,603	1858	78,589
1851	289,601	1859	79,322
1852	300,992	1860	105,162
1853	284,945	1861	65,529
1854	319,223	1862	76,306

NEW YORK, HARLEM & ALBANY R. R.

CHANGE OF TIME.

SUMMER ARRANGEMENT, commencing MONDAY, May 18, 1863, Trains will leave Twenty-sixth street Depot:

For Albany—10.30 A. M., stopping at Williamsbridge, White Plains, Bedford, Croton Falls, and all stations north to Chatham, Chatham Centre, Kinderhook, and Schodack, connecting with New York Central R. R. for all points west, and with the Northern R. R. for Saratoga and all points north.

For Croton Falls—8.15 A. M., stopping at all stations.

For White Plains—8.15, 10 A. M., 2.30, 4.10, 5 P. M., stopping at all stations.

For White Plains, 6.15 P. M., from White Street Depot.

For Dover Plains—4 P. M., stopping at White Plains and stations north to Dover.

For Williamsbridge—8.15, 10 A. M. 2.30, 4.10, 5, 6.15 and 8.30 P. M., stopping at all stations.

RETURNING WILL LEAVE

Albany—9.10 A. M. on arrival of Northern and Western Trains, stopping at all stations from Chatham to Croton Falls, also Bedford, at White Plains, and Williamsbridge.

Dover Plains—5.45 A. M., stopping at all stations north of and at White Plains.

Croton Falls—5 P. M., stopping at all stations.

White Plains—6.10, 7, 8.20 A. M., and 12.30, 4.15 P. M., stopping at all stations.

Williamsbridge—5.30 A. M. stopping at all stations.

JOHN BURCHILL, Superintendent.

AN INVALUABLE POCKET GUIDE
FOR THE ENGINEER AND MECHANIC!

THE

Mechanic's & Machinist's
PRACTICAL
BOOK OF REFERENCE

Containing Tables and Formulæ for use in Superficial and Solid Mensuration; Strength and Weight of Materials, Mechanics, Machinery, Hydraulics, Hydrodynamics, Marine Engines, Chemistry, and Miscellaneous Recipes. Adapted to, and for the use of all classes of Practical Mechanics. Together with the

Engineer's Field Book

Containing formulæ for the various methods of Running and Changing Lines, Locating Side Tracks and Switches, etc. Table of Radii and their Logarithms. Natural and Logarithmic Versed Sines and External Secants, Natural Sines and Tangents to every Degree and Minute of the Quadrant, and Logarithms of Natural Numbers, from 1 to 1,000.

BY CHARLES HASLETT,
Civil Engineer.

EDITED BY CHARLES W. HACKLEY,
Professor of Mathematics in Columbia College, in New York.

Issued in a compact pocket volume of 520 pages, containing 176 diagrams, bound in morocco, pocket-book form, PRICE TWO DOLLARS. *Copies mailed free of postage on receipt of price.*

The work is eminently a PRACTICAL **POCKET GUIDE** to ALL CLASSES OF **Mechanics** and **Engineers.** As a book for practical use in field work, it is confidently believed that this is more direct in the application of rules and facility of calculation than any work now in use. The original portion of this part of the work is submitted to the profession, fully confident that its use will be practical proof of its superior merits.

The tables and examples have been prepared with great care, and their accuracy may be relied upon. Further information can be derived from the circular containing the contents in full, which will be sent on application to the publisher. Inducements are offered to clubs of six or twelve, for particulars of which also apply to publisher,

THE FIRM OF W. R. TRAVERS & CO. is this day dissolved by mutual consent. Either partner is authorized to sign the name of the firm in the liquidation of the business.

W. R. TRAVERS,
S. F. MASSETT.

Dated NEW YORK, May 1, 1863.

LIMITED PARTNERSHIP.

Notice is hereby given that the undersigned, JENKINS VAN SCHAICK, STEPHEN F. MASSETT, WILLIAM R. TRAVERS and GEORGE A. OSGOOD, all of whom reside in the city of New York, have this day formed a limited partnership pursuant to the provisions of the first title of the fourth chapter of the second part of the Revised Statutes of the State of New York, and the various acts of the Legislature amendatory thereof.

That the name of or firm under which the said partnership is to be conducted, is VAN SCHAICK & MASSETT.

That the general nature of the business to be transacted is the Stock Exchange and Brokerage business, and all financial transactions connected therewith, on commission. That the said JENKINS VAN SCHAICK and STEPHEN F. MASSETT are the general partners, and that the respective places of residence of the said general partners, are as hereinbefore stated, and the business of the said partnership is to be carried on in the City of New York. That each of the said special partners has contributed, as capital to the common stock of the said partnership, the sum of fifty thousand dollars. That the said co-partnership commences the first day of May, one thousand eight hundred and sixty-three, and will terminate on the first day of May, one thousand eight hundred and sixty-eight.—Dated NEW YORK, May 1, 1863.

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of SMITH'S AIR LIGHT FOR RAILROADS, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 28, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.
In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.
You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

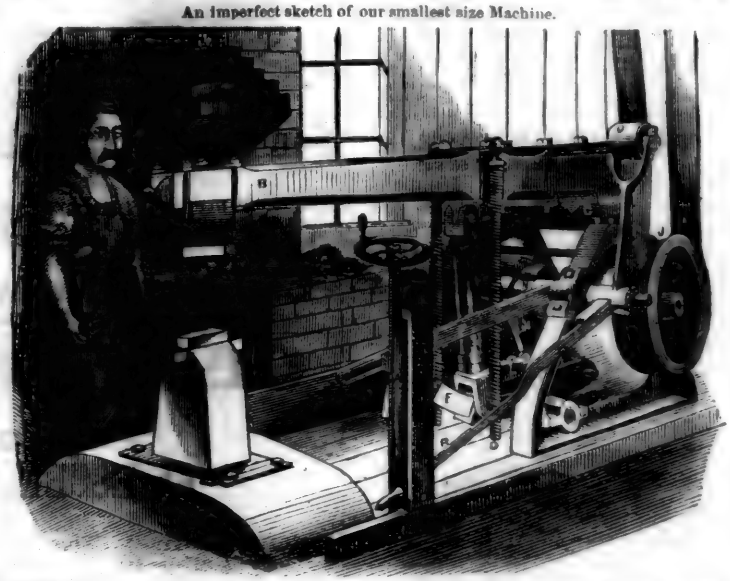
NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.



300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, 21 Nassau st., or by addressing

CHAS. W. WELSH,
Secretary.

AMES IRON WORKS,
OSWEGO, N. Y.,
SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.

An imperfect sketch of our smallest size Machine.

PAYE'S PATENT FORGE HAMMER. A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 422, New York, or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Crampton, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Knight's Point, Phila.; Mallory & Cottrell, Mystic, Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Guinness, Albany; Sweet Brothers, Syracuse.

FOX LATHES.
F. W. BACON & CO.,
No. 28 PLATT, corner of GOLD ST.,
NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. GEO. H. FOX & Co., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT REOILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downward is beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Picket's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years with uniform success, they confidently offer their services to those requiring such aid.

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS**, etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.

Address **HENRY RUTTAN,**
Coburg, Canada.

American Railroad Journal.

New York, Saturday, June 20, 1863.

Rochester and Genesee Valley Railroad.

The annual meeting of the stockholders in this company was held at Rochester on the 12th inst., at which the following gentlemen were elected directors for the ensuing year: Nathaniel Marsh, John Arnott, Charles Minot, D. B. Eaton, John D. Cameron, A. S. Divin, Henry Martin, Charles G. Miller and Isaac Hills.

The city directors are: N. C. Bradstreet, H. S. Hebard, L. C. Spencer, and Philip Kirley.

The Board organized by electing Charles G. Miller President and John Arnott Vice President.

It appeared by the reports presented that for the year ending June 1st, the earnings of the road were $55,000 of which 48 per cent go to the company under the conditions of the lease making its receipts $26,436 80.

The receipts of the year were $24,509 32. The expenditure $23,668 66.

There has been a steady increase in the earnings of this road. Last year the total was $43,956 52.

The Treasurer Mr. Hills, states that there are $5,000 due the company, which will nearly pay off the existing debt. It has the annual interest to pay on bonds for $150,000, but no other debt.

The lease of the road has been transferred from the Buffalo, New York and Erie Company to the Erie Railroad Company, and the latter now operate it in connection with that road.

Sandusky, Mansfield and Newark Railroad.

At a special meeting of the Directors of this road, held in Sandusky, on the 9th inst., C. L. Boalt, was elected President, and J. H. Stewart, Superintendent. The *Register* says: "Mr. Boalt has had considerable experience in railroading, and is understood not only to be thoroughly posted in the project which occupied Mr. Durbin at the time of his death, but to be altogether favorable to its consummation. Mr. Stewart has been for some time the excellent Assistant Superintendent of the road, and is therefore fully qualified for the performance of the duties of his new position. Under this partially new administration, we hope for an enlarged and constantly increasing prosperity."

Illinois Central Railroad.

The earnings of this road for the last eight months—from October 1st, 1862, to May 31st, 1862, to May 31st, 1863—show an extraordinary increase over the corresponding months of 1861-2. Within the period named, the earnings of the traffic department have amounted to $2,526,230; in the same months of the previous year, $1,767,441; increase $768,810. The sales of land since October 1st, 1862, amount to $1,174,961, and the collections to $719,717. In the period of eight months, commencing October 1st, 1861, the sales of land were $712,440, and the collections $181,098, from which figures we find there has been an increase of $462,521 in sales, and $528,619 in collections.

Boston, Hartford and Erie Railroad.

The Connecticut House of Representatives has passed a bill incorporating the Boston, Hartford and Erie Railroad Company. The bill, says the Hartford *Press*, is a very important one, providing for a through line of Railroad from Boston, via Thompson, Willimantic, Hartford and Waterbury, to Fishkill, connecting with the Erie Railroad. The capital is to be $10,000,000, with the privilege of increasing to $15,000,000. The company may buy up any or all the lines of railroad on the route, absorbing all in one great company. The company is also bound to organize and expend $2,000,000 in construction before July 4, 1866, or forfeit its charter.

Portland, Saco and Portsmouth Railroad.

The annual meeting of this corporation was held at North Berwick, Me., on the 6th inst. The report of the directors for the year ending May 31, 1863, was presented, read and accepted. It shows the earnings the past year to have largely increased over those of the preceding year, while the expense has not proportionately been increased. The income from all sources was $283,196,791, and the expenditures, including dividends and taxes, $205,703.48, leaving a surplus of $77,492 31. The road is in excellent condition, as are all the appointments, and the expenses required the coming year will be heavier than last on account of the higher prices of labor and material.

The subject of the payment of dividends to the stockholders in gold or silver coin of the currency of the United States, as stipulated in the contract of lease with the Eastern and Boston and Maine Roads, was, after some discussion, referred to a committee, with direction to investigate the matter and report to the Directors.

The directors elected are: Ichabod Goodwin, George M. Browne, I. M. Spelman, Charles E. Barrett, Nathaniel Hooper, Edward P. Bancroft, George W. Burleigh.

☞ The sale of the Minehill and Schuylkill Haven and Lehigh River Railroad to the Reading Railroad, has been ratified by the stockholders in both Company's. The Miner's *Journal* says: "All the stockholders in the Minehill Railroad Company can exchange their stock at the rate of $66⅔ per share in the bonds of the Reading Railroad Company, to run fifty years, and in the Schuylkill Navigation Boat Loan Trust, in the following proportions—$59⅔ in the bonds of the railroad company, and $7 in the bonds of the Boat Loan Trust. The stockholders in the Schuylkill Haven and Lehigh River Railroad, who have paid up their stock, have the option of having it converted as above, or $10 per share returned to them in cash and the balance of $10 per share convertible into the above mentioned bonds in the same proportions, at the rate of $26⅔ per share. As the stock and bonds of the Reading Railroad Company are considerably above par, the stockholders of these companies cannot do better than to avail themselves of this offer. This arrangement will put nearly one and a half millions of dollars into the pockets of the stockhold-

ers of these two companies; and under all the circumstances we consider it an excellent purchase so far as the interests of the Reading Railroad Company are concerned."

Philadelphia, Wilmington and Baltimore Railroad.

We have received the report of this company for the fiscal year ending October 31, 1862, which was presented at the annual meeting of the company held at Wilmington, Del., on the 12th of January last. The gross earnings of the road during the year were:

From passengers		$1,645,024 83
" freight and express		506,350 25
" rents		16,268 04
" mails and miscellaneous		55,936 62
		$2,223,579 74
Add earnings of New Castle and Frenchtown line		27,282 81
Total for both roads		$2,250,862 55
The expenses were:		
Repairs of road	$154,319 68	
" bridges	16,430 42	
" locomotives	29,653 14	
" cars	24,509 49	
" buildings, etc.	16,452 59	
Passenger department	101,683 44	
Freight "	89,052 29	
Ferries	25,587 25	
Wood and coal	55,815 49	
Oil, waste, etc	9,763 65	
Taxes and insurance	15,006 20	
Office exp., salaries, etc.	37,094 30	
Switchmen, watchmen, etc.	18,873 31	
Telegraph	9,676 08	
Rents	6,491 18	
Law expenses	5,486 09	
Casualties, gratuities, etc.	11,570 18	
Miscellaneous	22,355 83	
New work, as below	325,636 76	
Operating New Castle & Frenchtown line	16,993 13	
Taxes and bonus to the State of Delaware and Newcastle County	11,000 00	
Add loss in operating Delaware railroad	23,438 49	
		1,026,387 99
		$1,224,474 56
Interest on bonded debt, ground rents, etc., less interest received		143,479 39
Leaving net revenue		$1,080,995 17
From this two dividends have been paid:		
One in April of 4 per ct.	$224,000 00	
One in October of 5 per cent. and National tax	289,639 17	
		513,639 17
Leaving		$567,356 00
Appropriations to Sinking Fund		43,666 67
Leaving an actual surplus of		$523,689 33

A considerable portion of this surplus is due from the United States Government.

A comparison of the past with the preceding year, shows an increase in the gross earnings of both roads of $733,877 74; with an increase in expenditures of $328,366 37—making the increase in net revenue $405,511 37. It also shows a net result after dividend of $253,872 20 more than in 1861, besides an excess of $228,592 14 in improvements, or a total result of $482,464 34 in surplus and improvements more than in 1861.

Besides the ordinary operating expenses, the following amounts have been expended for substantial additions to the means and the value of the road:

15.062 miles of double track and additional track, costing, with grading and masonry	$126,611 29
7 new locomotives	63,793 76
2 new mail passenger cars	3,042 82
136 new freight and market cars	77,527 83
New stations, buildings, etc	33,033 25
Susquehanna bridge	6,016 06
Addition to depot land on 16th street Philadelphia	15,611 76
Total	$325,636 76

The number of miles run by locomotives during the year burning coal was 446,144; do., burning wood, 136,471—total, 582,615, against 439,780 in 1861, an increase of 142,835. The cost of new work and improvements per mile run by locomotives has been 55.9 per cent. The ratio of expenditures to earnings has been only 43.8 per cent. The ratio of expenditures for additions and improvements, to earnings, was 14.6 per cent. deduct this from the whole expenditures, and it leaves a ratio of 29.10 per cent only for operating expenses. The year which this report embraces shows the largest amount of work ever done on the road. Much of this work was done for the government at reduced rates, the trains earning money only in one direction. Had the business been equal in both directions, the ratio of expenses would have been much smaller and the net earnings much larger.

The following will show the items of new work and renewals on the road, and the position of the same:

At Baltimore a new platform and roof has been attached to the south side of the depot. At Edgewood, a new passenger platform has been built; and at Magnolia, the old one thoroughly repaired. Both the Bush and Gunpowder bridges have been repaired; at Gunpowder, the draw, which was burned in 1861, has been rebuilt. At Perryville and Havre-de-Grace ferry, the drops on both sides of the river have been entirely rebuilt and strengthened by the use of iron plates between chord timbers, and increase of size of both timbers and truss rods. The dock at Havre-de-Grace has been put in thorough repair, and a new passenger platform built outside of the old depot. At Iron Hill, the road bridge has been rebuilt. New platforms required by second track have been built at Newport, and the necessary repairs made to the old ones. The road bridge at Strand's Crossing has been rebuilt. The old engine house at Wilmington has been taken down, and a new and much larger one constructed, of a capacity for 21 engines, exclusive of two stalls to be used for a boiler shop. An iron turntable is attached, and also a building to be used as an oil room, pattern room and tool house for road department. A wharf has also been built, including a dock for loading timber; also, a new frame car house, having two tracks 300 feet in length. Arches have been placed in all three spans of Brandywine bridge, and the draw pier rebuilt. The Shellport bridge has been entirely rebuilt, and the trestles extended for the second track. Marcus Hook bridge has been temporiarily rebuilt by trestle work. The Chester road bridge at Thurlow, has been rebuilt, and the farm bridge below removed. Span No. 1 of the Darby bridge has been shortened two pannels by building a new abutment at the line of river dike and a culvert on the inside; span No. 2, strengthened by arches, and the draw span entirely rebuilt. The east end of the railroad draw of Gray's Ferry bridge has been entirely rebuilt, and all necessary repairs made to the railroad side of the bridge. A frame house for six engines has been added to the old engine house at Broad and Prime streets, Philadelphia, and a frame freight house built north of the passenger depot. A new iron turntable has been placed and an entire new arrangement of yard tracks commenced. A new freight platform on the wharf at Southwark, south of the passenger depot, and the freight house extended about 15 feet. About 15 miles of second track have been laid, and nearly 26 miles of main track renewed. All culverts between Gray's Ferry and Darby bridge have been extended and repaired as required for the double track, and the necessary additional platforms have been built at Bell road and Gazaretto.

From the foregoing it may be inferred that the road and its fixtures have not been allowed to depreciate. The old road is presented to the stockholders, this year, in all respects as good and efficient as last year, besides all the substantial and valuable additions made during the year—all of which has been done out of the earnings.

There remains, however, much to be done in the future, if the business of the road continues to be nearly what it is now. Among the work to be done may be enumerated a double track to be continued to, and a bridge across, the Susquehanna river; eight or ten miles of double track between the Susquehanna river and Baltimore; extension of depots at Baltimore; a new freight house and engine house, and extensive additional yard tracks at Philadelphia; besides this company's proportion of new through passenger, mail and baggage cars between New York and Washington. When these additions are made, there can be no more efficient and better equipped road in the country than this, and the route of which this a part, between, New York and Washington, with the improvements proposed on this and the other roads, can defy all competition.

The contract system, which has been in operation on this road for several years, and resulted in great saving in expenses has been given up for this year in most of the departments, because the prices of the principal articles used in operating the road has so rapidly increased, and were so uncertain as to the future, that it was deemed more for the interest of the company to take the risk of future prices, than to pay an amount for the service by contract which would cover all the risks that the contractors would be liable to. When the prices of materials and labor again assume a permanent shape, the contract system should again be resorted to.

The railroad, now being laid between the depot of this company, on Broad and Prime streets, Philadelphia, and the Philadelphia and Trenton station at Kensington, will, when completed, enable the same cars to traverse the entire route between New York and Washington, and thus many of the discomforts now incident to the route will be done away with. The Junction railroad, however, now being constructed on the west bank of the Schuylkill, will, when built, furnish a ready means of connecting this road with the Philadelphia and Trenton railroad by steam power, passing as it

will, around the city, and remote from or under its principal thoroughfares. This will undoubtedly supersede all other modes of transfer from one road to the other, and make that part of the route which has always been dreaded by the traveller, as pleasant and expeditious as any other portion of the line.

The company have 37 engines, (8 of which are in use on the New Castle and Wilmington, New Castle and Frenchtown, Delaware, Eastern Shore, and Junction and Breakwater railroad); 74 first class, and 8 second class passenger cars, 2 sleeping cars, 18 baggage, 7 platform cars for crates, 1 paymaster's and 5 express cars—making the total in the passenger department, 110; in freight department, 630; in road department, 61—total, 801.

Number of passengers carried, 854,498; of which 629,110 were local, and 225,388 through. Number carried one mile, 43,573,777; of which 21,485,753 were local, and 22,088,024 through. Tons of freight carried, 175,972; of which 105,452 were local, and 70,520 through. Tons carried one mile, 12,163,451; of which, 5,252,477 were local and 6,910,974 through. Of the through tonnage, 16,684 were carried northwardly and 53,835 southwardly. Of the local tonnage, 37,947 were carried northwardly and 67,505, southwardly. The passenger travel, both local and through, were more equally divided.

The following is a condensed statement of the financial condition of the company at the close of the fiscal year, October 1, 1862:

Cost of railroad		$6,744,316 15
Port Deposit branch railroad		110,914 70
Terminus on the Delaware		76,400 06
Stock owned by the Company		744,425 00
Real estate for use of the road		48,293 79
Assets, viz:		
Real estate, valued at	$205,650 00	
Bonds purchased in anticipation for sinking fund	95,981 88	
Do., held by the Co.	199,000 00	
Stocks and other securities at cost	351,129 00	
Agents' balances	52,540 46	
Sundry balances	157,914 94	
Due from other roads	80,139 32	
Transportation of troops, supplies, etc.	267,107 44	
Post office department	5,861 24	
Bills receivable	102,435 18	
Materials on hand, including wood lands	78,003 16	
Cash	128,090 50	
		1,723,853 12
Advances to other roads leased by this company		60,202 89
		$9,508,405 71
Capital stock		$5,620,500 00
Mortgage loan		2,490,500 00
Improvements bonds		88,500 00
Ground rents		20,000 00
Sinking fund for mortgage loan—10 months' proportion		36,666 67
Current liabilities		238,042 22
Balance to credit of revenue		1,014,196 82
		$9,508,405 71

The officers and directors elected for 1863, are:

President—SAMUEL M. FELTON.

Directors—Moncure Robinson, Wm. Lyttleton Savage, John A. Duncan, Jesse Lane, Joseph Bringhurst, Frederick A. Curtis, John C. Groome, J. I. Cohen, Jr., Thomas Kelso, Columbus O'Donnell, Enoch Pratt, Thomas Donaldson, Wm. W. Corcoran, Nathaniel Thayer.

Secretary and Treasurer—ALFRED HORNER.

Connecticut River Railroad.

The earnings of this road for the years ending November 30, 1861 and 1862 have been as follows:

	1861.	1862.
From passengers	$121,832 60	$139,330 91
" freight	116,979 34	117,053 13
" mails	6,254 10	6,082 49
" express	3,650 00	3,582 29
" rents	2,119 96	2,103 33
Totals	$250,836 00	$268,152 15
Expenses, viz:		
Repairs of road	$39,536 56	$39,066 99

It will be noticed that the aggregate receipts for 1862 are $17,316 15 greater than those for 1861; with an increase in expenditure of $6,417,47—making the increase in net earnings $10,898 68.

The past year has been one of more than ordinary prosperity in business. The road has been thoroughly maintained. During the past two years the track has received 45,500 cross ties, 7½ miles of new iron and 9 miles of old rails taken up and repaired.

The lease of the Ashuelot road expired December 31, 1860. Since that period it has been operated, under lease, by the Cheshire Railroad Company. Its trains are generally so run as to afford good connections with this road, and the current of business between the two roads has not been seriously affected.

In leasing the Ashuelot road in 1850, it was necessary to purchase additional rolling stock and depot furniture to the amount of $21,841 42. On surrendering the road, most of this property was withdrawn, and placed on the Connecticut River road, and became a charge on the income account. The rent of the road having been payable quarterly on the first days of January, April, July and October, and the fiscal year of this company terminating on the 30th of November, it has happened at the end of each successive year that this company were in arrears on this account for the value of two months' rent, say $5,000. At the termination of the lease, this arrearage, together with the equipment and outfit accounts, were set against the surplus income of former years.

The new repair shops at Springfield station, commenced in 1860, were completed in September 1861, at a cost of $20,742 13, a portion of which, amounting to $9,454 10, was offset in 1861 by a credit of that sum from proceeds of sales of real estate not required for carrying on the business of the company, leaving a balance of $11,288 03. During the past year the old machine shop and engine house has been sold. The sale of this property made it necessary to provide new accommodations for the engines employed in running the Northampton trains. After making such provision out of the proceeds of the sale, there remained a balance of $2,952 24. This sum has been carried to repair shop account, reducing that amount to $8,335 79, which latter sum is now charged off to the income account of the past year.

The sinking fund established in 1861 for the ultimate redemption of the mortgage loan of $250,000, has received two annual instalments of $8,000 each. This amount has been paid over to the commissioners of that fund, and by them invested in the bonds of the company.

The equipment of the road consists of 12 locomotives; 13 passenger, 6 baggage, and 325 freight and gravel cars.

New Branch Railroad to Oil Creek.

The location of the New Branch road, which is to be built by the Pennsylvania Railroad Company from some point of the Philadelphia and Erie Railroad to Oil Creek, will soon be determined. Three routes have been surveyed, and the most feasible one is over a line from Garland, Penn., twenty-eight miles to Oil Creek, which affords a grade equally as good as the same number of miles anywhere in that part of the State. The work is to go into operation within a short time, and will give the Philadelphia and Erie Railroad peculiar advantages in the oil trade.—*Buffalo Com.*

Washington and Georgetown Railroad.

The Washington and Georgetown Horse Passenger Railroad Company has a capital stock of ten thousand shares, the par value of which is fifty dollars, and has issued $300,000 of six per cent. bonds, one hundred thousand dollars of which are retained as a reserve fund for any future improvements.

The apprehension that the business of the road would decrease in the summer, when Congress was not in session, has proved erroneous, and the local travel has produced receipts even larger than those during the session.

The company paid its first dividends in April, of four and one-half dollars per share, which, considering that the ground was first broken, for the construction of the road, in June of last year, and that the road was for a long time in an unfinished condition, shows unexampled prosperity. Its management is in the hands of men of large railroad experience in this city, Baltimore, New York and Washington.

Seventy-eight cars are now running, and five hundred horses are in use. The depots are large and Company possesses valuable and improving real estate.

The stock is held in Washington, Baltimore, New York and Philadelphia, by capitalists. The last sale of bonds was at ninety-five, and of stock at sixty-eight.

It is estimated that the earnings will pay from 12 to 15 per cent. per annum. The road was chartered by the Congress of 1862, and has no competitor for the local passenger business of Washington.—*Phila. Inq.*

Ohio and Mississippi Railroad.

At the stockholders meeting of this Company, held June 1, 1863, the following named gentlemen were elected directors for the ensuing year: Larz Anderson, Wm. Whitewright, jr., Theodore Gazlay, Joseph Torrence, Edwin Bartlett, Wm. J. McAlpine, James D. Lehmer, Henry Chauncey, Joseph W. Alsop, W. W. Scarborough, Edward Delano, Thos. G. Mitchell, Wm. H. Clement, Edward Learned, Charles S. Cone, Saml. H. Pomeroy, S. W. Comstock, Wm. H. Aspinwall, Charles D. Coffin, S. W. F. Odell, Fred. Schuchardt.

The board was organized on the following day by the election of Edward Learned, President; Wm. J. McAlpine, Vice-President and Superintendent; Samuel Trevor, Secretary; Charles S. Cone, Treasurer.

Ruttan's New Ventilated Car.

On the 10th inst., a number of invited guests passed over the Philadelphia, Wilmington and Delaware Railroad to Seaford, in a car arranged with a patent ventilator. Mr. Felton, of the Philadelphia, Wilmington and Baltimore, Messrs. Perkins and Wilson, of the Baltimore and Ohio, and Mr. Markley, of the Camden and Amboy roads were present. The car has on the top a large hood or tunnel, which receives the air, through which it passes down to a reservoir under the car filled with water. The air after passing over the water and depositing all the dust and cinders, is admitted into the car through an opening on each side, and as the windows and doors of the car are closed, no dust is admitted, while the temperature on a hot day is most delightful. The car passed over 260 miles of road remarkable for its dust, and when the passengers left it, not a particle of dust could be found on their clothing. Some thirty cars have been ordered for through trains to run from New York to Washington, when the junction railroad is completed, and we understand that these ventilators will be placed on each of them. The invention was patented by Mr. Ruttan, of Cobourg, Canada, and wherever it has been used has met with decided success. The excursion was under the charge of Mr. Wm. Stearns, Superintendent of the Philadelphia, Wilmington and Baltimore Railroad.—*Philad. Ledger.*

Cleveland and Mahoning Railroad.

The work of extending the track of this road to the Lake Shore is progressing rapidly. There is considerable excavating to be done and some heavy mason work, the greater part of which will be in the tunnel under Detroit and Michigan streets. It is not expected that this will be finished the present season. When the extension is completed, the terminus of the road will be on the old river bed where its depots will be established.

The Brookfield branch, which is to extend from Youngstown to the coal field of Hubbard and Brookfield, a distance of twelve miles, is being rapidly constructed. A large part of the grading is already completed and two miles of iron laid. It is expected that ten miles of the road will be in running order by next fall.—*Buffalo Com.*

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending June 5, 1863, was as follows:

Passengers	$23,231 28
Freight and live stock	24,434 89
Mails and sundries	1,221 68
Total	$48,887 85
Corresponding week of 1862	41,101 92
Increase	$7,785 93

The earnings of the Grand Trunk Railway for the week ending May 30, 1863, were:

Passengers	$27,764 41
Freight and live stock	2,900 00
Mails and sundries	33,996 79
Total	$84,661 20
Corresponding week, 1862	63,490 23
Increase	$21,170 97

The earnings of the La Crosse and Milwaukee Railroad for the 1st week in June, 1863, were $29,475 08
Same week, 1862 27,866 60

Increase $1,608 48

The earnings of the Galena and Chicago Union Railroad for the 1st week of June, 1863, were:

Freight	$31,477 37
Passengers	11,120 95
Mails	1,300 00
Total	$43,898 32
Same week, 1862	45,661 65
Decrease	$1,763 33

The earnings of the Chicago and Alton Railroad for the 1st week of June, 1863, were:

Passengers	$14,070 39
Freight	21,372 45
Sundries	974 33
Total	$36,417 17
Same week last year	21,547 81
Increase	$14,869 36

The earnings of the St. Louis, Alton and Terre Haute Railroad for the 1st week in June, 1863, were $25,932 62
Same week, 1862 16,338 03

Increase $9,594 59

The earnings of the Chicago and Northwestern Railway for the 1st week in June, 1863, were $27,415 74
Do., 1862 27,003 51

Increase $412 23

The earnings of the Toledo and Wabash Railroad Company for the 1st week of June, 1863, were $36,506 58
Same week, 1862 22,886 05

Increase $13,620 03

The earnings of the Milwaukee and Prairie du Chien Railroad for the 1st week of June, 1863, were $33,323 82
Same week, 1862 43,619 33

Decrease $10,295 51

The earnings of the Chicago and Rock Island Railroad for the 1st week of June, 1863, were $44,867 00
Same week, 1862 26,535 00

Increase $18,322 00

The earnings of the Michigan Central Railroad for the 1st week of June, 1863, were $49,841 00
Same period, 1862 36,075 00

Increase $13,766 00

The earnings of the Michigan Southern Railroad for the 1st week of June, 1863, were $56,129 18
Do., 1862 40,584 78

Increase $15,544 40

The earnings of the Cleveland and Toledo Railroad for the 1st week of June, 1863, were $24,039 00
Same week, 1862 16,914 00

Increase $7,125 00

The earnings of the Detroit and Milwaukee Railroad for the 1st week in June were:

Passengers	$8,462 99
Freight and live stock	9,857 47
Mails and sundries	544 93
Total	$18,865 39
Same week, 1862	14,075 35
Increase	$4,799 04

Municipal Subscriptions to Railroad Companies; how Affected by Subsequent Alteration of Charter.

A CORPORATION, AUTHORIZED BY THE LEGISLATURE TO SUBSCRIBE STOCK, IS IMPLIEDLY AUTHORIZED TO ISSUE BONDS IN PAYMENT. THE POWER TO ISSUE BONDS OR OTHER CERTIFICATES OF INDEBTEDNESS BELONGS TO ALL CORPORATIONS.

By an act of Assembly of the State of Pennsylvania, passed April 4, 1837, the Governor was empowered to incorporate a company by the name, style, and title of "the Pittsburgh, Kittaning and Warren Railroad Company," with power to construct a railroad from Allegheny river, at the borough of Franklin, to the Ohio river at or near the borough of Beaver. By the second section of the act it was enacted, that any incorporated company, city or borough, should have authority to subscribe to the stock "as fully as any individual." The seventeenth section enacted, that if the company should not proceed to carry on the work within five years from the passage of the act, and complete the same within ten years, the charter should become null and void, except so far as it compelled the company to make reparation for damages. On the 16th of March, 1847, before the ten years had expired, a supplement was passed extending the time for commencing the road to June 1, 1852. By subsequent acts the time for commencing the road was extended to June 1855, and for its completion to June 1865, the company was authorized to build a road from Pittsburgh to Kittaning, and thence to New York State line, to change its name to the Allegheny Valley Railroad Company, and certain counties were authorized to subscribe to its stock without directing the mode of payment, but providing that whenever bonds should be given in

payment, they should not be sold for less than par, and should not be subject to taxation till the profits of the road should amount to six per cent. on its cost. The fourth section of the supplement passed in April, 1852, declared that it should be lawful for the several counties and cities subscribing, to pay, if agreed upon by the parties, by the transfer of stocks held by them in other companies. And the sixth section enacted, that the several Acts of Assembly, limiting the corporate debts of the cities of Pittsburgh and Allegheny, should not prevent either of the said cities from subscribing to the stock of the Allegheny Valley Railroad Company.

In pursuance of these Acts of Assembly, the City of Pittsburgh by their Common Council on May 7, 1852, subscribed for eight thousand shares of the capital stock of the company, and issued its bonds in payment of the subscription. One J. D. Reinboth, as trustee of Emily M. Heuson, became possessed of seven certificates of loan representing $7,000, which on their face respectively set forth that the faith, credit, and property of the City of Pittsburgh were pledged for the payment of the principal and interest thereof.

The City of Pittsburgh having refused to make provision for the payment of these bonds or certificates of indebtedness, Reinboth applied to the Supreme Court of Pennsylvania for an alternative writ of *mandamus*, commanding the councils to take the necessary steps to secure their satisfaction. The Court now hold that the subscription by the City was valid, that they had authority to issue the bonds and grant a peremptory writ in favor of Reinboth.

The following is the opinion delivered at the decision of the case:

STRONG, J.—The respondents now contend that this subscription was unauthorized, because, as they say, the right to subscribe given by the act of 1837, had expired in consequence of the failure to commence and complete the railroad within the time limited by the act. When it was passed there was no company in existence. The act was but the offer of certain privileges to any who might accept them on the proposed conditions. Had it contained no provision that it should be null and void, if the work should not be commenced and completed within the defined period, the right to subscribe, given by it would have been of indefinite duration, certainly it would have lasted as long as the charter. With no propriety can it be said, that while the franchises tendered to the company remained, the right to make and receive the City subscription did not continue. But the tender of the franchise was never withdrawn, and after it had been accepted it was never abandoned or lost by non-user. It was quite in the power of the legislature to waive any right reserved to the State to resume the privileges offered, or to withdraw the tender, and they did waive it before the privileges had been lost. By the supplements of 1847 and 1851, they extended the time within which a company might be formed and accept the franchises offered. These supplements as well as that of 1852, are a part of the original charter, to be construed with it, and they show that the rights given and the power conferred will continue until 1865. If the legislature has declined to take back the privileges tendered; if they have declared that all the rights, privileges, and immunities shall remain, it is vain for one who has contracted with the company to insist that any of them have been lost by forfeiture or non-user. That the power to subscribe at first, expressly given to the City of Pittsburgh, was supposed and intended by the legislature to exist in 1852, is manifest from those parts of the supplement of April 14, 1852, to which reference has already been made. If not, why the enactment that certain acts of Assembly should not prevent such subscription? And why authorize the payment of such subscription by a transfer of stocks if the parties should so agree? It is then an untenable position that the right to subscribe given by the act of 1837, had ceased to exist on the 7th of May, 1852, when the subscription was directed by the City Councils.

Again, it is insisted, that though authority was given to subscribe to the stock of the Pittsburgh, Kittaning and Warren Railroad Company, none was given to subscribe to the stock of the Allegheny Valley Railroad Company. It is said that the latter is not the same company, either in name or object, which was chartered or authorized by the act of April 4th, 1837. But this is a mistake. The name was changed by the legislature, but the identity was not lost. No other company than the Allegheny Valley was ever organized under the act of 1837, and no other can be. Its life, its powers, and its privileges it derives from that act, and, as its name was changed by a supplement, the first act is to be read with the name Allegheny Valley Railroad Company, in the place of the Pittsburgh, Kittaning and Warren Railroad Company. Nor is there anything in the fact that the supplement of 1852, relieved the company from the duty of fixing the termini of their road at or near Beaver and Warren. This did not destroy its identity. It is still the corporation created by the act of 1837. Plank road Company *vs.* Arndt, and its kindred cases have no applicability to such a state of facts. In those cases it was ruled, that if the legislature changed the termini of a road authorized to be constructed by a company, subscriptions to stock *previously* made are released. It was not held that the company did not remain the same. A contract of subscription previously made with it, could not be enforced because the motive and consideration for the subscription were withdrawn, or changed by the alteration of the terminus of the road. Even that does not exist in this case. The subscription was not made until after the supplement of April 14th, 1852, was passed, and until after Beaver and Warren had ceased to be necessarily at the beginning and end of the road.

It is finally contended, that even if there was authority to make the subscription, there was none to issue bonds in payment. The language of the act of 1837 is "any incorporated company, city or borough shall have authority to subscribe thereto as fully as any individual." Now power to subscribe was power to create indebtedness. The creation of a debt was clearly contemplated. If not, why did the supplement of 1852 remove the disability to create a debt by subscription, which was thought to have been imposed by former acts? And if authority was given to the city to incur a debt by subscription, necessarily it included authority to give the creditor the usual evidence of a debt. Who would doubt that a power to borrow money carried with it a right to give a bond or a note to the lender? It is a necessary incident without which the power is worthless, and in every grant, whether it be of property, of a franchise or of a power, there is included everything necessary for its enjoyment. This is as true of grants to corporations, as of those to natural persons. Grants to corporations are indeed strictly construed in favor of the public. This is a rule to be invoked when we are seeking for what has been given. It may be a reason for holding that an authority has not been conferred upon a corporation, if the words of the gift are not clear and unambiguous, but none at all for stripping a power given of its natural and usual incidents. A power actually conferred is not the less because held by a corporation. And this admitted principle is held for the benefit of the public, not of the corporate body. It would be a perversion of its design to allow it to be used by a corporation to defraud its creditors, or to protect itself against its own assumed obligations. The obvious purpose which the legislature had in view in granting to the city of Pittsburgh the right to take the stock was to further the enterprise of building the railroad by providing a possible increase of means. This purpose would not have been accomplished by a barren grant of a right to subscribe without the power to give such securities for the debt created as could be made available. The city was authorized to subscribe "as fully as any individual," a natural person. Now after the organization of the company, a natural person might have made a subscription, payable with his own bond or note, if the company had agreed thereto. When, therefore, the legislature conferred upon the city a power as large as that which a natural person possesses, it is evident that they gave in it power to give any securities for the debt which such a person might have given.

There is another course of argument which may be briefly stated, and which leads to the same conclusion. The power to execute and issue bonds, contracts or other certificates of indebtedness belongs to all corporations, public as well as private, and is inseparable from their existence. It is for that they hold a common seal. No one would doubt that for a legal and authorized debt, a municipal corporation might give its bond under its general corporate powers. If a bond given by such an obligor be void, it is not because of the form of the instrument, nor because general corporate powers do not warrant giving bonds, but because the debt for which the bond has been given was created without authority, against law, or without law. A municipal bond for a subscription to the stock of a railroad company is ordinarily invalid, because such a subscription is outside of the powers of a municipal corporation. But when, as in this case, the legislature has authorized the subscription, and when, therefore, it has been made in the legitimate exercise of powers conferred, it becomes a debt like any other, and may be secured and evidenced in the same way. Then it is unnecessary for the legislature to declare that bonds may be given for it, for the power to give bonds was conferred by the charter itself.

We are of opinion, therefore, that the city of Pittsburgh had the power to make the subscription which was made to the capital stock of the

Allegheny Valley Railroad Company, and that the bonds issued by the city were lawfully issued. A peremptory *mandamus* awarded.

The Credit Mobilier of Paris.

In the Annual Report for 1862, the President says:

"After ten years existence, ten years passed in struggle and efforts to surmount obstacles of all descriptions, we may cast our eye upon the past with a look of tranquillity, and face the future with confidence and security.

"Stupendous works have been accomplished by us, both in France and in other countries; and none of our undertakings have remained unfinished. All are in a prosperous condition, or in a state of improvement.

"After having distributed dividends on an average of 16 per cent. during the last ten years, we can present a capital considerably improved and entirely at our command.

"Independently of the profits we are about to distribute, those which are already realized, or may be realized with facility, independently of those which we may be allowed to hope for from fresh operations, already promise us a perspective no less advantageous. We are in a position, in fact, to appropriate our means of action in harmony with the growing importance of our operations."

Synopsis of the "Credit Mobilier," 1863.

Assets.	Francs.	Dollars.
Stocks, shares and bonds	147,900,116	29,580,000
Bills receivable, discounted	11,887,212	2,377,440
Reports	17,478,037	3,495,600
Advances to various companies	17,441,942	3,488,360
The company's hotel & furniture	1,449,580	289,900
Cash in the bank, and dividends to be received	17,238,644	3,447,700
Total assets	213,395,535	42,679,000
Liabilities.	Francs.	Dollars.
Capital paid in	60,000,000	12,000,000
Accounts current and credits	101,811,890	20,362,350
Bills payable	16,824,300	3,364,850
Reserve fund	2,000,000	400,000
Balance of profit and loss account realized	18,559,623	3,711,900
Balance of profit and loss to be received	14,199,720	2,839,900
Total liabilities	213,395,535	42,679,000

The board proposed a dividend of 12 million francs to stockholders, (twenty per cent., or 100 francs per share,) and 1,333,333 to the directors, as a reward for their services.

National Stocks and Currency.

The following list embraces the stocks that are receivable as security for the new national currency:

$9,415,250 sixes of 1867	interest payable	January	and	July.

American Railroad Journal.

Saturday, June 20, 1863.

Stock Exchange and Money Market.

Another remarkable change in the aspect of our public affairs has occurred within the past week, and had its full effect on many departments of business. The management of the war has a direct bearing on the transactions of men; prices rise and fall, bargains are made under the stimulus of the hour, victory or defeat determine the price of gold or exchange, and the market, which is the concentration of individual opinion into mass and mobility reels like a vessel in a storm at sea. Beyond these immediate influences which operate directly on the street, there are others of a more quiet and philosophic character, which are absolutely necessary to be considered, if we would look into the financial future. And the most important of these is the consideration of the actual amount of talent which is now in charge of the Government of this country and its great and wondrous resources. If ever it required the aid of its ablest men in its service, it does so now, and if the President would be instructed by his friends as well as his opponents, he would not delay for a single instant to call to his aid the best intellect of the country. Imbecility and incapacity can no longer be tolerated in the public service.

It is pleasing to know, however, that the enterprise and spirit of the people continue to withstand every depressing circumstance. As the pressure increases, the mercury of the popular feeling rises. During the present flurry, there has been no diminution of public confidence in the national securities. The last accounts from abroad show a fresh demand, and rise in them even in the London market, and large amounts are being absorbed on the continent. This is the news brought by the Scotia, and it is also stated that this vessel brought out large orders at par for the 6 per cent. coupon Stocks, payable in 1881, and the 5's of 1874.

One of the great enterprises of the day is the construction of the Eastern division of the Union Pacific Railway. Four thousand tons of American railway iron are advertised for, and the organization, under new auspices, of that portion of the route hitherto known as the Leavenworth, Pawnee and Western Railroad, is proving to be as efficient and very much of the same character as that which has marked the career of the Atlantic and Great Western. The office of the company is about to be removed to this city, for the greater facility of transacting its business. Some inquiry has been made as to the purposes, ulterior at least, of the new management. We believe we are in a position to give an explanation. It is well-known that a considerable portion of the Western Division of the Pacific Railway has been laid out

graded, and put under contract; that large pecuniary aid has been given it in California from public and private sources; and that in fact there is but the Central division which remains in an uncertain condition. The corporators have done nothing since their first and only meeting at Chicago to forward the project. Indeed the committee charged with the duty of pushing forward the organization to its legal termination, has taken no action that we have heard of. At a private meeting held some weeks since in this city, from which some of the earliest and most active of its friends were excluded, some apparently showy resolutions were passed, though really amounting to nothing; and we understand another meeting of the same sort is to be held for the purpose of taking up the tangled skein where it had been dropped, and reeling it off into something more shapely. But a very curious state of things has arisen which is worthy of notice, since it is likely to solve the whole problem in an easy and simple manner. The original act of Congress contains some provisions which have only recently been understood. It would appear from various sections of the act, that any of the Eastern companies connecting with the 100th parallel westward, and the Central Pacific Railroad of California which terminates at the Western boundary of Nevada, have themselves full power to construct the intermediate central division of the line. The 9th section states that the Kansas Company may proceed westward to the 100th parallel, and the California Company may proceed eastward to the Eastern boundary of that State. The 10th section after prescribing how many miles shall be annually constructed by these companies, proceeds in these words: "And after completing their roads respectively, *said companies, or either of them* may unite upon equal terms with the first named company in constructing so much of said railroad and telegraph line and branch railroads, and telegraph lines in this act hereinafter mentioned *through the territories from the State of California to the Missouri River, as shall then remain to be constructed* on the same terms and conditions as prescribed in this act to the Union Pacific Railroad Company."

So that these two companies now at work on the Western and Eastern divisions have full power to unite and construct the Central division on their own motion, and without any further legislation on the subject, and even without calling for a dollar's subscription. All the powers, rights, advantages and privileges of the original Union Pacific Railroad Company fall at once into these two companies, upon their uniting and agreeing to assume them. That this opinion is not our own merely, is evident from the fact that the Attorney-General of the United States after a careful examination of the act of Congress has so construed it.

We may therefore congratulate the people of the East and West, that the construction of this great work is secured beyond a peradventure, and that the two companies already named will proceed with as little delay as practicable to undertake the construction of the remaining Central division. Every day seems to diminish the real or supposed difficulties in the way. Just as the great range of the Rocky Mountains has been found to be rather an elevation of plateaus and table land, than a succession of ragged peaks, so the obstacles of constructing a route across them have sunk into comparative trifles, easily overcome by the most moderate skill in engineering.

In the construction of the Eastern division, no call has been made on the Money Market for assistance. Actual capital has thus far done its own work, just as it did in the Atlantic and Great Western, when 200 miles of a six feet gauge were built in seven months, and not a dollar of stock was forced upon the New York market. The public then may feel assured no further call on them in aid of the Pacific road will be necessary, and any movement in that shape may be set down to speculation with motives which require no explanation.

The Share Market was slightly effected by unfavorable rumors from the seat of war. The shares of the leading railways were lower, but the decline was not serious. The earnings are enormous, and the profits continue large. By reference to our Table of Earnings it will be seen that for May, as far as heard from, they are largely in excess of the earnings for May, 1862. For instance: the gain in Chicago and Rock Island has been $55,235; in Chicago and Northwestern, $23,-314; in Cleveland and Toledo, $30,074; in Erie, $251,451; in Galena and Chicago, $57,963; in Hudson River, $49,329; in Illinois Central, $107,-920; in Michigan Southern, $63,155; in Michigan Central, $50,414; in Harlem, $14,414; and in Pittsburg, Fort Wayne and Chicago, $141,730. From January to May, inclusive, the gain has been: in Chicago and Rock Island, $205,388; in Chicago and Northwestern, $155,653; in Cleveland and Toledo, $220,443; in Galena and Chicago, $197,651; in Hudson River, $470,600; in Illinois Central, $378,096; in Michigan Southern, $396,-848; in Michigan Central, $295,856; in Harlem, $131,451; in Pittsburg, Fort Wayne and Chicago, $624,206; and in Erie, $1,236,364. The earnings of the latter road have been in the past five months $4,388,548, against $3,152,184 in the first five months of 1862. The average gain per month has been $244,273. At this rate of increase, the earnings for the year 1863 will exceed *eleven millions of dollars.*

Gold is not in much demand for export, and very little has been recently shipped from this port. The amounts hitherto brought here from California, are principally taken by the British steamers from Aspinwall to England, and furnish a large basis against which to draw without risk of capture.

The rate of gold in this market on the 10th inst., was 140½; during the week following it fluctuated between that figure and 142½. On Tuesday it rose to 148½, and on Wednesday, there being no demand for export, it fell to 145½-⅜. Exchange was dull at 158 to 159. It is considered that the stamp duty on gold contracts, prevents transactions where the rise is small, as it swallows up the profit in such cases. The conversions of United States currency into the new loan of 1882 are large, $1,236,580 being paid in on Wednesday in this city. The receipts at the Treasurer's office were also large, viz., $5,625,295 73, and the balance on that day was $24,466,097 62.

The Stockholders of the Cleveland, Columbus and Cincinnati Railroad, and of the Cleveland, Painesville and Ashtabula Railroad have voted unanimously in favor of the consolidation and division of the earnings of the roads as proposed by the Directors.

The Galena and Chicago Union Railroad Company have declared a dividend of three per cent, free from Government tax, payable at the office of the Company in Chicago on the 15th of July.

The Michigan Central Railroad Company have declared a dividend of six dollars per share, free of government tax, payable July 1.

The Providence and Worcester, Boston and Worcester, and Western Railroad Companies have each declared a semi-annual dividend of four per cent., free from government tax, but subject to the state tax on non-resident stockholders of one-fifteenth thereof, payable July 1.

The Cleveland and Pittsburgh Railroad is now under tne direction of the officers of the Company, and all persons having claims against the Company, are requested to present them at the office in Clevelanc.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Chicago and Northwestern Railroad.

The following gentlemen have been elected directors of this Co. for the current year: Wm. B. Ogden, President, Chicago; J. A. Wood, Janesville, Wis.; Geo. L. Dunlap, Chicago; H. Smith, Appleton, Wis.; M. C. Darling, Fon du Lac, Wis.; A. B. Pritchard, Watertown, Wis.; J. J. R. Pease, Janesville, Wis.; Wm. A. Booth, Lowell Holbrook, C. S. Seyton, H. H. Booth, New York; S. M. Bartholomew, Conn.

Chicago and Milwaukee Railway.

The Chicago and Milwaukee and the Milwaukee and Chicago Railroads completed their amalgamation last week, under the new corporate name of Chicago and Milwaukee Railway Company. The election for directors of the new company will take place at Chicago on the 23d instant.

Farm Mortgages in Wisconsin.

The Supreme Court of Wisconsin has lately affirmed the validity of all the farm mortgages of the State. These are mortgages given to the Milwaukee and Mississippi Railroad and other similar corporations. The issue involved several millions of dollars, and the decision is one of vital interest to thousands of the citizens of the State.

Oil Creek Railroad.

The work upon the road is being pushed forward rapidly and will soon be completed through from Corry to Oil City. The officers of this company are: President, Thomas Struthers; Superintendent, W. S. Streator; Secretary, John E. McPherson; Auditor, W. K. Witter; Chief Engineer, Samuel M. Lawrence. They are all gentlemen of well-known reputation and are eminently qualified to fill the respective positions to which they were elected.—*Titusville Rep.*

Chicago and Rock Island Railroad.

The annual meeting of the stockholders of this company was held in Chicago on the 5th inst., at which the following gentlemen were elected directors for the ensuing year: Thos. C. Durant, David Dows, Chas. W. Durant, Clark Durant, E. W. Dunham, Francis H. Tows, Thomas T. Sturgis, Geo. T. M. Davis, Harvey Kennedy, New-York; Robert A. Forsyth, Newburgh, N. Y.; B. P. Learned, Albany N. Y.; John F. Tracy, Chicago, Ill.; E. Cook, Davenport, Iowa.

At a subsequent meeting of the board, the following officers were elected: President, Chas. W. Durant; Vice-President and General Superintendent, John F. Tracy; Secretary, Francis H. Tows; Treasurer, E. W. Dunham.

Rome, Watertown and Ogdensburgh R. R.

At a meeting of the Company held at Watertown on the 4th inst., the following gentlemen were elected Directors: Wm. C. Pierrepont, Pierrepont Manor; Charles E. Bill, New York; Samuel F. Phelps, New York; John Ferguson, New York; Marcellus Massey, New York; Edward Strong, New York; A. Alexander, jr., Springfield Mass.; Calvert Comstock, Albany; David Utley, Rome; Solon D. Hungerford, Adams; William Lord, Brownville; Talcott H. Camp, Watertown; Willard Ives, Watertown.

At a subsequent meeting of the Directors, Wm. C. Pierrepont was re-elected President, and R. C. Hungerford, Treasurer.

Scioto and Hocking Valley Railroad.

The Scioto and Hocking Valley Railroad has been sold at auction in pursuance of the order from the Court of Common Pleas of Perry County, Ohio. The sum bid was $411,100, two-thirds of the appraisement. The purchasers were E. P. Mason, I. Hartshorn, and T. J. Stead, representing the second mortgage holders, and as trustees of the new company.

Atlantic and Great Western Railway.

We understand, on what we consider good authority, that a railroad arrangement of the greatest importance to our citizens and the public generally has been perfected. It is reported that the Atlantic and Great Western Railway Company have leased the Cleveland and Mahoning Railroad for a term of ninety-nine years, guaranteeing a rate of interest to the stockholders of the latter company that will probably give a handsome dividend. The line is to be completed forthwith to the Old River Bed, where the depot buildings will be erected and a junction effected with the Cleveland and Toledo Railroad.—*Cleveland Herald.*

Important Patent Decision.

It has heretofore been the practice of the Patent Office to refuse to entertain an application for reissue on behalf of an assignee or assignees, unless he or they owned the entire interest of the patentee. But this has been reversed by the Board of Examiners-in-Chief, who have decided that any assignee of an exclusive territorial right under a patent, is entitled to surrender and take out a reissue, which will be operative to the extent of the territory embraced in his grant.

Albany and Susquehanna Railroad.

We learn that the work on this road has been let from East Worcester to Oneonta, to two responsible firms, who will push it to early completion.

Junction Railroad.

The work upon the Junction Railroad is being puched forward, a force being employed on it along its entire length. The road is a little over four and half miles long, extending from Gray's Ferry to Belmont. There will be two tracks of 4 feet 8½ inches gauge. Probably no road in the country of a similar length has required so much culverting and tunnelling and bridging as the Junction Road will. There will be six iron bridges, eight culverts, and seven hundred and fifty feet of tunnelling. North of Market street bridge most of the grading has been done, and a handsome and substantial iron bridge has been constructed over Thirty-fifth street, near the stand-pipe. The excavation south of the Market street bridge, has been brought up to the vicinity of Walnut street, near where the tunnelling will be begun and come out north of the bridge. At Gray's Ferry workmen are engaged in blasting a considerable depth, having to be reached through solid rock. Preparations have been made for the building of an immense depot on the north side of Market street, below Thirty-second. The old buildings have been removed from the site, and the new structure will soon be commenced.—*Phila. Ledger.*

Buffalo and Lake Huron Railway.

The half-yearly meeting of this Company was held on Thursday, May 14, at the London Tavern:

Mr. Philip Rawson, the chairman, presided.

Mr. Short, the secretary read the notice convening the meeting, and the following report was taken as read:

REPORT OF THE DIRECTORS IN ENGLAND.

The accounts submitted herewith, for the half-year ending 31st January, 1863, show the results of the Company's working as under—

Net revenue		£16,537	18 9
Renewal of rails	£1,593 5 8		
Hire of cars	875 6 10		
Depreciation of currency	538 16 10		
		3,007	9 4
Leaving the amount of		£13,530	9 5

to meet the interest payable on the Company's mortgage debt, and other interest charges.

The outlay for works on capital account during the half-year has been restricted to the more pressing repuirements of the Company's business; such works only as were imperatively required having been undertaken. There are many points, however, at which increased accomodation to the traffic is needful, and the board propose to supply it as soon as convenient. The charges applicable to this account for the half-year are as follows:

Loss on revenue account for the half-year ending July 31, 1862, after providing for interest on mortgage and chattel bonds, &c. $52,671 29=	£10,822	17	4
Payments on account of Goderich Habor Extension which includes $11,008 40 instalments on Goderich harbor purchase, $25,025 20.	5,142	2	7
Payments on account of works on line, station buildings $4,122 37.	847	1	2
Payments on account of Buffalo Extension and Fort Erie New Works, including $1,310 for dredging Erie Canal at Black Rock Swing Bridge, required by the Commissioners $1,868 18	383	17	6
Proportion of direction salaries, office expenses, including $1,703 paid to Mr. Evans on account of expenses to Canada $2,450 59	503	10	11
Paid for right of way $1,245 73	255	19	6
Sundries $1,436 39	295	3	0

During the half-year a balance of $9,360 due by the Brantford Car Company, and $1,000 on account of property sold in Buffalo, has been received and credited in the accounts. The amount standing at the credit of general balance account, namely, $3,538 16=£727 0s. 8d., as having been paid to steam-boats on account of guarantee, still remains unadjusted. The credit balance, under the head of "Sundry floating accounts with stations," as per general balance sheet, viz., £16,907 9s. 10d., includes Buffalo outstanding, viz., £12,523 8s. 6., but about two-thirds of the last-named amount is estimated as being due to other Companies in settlement of current accounts, and is payable in American currency, on which no loss will be sustained. Although the depreciation in American currency has fluctuated between 15 and 60 per cent. during the past half-year, yet so far as this Company's losses have been realised, about £500 will cover the whole amount, exclusive of any enhanced cost of stores purchased in Buffalo, as will be seen on reference to the revenue accounts; any additional cost, however, of stores, the board believe to be small compared with the cost of converting American into Canadian currency.

The Revenue for the half-year ending 31st January amounted to £47,359 11s. 11d.; and the expenditure for the same period, including exceptional charges, before referred to, of £3,007 9s. 4d. £33,829 2s. 6d.; leaving a surplus of £13,530 9s. 5d.; to meet interest on chattel bonds £1,541 4s.; ditto

loans £678 18s. 11d.; ditto mortgage bonds paid up to date £13,451 18s. 9d.; total 16,672 1s. 8d.; leaving a deficiency on revenue, after paying expenses and providing for interest on bonds, &c., to date of £3,141 12s. 3d. The per centage of working expenses, as compared with the gross receipts, amounts to 71 against 75 per cent. for the corresponding half-year; and the per centage, less renewals, amounts to 65 against 73 per cent. for the same period. The revenue for the half-year ending 31st January, 1862, amounted to £50,021; this half-year it amounts to £47,359 11s. 11d.; decrease £2,166 8s. 1d. The aggregate expenditure for half-year ending 31st January, 1862, amounted to £37,775 1s. 3d.; this half-year it amounts to £33,129 2s. 6d.; decrease £3,945 18s.. 9d. In order to institute a comparison of the cost of maintenance for the past half-year, as compared with previous half-year years, the following figures are subjoined:—

Average Cost per Mile per Annum.

Jan. 1860	Jan. 1861.	Jan. 1862.	Jan. 1863.
£90 0 9	£82 4 0	£87 0 0	£80 0 0*

* Includes repair of iron.

The following table will show the revenue and expenses yearly, from 31st January, 1860, inclusive:—

Revenue:	Jan. 31, 1860.	Jan. 31, 1861.	Jan. 31, 1862.	Jan. 31. 1863.
Passengers	£11,092	£11,262	£12,342	£13,379
Freight	23,762	23,949	36,177	33,105
Mails	496	496	496	496
Expresses and parcels	225	581	550	587
Sundries	260	308	456	792
Total	35,836	36,597	50,021	47,360
Expenses:				
Maintenance	7,243	6,391	7,002	4,826
Locomotive exp.	5,880	6,168	9,244	7,129
Transport'n do..	4,794	5,048	7,035	7,518
General charges.	3,388	3,107	4,178	3,696
Working Niagara ferry	2,047	1,368	1,893	1,603
Sundries as per abstract	5,016	4,631	5,739	5,402
Total	27,755	27,296	36,051	30,822

The following table will further show the comparative results for the same period, in an abstract form:

	1860.	1861.	1862.	1863.
Revenue	£35,836	£36,597	£50,021	£47,360
Expenses	29,755	27,296	37,775	30,822
	£6,081	9,300	12,246	16,538
Aver. p. mile p. wk..	£8 11s.	£8 14s.	£12	£11 6s.
Aver. weekly traffic.	1,378	1,408	1,924	1,821
Clear av. w'kly profit	234	358	471	636
Per centage of exp. on gross receipts.	83	75	75	71

Locomotive exp:	Jan. 31. 1861.	Jan. 31. 1862.	Jan. 31. 1863.
Miles run	175,510	270,607	219,577
	dols.	dols.	dols.
Loco. & car exp'nses.	38,114.42	58,790.00	44,168.41
Cost per mile run...	10½d.	10½d.	10d.

The marked decrease on the gross expenditure for the past half-year, as compared with the previous half-year, arises chiefly on the maintenance and locomotive expenses, as will be seen on glancing over the above tables, and is the result of certain economical charges consequent in the first instance on the contract for maintenance having passed into the Company's hands on the 31st October last, and the reduced cost at which the road has since been maintained: and in the next place to the saving effected in the locomotive department by the reduction of mileage and wages paid to the mechanical staff, and the reduced cost of fuel.

The balance of wood on hand from last half-year was 11,164 cords, purchased during half-year 767 cords, total 11,931 cords, consumption 5,400 cords. The average cost per cord of the stock on hand amounts to $1.57. The cost per cord as charged to the mechanical department, including hauling, cutting, delivering and management amounts to 2.70, being lower than any rate heretofore charged; satisfactory arrangements have been made for maintaining the supply.

WORKS OF CONSTRUCTION.

Goderich Extension and Harbor.—The works on hand at the close of last half-year have, with the exception of the exterior of the North Pier been completed; the works at the North Pier will be now pushed forward as the material is on the ground.

Main Line.—The new car shop has been completed at a cost of $5,857 68th-100; it is built of brick, with a slate roof, and is 60 feet wide by 200 long in clear.

Extension of Sidings.—A total extension of 5,613 lineal feet of track has been made during the half-year by constructing and extending the sidings at Seaforth, Fort Erie, Mitchell, Richwood, Tavistock, and Brantford.

From the lateness of the season when these sidings were commenced, they have not yet been ballasted, but are in other respects complete. A new freight shed, having two floors, each 60 feet wide by 96 feet long, and having a capacity of 11,500 square feet, has been built at the Company's freight depot at Buffalo, and a small building has been erected at the Black Rock Ferry Works, for the use and shelter of employes on duty there in rough weather.

Maintenance of Way and Buildings.—During the months of August, September, and October the works of the road between Fort Erie and Goderich were kept in repair by the late maintenance contractor. During the months of November, December, and January, they have been carried out by the Company through the engineer department. The total length of roadway now under maintenance by the Company, inclusive of the Goderich Extension and the Buffalo Ferry and Extension Works, is 162 miles. The total extent of track in sidings is 9 36th-100 miles, in addition to the above. The roadway, buildings, bridges, docks and ferry works, are all reported to be in good working condition. Considerable repairs have been effected during the past three months on the side fences, and contracts are in hand for the delivery of a large amount of fence rails for reconstruction of snake or rail fencing.

Sleepers.—A supply of 59,000 are now under contract, a large portion of which are already delivered and distributed along the roadway to be used as soon as the frost leaves the ground.

Renewals of Iron.—Three hundred tons of worn iron was sent to the Buffalo rolling mills in December and January, and will be ready for use in March. 2,721 rails have been repaired and replaced in the track, on these there were 4,192 flanges and 9,201 feet of surface repaired. Although the iron on the Buffalo and Lake Huron Railway has worn remarkably well, it is desirable to procure a reserve supply of new iron, in order to facilitate repairs and renewals as they become necessary.

Goderich Harbor.—In addition to the 400 feet extension of pier-work now under contract and in hand at the North Pier, it is very desirable to extend the South Pier to the same extent, to prevent the entrance shoaling.

FINANCE.

During the half-year the Directors have paid off £21,800, and on February 22nd, £7,200 of the £35,000 chattel mortgage bonds outstanding on the 31st July last, leaving £6,000 only unredeemed. The Directors have deemed it expedient to apply to Parliament during the present Session for powers to enlarge the capital of the Company, of which they might avail themselves should the necessity arise.

The result of the half-years working has been prejudicially affected (as will be seen by reference to the general manager's report), by causes which have influenced the position and prospects of this railway in common with others. The termination of the American troubles, and an improved value of the currency, would enable the commercial community of the district to again avail themselves of the option of markets, of which they are now practically deprived; while the through traffic to Lake Ontario is capable of a large increase, provided the traffic arrangements now made with the Great Western are fully carried out. The return of trade to its accustomed channels on the American Continent would also no doubt operate to the advantage of this Company, and assist in realising the expectations of increasing traffic.

The capital account shows that £1,477,050 had been received, and £1,441,818 expended, leaving a balance of £35,232.

Directors.—President—Philip Rawson, Esq., Liverpool; Vice-President—Robert S. Carter, Esq., Brantford, C. W. English Board—Charles Langton, Esq., Liverpool; Charles Holland, Esq., Liverpool; Maxwell Hyslop, Esq; Liverpool; Alexander MacEwen, Esq., Glosgow. Canadian Board—Allen Cleghorn, Esq., Brantford C. W.; A. Digby, Esq., M.D., Brantford, C. W. General Manager—Robert S. Carter, Brantford.

The Pacific Railroad.

NEW YORK, APRIL 15, 1863.

Gentlemen:—Understanding that you take an interest in the proposed Pacific Railroad, I proffer you the results of some personal observations thereon. I traveled leisurely across the continent in 1859, making inquiries and observations with regard to the feasibility and the importance of this great enterprise. I first traversed the State of Kansas, then struck west to Denver and the just-discovered gold region of the Rocky Mountains; thence skirted the eastern base of those mountains for two hundred miles to reach the Overland Mail Route at Fort Laramie, on the North Platte; then followed up that stream and its northern affluent, the Sweetwater, through the South Pass to the west side of those mountains; thence followed the usual emigrant trail across Green River to Fort Bridger and Salt Lake; thence proceeded by Camp Floyd and the now shortened or Simpson Route for some three hundred miles; then bore up northward and struck the old emigrant trail down the Humboldt at Gravelly Ford, following the Humboldt to its sink; thence crossed the forty miles of barren sand that lies between that sink and that of the Carson; thence up the Carson by Virginia City and Genoa to the foot of the Sierra Nevada; thence across, by the most traveled route, to Placerville, California, and so to Sacramento City and San Francisco. I traveled very extensively in California, mainly through its central region, so that not many who lived years there have seen more of the Golden State than I have. Here is a summary of what I have to say of the Pacific Railroad:

From the Missouri at the mouth of the Kansas to the base of the Rocky Mountains is some 600 miles in a straight line. I presume the railroad will not strike those mountains in much less than 700 miles. Thus far, I believe a railroad can be graded, bridged and timbered as cheaply as almost anywhere on earth. The streams to be crossed are few and small; the ground rolls gently and moderately; water is abundant, and timber easily procurable from the intervales or bottoms of the streams for a good part of the distance, and from the Rocky Mountains (by floating it down the Platte) for the residue. The valley of the Platte lies high, so that few streams enter that river, especially from the south. And I am confident that, if a railroad were built from the Missouri to the Rocky Mountains, and there stopped, it would be well sustained by the local business alone. It is the cost of transporting provisions, machinery, implements, &c., that now cripples and restricts the working of the gold mines in those mountains; the cost of gold—that is, the cost of whatever must be consumed in obtaining gold—governing the production of this article, like every other. Were a railroad this day running to the Rocky Mountains, their product of gold would be quadrupled annually for many years ensuing. And every pound of gold produced would give

at least a ton of freight to this railroad. Were but one million persons engaged in successful mining in those mountains, a double track railroad would find profitable employment in carrying passengers thither and back, and in supplying the omnivorous wants of the miners.

The passage of the Rocky Mountains presents no serious difficulties. By the route I traveled, the aggregate of excavation, embankment and bridging, need not exceed that on the Massachusetts Western, or the eastern half of the Erie Railroad. The thirty or forty miles directly through the South Pass may be graded and bridged far more easily and cheaply than the Delaware section of the Erie road. But I believe a more direct and shorter route will be chosen—probably that known as "The Cherokee Trail," up the Cache-le-Poudre River, or that farther north, by what is known as "The Cheyenne Pass." Neither, as I am advised, present any formidable obstacles.

The hardest part of the road to grade and bridge lies between Green River—say 50 to 100 miles west of the western base of the Rocky Mountains—and Salt Lake, over or around the Uintah Mountains. The elevation above the sea-level here reaches from 5,000 to 8,000 feet—that of Salt Lake (the lowest point) being 4,900. Timber may be floated down from the Rocky Mountains so far as Green River; beyond that, for some 200 to 300 miles, the supply is scarce and capricious, while the rivers or canons are frequent and steep-banked. Green River, where I crossed it, lies in a deep valley, perhaps two or three miles wide; but I am assured it narrows to a mere chasm as you descend the stream, so that a bridge may be thrown over it, without difficulty, at a dozen different points near where I think it should be crossed, or on a due line from Denver to Salt Lake. I should deem it of paramount importance to avoid a descent nearly to the surface of this mountain-fed stream, as its spring freshets must naturally be heavy, and the cost of traction in the re-ascent to the general level of the country quite considerable. It may be advisable to turn the Uintah range by following down Bear or Weber River to the north shore of Salt Lake; but I think the valley of that lake should be approached by way of the Timpanagos and Lake Utah, and that the railroad should pass southward of Salt Lake—probably near Camp Floyd.

From Camp Floyd to the Humboldt, the general valley level is broken by numerous mountains, generally of moderate elevation, but having an average southwest and northeast direction, that will require careful surveys to ascertain the most practicable route, and may render considerable detours expedient. The timber here is mainly a Bunch Cedar (red) on the mountains; rather small for ties, but which will answer. There is also considerable "Mountain Pine," so called, but I know little of it, and am not favorably impressed with its qualities. In a few deep canons there is a very excellent pine of a different species—"Indian Pine," it is called—which is good for almost any purpose. I only observed it in a very few places, and cannot say that it is abundant.

The valley of the Humboldt is some 2,000 feet (I judge) lower than much of the country east and south of it, and much care will probably be required in selecting the place of descent into that valley. It may be, however, that a route may be followed that avoids the Humboldt altogether, like the trail known as Simpson's, keeping considerably south of the river, and so shortening the road materially. Simpson's route is a good hundred miles shorter from Salt Lake to Carson Valley than any can be that includes the whole or a portion of the valley of the Humboldt; but that valley presents no engineering difficulties, and may be traversed by a railroad as easily as New Jersey, or Southern New York. There is very little timber on the Humboldt; but I believe a supply may be obtained in the Goose-creek Mountains at its head, and readily floated down and taken out as required. The Humboldt, though 350 miles long, is but a decent mill stream, save in spring, and has just about the same amount of water from near its head to the lake into which it falls, whence a swollen stream slowly glides away, to be lost in the "sink" aforesaid.

From the Humboldt to the Carson (40 miles) is a mere desert or sand plain, as easily traversed by a railroad as Long Island.

Up the Carson (80 miles) the grading will be easy; and abundance of excellent timber may easily be floated down from the Sierra Nevada.

There is no difficulty as to water anywhere. In Western Utah, it is sometimes deficient on the surface; but, as in all mountainous regions, wells sunk in the valleys anywhere yield an ample supply of the fluid at moderate depths. Artesian wells are always practicable in such countries, if the trouble of raising water to the surface by pumps be objected to.

Coal has recently been found at two or three places in Utah, near Salt Lake; as also in Colorado, near Denver. It will doubtless be found in many of the valleys of the entire region traversed by this road.

As to minerals, gold is now found on both sides of the Rocky Mountains, as also in their ravines, for at least a hundred miles north and south of any possible route of the Pacific road, and every month is signalized by new discoveries. I am confident that much of Utah is gold-bearing, as Colorado, not only along the eastern base of the Sierra, but for a considerable distance up the Humboldt, is already proved to be. When I passed down the Humboldt, less than four years ago, no one dreamed of prospecting its desolate bluffs; now, many excellent lodes have been found therein, and the search has but begun. "Ruby Valley," half way between Salt Lake and the Carson, is doubtless so named because of precious stones casually picked up therein; and the hill I climbed, on the north side of the South Pass, like many others I noted in the Rocky Mountains, abounded in fragments of quartz, which is the usual if not uniform matrix of the precious metals.

The soil of the valleys of Colorado, Utah, and Nevada (which this road traverses) is generally good—often excellent. It is too commonly sterile for lack of summer rains, but yields abundantly the earlier fruits and vegetables of the temperate zone, when duly moistened by irrigation. Salt Lake City is located on a swale or gentle slope which was a desert until irrigated; it now grows trees luxuriantly, is filled with bounteous gardens and fruit orchards, while the wheat of the valley is marvelously prolific. A little stream running down between two mountains, by whose springs it is fed, may be easily trained to irrigate and render fruitful a large section of the valley at their foot. Carson Valley will yet be irrigated by dams thrown across the river, and will then have the most thrifty agriculture and horticulture of any valley on the globe. The meat and much of the bread required by the rapidly increasing population of the present territories will mainly be carried up to them from the fertile valleys of the Mississippi and Missouri; but their vegetables, and fodder and fruits will, in time, be grown on their own soil, as they easily may be.

Finally: I believe the appropriations so generously made by Congress for the construction of the Pacific Railroad will nearly or quite defray the necessary cost of its construction; and I am confident that its business and receipts will pay a fair interest on its total cost from the outset, and be doubled every seven years of the twenty-one following its completion. The Pacific Railroad is, therefore, not only the grandest and noblest enterprise of our age, but is morally certain to prove the most beneficent and the most remunerative.

Yours,
HORACE GREELEY,
154 Nassau street.

MESSRS. HALLETT & Co.,
58 Beaver street, New York City.

FOR SALE.

1,250 TONS 64 lbs. AMERICAN RAIL, best quality. Apply to GEO. T. M. DAVIS,
May 13, 1863. 4t20 47 Exchange Place.

PACIFIC RAILWAY.

THE undersigned will receive proposals to furnish four thousand (4,000) tons of railway iron (or any part thereof) for the track of the first section of the Union Pacific Railway, Eastern Division. The iron to be of American manufacture, of the best quality, and to be delivered either at Leavenworth or Kansas City. Communications for further information to be addressed to the undersigned or to SAMUEL HALLETT & Co., 58 Beaver st., New York. Terms, cash on delivery.

J. C. FREMONT,
Pres't Union Pacific Railway, E. D.
NEW YORK, June 9, 1863.

2 Second Hand LOCOMOTIVES.
10 GRAVEL CARS..... $165

ONE ENGINE, 18 tons; Cylinder, 14×20; 5½ ft. wheels with crank. Price..... $6,000.
One Engine, 20 tons; Cylinder, 15×20; 5 ft. wheels; fitted for coal or wood. Just put in good order, with new Boiler. Price..... $7,000.
For sale by

WILLIAMS & PAGE,
3m21 67 Water st., BOSTON.

NEW YORK, HARLEM & ALBANY R. R.

CHANGE OF TIME.

SUMMER ARRANGEMENT, commencing MONDAY, May 18, 1863, Trains will leave Twenty-sixth street Depot:

For Albany—10.30 A. M., stopping at Williamsbridge, White Plains, Bedford, Croton Falls, and all stations north to Chatham, Chatham Centre, Kinderhook, and Schodack, connecting with New York Central R. R. for all points west, and with the Northern R. R. for Saratoga and all points north.

For Croton Falls—8.15 A. M., stopping at all stations.

For White Plains—8.15, 10 A. M., 2.30, 4.10, 5 P. M., stopping at all stations.

For White Plains, 6.15 P. M., from White Street Depot.

For Dover Plains—4 P. M., stopping at White Plains and stations north to Dover.

For Williamsbridge—8.15, 10 A. M. 2.30, 4.10, 5, 6.15 and 8.30 P. M., stopping at all stations.

RETURNING WILL LEAVE

Albany—9.10 A. M. on arrival of Northern and Western Trains, stopping at all stations from Chatham to Croton Falls, also Bedford, at White Plains, and Williamsbridge.

Dover Plains—5.45 A. M., stopping at all stations north of and at White Plains.

Croton Falls—5 P. M., stopping at all stations.

White Plains—6.10, 7, 8.20 A. M., and 12.30, 4.15 P. M., stopping at all stations.

Williamsbridge—5.30 A. M. stopping at all stations.

JOHN BURCHILL, Superintendent.

SUBSTITUTE FOR

CAR DUCK.

Kingman's Car Covering.

THIS is a kind of Elastic Mastic, a thick coating of which is applied to the top of the Car, and into it a heavy Burlap or Barging is imbedded and thoroughly painted, thus making a covering VERY MUCH LIKE CAR DUCK, but at this time at half the cost. It is now successfully used by several New England Roads and Car builders. Directions and particulars sent when requested. This Mastic and Burlaps for sale by

WILLIAMS & PAGE,
67 Water street,
March, 1863. Boston.

FINK'S PATENT IRON RAILROAD BRIDGE.

THE undersigned is prepared to manufacture and build in any part of the United States and Canada, at reasonable terms, FINK'S PATENT IRON BRIDGE in spans from 20 to 300 feet. The same is favorably known, well tested and already extensively introduced, is stronger and more economical than any other Bridge now in use, requires no repairs, and no adjustment, but is perfectly adjustable. For plans and particulars apply to

SMITH'S
Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of SMITH'S AIR LIGHT FOR RAILROADS, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT, we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD,
GENERAL SUPERINTENDENT'S OFFICE,
ALBANY, November 15, 1862.

TO THE MANAGERS OF RAILROADS:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever been produced, and commend it to the consideration of railroad managers.

Very respectfully, etc.,
C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
WEST ALBANY, January 23, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—Below please find the cost of locomotive lamps burning oil on this division.

Supposing oil cost $1 57 per gallon.
Cost per hour, 5 cents.
Cost of wicks, chimneys, per year, $4 80.
Estimate cost of leakage, gumming and overflow, one-fourth of the consumption.

In the year 1861, when the lamps were all oil burners, the cost of repairs were $10 20 per year.

You will please add the overflow to the actual cost per hour, which would make 6.25 per hour.

Your most ob't servant,
EDWARD H. JONES,
Master Mechanic, Eastern Division.

300 days, 5 hours each day, 1,500 hours, 6¼c. per hour	$93 75
Repairs of lamps for one year	10 20
Wicks and chimneys	4 80
	$108 75

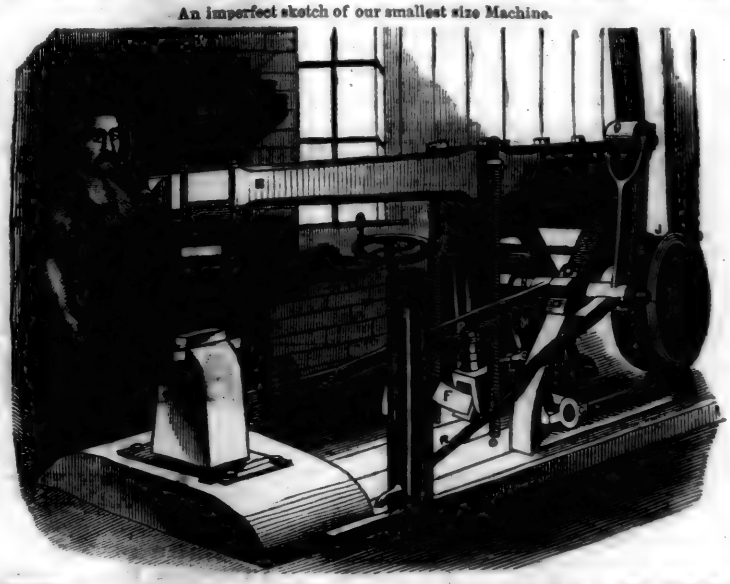
NEW YORK CENTRAL RAILROAD,
MASTER MECHANIC'S OFFICE,
ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on our first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, $2½ per thousand, makes the cost of light for each engine 1¼ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,
DAVID UPTON,
Master Mechanic, Western Division.



300 days, 5 hours each day, 1,500 hours, 1¼c. per hour	$18 75
One-sixth waste of gas	3 12
Repairs of lamps for one year	5 00
	$26 87

Further information may be obtained at the office of the Company, 21 Nassau st., or by addressing

CHAS. W. WELSH,
Secretary.

AMES IRON WORKS,
OSWEGO, N. Y.,
SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.

An imperfect sketch of our smallest size Machine.

PAYE'S PATENT FORGE HAMMER, A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one inch to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an engraving and description of this hammer, see page 1, Vol. V (new series) of the SCIENTIFIC AMERICAN; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 423, New York, or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Crampton, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox, Kaigh's Point, Phila.; Mallory & Cottrell, Mystic, Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quincy & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Guinness, Albany; Sweet Brothers, Syracuse.

FOX LATHES.

F. W. BACON & CO.,

No. 23 PLATT, corner of GOLD ST.,

NEW YORK,

RESPECTFULLY ask attention to their stock of Machinists' and Brassfinishers' tools from the establishment of Messrs. Geo. H. Fox & Co., of Boston.

Nason's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rival or substitute for the manufacture of Cocks, Valves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciated by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run SIX MONTHS WITHOUT REOILING, thereby saving labor, friction, oil, and the disagreeable and sometimes destructive effects of the dripping of oil from above.

ELEVATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unerring; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downward is beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Tuft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless screw—two or more ropes are used instead of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Belting, Belt Lacing, and Picket's Patent Belt Fastenings kept on hand and furnished to order. Steam and Water Gauges, Gauge Cocks, Packard's Patent Ratchet Drills.

ALL DESCRIPTIONS OF MILL WORK MADE TO ORDER.

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on by an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the erection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past ten years with uniform success, they confidently offer their services to those requiring such aid.

DELAFIELD & BAXTER'S,

Late OGDEN & DELAFIELD,

ROSENDALE CEMENT.

WE are prepared to enter into arrangements for supplying our CEMENT for public works, or other purposes. We **warrant it equal in every respect** to any manufactured in this country. It attains a great degree of hardness, sets immediately under water, and is a **superior article** for masonry coming in contact with water, or requiring great strength.

For sale in tight barrels, well papered, on application at their office, by **DELAFIELD & BAXTER, 104** Wall st.

The above CEMENT is used in most of the fortifications building by government. 45

AN INVALUABLE POCKET GUIDE

FOR THE ENGINEER AND MECHANIC!

THE

Mechanic's & Machinist's

PRACTICAL

BOOK OF REFERENCE

Containing Tables and Formulæ for use in Superficial and Solid Mensuration; Strength and Weight of Materials, Mechanics, Machinery, Hydraulics, Hydrodynamics, Marine Engines, Chemistry, and Miscellaneous Recipes. Adapted to, and for the use of all classes of Practical Mechanics. Together with the

Engineer's Field Book

Containing formulæ for the various methods of Running and Changing Lines, Locating Side Tracks and Switches, etc. Table of Radii and their Logarithms. Natural and Logarithmic Versed Sines and External Secants, Natural Sines and Tangents to every Degree and Minute of the Quadrant, and Logarithms of Natural Numbers, from 1 to 1,000.

BY CHARLES HASLETT,

Civil Engineer.

EDITED BY CHARLES W. HACKLEY,

Professor of Mathematics in Columbia College, in New York.

Issued in a compact pocket volume of 520 pages, containing 176 diagrams, bound in morocco, pocket-book form, PRICE TWO DOLLARS. *Copies mailed free of postage on receipt of price.*

The work is eminently a PRACTICAL **POCKET GUIDE** to ALL CLASSES OF **Mechanics** and **Engineers.** As a book for practical use in field work, it is confidently believed that this is more direct in the application of rules and facility of calculation than any work now in use. The original portion of this part of the work is submitted to the profession, fully confident that its use will be practical proof of its superior merits.

The tables and examples have been prepared with great care, and their accuracy may be relied upon. Further information can be derived from the circular containing the contents in full, which will be sent on application to the publisher. Inducements are offered to clubs of six or twelve, for particulars of which also apply to publisher,

Construction of Railways.

It is the opinion of many intelligent and experienced persons, long familiar with railways, that we are yet to witness great improvements in their construction. For example, it is well known that the rails themselves are yet laid down in such a manner, that they are full of depressions from a perfectly level line, so that a train is constantly ascending and descending elevators as it passes from one tie to another, owing to the nature of the soil beneath, or the inequality of the bearing surface of the ties themselves. So too the dust which infests the passenger cars, and gets into the machinery wearing it out and causing the necessity of large waste of oil in removing friction in the parts in motion, flies up from the ends of the ties in consequence of the weight of the trains pressing upon these ends and forcing it out in puffs.

The attention of a self made and practical engineer, who has for five years been engaged on the Western Railroad, has been mainly directed to this subject, and that gentleman, Mr. Anthony resident at Greenbush opposite Albany, has recently called on us and explained his plans for remedying the difficulties complained of, exhibiting neat and careful drawings made by himself illustrating his proposed improvements. They appear to be equal to the emergency, and we take pleasure, without his knowledge of the fact, to allude to them briefly in our columns.

His first idea is to make his ties all of equal size and bearing. Next, instead of stretching a single tie across and under the track, to cut them in two equal parts, so that the pressure of each rail may be in the centre of the tie. Next, to lay a longitudinal sill in pieces of about the same size and bearing, in the centre of the track to which iron connecting rods are braced, to hold the rails firmly in their position. Then to attach to each chain a wedge with an india rubber covering, which in case of the sinking of a tie, may be driven in without disturbing it, so that a perfect level may always be kept in the rail by a few blows of a hammer. He also proposes to alter the neck of the rail or that part which supports the running surface by decreasing its width, and reducing its weight without diminishing its strength. He believes that by these changes he can secure a perfect level in the track, and prevent the ties from yielding at their extremities, and throwing up the dust when a train passes over them. We confess we were pleased with the simplicity and apparent adequateness of his plans to overcome these difficulties. Mr. Anthony proposes to publish a pamphlet with plates to convey a full idea of these improvements, and to bring them before the public in an intelligible shape.

No subject has received more attention from Railway Engineers than that of procuring the most perfect bearing underneath the rails. The mode originally adopted, was that of placing stone blocks about two feet in the side and one foot in depth, on which a cast iron chair was scarcely fastened and on this the rail was placed. This was the manner in which the Albany and Schenectedy railway was constructed. But experience showed that the immobility of the blocks and the rigidity of their resistance reacted on the cars and the machinery of the locomotives, and rapidly loosened and destroyed them. Wooden transverse sleepers were then adopted, and have been generally used. Latterly sleepers of cast iron have been tried abroad on a large scale, but we have not learned with what ultimate success. The brittleness of the material would seem to be a great objection. The plan of wooden ties now universally adopted in this country is liable to the objection taken by Mr. Anthony, since the rail gradually works into vertical curves, becomes elongated and uneven, and presents a continual resistance to the passage of the trains; a resistance as formidable in their sum total, as a heavy continuous grade. If Mr. Anthony then can overcome this by his change in the form and length of his ties, their uniform bearing surface, their receiving the weight of the trains in the centre of that surface instead of the ends, and preserving a perfect level in the rails themselves, he will have achieved a very great success, which will be felt in the working of our railways, and economise the repairs of the track and machinery to a very sensible extent. We repeat therefore our wish that he may be able to bring his improvements to the notice of railway managers, and that they may have a fair trial. As a number of new Companies are about to commence operations, would it not be well for these to give their attention early to this subject.

We had nearly forgotten to state that Mr. Anthony's plan is admirably adapted to the reconstruction of old roads, as the ties though worn out in their use, may be relaid in the manner proposed.

Stock Dividends Regarded as Income.

The Commissioner of Internal Revenue has decided that where a corporation makes a "stock dividend," if it be an actual or substantial capitalization of profits realized, the amount of stock apportioned to each stockholder is to be returned to him as income. If the issue of new stock be wholly or chiefly speculative, the amount received by each stockholder is returnable as income at the market value on the day of issue.

Also, that where the owners of a manufactory, or the directors or stockholders of a manufacturing or other corporation, have not divided profits realized, but have added them to contingent fund and expended them in improving old or erecting new buildings, or otherwise enlarging their property, they will be required to return their proportion of profits as income—such use of profits being equivalent to using them for purposes of capital without the ordinary course of declaring dividends and adding to capital stock. Undistributed earnings, when applied to contingent fund in ordinary course of business, and to an or-

dinary percentage are not returnable by stockholders as income.

Philadelphia and Reading Railroad.

The gross receipts of this company from the transportation of passenger, freight, coal, etc., for the fiscal year ending November 30, 1862, were:

From 396,466, equal to 150,970 through passengers		$403,563 77
From 451,732.9 tons merchandize		523,416 16
" freight on 2,810,990 tons coal		2,879,419 55
" U. S. mail		19,618 00
" miscellaneous		85,812 74
		$3,911,830 22
Working expenses, viz:		
Fuel— 6,338 cords wood	$26,258 24	
44,754 tons coal	109,646 25	
Oil — 43,598 galls., waste etc	45,631 97

Balance of dividend fund, 1862		$811,985 64
Add balance dividend fund, 1861		178,970 57
Total reserved fund		$990,956 21

The increase in passenger travel has been equal to 10,519 through passengers. The increase in receipts therefrom is $64,659 08. The number of tons of merchandize transported is 126,775 more than in 1861; and the increase in receipts therefrom, $117,094 94. The coal tonnage shows an increase of 671,455 tons, with an increase in receipts of $768,376 16. The total increase in gross earnings over those of the preceding year was $1,005,991 49; and in the net profits, $751,541 78.

The amount to credit of reserved fund, Nov. 30, 1861, was $780,742 40; from which has been deducted: sundry drawbacks on traffic for that year $18,451 58; credit due to sinking funds, $27,373 31; difference between the par and estimated value of stocks and bonds held by the company, and debts considered doubtful, $555,-946 94—leaving the balance, as above, $178,970 57. The total reserved fund now stands at $990,-956 21.

After deducting all expenses, including renewal fund, and interest on the bonds, the net profits are $1,353,393 81—which is equal to 11.72 per cent. on all the outstanding stock, common and preferred. A dividend of 7 per cent. in cash on the preferred stock was declared and paid on the 15th of January. The scrip issued for the arrears of dividends due on this stock, amounting with interest, to $450,642 72, fell due on the 31st of December. Of this, $358,702 08 were purchased during the year, and the remainder, $91,940 64, was paid at maturity. Bonds of the company to the amount of $373,500 have been purchased during the year for the sinking funds. The sum of $284,323 35 was expended in the purchase of new cars and engines; and $347,990 in the construction of the Mahanoy and Broad Mountain Railroad, for which the bonds and stock of that company are held. The charges to construction or capital account during the year has been $401,-774 59. A dividend of 7 per cent. in stock was declared payable to the common stockholders on the 16th of February.

The equipment of the road consists of 143 locomotives, of which 120 are first class, 16 second class, 4 third class and 3 fourth class; 47 passenger, 12 baggage, and 8 mail and express cars, all 8-wheel; 3 iron and 1,437 wooden 8-wheel coal cars, 2,939 iron and 1,794 wooden 4-wheel coal cars—making a total of 7,613. Of the 1,127 cars for freight, etc., 546 are 8-wheel and 571, 4-wheel.

In addition to the above, the company own 5 small passenger cars, 12 stationary engines, 13 steam and water power engines, 8 snow plows, 1 dredging machine, 23 carts, wagons, drays, etc., and 60 horses for hauling in Philadelphia, Richmond and elsewhere.

The rolling stock has been increased during the year, by the addition of coal cars equal to 1,165 4-wheel cars; freight cars equal to 115 4-wheel cars; passenger cars by 2 8-wheel cars. Nine locomotives, 58 coal cars, 37 freight cars, and 3 passenger cars have been rebuilt during the year —the whole cost of which has been charged to transportation expenses. The expenses of this department have increased $105,262 12 beyond that of 1861. Of this increase, the sum of $73,-264 50 represents the additional cost of furnishing motive power on and working six lateral railroads in the Schuylkill coal region, the expenses of which have been charged to this department from the following dates:

Schuylkill Valley	September	1, 1862.
Mill Creek	"	"
Swatara	April	1, 1862.
Mount Carbon	May	16, "
Mahanoy and Broad Mountain	July	1, "
Union Canal Railroad	"	25, "

The increased business in coal, merchandize and passengers will fully account for the balance of excess of expenses for 1862.

A further reduction has been effected in the *cost* of carrying coal, which, with the large average load hauled, proves extraordinary efficiency in the locomotive department—the heavy business of the year having been done, and additional power supplied to four of the lateral roads above named, with a force of engines less than that of the previous year. The general merchandize of the road has also been moved at a lower cost than ever before, and the through passengers at less than for twelve years previously. The gross tonnage, 8,260,953 tons (exclusive of weight of engines and cars,) is the heaviest ever carried over the road, each item—coal, merchandize and passengers—being in excess of any previous year. The Superintendent, in his report says:

The great freshet of June 4th, which left the road almost uninjured, was followed by an immediate and heavy demand for our rolling stock.

In such an efficient condition was this found, that our coal trade, which, previous to that date, had been about 42,000 tons per week, increased to 71,579 tons, and has since that time averaged about 57,000 tons per week.

The trade of the Schuylkill Valley and its tributaries has been largely developed, during the past year, by the starting of several furnaces, and the activity of iron and other branches of manufacture. Of pig iron 60,879 tons, manufactured iron 25,139 tons, iron ore 90,964 tons, lumber 28,-967 tons, grain 38,331 tons, and of flour 24,949 tons have been transported in 1862, each largely in excess of any former year.

A large portion of this increased trade has been derived from the Lebanon Valley Branch Railroad, which continues to yield very satisfactory results. Its gross tonnage for the year was 593,-717 tons, and the whole number of passengers carried 194,340. Its income, exclusively off its own line, was $570,204 90, and expenses $169,661 16, leaving a net revenue of $400,543 74; to which may be added the receipts on the Reading Railroad off that portion of the business passed over the latter, $326,392 36.

During the five days following the June freshet, which damaged the Swatara bridge on the Pennsylvania Railroad, the through passenger and freight business of that company were passed, at their request, between Harrisburg and Philadelphia, over the Lebanon Valley and main roads.

The business of the Lebanon Valley Railroad (in one month 63,466 tons) has approached the capacity of a single track railroad consistent with safety and regularity.

The double track about being completed between Harrisburg and Hummelstown, and that contemplated between Myerstown and Lebanon, will materially facilitate its operations.

It is satisfactory to state that from the time locomotives first commenced running on this branch, in January, 1857, no trains moving in opposite directions have ever come in collision.

The extra passenger train between Port Clinton and Reading was discontinued on November 29th, 1862, the Catawissa night train, with which it connected, having been then taken off.

The number of miles run by engines over the main line in transportation department the past year was 1,479,421; in roadway department, 47,-056; in renewal, etc., department, 14,284—total Reading Railroad, 1,540,761; total Lebanon Valley Railroad, 314,645; total Chester Valley Rail-

road, 33,725; on lateral roads in coal region, 199,035—total, 2,088,166. Miles run in 1861, 1,695,927—increase, 392,239.

The total tonnage for the year, on main and branch roads, including weight of passengers, in tons of 2,000 lbs., was 3,260,953. The total number of tons hauled one mile, including cars, but exclusive of engine and tender, was 559,944,544. The average weight of loaded coal trains down was 787.2; do., empty coal trains up, 275.4; do., passenger trains, 59.4.

The total number of miles run by all engines, owned and used by the company, from May, 1838, to November 30, 1862, was 28,547,670. Total number of tons hauled one mile between same dates, 6,898,358,553. The total amount of coal transported from commencement to date of the report was 29,694,421 tons. The total tonnage of the road was 40,258,152.

The total number of passengers carried during the year was 396,466; number of miles traveled by same, 13,889,489—equal to 150,970 through passengers carried over the whole road. The total number of passengers carried to date of the report, including Philadelphia Branch road, 4,842,732.

The Philadelphia Branch road, between Philadelphia and Schuylkill Viaduct, is three miles long. The tonnage was 6,079; number of passengers, 19,891; total receipts, $3,423 14.

The last yearly statement of the roadway department of the service, included the repairs of the Mill Creek and Schuylkill Valley Railroads for four months; the present cover one year's expenses on those roads, and also six months on the Mount Carbon and the Swatara, and four months on the Union Railroad. It also includes an expenditure of $9,329 72, chiefly on the laterals, in repairing the damage done by the freshet in June last. Notwithstanding these extraordinary expenses, and the increase in tonnage over the previous year, the total roadway expenses only exceed those of 1861 by $10,460 77, and the cost of renewals of rails is less by $23,336 25, than it was in the previous year. The extent of railway in the charge of this department, November 30th, 1862, exclusive of the Schuylkill and Susquehanna and the Lorberry, which are not included in the accounts, is as follows:

	Miles of Main Track and Branches.	Miles of Sidings.	Total Miles.
Philadelphia and Reading	198.00	59.09	257.09
Willow street	3.50	0.54	4.04
Mt. Carbon & Pt. Carbon	5.00	6.85	11.85
Mt. Carbon (6 months)	7.83	2.00	9.83
Lebanon Valley Branch	70.98	8.19	79.17
Chester Valley Branch	21.50	1.80	23.30
Schuylkill Valley Branch	25.23	1.05	26.28
Mill Creek Branch	13.78	1.52	15.30
Union Branch (4 months)	3.50	0.41	3.91
